SUMMARY: The United States Department of Agriculture (USDA) is publishing final regulations to implement the salary offset provisions of the Debt Collection Act of 1982 (Pub. L. 97–365, enacted on October 25, 1982). Notice of proposed rulemaking was published in the Federal Register on September 25, 1985 (50 FR 38821).

Based upon the comments received on the proposed regulations, USDA is clarifying three examples contained in the definition of "Debt".

EFFECTIVE DATE: These regulations are effective April 16, 1986.

FOR FURTHER INFORMATION CONTACT: Frank Padalino, Office of Personnel, U.S. Department of Agriculture, Room 307–W, Washington, DC 20250, (202) 447–6905.

SUPPLEMENTARY INFORMATION: On September 25, 1985, the USDA published proposed rules for offsetting the Federal pay of employees indebted to the U.S. Government. The supplementary information contained in the notice of proposed rulemaking set forth the basis and purpose of the proposed rule. The USDA is adopting the proposed rule as a final rule with only minor technical changes. A summary of the comments received follows:

Section 3.52(b)(2)—Comment:

Add the phrase, "resulting from his or her negligent, willful, or unauthorized acts," after the word "losses". This comment suggests that debt should be defined broadly. The suggested language has been included in the final regulation. However, the word "illegal" has been added to broaden the description of acts, and the phrase has been added after the word "liable" for clarity.

Section 3.52(b)(2)(iv)—Comment:

The definition should be expanded to include "using" in addition to "authorizing the use of" Government owned or leased equipment, facilities, supplies, and services for other than official or approved purposes. This comment appropriately notes an oversight in the proposed regulation. The suggested change has been adopted in the final regulation.

Section 3.52(b)(2)(v)—Comment:

The definition should be changed to, "Lost, stolen, damaged, or destroyed Government property." The existing example implies that employee debt resulting from damage to Government property is limited to damage to Government vehicles. This comment calls attention to the restrictive language in paragraph (v). To broaden the focus of this paragraph, the suggested change has been adopted in the final regulation.

In addition, one comment from a USDA agency addressed internal procedures as they apply to the conduct of a hearing. This will be dealt with in USDA's internal procedures.

Finally, one commentor suggested the proposed rule be adopted as written.

The proposed rule provided that it would not apply to any case where collection of a debt by salary offset is explicitly provided for by another statute. As the Comptroller General has noted in 64 Comp. Gen. 142 (1984), such statutes include 5 U.S.C. 5512(a) (setoff against accountable officers), 5 U.S.C. 5513 (setoff to recoup disallowed payments), 5 U.S.C. 5522(a)(1) (setoff to recoup advance payments for evacuations), 5 U.S.C. 5705 (1) and (2) (setoff to recoup travel advances), and 5 U.S.C. 5724(f) (setoff to recoup travel and transportation advances in connection with permanent changes of station). The final rule adopts this provision. Thus, the rule does not apply to setoffs occurring under these and other similar authorities.

Regulatory Impact

USDA has reviewed this final rule in accordance with Executive Order No. 12291 and has determined that it is not a major rule. The Secretary has determined that this action will not have a significant effect on the economy and will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprise in domestic or export markets. It is anticipated that the final rule will enable USDA to increase collections by approximately $5 million, representing money that is already owed and overdue. It will have an impact on only a small percentage of Federal employees; those who are delinquent in repaying their debts to the Department of Agriculture.

Under the circumstances explained above, the Secretary has determined that this action will not have a significant impact on a substantial number of small entities. This rule sets procedures for salary offset and does not affect the environment.

List of Subjects in 7 CFR Part 3

Salary offset, Claims, Debt management.

Accordingly, USDA adds a new Subpart C to Part 3 of Title 7 of the Code of Federal Regulations to read as follows:

Subpart C—Salary Offset

Authority: 5 U.S.C. 5514; 5 CFR Part 550, Subpart K.

Subpart C—Salary Offset

§ 3.51 Scope.

(a) The provisions of this subpart set forth the Department's procedures for the collection of a Federal employee's pay by salary offset to satisfy certain valid and past due debts owed the government.

(b) These regulations apply to:

(1) Current employees of the Department and other agencies who owe debts to the Department; and

(2) Current employees of the Department who owe debts to other agencies.

(c) These regulations do not apply to debts or claims arising under the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.); the Social Security Act (42 U.S.C. 301 et seq.); the tariff laws of the United States; or to any case where collection of a debt by salary offset is explicitly provided for or prohibited by another statute.

(d) These regulations identify the types of salary offset available to the Department, as well as certain rights provided to the employee, which include a written notice before deductions begin, the opportunity to petition for a hearing and to receive a written decision if a hearing is granted. These employee rights do not apply to any adjustment to pay arising out of an employee's election of coverage or a change in coverage under a Federal benefits program requiring periodic deductions from pay, if the amount to be recovered was accumulated over four pay periods or less.

(e) These regulations do not preclude an employee from:

(1) Requesting waiver of a salary overpayment under 5 U.S.C. 5584, 10 U.S.C. 2774, or 32 U.S.C. 716;

(2) Requesting waiver of any other type of debt, if waiver is available by statute; or

(3) Questioning the amount or validity of a debt by submitting a subsequent claim to the General Accounting Office.

(f) Nothing in these regulations precludes the compromise, suspension or termination of collection actions where appropriate under the Department's regulations contained elsewhere.

§ 3.52 Definitions.

(a) "Agency" means:

(1) An Executive Agency as defined by section 105 of title 5 U.S.C., the U.S. Postal Service, the U.S. Postal Rate Commission; and

(2) A Military Department as defined by section 102 of title 5, U.S.C.

(b) "Debt" means:

(1) An amount owed to the United States from sources which include, but are not limited to, insured or guaranteed loans, fees, leases, rents, royalties, services, sales of real or personal property, overpayments, penalties, damages, interest, fines and forfeitures (except those arising under the Uniform Code of Military Justice).

(2) An amount owed to the United States by an employee for pecuniary losses where the employee has been determined to be liable due to his or her negligent, willful, unauthorized or illegal acts, including but not limited to:

(i) Theft, misuse, or loss of Government funds;

(ii) False claims for services and travel;

(iii) Illegal, unauthorized obligations and expenditures of Government appropriations;

(iv) Using or authorizing the use of Government owned or leased equipment, facilities, supplies, and services for other than official or approved purposes;

(v) Lost, stolen, damaged, or destroyed Government property;

(vi) Erroneous entries on accounting records or reports; and

(vii) Deliberate failure to provide physical security and control procedures for accountable officers, if such failure is determined to be the approximate cause for a loss of Government funds.

(c) "Department" or "USDA" means the United States Department of Agriculture.

(d) "Disposable Pay" means any pay due an employee that remains after required deductions for Federal, State and Local income taxes; Social Security taxes, including Medicare taxes; Federal retirement programs; premiums for life and health insurance benefits; and such other deductions required by law to be withheld.

(e) "Employee" means a current employee of an agency, including a current member of the Armed Forces or a Reserve of the Armed Forces.

(f) "Hearing official" means an administrative law judge of the Department or some other individual not under the control of the Secretary.

(g) "Salary Offset" means a deduction of a debt by deduction(s) from the disposable pay of an employee without his or her consent.

(h) "Secretary" means the Secretary of the U.S. Department of Agriculture or his or her designee.

(i) "Waiver" means the cancellation, remission, forgiveness, or non-recovery of a debt owed by an employee to an agency as permitted or required by 5 U.S.C. 5584, 10 U.S.C. 2774, or 32 U.S.C. 716, 5 U.S.C. 8346(b) or any other law.

§ 3.53 Coordinating offset with another federal agency.

(a) *When USDA is owed the debt.* When USDA is owed a debt by an employee of another agency, the other agency shall not initiate the requested offset until USDA provides the agency with a written certification that the debtor owes USDA a debt (including the amount and basis of the debt and the due date of the payment) and that USDA has complied with these regulations.

(b) *When another agency is owed the debt.* The Department may use salary offset against one of its employees who is indebted to another agency, if requested to do so by that agency. Such a request must be accompanied by a certification by the requesting agency that the person owes the debt (including the amount and basis of the debt and the due date of the payment) and that the agency has complied with its regulations required by 5 U.S.C. 5514 and 5 CFR Part 550, Subpart K.

§ 3.54 Determination of indebtedness.

(a) In determining that an employee is indebted to USDA and that 4 CFR Parts 101 through 105 have been satisfied and that salary offset is appropriate, the Secretary will review the debt to make sure that it is valid and past due.

(b) If the Secretary determines that any of the requirements of paragraph (a) of this section have not been met, no determination of indebtedness shall be made and salary offset will not proceed until the Secretary is assured that the requirements have been met.

§ 3.55 Notice requirements before offset.

Except as provided in § 3.51(d), salary offset will not be made unless the Secretary first provides the employee with a minimum of 30 calendar days written notice. This Notice of Intent to Offset Salary (Notice of Intent) will state:

(a) That the Secretary has reviewed the records relating to the debt and has determined that a debt is owed, the amount of the debt, and the facts giving rise to the debt;

(b) The Secretary's intention to collect the debt by means of deduction from the employee's current disposable pay until the debt and all accumulated interest are paid in full;

(c) The amount, frequency, approximate beginning date, and duration of the intended deductions;

(d) An explanation of the Department's requirements concerning interest, penalties and administrative costs; unless such payments are waived in accordance with 31 U.S.C. 3717 and § 3.34;

(e) The employee's right to inspect and copy Department records relating to the debt;

(f) The employee's right to enter into a written agreement with the Secretary for a repayment schedule differing from that proposed by the Secretary, so long as the terms of the repayment schedule proposed by the employee are agreeable to the Secretary;

(g) The right to a hearing conducted by a hearing official on the Secretary's determination of the debt, the amount of the debt, or percentage of disposable pay to be deducted each pay period, so long as a petition is filed by the employee as prescribed by the Secretary;

(h) That the timely filing of a petition for hearing will stay the collection proceedings;

(i) That a final decision on the hearing will be issued at the earliest practical date, but not later than 60 calendar days after the filing of the petition requesting the hearing, unless the employee requests, and the hearing officer grants, a delay in the proceedings;

(j) That any knowingly false or frivolous statements, representations, or evidence may subject the employee to:

(1) Disciplinary procedures appropriate under 5 U.S.C. Chapter 75, 5 CFR Part 752, or any other applicable statutes or regulations;

(2) Penalties under the False Claims Act, 31 U.S.C. 3729–3731, or any other applicable statutory authority; or

(3) Criminal penalties under 18 U.S.C. 286, 287, 1001, and 1002 or any other applicable statutory authority;

(k) Any other rights and remedies available to the employee under statutes or regulations governing the program for which the collection is being made;

(l) That amounts paid on or deducted for the debt which are later waived or found not owed to the United States will be promptly refunded to the employee, unless there are applicable contractual or statutory provisions to the contrary;

(m) The method and time period for requesting a hearing; and

(n) The name and address of an official of USDA to whom communications should be directed.

§ 3.56 Request for a hearing.

(a) Except as provided in paragraph (c) of this section, an employee must file a petition for a hearing, that is received by the Secretary not later than 30 calendar days from the date of the Department's notice described in §3.55, if an employee wants a hearing concerning:

(1) The existence or amount of the debt; or

(2) The Secretary's proposed offset schedule (including percentage).

(b) The petition must be signed by the employee and should identify and explain with reasonable specificity and brevity the facts, evidence and witnesses which the employee believes support his or her position. If the employee objects to the percentage of disposable pay to be deducted from each check, the petition should state the objection and the reasons for it.

(c) If the employee files a petition for hearing later than the 30 calendar days as described in paragraph (a) of this section, the hearing officer may accept the request if the employee can show that the delay was because of circumstances beyond his or her control or because of failure to receive notice of the filing deadline (unless the employee has actual notice of the filing deadline).

§ 3.57 Result if employee fails to meet deadlines.

An employee will not granted a hearing and will have his or her disposable pay offset in accordance with the Secretary's offset schedule if the employee:

(a) Fails to file a petition for a hearing as prescribed in §3.56; or

(b) Is scheduled to appear and fails to appear at the hearing.

§ 3.58 Hearings

(a) If an employee timely files a petition for a hearing under § 3.56, the Secretary shall select the time, date, and location for the hearing.

(b) (1) Hearings shall be conducted by an appropriately designated hearing official; and

(2) Rules of evidence shall not be adhered to, but the hearing official shall consider all evidence that he or she determines to be relevant to the debt that is the subject of the hearing and weigh it accordingly, given all of the facts and circumstances surrounding the debt.

(c) USDA will have the burden of going forward to prove the existence of the the debt.

(d) The employee requesting the hearing shall bear the ultimate burden of proof.

(e) The evidence presented by the employee must prove that no debt exists or cast sufficient doubt such that reasonable minds could differ as to the existence of the debt.

§ 3.59 Written decision following a hearing.

Written decisions provided after a hearing will include:

(a) A statement of the facts presented at the hearing to support the nature and origin of the alleged debt and those presented to refute the debt;

(b) The hearing officer's analysis, findings and conclusions, considering all of the evidence presented and the respective burdens of the parties, in light of the hearing;

(c) The amount and validity of the alledged debt determined as a result of the hearing; and

(d) There payment schedule (including percentage of disposable pay), if applicable.

(e) The determination of the amount of the debt at this hearing is the final agency action on this matter.

§ 3.60 Review of departmental record related to the debt.

(a) *Notification by employee.* An employee who intends to inspect or copy Departmental records related to the debt must send a letter to the Secretary stating his or her intention. The letter must be received by the Secretary within 30 calendar days of the date of the Notice of Intent.

(b) *Secretary's response.* In response to the timely notice submitted by the debtor as described in paragraph (a) of this section, the Secretary will notify the employee of the location and time when the employee may inspect and copy Departmental records related to the debt.

§ 3.61 Written agreement to repay debt as alternative to salary offset.

(a) *Notification by employee.* The employee may propose, in response to a Notice of Intent, a written agreement to repay the debt as an alternative to salary offset. Any employee who wishes to do this must submit a proposed written agreement to repay the debt which is received by the Secretary within 30 calendar days of the date of the Notice of Intent.

(b) *Secretary's response.* The Secretary will notify the employee whether the employee's prosposed written agreement for repayment is acceptable. The Secretary may accept a repayment agreement instead of proceeding by offset. In making this determination, the Secretary will balance the Department's interest in collecting the debt against hardship to the employee. If the debt is delinquent and the employee has not disputed its

VOL
51
ISS
51
MR
17
1986
UMI

existence or amount, the Secretary will accept a repayment agreement, instead of offset, for good cause such as, if the employee is able to establish that offset would result in undue financial hardship or would be against equity and good conscience.

§ 3.62 Procedures for salary offset: when deduction may begin.

(a) Deductions to liquidate an employee's debt will be by the method and in the amount stated in the Secretary's Notice of Intent to collect from the employee's current pay.

(b) If the employee filed a petition for a hearing with the Secretary before the expiration of the period provided for in § 3.56 then deductions will begin after the hearing officer has provided the employee with a hearing, and a final written decision has been rendered in favor of the Secretary.

(c) If an employee retires or resigns before collection of the amount of the indebtedness is completed, the remaining indebtedness will be collected according to the procedures for administrative offset (see Subpart B of this part).

§ 3.63 Procedures for salary offset: types of collection.

A debt will be collected in a lump-sum or in installments. Collection will be by lump-sum collection unless the employee is financially unable to pay in one lump-sum, or if the amount of the debt exceeds 15 percent of disposable pay for an ordinary pay period. In these cases, deduction will be by installments, as set forth in § 3.64.

§ 3.64 Procedures for salary offset: methods of collection.

(a) *General.* A debt will be collected by deductions at officially-established pay intervals from an employee's current pay account, unless the employee and the Secretary agree to alternative arrangements for repayment under § 3.61.

(b) *Installment deductions.* Installment deductions will be made over a period not greater than the anticipated period of employment. The size and frequency of installment deductions will bear a reasonable relation to the size of the debt and the employee's ability to pay. However, the amount deducted for any period will not exceed 15 percent of the disposable pay from which the deduction is made, unless the employee has agreed in writing to the deduction of a greater amount. If possible, the installment payment will be sufficient in size and frequency to liquidate the debt in no more than three years. Installment payments of less than $25 per pay period or $50 a month will be accepted only in the most unusual circumstances.

(c) *Sources of deductions.* The Department will make deductions only from basic pay, special pay, incentive pay, retired pay, retainer pay, or in the case of an employee not entitled to basic pay, other authorized pay.

§ 3.65 Procedures for salary offset: imposition of interest, penalties and administrative costs.

Interest, penalties and administrative costs will be charged in accordance with 4 CFR 102.13.

§ 3.66 Nonwaiver of rights.

So long as there are no statutory or contractual provisions to the contrary, no employee payment (or all or portion of a debt) collected under these regulations will be interpreted as a waiver of any rights that the employee may have under 5 U.S.C. 5514.

§ 3.67 Refunds

The Department will refund promptly to the appropriate individual amounts offset under these regulations when:

(a) A debt is waived or otherwise found not owing the United States (unless expressly prohibited by statute or regulation); or

(b) The Department is directed by an administrative or judicial order to refund deducted from the employee's current pay.

§ 3.68 Agency regulations.

The Head of each USDA agency is delegated the authority to act for the Secretary under these regulations and may issue regulations or policies not inconsistent with Office of Personnel Management regulations (5 CFR Part 550, Subpart K) and regulations in this subpart governing the collection of a debt by salary offset.

Done this 24th day of February 1986, at Washington, DC.

Frank W. Naylor,

Acting Secretary of Agriculture.

[FR Doc. 86-5714 Filed 3-14-86; 8:45 am]

BILLING CODE 3410-96-M

---

7 CFR Part 6

Section 22 Dairy Import Quota for Uruguay

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Interim rule.

SUMMARY: This interim rule amends the regulations (7 CFR 6.20–6.33) governing the importation under license of certain dairy products which are subject to quantitative limitations proclaimed under the authority of section 22 of the Agriculture Adjustment Act of 1933, as amended, in order to implement Presidential Proclamation No. 5425 of January 6, 1986, which modified such quantitative limitations to allow the importation of 551, 150 pounds of Italian-type cheese in original loaves from Uruguay. A special application period for the 1986 quota year is being established for importers who desire to receive import licenses for the importation of cheese from Uruguay.

EFFECTIVE DATE: March 17, 1986. Comments on this interim rule must be received on or before May 16, 1986, in order to be assured of consideration.

ADDRESS: Mail comments to: Head, Import Licensing Group, Dairy, Livestock and Poultry Division, Room 6616 South Building, Department of Agriculture, Washington, DC 20250.

Copies of all written comments received will be available for examination by interested persons in Room 6622 of the South Building, Department of Agriculture (14th and Independence Avenue SW.), Washington, DC during regular business hours (8:15–4:45 weekdays).

FOR FURTHER INFORMATION CONTACT: Phillip J. Christie, Head, Import Licensing Group, Dairy, Livestock and Poultry Division, Rm. 6616 South Building, Department of Agriculture, Washington, DC 20250 or telephone at (202) 447–5270.

SUPPLEMENTARY INFORMATION: This interim rule has been reviewed under USDA procedures required by Executive Order 12291 and Departmental Regulation 1512-1 and has been classified as "not major" since this interim rule will not have any of the significant effects specified in those documents.

Furthermore, to the extent, if any, that the provisions of the Regulatory Flexibility Act (5 U.S.C. 601) apply to this interim rule, the Administrator, Foreign Agricultural Service (FAS), hereby certifies that this interim rule will not have a significant economic impact on a substantial number of small entities. The interim rule will enhance the capability of both large and small firms to import certain cheese from Uruguay. The public is invited to comment on the impact of this interim rule on small entities, and the Administrator, FAS, will review this determination in light of those comments.

An evaluation of the impact of this rule on the environment was made and, based on this evaluation, it has been

determined that this action is not a major Federal action and will have no foreseeable adverse effects on the quality of the human environment. Consequently, no environmental impact statement is necessary for this interim rule.

Presidential Proclamation No. 4708 of December 11, 1979, and Presidential Proclamation No. 4811 of December 30, 1980, established quantitative limitations on imports of certain dairy articles in accordance with section 701 of the Trade Agreements Act of 1979 (Pub. L. 96–39) and section 22 of the Agricultural Adjustment Act of 1933, as amended (7 U.S.C. 624). Pursuant to those proclamations, the Department of Agriculture issued regulations providing that the dairy articles subject to such quantitative restrictions could be entered into the United States only by or for the account of a person or firm to which a license has been issued by or under the authority of the Secretary of Agriculture and only in accordance with the terms of such license.

Presidential Proclamation No. 5425 of January 6, 1986, modified such quantitative limitations to permit imports of up to 551,150 pounds of Italian-type cheese in original loaves from Uruguay. The purpose of this interim rule is to amend the regulations governing the importation of dairy articles subject to quotas in order to implement Presidential Proclamation No. 5425. This interim rule will amend Appenix 2 "Articles subject to the historical and supplementary licensing provisions of Import Regulation 1, Revision 7, and respective annual import quotas for each quota year" to 7 CFR Part 6, Subpart—Section 22 Import Quotas, by adding Uruguay to the list of countries from which Italian-type cheese in original loaves may be imported in the United States. The quantity which may be imported annually from Uruguay is 551,150 pounds.

The Department will issue supplementary import licenses authorizing the importation of such cheese from Uruguay to qualified importers. The application period for import licenses for the 1986 quota year was the period from August 1, 1985, through November 1, 1985. However, since there has been no opportunity for importers to apply for supplementary import licenses for cheese imported from Uruguay, it has been determined to provide for a special application period for such licenses.

Importers who desire to receive supplementary import licenses for the importation of Italian-type cheese in original loaves from Uruguay during the 1986 quota year must submit their application in writing to: Head, Import Licensing Group, Dairy, Livestock and Poultry Division, Room 6616, South Building, U.S. Department of Agriculture, Washington, DC 20250 no later than March 31, 1986.

Eligibility to receive such licenses and the allocation of such licenses will be determined in accordance with established rules and procedures. Applications for the issuance of licenses to import such cheese from Uruguay during the 1987 quota year may be submitted beginning August 1, 1986.

Since the 1986 quota year has already begun, it is important that licenses to import the specified quantity of cheese from Uruguay be issued as quickly as possible so that importers will have sufficient time to import such cheese during the 1986 quota year. Accordingly, it has been determined that this interim rule shall become effective on [March 17, 1986]. However, comments from interested persons are requested. Comments must be received by [May 16, 1986] in order to be assured of consideration. After the comments have been received and reviewed, a final rule will be published setting forth any changes which may be necessary in these regulations.

List of Subjects in 7 CFR Part 6

Section 22, Import quotas, Dairy products.

Interim Rule

PART 6—[AMENDED]

Accordingly, 7 CFR Part 6, Subpart—Section 22 Import Quotas, is amended as follows:

1. The authority citation for 7 CFR Part 6, Subpart—Section 22 Import Quotas, is revised to read as follows and the authority citations following all the sections throughout the subpart are removed.

Authority: Section 3, Pub. L. 80–897, 62 Stat. 1248, as amended (7 U.S.C. 624); Secs. 701, 703, Pub. L. 96–39, 93 Stat. 268, 272 (19 U.S.C. 1202 note); Part 3 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202); Sec. 501, Pub. L. 82–137, 65 Stat. 290, as amended (31 U.S.C. 9701).

Appendix 2—Articles Subject to the Historical and Supplementary Licensing Provisions of Import Regulation 1, Revision 7, and Respective Annual Import Quotas for Each Quota Year [Amended]

2. Group IV(a) of Appendix 2—Articles subject to the historical and supplementary licensing provisions of Import Regulation 1, Revision 7, and respective annual import quotas for each quota year is amended by adding the following new line immediately after the line beginning with "Argentina":

Uruguay	250,000	551,150

Signed this 5th of March 1986.

Thomas O. Kay,

Administrator, Foreign Agricultural Service.

BILLING CODE 3410-10-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 73

[Airspace Docket No. 86–AWA–3]

Change of Using Agency for Restricted Areas R–2901A—R–2901I Avon Park, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The using agency for Restricted Areas R–2901A through R–2901I Avon Park, FL, is being changed at the request of the Department of the Air Force. The using agency will be the Commander, MacDill Air Force Base, FL.

EFFECTIVE DATE: 0901 UTC, May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald C. Montague, Airspace and Aeronautical Information Requirements Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426–3128.

The Rule

This amendment to Part 73 of the Federal Aviation Regulations changes the using agency for Restricted Areas R–2901A through R–2901I from the "56th TFW, MacDill AFB, FL" to the "Commander, MacDill AFB, FL" at the request of the Department of the Air Force. Because this action is a minor amendment in which the public would not be particularly interested, I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary. Section 73.29 of Part 73 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this regulation only involves an established

VOL
51
ISS
51
MR
17
1986
UMI

body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 73

Aviation safety, Restricted areas.

Adoption of the Amendment

PART 73—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 73 of the Federal Aviation Regulations (14 CFR Part 73) is amended, as follows:

1. The authority citation for Part 73 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510, 1522; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 73.29 [Amended]

2. Section 73.29 is amended as follows:

R–2901A Through R–2901I Avon Park, FL [Amended]

By removing the words "56th TFW, MacDill AFB, FL" and by substituting the words "Commander, MacDill AFB, FL"

Issued in Washington, DC, on March 7, 1986.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

---

14 CFR Part 75

[Airspace Docket No. 85–AWA–51]

Establishment of Jet Routes—Expanded East Coast Plan

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes three new Jet Routes in several southeastern states: South Carolina, North Carolina, Georgia and Virgina. These routes are part of an overall plan designed to alleviate congestion and compression of traffic in the airspace between New England and Florida. This amendment is a portion of the Expanded East Coast Plan (EECP) to make optimum use of limited airspace along the east coast corridor. This action reduces enroute and terminal delays in the Boston, MA, New York, NY, Miami, FL, Chicago, IL, and Atlanta, GA, areas; saves fuel and reduces controller workload. The EECP is being implemented in segments until completed.

EFFECTIVE DATE: 0901 G.m.t., May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Air Traffic Rules Branch (ATO–230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426–8626.

SUPPLEMENTARY INFORMATION:

History

On January 21, 1986, the FAA proposed to amend Part 75 of the Federal Aviation Regulations (14 CFR Part 75) to establish new Jet Routes J–208, J–209 and J–210 located in South Carolina, North Carolina, Georgia and Virignia (51 FR 2721). Also, on February 28, 1986, a supplemental notice was published to correct mistakes noted in the Jet Route descriptions (51 FR 7083). This action alleviates congestion along the coastal corridors between New York and Florida. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes and those proposed in the supplemental notice, this amendment is the same as that proposed in the notice. Section 75.100 of Part 75 of the Federal Aviation Regulations was republished in Handbook 7400.6A dated January 2, 1985.

The Rule

This amendment to Part 75 of the Federal Aviation Regulations establishes three new Jet Routes in several states which include South Carolina, North Carolina, Georgia and Virginia. These routes are part of an overall plan designed to alleviate congestion and compression of traffic in the airspace between New England and Florida.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Jet routes

Adoption of the Amendment

PART 75—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 75 of the Federal Aviation Regulations (14 CFR Part 75) is amended, as follows:

1. The authority citation for Part 75 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 75.100 [Amended]

2. Section 75.100 is amended as follows:

J–208 [New]

From Athens, GA, via Liberty, NC; to Hopewell, VA.

J–209 [New]

From Greenwood, SC, via Tar River, NC; to Norfork, VA.

J–210 [New]

From INT Savannah, GA, 206° and Vance, SC, 221° radials; Vance; to Wilmington, NC.

Issued in Washington DC, on March 10, 1986.

Shelomo Wugalter,

Acting Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 250

[Release No. 35–24044; File No. S7–22–85]

Public Utility Holding Companies; Exemption for Affiliated Persons of Investment Bankers and Commercial Banking Institutions To Serve as Officers or Directors, Competitive Bidding Rule

AGENCY: Securties and Exchange Commission.

ACTION: Adoption of rule revision and rule amendment.

SUMMARY: The Commission is adopting a rule revision that would allow a limited number of persons affiliated with investment bankers and commercial bankers to serve as officers or directors of public utility holding companies and their subsidiaries under certain conditions. This action is intended to simplify and expand the exemptions now available under the existing rule. The Commission is also adopting a rule amendment to minimize potential conflicts of interest that may arise after an affiliated person of an investment banker has served as a director of a holding company or its subsidiary.

EFFECTIVE DATE: April 16, 1986.

FOR FURTHER INFORMATION CONTACT: Elizabeth K. Norsworthy, Chief, Office of Regulatory Policy, (202–272–2048), or Denis R. Molleur, Esq., Office of Public Utility Regulation, (202–272–2073), Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

After the effective date, questions should be directed to the Office of Public Utility Regulation, (202) 272–7676, Division of Investment Management, 450 Fifth Street, NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission is adopting a revision of rule 70 [17 CFR 250.70] under section 17(c) [15 U.S.C. 79q(c)] of the Public Utility Holding Company Act of 1935 [15 U.S.C. 79 *et seq.*] ("Act") to permit a limited number of persons affiliated with investment bankers or commercial banking institutions (hereinafter collectively referred to as "banking institutions") to serve as directors or officers of public utility holding companies and their subsidiaries (hereinafter collectively referred to as "system companies"). The purpose of the rule revision is to simplify the structure of the existing rule and to give system companies more flexibility in the selection of their officers and directors. The Commission is also adopting an amendment to rule 50 [17 CFR 250.50] under sections 6, 7(c), and 12(d) [15 U.S.C. 79(f), 79g(c), and 79*l*(d)] of the Act, the rule that governs competitive bidding procedures, to address potential conflicts of interest that may arise shortly after an affiliated person of an investment banker has served as a director of a system company.

The Commission initially proposed the rule 70 revision and rule 50 amendment in May of 1985.[1] Based upon comments received on that proposal, a revised version of the rule revision and rule amendments was published for public comments in November.[2] Since the proposing releases discussed the legislative history of section 17(c), the administrative history of rule 70 and the Commission's reasons for revising rule 70 and amending rule 50, this release focuses upon the commentators' reaction to the revised proposal and certain technical changes that have been made in that proposal.

Discussion

A. Rule 70

1. Limitations on Directors of System Companies Who Are Affiliated With Banking Institutions

a. Percentage limitations. The final rule allows a holding company to have up to 75% of its directors affiliated with commercial banking institutions and investment bankers. The entire 75% may be affiliated with commercial banking institutions that have their principal places of business located within the state or states served by the holding company system or up to 25% may be affiliated with investment bankers wherever located or with commercial banking institutions that have their principal places of business located outside the state or states served by the system. Under the final rule, a subsidiary company also may have up to 75% of its directors affiliated with commercial banking institutions and investment bankers. The entire 75% may be affiliated with commercial banking institutions that have their principal places of business located within the state or states served by the subsidiary or up to 25% may be affiliated with investment bankers wherever located or with commercial banking institutions that have their principal places of business located outside the state or states served by the subsidiary.

If application of these percentage limitations results in a fractional number of .5 or more, that fraction may be rounded up to arrive at the number of affiliations that are allowed under the revised rule. For example, if 75% of a holding company's board of directors equals 13.5 persons and 25% equals 4.5 persons, up to 14 directors could be affiliated with banking institutions. All 14 directors could be afiliated with commercial banking institutions that have their principal places of business located within the state or states served by the holding company system. Alternatively, up to 5 of the 14 directors could be affiliated with commercial banking institutions that have their principal places of business located outside of the state or states served by the system or with investment bankers wherever located.

Under the reproposal, no more than 25% of a system company's directors could be affiliated with investment bankers or with commercial banking institutions that have their principal places of business located outside the state or states served by the system. However, up to 75% of the board could be affiliated with local commercial banking institutions, provided that the total number of director affiliated with investment bankers or commercial banking institutions did not exceed 75% of the board. The reproposal specified that in the case of a holding company, a commercial bank would be considered local if the bank's principal place of business is located within the state or states served by the system; in the case of a subsidiary company, a bank would be considered local if the bank's principal place of business is located within the state or states served by the subsidiary.

Two commentators pointed out that these provisions could be read to prevent subsidiary companies from having any directors affiliated with commercial banks that have their principal place of business located within the state or states served by the system but outside the state or states served by the subsidiary company. Since that was not the Commission's intent, the final version of the rule has been redrafted.

b. Limitations on system company directors serving as officers of banking institutions. The final rule allows the directors of subsidiary companies who are affiliated with commercial banking institutions that have their principal places of business located within the state or states served by the subsidiary to serve as officers of those local banks as long as they are not also serving as

1986
UMI

officers of the subsidiary company. However, any holding company directors who are affiliated with banking institutions may not serve as officers of those institutions. These provisions of the revised rule are adopted essentially as reproposed.

Several commentators urged the Commission to also allow the outside directors of holding companies to serve as officers of local commercial banking institutions. They argued that the potential for abuse is remote and, in many instances, an officer of a local bank could make a substantial contribution in serving as a holding company outside director. However, it is the holding company that is primarily responsible for system-wide financing decisions. To avoid domination of a holding company system by banking institutions, the purpose expressed by Congress in enacting section 17(c), the Commission continues to believe that rule 70 should permit the directors of holding companies to be affiliated with commercial banking institutions only as outside directors.

2. Limitations on Officers of System Companies Who Are Affiliated With Banking Institutions

As in the reproposal, the final rule allows an officer of a holding company or subsidiary company to serve as a director of a commercial banking institution provided that the system company officer does not also serve as an officer or employee of that commercial bank and provided that no more than one other officer of the system company serves as a director of that bank.

Although one commentator asked the Commission to permit at least three officers from the same system company to serve as outside directors of the same commercial banking institution, the Commission continues to believe that no more than two officers from the same system company should serve as outside directors of the same commercial bank, again to avoid any potential for the bank to unduly influence the operations of the system company.

3. Elimination of the Federal Energy Regulatory Commission ("FERC") Exemption

The final rule's exemptive provisions described above replace, *inter alia*, an exemptive paragraph of the existing rule that permits any person affiliated with a banking institution to serve as an officer or director of a system company if authorized by FERC. In the proposing release, the Commission requested specific comment on whether the FERC exemption should be retained in the final version of the rule.

A few commentators believed that the FERC exemption should be retained in the interest of comity and consistent Federal regulation, but cited no instances of need for such an exemptive provision. The Commission continues to believe that a separate FERC exemption is unnecessary given the generous percentage limitations described above.

4. Grandfather Clause

The final rule provides that a system company officer's or director's affiliation with a banking institution that exists on the day before the effective date of the revised rule will not disqualify that individual from continuing to serve as an officer or director or from serving successive terms in that capacity. At the request of commentators, the provision has been redrafted to make it clear that an individual's affiliation with a banking institution that exists on the day before the revised rule becomes effective will not disqualify that person from election or appointment to successive terms. The proposal has also been redrafted to make it clear that the only banking affiliations of a system company officer or director that are grandfathered are those affiliations that have been permitted under the existing rule; any other affiliations acquired after the revised rule's effective date will have to comply with the revised rule's provisions.

5. Definitions

a. *Director.* As in the reproposal, the final version of rule 70 defines a director as "any director of a corporation or any individual who performs similar functions in connection with a corporation, partnership, trust, voting trust or other company." An "advisory director" who is not entitled to vote on issued presented to the board for consideration would not be considered a director for purposes of applying the revised rule's provisions.

b. *Officer.* The final rule defines an officer as "a chairman of the board of directors, chief executive officer, president, vice president, treasurer, secretary, comptroller, and any individual who performs similar functions." At the suggestion of one commentator, the reproposal has been redrafted to exclude the chairman of a system company's finance committee or executive committee from the difinition so that outside directors who are selected to act as chairmen of those committees would not be treated as officers under the revised rule. The reproposed definition has also been redrafted so that a system company's chief executive officer would explicitly be included in the definition of officer under the final rule.

c. *Commercial banking institutions.* As recommended by two commentators, the final version of the definition of "commercial banking institution" excludes Federal Reserve banks, which were inadvertently included in the reproposal, because such banks are not primarily engaged in commercial banking activities. The definition has also been revised to explicitly exclude savings banks, as well as savings and loan associations. As pointed out by one commentator, in some areas of the country, savings institutions are organized and known as savings banks, not as savings and loan associations.

One commentator urged the Commission to treat a bank-holding company and each of its bank subsidiaries as separate commercial banking institutions for purposes of the rule. The Commission continues to believe, however, that a bank-holding company system should be treated as a single commercial banking institution to avoid the potential for domination of a public utility holding company system by any one bank holding company system.

Similarly, the Commission continues to believe that the revised rule should not retain the existing rule's exemption for system company officers and directors who are affiliated with small commercial banks. Two commentators suggested that commercial banks having combined capital and surplus not in excess of $10 million should be excluded from the definition of commercial banking institution. One commentator suggested excluding commercial banks that have combined capital and surplus not in excess of $25 million. However, the Commission believes that a separate exclusion for small banks is not needed, given the revised rule's generous percentage limitations.

B. Rule 50

As amended, the final version of rule 50 would incorporate the same conflict of interest provision that was proposed, that is, any proposal which is received from an investment banker within twelve months after an affiliated person of that investment banker has served as a director of the applicant or declarant or of any company within the same holding company system will not be considered an independent proposal. The amended rule, however, makes no other changes with regard to competitive bidding procedures as set forth in the rule and as modified by the

Commission's 1982 Statement of Policy[8] and subsequent administrative positions thereunder. As recommended by the commentators, the Commission believes that it is more appropriate to address all aspects of rule 50 in the context of a separate rule-making proceeding.

Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Chairman of the Commission has certified that the revision of rule 70 and the amendment to rule 50 will not have a significant economic impact on a substantial number of small entities. The Commission did not receive any comments concerning the Chairman's certification.

Statutory Basis

The final revision of rule 70 is adopted by the Commission pursuant to the authority granted the Commission in sections 17(c) and 20(a) [15 U.S.C. 79q(c) and 79t(a)] of the Act. The amendment to rule 50 is adopted pursuant to the authority granted the Commission in sections 6(c), 7, 12(d) and 20(a) [15 U.S.C. 79f(c), 79g, 79*l*(d) and 79t(a)] of the Act.

Text of Rule Revision and Rule Amendment

Part 250 of Chapter II, Title 17 of the Code of Federal Regulations is amended as set forth below.

PART 250—GENERAL RULES AND REGULATIONS, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

1. The authority citation for Part 250 is amended by adding the following citations:

Authority: Secs. 3, 20, 49 Stat. 810, 833; 15 U.S.C. 79c, 79t, unless otherwise noted. Section 250.50 also issued under Secs. 6, 7, 12, 49 Stat. 814, 815, 823; 15 U.S.C. 79f, 79g, 79l, 79t. Section 250.70 also issued under Sec. 17, 49 Stat. 830; 15 U.S.C. 79q.

2. By revising § 250.70 to read as follows:

§ 250.70 Exemptions from section 17(c) of the Act.

Notwithstanding the prohibitions contained in section 17(c) of the Act,

(a) A registered holding company may have up to 75% of the members of its board of directors comprised of affiliated persons of commercial banking institutions that have their principal places of business located within the state or states served by the holding company system, *Provided*, that:

(1) Those affiliated persons do not also serve as officers or employees of those local commercial banking institutions; and

(2) No more than one director or 25% of the members of the board of directors of the holding company, whichever is greater, is affiliated with the same local commercial banking institution.

(b) A registered holding company may have up to 25% of the members of its board of directors comprised of affiliated persons of commercial banking institutions that have their principal places of business located outside the state or states served by the holding company system or investment bankers wherever located, *Provided*, that:

(1) Those affiliated persons do not also serve as officers or employees of those banking institutions;

(2) No more than one director or 10% of the members of the board of directors, whichever is greater, is affiliated with any one investment banker or with any one commercial banking institution;

(3) The total number of directors who are affiliated with investment bankers or commercial banking institutions does not exceed 75% of the members of the board of directors; and

(4) Where an affiliated person of an investment banker serves as a director of any company within a holding company system, the investment banker:

(i) Has not acted as a managing underwriter for the distribution of securities issued by any company in the holding company system for at least twelve months prior to the director's appointment or election to the board; and

(ii) Does not act as a managing underwriter for the distribution of securities issued by any company in the holding company system while the director serves on the board.

(c) A subsidiary company of a registered holding company may have up to 75% of the members of its board of directors comprised of affiliated persons of commercial banking institutions that have their principal places of business located within the state or states served by the subsidiary company, *Provided*, that:

(1) Those affiliated persons either do not serve as officers or employees of those local commercial banking institutions or, alternatively, do not serve as officers or employees of the subsidiary company; and

(2) No more than one director or 25% of the members of the board of directors of the subsidiary company, whichever is greater, is affiliated with the same local commercial banking institution.

(d) A subsidiary company of a registered holding company may have up to 25% of the members of its board of directors comprised of affiliated persons of commercial banking institutions that have their principal places of business located outside the state or states served by the subsidiary company or investment bankers wherever located, *Provided*, that:

(1) Those affiliated persons do not also serve as officers or employees of those banking institutions;

(2) No more than one director or 10% of the members of the board of directors, whichever is greater, is affiliated with any one investment banker or with any one commercial banking institution;

(3) The total number of directors who are affiliated with investment bankers or commercial banking institutions does not exceed 75% of the members of the board of directors; and

(4) Where an affiliated person of an investment banker serves as a director of any company within a holding company system, the investment banker:

(i) Has not acted as a managing underwriter for the distribution of securities issued by any company in the holding company system for at least twelve months prior to the director's appointment or election to the board; and

(ii) Does not act as a managing underwriter for the distribution of securities issued by any company in the holding company system while the director serves on the board.

(e) An officer of a holding company may serve as a director of a commercial banking institution, *Provided*, that:

(1) The officer of the holding company does not also serve as an officer or employee of that commercial banking institution; and

(2) No more than one other officer of the holding company serves as a director of that commercial banking institution.

(f) An officer of a subsidiary company may serve as a director of a commercial banking institution, *Provided*, that:

(1) The officer of the subsidiary company does not also serve as an officer or employee of that commercial banking institution; and

VOL 51
ISS 51
MR 17
1986
UMI

(2) No more than one other officer of the subsidiary company serves as a director of that commercial banking institution.

(g) A person serving as an officer or director of a holding company or subsidiary company on April 15, 1986, shall not be disqualified from continuing to serve or from serving successive terms in that capacity solely because of an affiliation with a commercial banking institution or investment banker which existed on that date.

(h) As used in section 17(c) of the Act and in this rule:

(1) An "affiliated person" of a commercial banking institution or investment banker means an officer, director, partner, appointee or representative of that commercial banking institution or investment banker, as well as any person that directly or indirectly owns or holds with power to vote 5 percent or more of the outstanding voting securities of that commercial banking institution or investment banker.

(2) A "commercial banking institution" means any person:

(i) That engages directly or indirectly in the business of a bank, trust company, bank-holding company, banking association or firm; and

(ii) Any enterprise in which such person owns 20 percent or more of the equity interest.

The term excludes any person that derived 15% or less of its gross revenues from commercial banking and investment banking activities during the fiscal year immediately preceding an affiliated person's appointment or election to the board of directors, or appointment as officer, of a registered holding company or subsidiary company thereof. The term also excludes any Federal Reserve Bank, savings bank, savings and loan association, building and loan association, cooperative bank, homestead association, or similar institution, or any receiver, conservator, liquidator, liquidating agent, or similar official or person thereof or therefor.

(3) An "investment banker" means any person:

(i) That engages directly or indirectly in the business of underwriting or dealing in securities that are not exempted from registration under the Securities Act of 1933 by section 3 of that Act; and

(ii) Any enterprise in which such person owns 20 percent or more of the equity interest.

The term excludes any person that derived 15% or less of its gross revenues from commercial banking and investment banking activities during the fiscal year immediately preceding an affiliated person's appointment or election to the board of directors of a registered holding company unless those revenues were derived from acting as a managing underwriter for the distribution of securities issued by any company in such holding company system.

(4) A person's gross revenues from its own commercial and investment banking activities and from its ratable share of the commercial banking and investment banking activities of enterprises in which it owns 20 percent or more of the equity interest should be considered in determining the degree to which the person is engaged in such activities.

(5) A "director" means any director of a corporation or any individual who performs similar functions in connection with a corporation, partnership, trust, voting trust or other company.

(6) An "officer" means a chairman of the board of directors, chief executive officer, president, vice president, treasurer, secretary, and comptroller, or any individual who performs similar functions in connection with a corporation, partnership, trust, voting trust, or other company.

(7) A "managing underwriter" means an underwriter (or underwriters) who, by contract or otherwise, deals with the issuer, organizes the selling efforts, receives some benefit directly or indirectly in which all other underwriters similarly situated do not share in proportion to their respective interests in the underwriting, or represents any other underwriters in such matters as maintaining the records of the distribution, arranging the allotments of securities offered or arranging for appropriate stabilization activities, if any.

3. By redesignating paragraph (b) as paragraph (b)(1), adding paragraph (b)(2), and removing the authority cite from the end of §250.50 to read as follows:

§ 250.50 Requirement of public invitation of proposals for the purchase or underwriting of securities.

* * * * *

(b)(1) *Public invitation of proposals.* * * *

(2) Any proposal which is received from an investment banker as defined in rule 70(h)(3) [17 CFR 250.70(h)(3)] within twelve months after an affiliated person of that investment banker has served as a director of the applicant or declarant or of any company within the same holding company system will not be considered an independent proposal.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 520, 556, and 558

Animal Drugs, Feeds, and Related Products; Morantel Tartrate

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of two supplemental new animal drug applications (NADA's) filed by Pfizer, Inc., providing for a revised tolerance for residues of morantel tartrate in food derived from treated cattle and for use of the drug in dairy cattle of breeding age.

EFFECTIVE DATE: March 17, 1986.

FOR FURTHER INFORMATION CONTACT: Adriano R. Gabuten, Center for Veterinary Medicine (HFV–135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4913.

SUPPLEMENTARY INFORMATION: Pfizer, Inc., 235 East 42d St., New York, NY 10017, filed supplemental NADA 92–444 providing for use of Rumatel® (morantel tartrate) Type A Article for making Type C cattle feed, and supplemental NADA 93–903 providing for use of Rumatel® and Nematel™ Boluses for treating cattle. The drugs are used for removal and control of mature gastrointestinal nematode infections. The supplements provide for a revised tolerance for residues of morantel tartrate in food derived from treated cattle and for use of the drug in dairy cattle of breeding age.

The supplements are approved and the regulations are amended to reflect the approval. The basis of approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug

Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has carefully considered the potential environmental effects of this action under FDA's final rule implementing the National Environmental Policy Act (21 CFR Part 25) as published in the **Federal Register** of April 26, 1985 (50 FR 16636), and has determined that:

1. For the action providing for safe concentrations for total residues of morantel tartrate in the uncooked edible tissue of cattle and in milk, under 21 CFR 25.24(d)(1)(i), that the action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

2. For the action providing for use in dairy cattle of breeding age, that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment as provided in 21 CFR 25.31a(a), may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects

21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Parts 520, 556, and 558 are amended as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 520 continues to read as follows:

Authority: Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

§ 520.1450a [Amended]

2. In § 520.1450a *Morantel tartrate bolus* in paragraph (d)(3) by removing "Not for use in dairy animals of breeding age."

PART 556—TOLERANCES FOR RESIDUES OF NEW ANIMAL DRUGS IN FOOD

3. The authority citation for 21 CFR Part 556 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

4. By revising § 556.425 to read as follows:

§ 556.425 Morantel tartrate.

The marker residue selected to monitor for total residues of morantel tartrate in cattle is *N*-methyl-1,3-propanediamine (MAPA). The target tissue selected is liver. Residue concentrations are determined by measuring the morantel residues convertible to MAPA. A tolerance for MAPA is established in cattle of 0.70 part per million in liver. A marker residue concentration of 0.70 part per million in liver corresponds to a concentration for total residues of morantel tartrate of 2.40 parts per million in liver. The safe concentrations for total residues of morantel tartrate in the uncooked edible tissues of cattle are 1.20 parts per million in muscle, 2.40 parts per million in liver, 3.60 parts per million in kidney, and 4.80 parts per million in fat. A tolerance for the marker residue of morantel tartrate in milk is not needed. The safe concentration for total residues of morantel tartrate in milk is 0.40 part per million. "Tolerance" in this section refers to a concentration of a marker residue selected to monitor for total residues of the drug in the target animal. "Safe concentrations" refer to the concentrations of total residues considered safe in edible tissues and milk.

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

5. The authority citation for 21 CFR Part 558 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

§ 558.360 [Amended]

6. In § 558.360 *Morantel tartrate* in paragraph (d)(3) by removing "Not for use in dairy cattle of breeding age."

Dated: March 11, 1986.

Marvin A. Norcross,

Acting Associate Director for New Animal Drug Evaluation.

New Animal Drugs For Use in Animal Feeds; Definitions and General Considerations; Revised Procedures Re Medicated Feed Applications

Correction

In FR Doc. 86–4316 beginning on page 7382 in the issue of Monday, March 3, 1986, make the following corrections:

1. On page 7392, § 558.4(d), in the table, in the last column, the sixth line should read, "80–120/70–130". The eighth line should read, "80–115/70–130".

2. On page 7393 in the table, Category I, in the last line, the third column," 2.4%" should read "2.5%".

3. On page 7393, in the table, Category II, in the sixteenth line, transfer "0.00625%" to the third column from the fourth column. Likewise in the seventeenth line, transfer "0.025%" to the third column from the fourth.

In the eleventh line from the bottom of the page, transfer "0.01% (Combined)" to the third column from the fourth column. In the tenth line from the bottom, transfer "0.02% (Combined)" to the third column from the fourth column.

4. On page 7394, in the table, Category II, in the last line in the fourth column, "< 7% 90–110" should read "> 7% 90–110".

5. On page 7395, in amendatory instruction 29, in the fifth line, "redesignating" should read "redesignated". In the sixth line, "redesignated" should read "redesignating".

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 785

Requirements for Permits for Special Categories of Mining

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior

ACTION: Final rule; technical amendment.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSMRE) is amending regulatory cross-references contained in the final regulations concerning requirements for permits for special categories of surface mining and reclamation operations subject to the provisions of the Surface Mining and Reclamation Act of 1977. In a May 24, 1983 **Federal Register** document, 30 CFR Part 826 was removed and the provisions thereof moved to new §§ 816.107 and 817.107. Paragraphs (b) and (c) of 30 CFR 785.15 continue to reference 30 CFR 826.12. The paragraphs are corrected in this rulemaking to cite the proper section references.

EFFECTIVE DATE: March 17, 1986.

FOR FURTHER INFORMATION CONTRACT: Ralph Blumer, Regulatory Development and Issues Management, Office of the Director, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue NW., Washington, DC 20240, (202) 343–5981.

SUPPLEMENTARY INFORMATION:

I. Background
II. Discussion of Amendment
III. Procedural Matters

I. Background

OSMRE published final rules relating to backfilling and grading requirements for surface and underground mining activities on May 24, 1983 (48 FR 23356). Part 826 governing mining of steep slopes, was removed and those requirements were moved to Parts 816 and 817 as new §§ 816.107 and 817.107. Paragraphs (b) and (c) of 30 CFR 785.15 contains references to 30 CFR 826.12. This rulemaking will correct this reference. The correction is considered a technical amendment and no change in meaning or application is intended. The main purpose of this technical amendment is to assure that 30 CFR Chapter VII, due for update in July 1986 is accurate.

II. Discussion of Amendment

This amendment is to correct section references in 30 CFR 785.15(b) and (c) to correspond with the redesignation and/or removal of 30 CFR Part 826.

III. Procedural Matters

Executive Order 12291 and the Regulatory Flexibility Act

OSMRE has determined that this document is not a major rule and does not require a regulatory impact analysis under Executive Order 12291 because the rule is procedural and has no economic effect on the public. The Department has also determined that this document will not have a significant economic effect on a substantial number of small entities and does not require a regulatory flexibility analysis under the Regulatory Flexibility Act.

National Environmental Policy Act

This rulemaking is not a major Federal action, but a procedural rule covered under previous rulemakings. Therefore, an environmental assessment is not required for this rulemaking, which is covered under the environmental assessment and environmental impact statements prepared for the previous rulemakings.

Federal Paperwork Reduction Act

It has been determined that the information collection requirements do not change due to the corrections of this rulemaking, and therefore, it is exempt from the requirements of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.) and does not require clearance by the Office of Management and Budget.

List of Subjects in 30 CFR Part 785

Coal mining, Reporting and recordkeeping requirements, Surface mining, Underground mining.

Accordingly, the Office of Surface Mining Reclamation and Enforcement is amending 30 CFR Part 785 as set forth herein.

Dated: March 7, 1986.

James E. Cason,
Deputy Assistant Secretary for Land and Minerals Management.

PART 785—REQUIREMENTS FOR PERMITS FOR SPECIAL CATEGORIES OF MINING

1. The authority citation for Part 785 continues to read as follows:

Authority: Secs. 102, 201, 501(b), 503, 504, 506, 507, 508, 509, 510, 511, 513, 514, 515, 516, 517, 519, 527, 529, 701, and 711, Pub. L. 95–87, 91 Stat. 445 (30 U.S.C. 1202, 1211, 1251, 1253, 1254, 1256, 1257, 1259, 1260, 1261, 1263, 1264, 1265, 1266, 1267, 1269, 1277, 1279, 1291, 1301), unless otherwise noted.

§ 785.15 [Amended]

2. Paragraphs (b) and (c) of § 785.15 are amended by removing the words "30 CFR Part 826.12" and adding in their place the words "§§ 816.107 or 817.107 of this chapter."

[FR Doc. 86–5741 Filed 3–14–86; 8:45 am]

30 CFR Part 914

Approval of Permanent Program Amendments From the State of Indiana Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: OSMRE is announcing the approval of amendments to the Indiana Permanent Regulatory Program (hereinafter referred to as the Indiana program) received by OSMRE pursuant to the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

On September 4, 1985, Indiana submitted amendments to its program to establish a program for the training, examination and certification of blasters.

After providing opportunity for public comment and conducting a thorough review of the program amendments, the Director, OSMRE, has determined that the amendments meet the requirements of SMCRA and the Federal regulations. Accordingly, the Director is approving these amendments. The Federal rules at 30 CFR Part 914 which codify decisions concerning the Indiana program are being amended to implement this action.

This final rule is being made effective immediately in order to expedite the State program amendment process and encourage States to conform their programs to the Federal standards without undue delay; consistency of the State and Federal standards is required by SMCRA.

EFFECTIVE DATE: March 17, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Richard D. Rieke, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204. Telephone: (317) 269–2600.

SUPPLEMENTARY INFORMATION:

I. Background

Information regarding the general background on the Indiana State Program, including the Secretary's Findings, the disposition of comments and a detailed explanation of the conditions of approval of the Indiana program can be found in the July 26,

1982 **Federal Register** (47 FR 32071–32108). Subsequent actions concerning the Indiana program are described in 30 CFR 914.15 and 30 CFR 914.16.

II. Discussion of Proposed Amendment

On September 4, 1985, the Indiana Department of Natural Resources submitted to OSMRE pursuant to 30 CFR 732.17, a proposed State program amendment for approval. The amendment establishes a program for the training, examination and certification of blasters.

On March 4, 1983, OSMRE issued final rules effective April 14, 1983, establishing the Federal standards for the training and certification of blasters at 30 CFR Part 850 (48 FR 9486). Section 850.12 of these regulations stipulates that the regulatory authority in each State with an approved program under SMCRA shall develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a surface coal mining operation within 12 months after approval of a State program or within 12 months after the publication date of OSMRE's rules at 30 CFR Part 850, whichever is later. In the case of Indiana's program, the applicable date was 12 months after publication of OSMRE's rules or March 4, 1984. However, Indiana requested and received a twelve-month extension to March 4, 1985, and an additional six-month extension to September 4, 1985. (May 14, 1984, 49 FR 20285 and April 5, 1985, 50 FR 13566).

OSMRE published a notice in the **Federal Register** on November 15, 1985, announcing receipt of the proposed program amendments submitted on September 4, 1985, and procedures for the public comment period and for requesting a public hearing on the substantive adequacy of the proposed amendment (50 FR 47229). The public comment period ended December 16, 1985. There was no request for a public hearing and the hearing scheduled for December 10, 1985, was not held.

III. Director's Findings

The Director finds, in accordance with SMCRA and 30 CFR 732.15 and 732.17, that the program amendment establishing a blaster training, examination and certification program submitted by Indiana on September 4, 1985, meets the requirements of SMCRA and 30 CFR Chapter VII. Although the blaster examination itself will be resubmitted at a later date to address identified deficiencies, the program on the whole is consistent with the Federal requirements. The examination is confidential and not subject to public comment; therefore, approval of the program will not be delayed pending resubmission of the examination. Only those areas of particular interest are discussed below in the specific findings. Discussion on only those provisions for which findings are made does not imply any deficiency in any provision not discussed.

1. The Indiana definition of "certified blaster" added to 310 IAC 12–1–3 means a person with at least 12 months blasting experience who has completed an approved training course and successfully passed the blaster certification exam and who holds a valid certificate issued by the State. The Director finds that this definition is more specific than the Federal definition of "blaster" at 30 CFR 850.5 but not less effective. The Federal rule defines "blaster" as a person directly responsible for the use of explosives who is certified under 30 CFR Part 850.

2. The amended Indiana rules 310 IAC 12–5–33 and 12–5–99 contain requirements found in the Federal counterpart rules at 30 CFR 816.61 and 817.61, general requirements for use of explosives for surface and underground mines, except for the requirement at 30 CFR 816.61(c)(2) and 817.61(c)(2) that certificates of blaster certification be carried by the blaster or be on file at the permit site. The Indiana counterpart for the Federal requirement is contained in 310 IAC 12–8–7(e) which is discussed below under Finding 9. Indiana rules 30 IAC 12–5–33 and 12–5–99 contain general requirements for use of explosives found in the Federal rules and also require that each person responsible for blasters shall possess a valid certification and that decisions concerning blast specifications shall be made by a certified blaster. The Director finds the Indiana rules no less effective than the Federal rules.

3. Indiana has added 310 IAC 12 Rule 8 to cover training, examination and certification of blasters. Indiana rule 310 IAC 12–8–1 establishes the scope of the rule, similar to 30 CFR 850.1 The Director finds this section no less effective than 30 CFR 850.1.

4. Indiana has added 310 IAC 12–8–2 to explain the objective of 310 IAC 12–8–1 through 12–8–9 to establish the blaster certification program. Although there is no Federal counterpart, the Director finds this explanatory rule consistent with the requirements in 30 CFR Part 850.

5. Indiana rule 310 IAC 12–8–3 establishes requirements for blaster training. It contains requirements similar to the Federal counterparts in 30 CFR 850.13, including a listing of topics to be included in the training courses. The Indiana rule also contains, in paragraph (d), requirements for training of persons who are assigned to a blasting crew or who assist in explosives use. Although there is no Federal counterpart rule, the Director finds these requirements to be consistent with the Federal requirements for blaster training. The Director, therefore, finds the Indiana rules no less effective than the Federal rules.

6. Indiana rule 310 IAC 12–8–4 establishes requirements for applications for a certification. Although there is no Federal counterpart, the rule establishes practical information for applying for certification and is consistent with Federal requirements. The Director finds the rule no less effective than the Federal rules.

7. Indiana rule 310 IAC 12–8–5 establishes requirements for written examinations and for practical experience that are similar to the Federal rules at 30 CFR 850.14. The Indiana rule contains additional practical information on examination notices, grades and other topics of interest to candidates. The Director, therefore, finds the rules no less effective than the Federal rules.

8. Indiana rule 310 IAC 12–8–6, comity registration, allows, under certain circumstances, persons holding a valid blaster certification in another state to be certified in Indiana without examination, if the other state has an approved blaster certfication program. In the preamble to the Federal rules on blaster certification, OSMRE endorsed the concept of State reciprocity saying that this "should be facilitated by the State program review and approval process, under which all States with approved programs must conform with the rules adopted today and the Act." (48 FR 9488, March 3, 1983). Therefore, the Director finds this section of the Indiana rules no less effective than the Federal rules.

9. Indiana rule 310 IAC 12–8–7 establishes requirements for certification. The rule sets the period of certification at 3 years and covers practical information for issuance of certification and replacement certificates. The rules contain requirements similar to those of 30 CFR 850.15 (a), (d) and (e) and also contains the requirement of 30 CFR 816.61(c)(2) and 817.61(c)(2) that blasters shall maintain their blaster certificates at the mine site. The Director, therefore, finds the rules no less effective than the Federal rules.

10. Indiana rule 310 IAC 12–8–8 contains requirements for renewal of blaster certificates provided for in 30

BEST COPY AVAILABLE

VOL
51
ISS
51
MR
17
1986
UMI

CFR 850.15(c). The Indiana rule provides requirements for and practical information on renewing certificates every three years. Federal rule 30 CFR 850.15(c), although it does not establish specific requirements, provides for recertification of blasters. The Director, therefore, finds the Indiana rules no less effective than the Federal rules.

11. Indiana rule 310 IAC 12–8–9 establishes provisions for revocation of certification, for hearings on revocations and for reissue of revoked certifications. The rules are consistent with the Federal provisions for revocation at 30 CFR 850.15(b), and, therefore, the Director finds them no less effective.

12. OSMRE has completed a review of the course material proposed for use in Indiana's training courses and has reviewed copies of representative examinations to be used to satisfy the written examination requirement. OSMRE has found the course material to satisfactorily comply with State and Federal program requirements. However, the examination was found to be inadequate in that some of the questions were found to be too simple so that the examination did not adequately judge knowledge of the topics covered. Also, the mix of questions needs to be improved so that all topics are adequately covered. Indiana is currently working to address these deficiencies and will submit revised examination samples for OSMRE review in the near future. Upon completion of OSMRE's review, Indiana will be notified of the adequacy of the examination and, if appropriate, that Indiana can begin implementing its blaster certification program.

The Director finds that the Indiana regulatory provisions for training, examination and certification of blasters are no less effective than the requirements established in the Federal rules.

IV. Public Comments

No public comments were received on the amendments.

V. Director's Decision

The Director, based on the above findings, is approving the Indiana regulatory amendments as submitted on September 4, 1985, under the provisions of 30 CFR 732.17. The Federal rules at 30 CFR Part 914 are being amended to implement this decision.

VI. Procedural Matters

1. *Compliance with the National Environmental Policy Act.* The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act.* On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 914

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: March 10, 1986.

James W. Workman,

Deputy Director, Operations and Technical Services.

PART 914—INDIANA

30 CFR Part 914 is amended as follows:

1. The authority citation for Part 914 continues to read as follows:

Authority: Pub. L. 95–87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

2. 30 CFR 914.15 is amended by adding a new paragraph (j) as follows:

§ 914.15 Approval of regulatory program amendments.

* * * * *

(j) The following amendments submitted by the Indiana Department of Natural Resources to OSMRE on September 4, 1985, are approved effective March 17, 1986: Indiana's blaster training, examination and certification program as contained in the Indiana regulations at 310 IAC 12–1–3, 310 IAC 12–5–33, 310 IAC 12–5–90, 310 IAC 12–8–1, 310 IAC 12–8–2, 310 IAC 12–8–3, 310 IAC 12–8–4, 310 IAC 12–8–5, 310 IAC 12–8–6, 310 IAC 12–8–7, 310 IAC 12–8–8, 310 IAC 12–8–9 and in the blaster training program.

3. 30 CFR 914.16 is amended by removing and reserving paragraph (a) as follows:

§ 914.16 Required program amendments.

30 CFR Part 917

Approval of Permanent Program Amendments From the Commonwealth of Kentucky Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: OSMRE is announcing the approval of program amendments submitted by Kentucky as modifications to the State's permanent regulatory program (hereinafter referred to as the Kentucky program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments were submitted on September 16, 1985 and modified on December 10, 1985. The amendments pertain to liability insurance requirements.

After providing for public comment and conducting a thorough review of the program amendments, the Direcor has determined that the amendments on liability insurance requirements meet the requirements of SMCRA and the Federal regulations and is approving these amendments. The Federal rules at 30 CFR Part 917 codifying decisions concerning the Kentucky program are being amended to implement this action.

This final rule is being made effective immediately to expedite the State program amendments process and encourage States to conform their programs with the Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

EFFECTIVE DATE: March 17, 1986.

FOR FURTHER INFORMATION CONTACT: W. Hord Tipton, Director, Lexington Field Office, Office of Surface Mining Reclamation and Enforcement, 340 Legion Drive, Suite 28, Lexington, Kentucky 40504. Telephone: (606) 233–7327.

SUPPLEMENTARY INFORMATION:

I. Background

On December 30, 1981, Kentucky resubmitted its proposed regulatory program to OSMRE. The Kentucky program was conditionally approved by the Secretary of the Interior subject to the correction of 12 minor deficiencies. The approval was effective upon publication of the notice of conditional approval in the May 18, 1982 **Federal Register** (47 FR 21404–21435). Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Kentucky program can be found in the May 18, 1982 **Federal Register.** Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 917.11, 30 CFR 917.15, 30 CFR 917.16 and 30 CFR 917.17.

II. Submission of Program Amendments

On September 16, 1985, Kentucky submitted amendments to its regulations pertaining to general hydrology requirements and liability insurance requirements. On October 25, 1985, OSMRE published a notice in the **Federal Register** (50 FR 43413) announcing receipt of the amendments and inviting public comment on their adequacy. The public hearing scheduled for November 19, 1985, was not held because no one requested an opportunity to testify.

On December 10, 1985, Kentucky submitted modifications to the liability insurance amendments. On January 21, 1986, OSMRE reopened the comment period for these amendments for a period of fifteen days ending February 5, 1986 (51 FR 2731). On February 7, 1986, Kentucky submitted modifications to the amendments pertaining to general hydrology requirements. The comment period for those modifications will be reopened by a separate **Federal Register** notice. This final rule therefore, pertains only to the liability insurance amendments.

III. Director's Findings

The Director finds, in accordance with SMCRA and 30 CFR 732.15 and 732.17, that the program amendments pertaining to liability insurance requirements submitted on September 16, 1985, including modifications submitted on December 10, 1985, meet the requirements of SMCRA and 30 CFR Chapter VII. Only these provisions of particular interest are discussed below. Any provisions not specifically discussed are found to be no less stringent than SMCRA and no less effective than the Federal rules.

1. Kentucky is deleting the incorporation of Reclamation Advisory Memorandum (RAM) #64, "Certification of Liability Insurance Update, June 10, 1983," from its list of RAM's incorporated by reference at 405 KAR 7:015 Section 1. The RAM is deleted in accordance with changes to the liability insurance requirements in 405 KAR 10:030 which are discussed below under Finding 2. The Director finds this deletion consistent with the Federal rules.

2. Kentucky has amended paragraph (1) of 405 KAR 10:030 section 4 to require the applicant to submit, as part of the permit application at the time of bond submission, a certificate of liability insurance. Since 405 KAR 10:010 section 2(2) requires submission of bond after permit approval but before the permit is issued, the certificate of liability insurance would likewise be issued after permit approval but before permit issuance. The Federal rule at 30 CFR 800.60(a) requires submission of the certificate of liability insurance as part of the permit application.

Since Kentucky would still require that the applicant obtain and submit proof of the necessary liability insurance before any permit is issued and before initiation of any coal mining operation, and since this proof, when submitted, must be included in the permit application, the Director finds that the revised State rule provides protection that is no less stringent than that required by section 507(f) of SMCRA and that it is no less effective than the corresponding Federal regulations. The Director notes also that the Kentucky regulatory change does not affect the public's right to comment. The Kentucky rules require minimum liability coverage for bodily injury and property damage which the operator must meet to be in full compliance. The public's ability to comment on the adequacy of the minimum amounts established in the regulations is not hampered by the absence of the certificate in the permit application.

Kentucky has also amended section 4, paragraph (1) to require coverage for bodily injury and property damage of $300,000 for each occurrence and $500,000 aggregate. This is the same minimum coverage required by 30 CFR 800.60(a) and therefore the Director finds it no less effective than the Federal rule.

Other changes are made to paragraph 1 and to paragraph 2 of section 4 which clarify the rule or reflect language in 30 CFR 800.60. The Director finds the amended Kentucky rule no less effective than the Federal rule.

IV. Public Comments

OSMRE solicited comments from the Environmental Protection Agency (EPA) and received its concurrence on the amendments.

No comments were received in response to OSMRE's request for comments from the public.

V. Director's Decision

The Director, based on the above findings, is approving the Kentucky program amendments pertaining to liability insurance as submitted on September 16, 1985, including modifications submitted December 10, 1985. The Federal rules at 30 CFR Part 917 are being amended to implement the Director's decisions.

VI. Additional Determinations

1. *Compliance with the National Environmental Policy Act.* The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act.* On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7 and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, for this action OSMRE is exempt from the requirement to prepare a Regulatory Impact Analysis and this action does not require regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

BILLING CODE 4310-05-M

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 211

Administration; Appeal of Decisions Concerning the National Forest System; U.S. Postal Service Postmarks; Time of Filing Determinations

AGENCY: Forest Service, USDA.

ACTION: Interim rule; request for comments.

SUMMARY: This rule makes a technical change in the present Forest Service administrative appeal procedures to make explicit that legible United States Postal Service (USPS) postmarks take precedence in determining time of filing. The change is necessary to achieve consistent interpretation. Public comments are invited and will be considered in promulgating a final rule.

EFFECTIVE DATE: March 17, 1986.

ADDRESS: Send comments on this interim rule to Chief (1570), Forest Service, USDA, P.O. Box 2417, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Larry Hill, Acting Staff Assistant, National Forest System (202) 382–9349.

SUPPLEMENTARY INFORMATION:

Background

Paragraph (c)(4) of 36 CFR 211.18 states that "Postmarks, other evidence of mailing, or, if not mailed, time of receipt will determine time of filing." Some Forest Service officials and appellants have been misinterpreting this provision to mean that other evidence of mailing could take precedence over legible USPS postmarks. The use of a USPS postmark as evidence of timeliness is a commonly used standard. This postmark provides tangible, unbiased evidence by an official Agency of the United States Government as to timeliness. Not to give precedence to this type of evidence ignores not only common practice but also the Agency's historical procedure of interpreting timeliness of appeals. Giving precedence to other evidence of mailing over a legible USPS postmark results in inconsistence and subjective practices.

This amendment to Forest Service appeal procedures makes clear that when officials determine timeliness under 36 CFR 211.18(c)(4), legible USPS postmarks shall take precedence over "other evidence of mailing." Only where the USPS postmark is illegible or missing will "other evidence of mailing" be used to determine timeliness.

In addition to this change, other minor word changes are made in paragraph (c)(4) to conform to principles of effective writing and to achieve precision of expression.

This action is basically a technical clarification of the rule and does not represent a change in Agency policy or intended procedures. Because of the need to achieve consistency in Agency interpretation, it is necessary to issue this amendment as an interim rule effective upon publication. All comments received on the rule will be considered in issuing a final rule.

Regulatory Impact

Because of its technical nature, it has been determined that this interim rule is exempt from review procedures required by E.O. 12291. The rule will have no effect on the Nation's economy, or substantial numbers of individuals or businesses, or on the quality of the human environment. The final rule does not contain an information collection or recordkeeping requirement as defined in the Paperwork Reduction Act of 1980.

List of Subjects in 36 CFR Part 211

Administrative practice and procedure, National Forests.

Therefore, for the reasons set forth above, Subpart B—Appeal of Decisions Concerning the National Forest System, of Part 211—Administration of Title 36 of the Code of Federal Regulations is amended as follows:

PART 211—ADMINISTRATION

Subpart B—Appeal of Decisions Concerning the National Forest System

1. Move the authority citation appearing at the end of Subpart B, to occur at the beginning of the Subpart. The authority citation continues to read as follows:

Authority: 30 Stat. 35, as amended, 50 Stat. 526 (16 U.S.C. 551, 7 U.S.C. 1011 (f), 5 U.S.C. 301)).

2. Revise paragraph (c)(4) of § 211.18 to read as follows:

§ 211.18 Appeal of decisions of forest officers.

* * * * *

(c) * * *

(4) When determining time of filing, Reviewing Officers shall give precedence to United States Postal Service (USPS) postmarks over other evidence of timely filing. Filing is defined as either to mail or to deliver the appropriate documents. If documents are delivered by means other than the USPS, date of receipt determines time of filing. If the date of mailing cannot be determined from a legible USPS postmark, the Reviewing Officer may accept other evidence of timely filing. Weekends or Federal holidays are included in computing the time allowed for filing, but when the filing time would expire on a weekend or holiday, the filing time is extended to the end of the next business day.

BILLING CODE 3410-11-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 69

[CC Docket No. 78–72; Phase I; FCC 86–69]

MTS and WATS Market Structure

AGENCY: Federal Communications Commission.

ACTION: Final rule (Report and Order).

SUMMARY: The Commission's access charges rules require the National Exchange Carrier Association to bill and collect carrier common line charges. The Report and Order modifies those rules to require exchange carriers to bill and collect carrier common line charges. This action is taken to eliminate unnecessary rules and regulations.

EFFECTIVE DATE: April 7, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Kent Nilsson (202) 632–6363.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 69

Access charges, Communications, Common carriers, Reporting and recordkeeping requirements, Telephone.

Report and Order

In the matter of MTS and WATS Market Structure; CC Docket No. 78–72, Phase I.

Adopted: February 24, 1986.
Released: February 28, 1986.

By the Commission.

1. On March 27, 1985, the National Exchange Carrier Association ("NECA") filed a petition for rulemaking to amend §§ 69.601(b) and 69.604 of the Commission's rules to permit exchange carriers to bill and collect carrier common line access charges. Section 69.604(a) of our rules presently requires that NECA bill and collect carrier common line charges.[1] In response to petitions filed by NECA, we waived this requirement for the first two "access years," [2] and pursuant to these waivers, exchange carriers, not NECA, have been billing and collecting carrier common line charges since May 1984, when the access charge tariffs first became effective. The NECA rulemaking petition sought, in effect, to make the billing and collection procedure authorized by these waivers a permanent part of the access charge rules. After receiving comments that overwhelmingly supported the NECA proposal, we issued a Notice of Proposed Rulemaking on October 17, 1985, that sought comments on amending those rules in accordance with the NECA request.[3]

2. Comments were filed by the Ameritech Operating Companies ("Ameritech"), BellSouth Corporation on behalf of South Central Bell Telephone Company and the Southern Bell Telephone Company (collectively, "BellSouth"), Mountain States Telephone and Telegraph Company, Northwestern Bell Telephone Company, and the Pacific Northwest Bell Telephone Company (collectively, "US West"), NYNEX Telephone Companies ("NYNEX"), Pacific Bell Telephone Company and the Nevada Bell Telephone Company ("Pacific"), Southwestern Bell Telephone Company ("Southwestern"), and the United States Telephone Association ("USTA"). Reply comments were filed by the GTE Telephone Operating Companies ("GTE"). Without exception, the initial comments supported the NECA proposal. In general, the comments noted: (1) That resources would be wasted if NECA were to expend resources for billing and collection that replicated existing exchange carrier billing and collection functions; and (2) that the advent of optional alternative carrier common line tariffs could conceivably lead to the anomalous result that NECA would be billing and the collecting carrier common line charges for some exchange carriers but not for others.

3. In a reply that exceeded the scope of comments that had been filed by other parties,[4] GTE contended that we should retain our billing and collection rules [5] to accomodate concerns that GTE has concerning the continued "viability of the NTS pool" should we permit alternative plans for recovery of non-traffic-sensitive costs filed by number of exchange carriers to go into effect.[6] GTE, however, did not provide a convincing explanation as to how the "viability" of the NECA pooling process would be adversely affected by altering the rules concerning which entity (*i.e.*, NECA or the exchange carrier) bills and collects the carrier common line charge. The obligation of each exchange carrier to the NECA pool is not altered by the change in the rules proposed. Furthermore, GTE does not respond to the arguments uniformly made in the first-round comments that requiring NECA to bill and collect carrier common line charges would be extremely burdensome on NECA and carriers with little or no gain in the pooling process. Indeed, GTE appears to agree with these contentions at certain parts of its reply. For example, it states that, with a per minute NTS recovery mechanism, it is "impossible for NECA to serve as the central billing agent.[7] In brief, GTE's reply comments do not contain any probative evidence or argument that would support a conclusion that the present billing and collection rules should be retained. On balance, we conclude that the record more than adequately supports the need to eliminate the requirement that NECA bill and collect carrier common line charges.

4. Accordingly, it is ordered, pursuant to sections 1, 4(i)–(j), and 201–205 of the Communications Act of 1934, 47 U.S.C. 151, 154(i)–(j), 201–205 (1984), that the rules of the Federal Communications Commission are modified as set forth in Appendix A, effective April 7, 1986.

5. It is further ordered That the Secretary shall cause this Report and Order to be published in the Federal Register.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Rules Amendments

Part 69 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 69—ACCESS CHARGES

1. The authority citation for Part 69 continues to read:

Authority: Secs. 4, 201, 202, 203, 205, 218, 403, 48 Stat. 1066, 1070, 1072, 1077, 1094, as amended, 47 U.S.C. 154, 201, 202, 203, 205, 218, 403, unless otherwise noted.

2. Section 69.601 is amended by revising paragraph (b) to read as follows:

§ 69.601 Exchange carrier association.

* * *

(b) All telephone companies that participate in the distribution of Carrier Common Line revenues shall be deemed to be members of such Association.

3. Section 69.604 is revised in its entirety to read as follows:

---

[1] Section 69.604(a) of the Commission's rules, 47 CFR 69.604(a) (1984).

[2] In the Matter of MTS and WATS Market Structure (CC Docket No. 78–72, Phase I) Order Granting Waiver, FCC 84–189 (released May 2, 1984); In the Matter of MTS and WATS Market Structure (CC Docket No. 78–72, Phase I) Order Granting Waiver, CC 27–18 (released February 22, 1985). The first waiver expired on June 1, 1985, and the second waiver will expire on June 1, 1986.

[3] Notice of Proposed Rulemaking in CC Docket No. 78–72, Phase I ("Notice"), FCC 85–552 (released October 17, 1985). *See* Appendix A, *infra*, for the text of the proposed revisions to Part 69 of our rules.

[4] *See* § 1.415(c)–(d) of the Commission's rules, 47 CFR 1.415(c)–(d) (1984).

[5] GTE Reply Comments at 2.

[6] *Id.* at 5–6. *See* §§ 1.401, 1.411 of the Commission's rules, 47 CFR 1.401, 1.411 (1984).

[7] GTE Reply Comments at 3. GTE is apparently proposing in a different proceeding that we amend our rules to provide that the entire carrier common line revenue requirement be recovered from interexchange carriers on a flat-rate basis. If we were to adopt such amendments in a rulemaking proceeding, we could consider at that time whether the billing and collection arrangements suggested by GTE are appropriate.

47 CFR Part 97

[PR Docket No. 85–23]

Amendment of the Commission's Rules To Implement the Final Acts of the World Administrative Radio Conference, Geneva, 1979

AGENCY: Federal Communications Commission.

ACTION: Final rules; Order.

SUMMARY: The amateur rules were recently amended in the Report and Order in PR Docket No. 85–23 to complete implementation of the Final Acts of the World Administrative Radio Conference, Geneva, 1979. This document further amends those rules in order to incorporate other rule changes made in the interim in PR Docket No. 85–104, and to correct typographical errors.

EFFECTIVE DATE: These rule changes are effective 0002 UTC March 1, 1986.

ADDRESS: Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: John J. Borkowski, Private Radio Bureau, Washington, DC 20554, (202) 632–4964.

SUPPLEMENTARY INFORMATION: .

List of Subjects in 47 CFR Part 97

Amateur radio, Frequencies, Emissions, Radio.

Order

In the Matter of Amendment of Part 97 of the Commission's Rules to Implement the Final Acts of the World Administrative Radio Conference, Geneva, 1979; PR Docket No. 85–23.

Adopted: February 26, 1986.
Released: February 28, 1986.

1. In the *Report and Order* in this proceeding, 51 FR 2712, January 21, 1986, the Commission adopted rules to complete implementation of the Final Acts of the World Administrative Radio Conference, Geneva, 1979, in the Amateur Radio Service. Subsequently, by *Report and Order* in PR Docket No. 85–104, 51 FR 3785, January 30, 1986, the Commission amended the amateur rules to permit telephony operation in the 7075–7100 kHz frequency band in the Caribbean Insular Areas. The rules adopted in PR Docket No. 85–23 which completely revised the amateur frequency and emissions tables did not include the later rule changes adopted in PR Docket No. 85–104. However, the rule amendments in PR Docket No. 85–23 become effective March 1, 1986, after the rule amendments in PR Docket No. 85–104, which become effective February 28, 1986.

2. By this Order the rules adopted in the *Report and Order* in this proceeding are editorially amended to correctly set forth the status of amateur telephony communications in the 7075–7100 kHz band as modified by the later document in PR Docket. No. 85–104.

3. This item also corrects a typographical error in the Appendix to the *Report and Order* in PR Docket No. 85–23 in the table in new § 97.7(b).

4. This action is taken pursuant to Sections 4(i) and 303(r) of the Communications Act of 1934, as amended (47 U.S.C. 154(i) and 303(r)) and § 0.231(d) of the Commission's rules (47 CFR 0.231(d)). Because these rule amendments which clarify our rules are non-substantive, the notice and comment provisions as well as the effective date requirements of the Administrative Procedure Act are inapplicable.

5. Therefore, it is ordered That the rule amendments set forth in the attached Appendix are adopted effective 0002 UTC March 1, 1986.

6. For further information about this document contact John J. Borkowski, (202) 632–4964.

Federal Communications Commission.

Edward J. Minkel,

Managing Director.

Appendix

PART 97—[AMENDED]

Part 97 of Chapter I of Title 47 of the Code of Federal Regulations, as amended by the *Report and Order* in PR Docket No. 85–23, 51 FR 2712, January 21, 1986, is further amended as follows:

1. The authority citation for Part 97 continues to read:

Authority: 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154,303.

2. The 40 meter band entry in paragraph (b) of § 97.7 is revised to read:

§ 97.7 Frequency privileges.

* * * * *

(b) *Technician class:* * * *

Meter band	*Terrestrial location of the amateur radio station*			Limitations (see para. (g))
	ITU region 1	ITU region 2	ITU region 3	
		Kilohertz		
*	*	*	*	*
40	7050–7075	7100–7150	7050–7075	1, 3, 32
*	*	*	*	*

3. The 7075–7100 kHz entry in paragraph (a) and paragraph (d)(2) of § 97.61 are revised to read:

§ 97.61 Authorized emissions.

(a) *Kilohertz.*

Frequency band (kHz)	Emissions	Limitations (see paragraph (d))
* * *	*	*
7075–7100	A1A, F1B	1, 2
* * *	*	*

(d) *Limitations:*

(1) * * *

(2) Amateur stations located in Regions 1 and 3, and amateur stations located within Region 2 which are west of 130 degrees West longitude or south of 20 degrees North latitude may also use A3E, F3E, G3E, H3E, J3E and R3E emissions.

BILLING CODE 6712-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 642

[Docket No. 60339-6039]

Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: The Secretary of Commerce (Secretary) issues this notice to close the commercial fishery for king mackerel from the Gulf of Mexico migratory group in the fishery conservation zone (FCZ). The Director, Southeast Region, NMFS (Regional Director), has determined that the commercial allocation of 1.66 million pounds has been exceeded. This action will ensure that the commercial allocation for king mackerel from the Gulf migratory group is not further exceeded during the current fishing year for this group.

EFFECTIVE DATE: Closure is effective at 2400 hours local time, March 12, 1986, through June 4, 1986.

FOR FURTHER INFORMATION CONTACT: Donald W. Geagan, 813–893–3722.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic (FPM) was developed by the Gulf of Mexico and South Atlantic Fishery Management Councils under the authority of the Magnuson Fishery Conservation and Management Act, and is implemented by regulations appearing at 50 CFR Part 642. Amendment 1 to the FMP went into effect on September 22, 1985 (50 FR 34840, August 28, 1985). An emergency rule amending these regulations became effective on March 6, 1986).

Amendment 1 established separate allocations for the Gulf and Atlantic migratory groups of king mackerel. The emergency rule implemented a total allowable catch of 5.20 million pounds for the Gulf migratory group of king mackerel to protect this fishery which has been depleted to the point nearing collapse. The emergency rule at § 642.21(f) further specified the commercial allocation for the Gulf migratory group of king mackerel for the current fishing year—through June 30, 1986—as 1.66 million pounds.

The Secretary is required under § 642.22 to close any segment of the king or Spanish mackerel fishery when its annual allocation or quota has been harvested, by publishing a notice in the **Federal Register**. The Regional Director has determined, based on the most recently reported catch figures, that the commercial allocation for the Gulf migratory group of king mackerel has been harvested. Hence, commercial fishing for king mackerel from the Gulf migratory group must cease at 2400 hours local time, March 12, 1986.

The closure will remain in effect until the end of the current fishing year for the Gulf migratory group of king mackerel (June 30, 1986), or until the emergency regulations lapse, whichever occurs first.

During the period of the closure, the purchase, barter, trade, and sale of Gulf migratory group king mackerel taken from the FCZ, including the sale of fish harvested by persons fishing under the bag limit, is prohibited. (This prohibition does not apply to trade in king mackerel harvested, landed, and bartered, traded or sold prior to the closure and held in cold storage by dealers and processors.) In addition, vessels permitted under § 642.4 are prohibited from fishing under the recreational bag limit during the period of the closure. Finally, fishing with purse seines for Gulf migratory group king mackerel is prohibited during the period of the closure.

This action is required by 50 CFR 642.22, and complies with the procedures of Executive Order 12291.

Authority: 16 U.S.C. 1801 *et. seq.*

Proposed Rules

Federal Register
Vol. 51, No. 51
Monday, March 17, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Parts 1901, 1924, and 1944

Planning and Performing Construction and Other Development

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to revise its regulation for planning and performing construction and other development work. The revision proposes a change in the basic structure of FmHA's Minimum Property Standards (MPS), revision of the use of insured warranties for new construction financed by FmHA under the Single Family Housing program, and the addition of classifications for Multi-Family residential rehabilitation work. Other editorial changes are also included.

The proposed "development standards" action implements the Agency's authority to determine and prescribe the standards for adequate housing under section 509 (a) of the Housing Act of 1949.

The circumstance requiring this action is enactment of the Housing and Urban Rural Recovery Act of 1983, Pub. L. 98–181, which mandates FmHA to revise its housing standards. The intended effect is to comply with Pub. L. 98–181 and provide safe, sanitary and decent housing for eligible families in rural areas.

The intended effect of the action to revise procedures pertaining to the use of insured 10-year warranties is to clarify criteria for the acceptability determination of warranty companies.

The addition of classifications for Multi-Family residential rehabilitation is to assure that buildings rehabilitated or repaired will meet appropriate levels of quality or performance comparable to those levels prescribed by the Secretary of HUD.

DATE: Comments must be received on or before May 16, 1986.

ADDRESS: Submit written comments in duplicate to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6348, South Agriculture Building, 14th and Independence Avenue, SW., Washington, DC 20250. All written comments made pursuant to this notice will be available for public inspection at the above address.

The collection of information requirements contained in this rule have been submitted to OMB for review under section 3504(h) of the Paperwork Reduction Act of 1980. Submit comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Farmers Home Administration, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Joyce M. Halasz, Loan Specialist, Single Family Housing Processing Division, Farmers Home Administration, USDA, Room 5346, South Agriculture Building, Washington, DC 20250, Telephone: 202–382–1489.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under USDA procedures established in Departmental Regulation 1512–1 which implements Executive Order 12291 and has been classified as "nonmajor." This action will result in an annual effect on the economy of less than $100 million and will neither result in a major increase in cost or prices, not adversely affect competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. There is no impact on proposed budget levels, and funding allocations will not be affected because of this action.

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that it does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Evinronmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

The FmHA programs and projects which are affected by this instruction are subject to intergovernmental consultation in the manner delineated in 7 CFR Part 1940, Subpart J, "Intergovernmental Review of Farmers Home Administration Programs and Activities."

The Catalog of Federal Domestic Assistance titles and numbers affect are:

Emergency Loans—10.404;
Farm Labor Housing Loans and Grants—10.405;
Farm Ownership Loans—10.407;
Very Low and Low Income Housing Loans—10.410;
Rural Housing Site Loans—10,411;
Rural Rental Housing Loans—10.415;
Soil and Water Loans—10.416;
Very Low Income Housing Repair Loans and Grants—10.417; and
Rural Self-Help Housing Technical Assistance—10.420.

1. General

The Housing and Urban-Rural Recovery Act of 1983, Pub. L. 98–181, amends section 509 (a) and section 515 of the Housing Act of 1949 and requires FmHA to revise its minimum property standards. The proposed regulation contains the requirements under which residential buildings shall be constructed in accordance with: (1) The minimum standards prescribed by the Secretary of Agriculture, or (2) the minimum standards prescribed by the Secretary of Housing and Urban Development (HUD), or (3) the minimum standards contained in any of the voluntary national model building codes, or (4) in the case of manufactured housing, the standards prescribed under Title VI of the Housing and Community Development Act of 1974.

The proposed regulation also contains the requirements under which, except for substantial rehabilitation, existing buildings shall be rehabiliated or repaired to meet appropriate levels of quality or performance comparable to those levels prescribed by the Secretary of HUD, but the rehabilitation or repair work, or the remainder of the property shall not be required to comply with new construction standards.

The thermal performance standards prescribed in Exhibit D of Subpart A of Part 1924 are consistent with the

standards pursuant to section 526 of the National Housing Act and, therefore, are not revised in this action.

2. Discussion

(i) The proposed minimum development standards prescribed by the Secretary of Agriculture are the standards contained in: (1) State adopted building codes which are based on or comparable to one of the voluntary model building codes, or (2) the voluntary model building code identified by FmHA as being the most prevalent and appropriate in the state. The minimum standards prescribed by the Secretary of HUD are the standards contained in (1) 24 CFR Part 200, Subpart S, §§ 200.926 and 200.926 a-e for One and Two-Family Dwellings, or (2) 24 CFR Part 200, Subpart S §§ 200.929(b)(2), 200.925a, 200.925b, 200.925c and Appendix A to Part 200 for Multi-Family Housing. The voluntary national model building codes are: (1) One and Two-Family Dwelling Code published by the Council of American Building Officials (CABO), (2) Basic Building Code published by the Building Officials and Code Administrators (BOCA), (3) Standard Building Code published by the Southern Standard Building Code Congress International (SBCCI), and (4) Uniform Buildings Code published by the International Conference of Building Officials (ICBO). The minimum standards for mobile/manufactured housing are contained in the HUD Manufactured Home Construction and Safety Standards (MHCSS) and the requirements contained in the proposed Exhibit J of Subpart A of Part 1924. Rural rental housing and related facilites being substantially rehabilitated are required to comply with the standards for new construction. Rural rental housing and related facilities being moderately rehabilitated are required to comply with applicable and existing laws, ordinances, codes, and regulations related to health, safety and welfare, and should conform to FmHA quality and performance criteria for moderate rehabilitation.

(ii) Section 1924.5(d)(1) describes the use of FmHA Manual of Acceptable Practices (MAP) Vol. 4930.1. FmHA believes the information contained in the manual is beneficial in clarifying construction techniques and practices.

(iii) Section 1924.5(d)(1)(i) describes the procedure and criteria used for selecting a set of standards for a proposed project. The project applicant or recipient of a Rural Housing conditional commitment, as defined in Subpart A of 1944, has the authority to make the selection. The regulation offers alternative minimum standards for development work as mandated by the Housing and Urban-Rural Recovery Act of 1983, Pub. L. 98–181, which are identified as "development standards." The inclusion of the various standards and codes in the term "development standards" simplifies references made in other regulations.

(iv) Section 1924.5(d)(1)(i)(E)(1) describes the criteria for determining the standards to be prescribed by the Secretary of Agriculture. The minimum standards are requirements contained in a building code that is adopted by a state and is: (1) Directly based on one of the voluntary national model building codes, or (2) determined by the Administrator to be equivalent to one of the voluntary national model building codes, or, in areas where such a code does not exist, are the requirements contained in the voluntary national model building code that is determined by the FmHA State Director to be the most prevalent and appropriate for the area. FmHA believes this criteria eliminates the confusion and difficulties often encountered when a facility is required to comply with more than one set of minimum standards, and utilizes standards that are most appropriate for the area's building conditions and likely to be most familiar to the local designers and builders.

(v) Section 1924.5(d)(1)(ii) refers to Guide 2, "FmHA Design Guide," for planning development work. The information contained in the guide is beneficial in providing good planning ideas for liveability and marketability and other elements to consider when determining property value. This guide will be available in any FmHA office.

(vi) Section 1924.5(d)(1)(iii) requirs the construction of new residential properties for permanent occupancy to comply with § 1924.5(d)(1) and the development standards, as discussed in sections (iii) and (iv) above.

(vii) Section 1924.5(d)(1)(iv) redefines the minimum standards for the rehabilitation of existing buildings. Substantial rehabilitation is required to comply with § 1924.5(d)(1) and the development standards, as discussed in sections (iii) and (iv) above. Moderate rehabilitation is required to comply with § 1924.5(d)(1) and should meet the criteria contained in the referenced Guide 3, "Quality and Performance Criteria for Moderate Rehabilitation." The information contained in the guide is beneficial for planning and performing moderate rehabilitation work and will be available in any FmHA office. Exhibit K of Subpart A of Part 1924 is added to define the various classifications of rehabilitation work.

(viii) Section 1924.5(d)(1)(v) redefines the minimum standards, as discussed in sections (iii) and (iv) above, for housing repairs.

(ix) Section 1924.5(d)(1)(vi) redefines the minimum standards, as discussed in sections (iii) and (iv) above, for farm labor housing.

(x) Section 1924.5(d)(vii) relocates criteria for the design and location of farm buildings.

(xi) Section 1924.5(d)(2) requires the identification of the applicable development standards to be on the drawings and specifications for proposed development work that must comply with those standards prescribed in § 1924.5(d)(1). This requirement is necessary to eliminate confusion on which minimum standards to reference and enforce during the project review process.

(xii) Section 1924.5(f)(1)(iii) requires that the drawings and specifications for development work must comply with applicable development standards, as prescribed in § 1924.5(d)(1), be certified by a qualified individual as to their conformity to the standards identified on the documents as prescribed in § 1924.5(d)(2). The regulation includes general criteria necessary for an individual to be qualified to certify documents, and also identifies the minimum amount of information that must be included in the certification statement. This certification requirement is necessary for the Agency to be assured that the proposed development work will conform to the applicable development standards.

(xiii) The implementation of other development standards to replace FmHA's present Minimum Property Standards (MPS) will necessitate amendments to several Parts of Chapter XVIII, Title 7, Code of Federal Regulations. These amendments will consist of conforming changes and cross references in numerous FmHA loan making and loan servicing regulations since development standards are relied on in several FmHA decision making processes. All FmHA regulations that refer to MPS will be amended to reference the applicable development standard. These changes will be addressed in the final rule publication, but are not included in this proposed rule since these changes are only administrative in nature.

3. Alternatives and Expected Effects

(i) Minimum Standards Prescribed by the Secretary of Agriculture:

Alternative No. 1: Retain the Minimum Property Standards (MPS), Volumes 4900.1 and 4910.1 that were in effect on September 1, 1981.

The retention of the standards, which are most familiar to the Agency, would require a major effort for continued maintenance of the many items contained within the standards. The standards, by name and format, are very similar to those prescribed by the Secretary of HUD and, therefore, likely to cause confusion to the public. Portions of these standards are inconsistent with the policy to deregulate standards on liveability and marketability.

Alternative No. 2: Adopt the Minimum Property Standards (MPS) prescribed by the Secretary of HUD.

Adoption of these standards would require Agency field staff to become highly familiar with multiple standards that would include the local building codes which are approved by HUD and used in conjunction with HUD MPS. Also, the Agency would be dependent upon HUD for maintenance of the standards. Since most local building codes are based upon a voluntary national model building code, it is unlikely that an MPS/local building code combination would be used in lieu of a voluntary national model building code.

Alternative No. 3: Adopt one of the voluntary national model building codes for nationwide use.

The adoption of one building code would minimize the impact on the Agency's field staff. The Agency would depend on the publisher for maintenance of the code. None of the codes, however, have been determined to satisfactorily address the building conditions in every area of the Nation. Also, conflicts in the standards between this code and locally adopted codes could exist, or develop in the future.

Alternative No. 4: Adopt all local building codes.

The adoption of all local building codes would minimize the impact on developers and builders. However, it would require agency field staff to become highly familiar with the many local codes and would be extremely difficult to manage at the state and national level. The adequacy of the local building codes would not be known without a major effort to evaluate and compare each code with national standards and policies.

Alternative No. 5: Publish a new set of minimum property standards.

The publication of a new set of minimum property standards would require a major agency effort. The time and effort to familiarize the public and field staff with the standards and to maintain their application to current practice would be significant. Also a large percentage of any new standards developed would be duplication of standards currently in existence.

Alternative No. 6: Adopt state building codes that are based upon or comparable to one of the voluntary national model building codes.

The adoption of these codes, which are already being enforced by most jurisdictions, would minimize the impact on developers and builders. Also, field staff would need to become familiar with only one new code in each state.

Alternative No. 6 was selected for prescribing a set of Minimum Standards for adequate housing.

(ii) Minimum Standards for Moderate Rehabilitation

Alternative No. 1: Adopt the standards prescribed by the Secretary of HUD.

The adoption of HUD standards, which are basically in the form of guidelines for local jurisdictions to develop their own standards, would require Agency field staff to become highly familiar with the contents and implementation of those standards in addition to the local codes in existence. The effort necessary for local jurisdictions to develop prescriptive standards based upon these guidelines would be very time consuming and difficult for FmHA to monitor.

Alternative No. 2: Publish a new set of minimum prescriptive standards.

The publication of minimum standards for moderate rehabilitation would likely be a manor agency effort due primarily to the extreme difficulty in addressing the many conditions that could exist in such work. Complete and accurate prescriptive standards would likely be quite extensive. Conflicts are also likely to occur with existing local codes.

Alternative No. 3: Adopt the appropriate sections of State Building Codes that are based upon or equivalent to the Voluntary National Model Building Codes.

The adoption of the code sections which pertain to moderate rehabilitation would be infeasible because of the incompatibility of terminology with FmHA loan making procedures. Also, the information necessary to determine rehabilitation classification, as defined in the model codes, would not be available at the time of loan application processing.

Alternative No. 4: Publish a new set of optional performance standards.

The publication of a new set of optional performance standards for moderate rehabilitation would require minimal agency effort. The optional performance standards would be a guide for use by FmHA in evaluating rehabilitation proposals and used by design consultants in planning development work. The optional criteria would be less stringent than those for new construction. The standards would address performance rather than finite specifications to accommodate flexibility and avoid oversights.

Alternative No. 4 was selected for prescribing a set of Minimum Standards for moderate rehabilitation of residential properties.

(iii) Identification of Applicable Minimum Standards

Alternative No. 1: Maintain existing regulations which do not include requirements for identifying the minimum standards to be applied for a specific proposal or project.

Specific proposals and projects will be required to comply with any of several different sets of minimum standards. If the applicable standards are not identified, the Agency would not know which standards to reference and enforce during the review process. This would likely create delays and the potential for imposing inconsistent and inappropriate design requirements.

Alternative No. 2: Amend regulations to require the identification of the applicable minimum standards on the drawings and specifications for a specific proposal or project.

Compliance with this requirement would result in a clearer understanding for all parties involved throughout the application processing of which minimum standards are applicable. Also, the drawings and specifications could be prepared and reviewed in a more orderly and consistent process.

Alternative No. 2 was selected for the identification of applicable minimum standards.

(iv) Certification of Drawings and Specifications

Alternative No. 1: Maintain existing regulations which do not include requirements for certifying drawings and specifications for their compliance with applicable minimum standards.

Specific proposals and projects will be required to comply with any of several different sets of minimum standards. Agency field staff would need to become highly proficient in the various alternative standards to make comprehensive and accurate reviews of the drawings and specifications. Extensive training would be necessary to prepare the staff for the increased complexity of this task.

Alternative No. 2: Amend regulations to require the certification of drawings and specifications for compliance with applicable minimum standards.

Compliance with this requirement would result in a decreased burden on agency field staff to be highly proficient in the various alternative standards. The burden would be transferred to a qualified individual who is already highly skilled and knowledgeable of the standards being applied. The Agency's acceptance of the drawings and specifications would be based primarily on this certification.

Alternative No. 2 was selected for the certification of drawings and specifications.

4. Insured 10-years Warranty Revisions

Present regulations authorize FmHA field personnel to accept interim construction inspections accepted by a warranty company approved by the National Office. Shortly after that final rule was published, several warranty companies requested approval, resulting in our awarness of additional variations in the types of plans offered and in the types of companies issuing them. That action invalidated the conditions set forth by the existing regulation and, therefore, new conditions were needed to be able to accept those warranty plans.

The additional information needed was provided to the field by Administrative Notice, to be incorporated into the instruction in the next revision. In addition, it was detemined that State Directors should have the authority to review a warranty company's qualifications and determine its acceptability.

To accomplish these objectives FmHA proposes revisions to the present regulation which include: Adding Exhibit L, "Insured 10-year Home Warranty Plan Requirements," to Subpart A of Part 1924, to facilitate acceptability determinations of insured 10-year home warranty plans at the State Office level.

Exhibit L consolidates warranty plan information currently found in several different places in the existing regulation and incorporates information previously provided to the field by Administrative Notice. It provides the reasons a formal determination of acceptability is needed, the different types of warranty companies, warranty plan features required for a determination of acceptability and the procedures for requesting a determination.

It also outlines the review and acceptance authority for state plans and insured warranty companies by FmHA State Directors and for risk retention groups, because of their different structure and multi-state authority, by the National Office. Information is also provided clarifying field responsibilities in monitoring warranty performance.

The reason for this action is to improve procedure and to clarify guidelines for the acceptability determination of warranty companies. Also, as a result of this action a cost effective savings is anticipated in the more timely review of warranty plans at the State level.

List of Subjects

7 CFR Part 1901

Civil rights, Compliance reviews, Fair housing, Minority groups.

7 CFR Part 1924

Agriculture, Claims, Construction complaints, Construction defects, Construction management, Construction and repair, Energy conservation, Housing, Loan Programs-Agriculture, Loan Programs-Housing and Community Development, Low- and Moderate-Income Housing.

7 CFR Part 1944

Home improvement loan program-Housing and Community development, Low- and moderate-income housing-Rental, Mortgages, Rural housing, Subsidies.

Therefore, FmHA proposes to amend Chapter XVIII, Title 7, Code of Federal Regulations as follows:

PART 1901—PROGRAM RELATED INSTRUCTIONS

1. The authority citation for Part 1901 is added to read as follows and all other authority citations throughout Part 1901 are removed.

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

2. Subpart E Exhibit C is revised to read as follows:

Exhibit C—FmHA Financed Contract

To: Area Director, Office of Federal Contract Compliance Program, U.S. Department of Labor (DOL) (Insert address for your DOL area, from Exhibit E, FmHA Instruction 1901–E)

We submit the following information relative to a construction contract in excess of $10,000:

1. Contractor's name: ______
Address: ______
Telephone No.: ______
Employer's identification No.: ______

2. Contract for: $______
Starting Date: ______
Completion Date: ______
Contract No.: ______
City: ______
DOL Region: ______

3. The authority citation for Part 1924 is revised to read as follows and all authorities are removed:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

4. Subpart A is revised to read as follows:

PART 1924—CONSTRUCTION AND REPAIR

Subpart A—Planning and Performing Construction and Other Development

Sec.
1924.1 Purpose.
1924.2 [Reserved]
1924.3 Authorities and responsibilities.
1924.4 Definitions.
1924.5 Planning development work.
1924.6 Performing development work.
1924.7 [Reserved]
1924.8 Development work for modular/panelized housing units.
1924.9 Inspection of development work.
1924.10 Making changes in the development plan.
1924.11 District Director's review of incomplete development.
1924.12 [Reserved]
1924.13 Supplemental requirements for more complex construction.
1924.14—1924.50 [Reserved]
Exhibit A—Breakdown of dwelling costs for estimating partial payments.
Exhibit B—Requirements for modular/panelized housing units.
Exhibit C—List of required drawings and specifications.
Exhibit D—Thermal performance construction standards.
Exhibit E—Preconstruction conference.
Exhibit F—Payment bond.
Exhibit G—Performance bond.
Exhibit H—Prohibition of lead-based paints.
Exhibit I—Guidelines for seasonal farm labor housing.
Exhibit J—[Reserved]
Exhibit K—Classifications for Multi-family Residential Rehabilitation work.
Exhibit L—Insured 10-Year Home Warranty Plan Requirements.

Subpart A—Planning and Performing Construction and Other Development

§ 1924.1 Purpose.

This subpart prescribes the basic Farmers Home Administration (FmHA), policies, methods, and responsibilities in the planning and performing of construction and other development work for insured Rural Housing (RH), insured Farm Ownership (FO), Soil and Water (SW), single unit Labor Housing (LH), Recreation (RL), and Emergency (EM) loans for individuals. It also

VOL 51
ISS 51
MR 17
1986
UMI

provides supplemental requirements for Rural Rental Housing (RRH) loans, Rural Cooperative Housing (RCH) loans, multiunit (LH) loans and grants, and Rural Housing Site (RHS) loans.

§ 1924.2 [Reserved]

§ 1924.3 Authorities and responsibilities.

The County Supervisor and District Director are authorized to redelegate, in writing, any authority delegated to them in this subpart to the Assistant County Supervisor and Assistant District Director, respectively, when determined to be qualified. FmHA Construction Inspectors, District Loan Assistants, and County Office Assistants are authorized to perform duties under this subpart as authorized in their job descriptions.

§ 1924.4 Definitions.

(a) *Construction.* Such work as erecting, repairing, remodeling, relocating, adding to or salvaging any building or structure, and the installation or repair of, or addition to, heating and electrical systems, water systems, sewage disposal systems, walks, steps, driveways, and landscaping.

(b) *Contract documents.* The borrower-contractor agreement, the conditions of the contract (general, supplementary, and other), the drawings, specifications, warranty information, all addenda issued before executing the contract, all approved modifications thereto, and any other items stipulated as being included in the contract documents.

(c) *Contractor.* The individual or organization with whom the borrower enters into a contract for construction or land development, or both.

(d) *County Supervisor and District Director.* In Alaska, for the purpose of this subpart, "County Supervisor" and "District Director" also mean "Assistant Area Loan Specialist" and "Area Loan Specialist," respectively. The terms also include other qualified staff who may be delegated responsibilities under this subpart in accordance with the provisions of Subpart F of Part 2006 (available in any FmHA office).

(e) *Date of commencement of work.* The date established in a "Notice to Proceed" or, in the absence of such notice, the date of the contract or other date as may be established in it or by the parties to it.

(f) *Date of substantial completion.* The date certified by the Project Architect/Engineer or County Supervisor when it is possible, in accordance with any contract documents and applicable State or local codes and ordinances, and the FmHA approved drawings and specifications, to permit safe and convenient occupancy and/or use of the buildings or other development.

(g) *Development.* Construction and land development.

(h) *Development standards.* Any of the following codes and standards:

(1) A standard adopted by FmHA for each state in accordance with §1924.5(d)(1)(i)(E) of this subpart.

(2) *Voluntary national model building codes (model codes).* Nationally recognized codes which address the health and safety aspects of buildings and related structures. They include:

(i) CABO One and Two family Dwelling Code, published by the Council of American Building Officials; supplemented by the Electrical Code for One and Two Family Dwellings, NFPA 70A, published by the National Fire Protection Association.

(ii) BOCA Basic/National Building Code, published by the Building Officials and Code Administrators International, Inc.

(iii) Standard Building Code, supplemented by the Standard Mechanical Code and Standard Plumbing Code, all published by the Southern Building Code Congress International, Inc., and supplemented by the National Electrical Code published by the National Fire Protection Association.

(iv) Uniform Building Code, supplemented by the Uniform Mechanical Code and Uniform Plumbing Code, all published by the International Conference of Building Officials; and supplemented by the National Electrical Code published by the National Fire Protection Association.

(3) *Minimum Property Standards (MPS).* The Department of Housing and Urban Development (HUD) Minimum Property Standards (MPS). They include:

(i) MPS for One and Two Family Dwellings, HUD Handbook 4900.1 [24 CFR Part 200, Subpart S, § 200.929(b)(1)]

(ii) MPS for Multi-family Housing, HUD Handbook 4910.1 [24 CFR Part 200, Subpart S, § 200.929(b)(2)].

(i) *Identity of interest.* Identity of interest will be construed as existing between the applicant (the party of the first part) and general contractors, architects, engineers, attorneys, subcontractors, material suppliers, or equipment lessons (parties of the second part) under any of the following conditions:

(1) When there is any financial interest of the party of the first part in the party of the second part. The providing of normal professional services by architects, engineers, attorneys or accountants with a client-professional relationship shall not constitute an identity of interest.

(2) When one or more of the officers, directors, stockholders or partners of the party of the first part is also an officer, director, stockholder, or partner of the party of the second part.

(3) When any officer, director, stockholder or partner of the party of the first part has any financial interest whatsoever in the party of the second part.

(4) When the party of the second part advances any funds to the party of the first part.

(5) When the party of the second part provides and pays on behalf of the party of the first part the cost of any legal services, architectural services or engineering services other than those of a surveyor, general superintendent, or engineer employed by a general contractor in connection with obligations under the construction contract.

(6) When the party of the second part takes stock or any interst in the party of the first part as part of the consideration to be paid them.

(7) When there exist or come into being any side deals, agreements, contracts or undertakings entered into thereby altering, amending, or cancelling any of the required closing documents except as approved by FmHA.

(j) *Land development.* Includes items such as terracing, clearing, leveling, fencing, drainage and irrigation systems, ponds, forestation, permanent pastures, perennial hay crops, basic soil amendments, pollution abatement and control measures, and other items of land improvement which conserve or permanently enhance productivity. Also, land development for structures includes the applicable items above, and items such as rough and finish grading, retaining walls, water supply and waste disposal facilities, streets, curbs and gutters, sidewalks, entrancewalks, driveways, parking areas, landscaping and other related structures.

(k) *Mechanic's and materialmen's liens.* A lien on real property in favor of persons supplying labor and/or materials for the construction for the value of labor and/or materials supplied by them. In some jurisdictions, a mechanic's lien also exists for the value of professional services.

(l) *Mobile/manufactured housing.* Housing, constructed of one or more factory-built sections, which includes the plumbing, heating and electrical systems contained therein, which is built to comply with the Federal Mobile Home Construction and Safety Standards, and which is designed to be used with or without a permanent foundation.

(m) *Modular/panelized housing.* Housing, constructed of one or more factory-built sections, which, when completed, meets or exceeds the requirements of one or more of the recognized development standards for site-built housing, and which is designed to be permanently connected to a site-built foundation.

(n) *Project representative.* The architect's or owner's representative at the construction site who assists in the administration of the construction contract. When required by FmHA, a full-time project representative shall be employed.

(o) *Technical services.* Applicants are responsible for obtaining the services necessary to plan projects including analysis of project design requirements, creation and development of the project design, preparation of drawings, specifications and bidding requirements, and general administration of the construction contract.

(1) Architectural services. The services of a professionally qualified person or organization, duly licensed and qualified in accordance with State law to perform architectural services.

(2) Engineering services. The services of a professionally qualified person or organization, duly licensed and qualified in accordance with State law to perform engineering services.

(p) *Warranty.* A legally enforceable assurance provided by the builder (warrantor) to the owner and the FmHA indicating that the work done and materials supplied conform to those specified in the contract documents and applicable regulations. For the period of the warranty, the warrantor agrees to repair defective workmanship and repair or replace any defective materials at the expense of the warrantor.

§ 1924.5 Planning development work.

(a) *Extent of development.* For an FO loan, the plans for development will include the items necessary to put the farm in a livable and operable condition consistent with the planned farm and home operations. For other types of loans, the plans will include those items essential to achieve the objectives of the loan or grant as specified in the applicable regulation.

(b) *Funds for development work.* The total cash cost of all planned development will be shown on Form FmHA 1924–1, "Development Plan," except Form FmHA 1924–1 may be omitted when (1) all development is to be done by the contract method, (2) adequate cost estimates are included in the docket, and (3) the work, including all landscaping, repairs, and site development work, is completely described on the drawings, in the specifications, or in the contract documents. Sufficient funds to pay for the total cash cost of all planned development must be provided at or before loan closing. Funds to be provided may include loan proceeds, any cash to be funished by the borrower, proceeds from cost sharing programs such as Agricultural Stabilization and Conservation Service (ASCS) and Great Plains programs or proceeds from the sale of property in accordance with paragraph (g) of this section.

(c) *Scheduling of development work.* (1) All construction work included in the development plan for RH loans will be scheduled for completion as quickly as practicable and no later than 9 months from the date of loan closing, except for Mutual Self-Help housing where work may be scheduled for completion within a period of 15 months.

(2) Development for Farm Program loans will be scheduled for completion as quickly as practicable and no later than 15 months from the date of loan closing unless more time is needed to establish land development practices in the area.

(d) *Construction.* (1) All new buildings to be constructed and all alterations and repairs to buildings will be planned to conform with good construction practices. The FmHA Manual of Acceptable Practices (MAP) Vol. 4930.1 (available in any FmHA Office), provides suggestions and illustrative clarifications of design and construction methods which are generally satisfactory in most areas. All improvements to the property will conform to applicable laws, ordinances, codes, and regulations related to the safety and sanitation of buildings, Thermal Performance Construction Standards contained in Exhibit D of this subpart and, when required, to certain other development standards described below.

(i) The development standard applicable to a proposal will be selected by the loan applicant or recipient of an RH Conditional Commitment in accordance with the following. The standard selected must:

(A) Relate to the type(s) of building proposed.

(B) Meet or exceed any applicable local or state laws, ordinances, codes and regulations.

(C) Include all referenced codes and standards.

(D) Exclude inapplicable administrative requirements.

(E) Be the current edition(s) of:

(*1*) The development standard adopted by FmHA for use in the state (identified in a State Supplement to this section) in which the development is proposed, in accordance with the following:

(*i*) The adopted development standard shall be the state code(s), if determined by the State Director to be based on one of the model codes defined in § 1924.4(h)(2) of this subpart, or

(*ii*) The adopted development standard shall be the state code(s), if determined by the Administrator to be acceptable, or

(*iii*) The adopted development standard in a state that does not have a code in compliance with paragraph (d)(1)(i)(E)(*1*) (*i*) or (*ii*) shall be the model code defined in § 1924.4(h)(2) that is determined by the State Director to be most prevalent and appropriate for the state, or

(*2*) One of the codes or standards defined in § 1924.4(h) (2) or (3) of this subpart.

(ii) Guide 2, "FmHA Design Guide" of this subpart (available in any FmHA office), includes guidelines for the evaluation of the design features which are not fully addressed in the development standards.

(iii) In new housing, all design, materials and construction will meet or exceed the applicable development standard as provided in paragraph (d)(1)(i) of this section.

(iv) For multifamily residential rehabilitation, as defined in Exhibit K of this Subpart, all substantial rehabilitation work of existing buildings will meet or exceed the applicable development standard. All moderate rehabilitation work should comply with Guide 3, "Quality and Performance Criteria for Moderate Rehabilitation," of this subpart (available in any FmHA office).

(v) The design and construction of housing repairs made with FmHA loan or grant funds will, as near as possible, comply with the applicable development standard.

(vi) Farm labor housing design and construction will comply with the following:

(A) Family projects, where the length of occupancy will be:

(*1*) Year-round, will meet or exceed the applicable development standard.

(*2*) Less than 12 months, but more than 6 months, will be in substantial conformance with the applicable development standard and constructed to facilitate conversion to year-round occupancy standards.

(*3*) Six months or less, may be less than the applicable development

VOL 51
ISS 51
MR 17
1986
UMI

standard but should be constructed in accordance with Exhibit I of this subpart.

(B) Dormitory and other nonfamily type projects, where the length of occupancy will be:

(*1*) More than 6 months, will be in substantial conformance with the applicable development standard and will at least meet or exceed the requirements of the Department of Labor, Bureau of Employment Security (29 CFR 1910.140).

(*2*) Six months or less, will comply with § 1924.5(d)(vi)(A)(3).

(vii) Farm service buildings should be designed and constructed for adaptation to the local area. In designing and locating farm service buildings, consideration will be given to practices recommended by Agriculture Colleges, the Extension Service (ES), Soil Conservation Service (SCS), and other reliable sources.

(2) Adequate drawings, specifications, and estimates will be provided to fully describe the work. Technical data, tests, or engineering evaluations may be required to support the design of the development. The "List of Required Drawings and Specifications," Exhibit C of this subpart, describes the drawings and specifications that are required to be included in the application for building construction, and § 1804.74 of Subpart D of Part 1804 of this chapter (Exhibit A of FmHA Instruction 424.5) describes the drawings that should be included for development of building sites. The specific development standard being used, [if required under paragraph (d)(1) of this section] will be identified on all drawings and specifications.

(3) Whenever possible, the borrower will pay with personal funds any charges made for technical services in connection with the borrower's proposed development. However, most of technical services may be included in the loan as prescribed in the program loan making regulations.

(e) *Land development.* (1) In planning land development, consideration will be given to the practices, including energy conservation measures, recommended by Agricultural Colleges, ES, SCS, or other reliable sources. All land and water development will conform to applicable laws, ordinances, zoning and other applicable regulations including those related to soil and water conservation and pollution abatement. The County Supervisor or District Director also will encourage the applicant to use any cost-sharing and planning assistance that may be available through Agricultural Conservation Programs.

(2) Site and subdivision planning and development should also be guided by the requirements of Subpart D of Part 1804 of this chapter (FmHA Instruction 424.5).

(3) Adequate plans and descriptive material will be provided to fully describe the work.

(i) Plans for land leveling, irrigation, or drainage should include a map of the area to be improved showing the existing conditions with respect to soil, topography, elevations, depth of topsoil, kind of subsoil, and natural drainage, together with the proposed land development.

(ii) When land development consists of, or includes, the conservation and use of water for irrigation or domestic purposes, the information submitted to the County Supervisor will include a statement as to the source of the water supply, right to the use of the water, and the adequacy and quality of the supply.

(f) *Responsibilities for planning development.* Planning construction and land development and obtaining technical services in connection with drawings, specifications, and cost estimates are the sole responsibility of the applicant, with such assistance from the County Supervisor or District Director (whichever is the appropriate loan processing and servicing officer for the type of loan involved), as may be necessary to be sure that the development is properly planned in order to protect FmHA's security.

(1) *Responsibility of the applicant.* (i) The applicant will arrange for obtaining any required technical services from qualified technicians, tradespeople, and recognized plan services, and the applicant will furnish the FmHA sufficient information to describe fully the planned development and the manner in which it will be accomplished.

(ii) When items of construction or land development require drawings and specifications, they will be sufficiently complete to avoid any misunderstanding as to extent, kind, and quality of work to be performed. The applicant will provide the FmHA with one copy of the drawings and specifications. Approval will be indicated by the applicant and acceptance for the purposes of the loan indicated by the County Supervisor or District Director on all sheets of the drawings and at the end of the specifications, and both instruments will be a part of the loan docket. After the loan is closed, the borrower will retain a conformed copy of the approved drawings and specifications, and provide another conformed copy to the contractor. After the work is completed and materials and labor claims have been paid, the County or District Office approved copy may be returned to the borrower. Items not requiring drawings and specifications may be described in narrative form.

(iii) FmHA will accept drawings and specifications only after the documents have been certified in writing as being in conformance with the applicable development standard, if required under paragraph (d)(1) of this section, by a licensed architect, professional engineer authorized building official or other competent code authority. A building permit is not an acceptable certification document.

The following format is suggested for this certification and contains the minimum repesentation acceptable to FmHA:

> Being (*a licensed architect, professional engineer, etc.*) in the State of ——, we are qualified to evaluate the technical sufficiency of construction documents for residential properties."
>
> We have examined the drawings and specifications dated ——, prepared by (*name of firm or individual,* and related to the development of the (*project name and location*).
>
> Based upon this examination, to the best of our knowledge and belief, these documents conform to (*name of development standard*), designated as the development standard for this project.
>
> We further certify that we have no financial interest in or with the borrower or contractor other than in the practice of our profession.

FmHA reserves the right to determine whether or not the certified statement is satisfactory.

(2) *Responsibility of the County Supervisor or District Director.* In accordance with program regulations for loans and grants they are required to process, the County Supervisor or District Director for the sole benefit of FmHA will:

(i) Visit each farm or site on which the development is proposed. For an FO loan, the County Supervisor and the applicant will determine the items of development necessary to put the farm in a livable and operable condition at the outset. Prepare Form FmHA 1924–1, when applicable in accordance with the Forms Manual Insert (FMI) for the form, after a complete understanding has been reached between the applicant and the County Supervisor regarding the development to be accomplished, including the dates each item of

development will be started and completed.

(ii) Notify the loan or grant applicant in writing immediately if, after reviewing the preliminary proposal and inspecting the site, the proposal is not acceptable. If the proposal is acceptable, an understanding will be reached with the applicant concerning the starting date for each item of development.

(iii) Discuss with the applicant the FmHA requirements with respect to good construction and land development practices.

(iv) Advise the applicant regarding drawings, specifications, cost estimates, and other related material which the applicant must submit to the FmHA for review before the loan can be developed. Advise the applicant of the information necessity in the drawings, how the cost estimates should be prepared, the number of sets of drawings, specifications, and cost estimates required, and the necessary for furnishing such information promptly. Advise the applicant that FmHA will provide appropriate specification forms, Form FmHA 1924–2, "Description of Materials." And Form FmHA 1924–3, "Service Building Specifications." The applicant may, however, use other properly prepared specifications.

(v) Advise the applicant regarding publications, plans, planning aids, engineering data, and other technical advice and assistance available through local, State, and Federal agencies, and private individuals and organizations.

(vi) Review the information furnished by the applicant to determine the completeness of the plans, adequacy of the cost estimates, suitability and soundness of the proposed development.

(vii) When appropriate, offer suggestions as to how drawings and specifications might be altered to improve the facility and better serve the needs of the applicant. The County Supervisor or District Director may assist the applicant in making revisions to the drawings. When appropriate, the contract documents will be forwarded to the State architect/engineer for review. For revisions that require technical determinations which FmHA is not able to make, the applicant will be requested to obtain additional technical assistance.

(viii) Provide the applicant with a written list of changes required in the contract documents. The applicant will submit two complete revised (as requested) sets of contract documents, for approval. On one set, the County Supervisor or District Director will indicate acceptance on each sheet of the drawings, and on the cover of the specifications and all other contract documents. At least the date and the initials of the approval official must be shown. On projects where a consulting architect or engineer has been retained, this acceptance will be indicated only after the State Director has given written authorization. The marked set of documents shall be available at the job site at all times for review by FmHA. The second set will become part of the loan docket.

(ix) Review the proposed method of doing the work and determine whether the work can be performed satisfactorily under the proposed method.

(x) Instruct the applicant not to incur any debts prior to loan closing for materials or labor or make any expenditures for such purposes with the expectation of being reimbursed from loan funds.

(xi) Instruct the applicant not to commence any construction nor cause any supplies or materials to be delivered to the construction site prior to loan closing.

(xii) Under certain conditions prescribed in Exhibit H of this subpart, provide the applicant with a copy of the leaflet, "Lead-Based Paint Hazards, Symptoms, Treatment, and Techniques for Eliminating Hazards," which is available in FmHA County Offices, and the warning sheet, "Caution Note on Lead-Based Paint Hazard," which is Attachment 1 of Exhibit H.

(g) *Surplus structures and use or sale of timber, sand, or stone.* In planning the development, the applicant and the County Supervisor or District Director should, when practicable, plan to use salvage from old buildings, timber, sand, gravel, or stone from the property. The borrower may sell surplus buildings, timber, sand, gravel, or stone that is not to be used in performing planned development and use net proceeds to pay costs of performing planned development work. In such a case:

(1) An agreement will be recorded in the narrative of Form FmHA 1924–1 which as a minimum will:

(i) Identify the property to be sold, the estimated net proceeds to be received, and the approximate date by which the property will be sold.

(ii) Provide that the borrower will deposit the net proceeds in the supervised bank account and apply any funds remaining after the development is complete as an extra payment on the loan.

(2) The agreement will be considered by the Government as modifying the mortgage contract to the extent of authorizing and requiring the Government to release the identified property subject to the conditions stated in the agreement without payment or other consideration at the time of release, regardless of whether or not the mortgage specifically refers to Form 1924–1 or the agreement to release.

(3) If the FmHA loan will be secured by a junior lien, all prior lienholders must give written consent to the proposed sale and the use of the net proceeds before the loan is approved.

(4) Releases requested by the borrower or the buyer will processed in accordance with applicable release procedures in Subpart A or Subpart C of Part 1965 of this chapter, as appropriate.

(h) *Review prior to performing development work.* For the sole benefit of FmHA, prior to beginning development work, the County Supervisor or District Director will review planned development with the borrower. Adequacy of the drawings and specifications as well as the estimates will be checked to make sure the work can be completed within the time limits previously agreed upon and with available funds. Items and quantities of any materials the borrower has agreed to furnish will be checked and dates by which each item of development should be started will be checked in order that the work may be completed on schedule. If any changes in the plans and specifications are proposed, they should be within the general scope of the work as originally planned. Changes must be approved and processed in accordance with § 1924.10 of this subpart. The appropriate procedure for performing development should be explained to the borrower. Copies of FmHA forms that will be used during the period of construction should be given to the borrower. The borrower should be advised as of the purpose of each form and at what period during construction each form will be used.

(i) *Time of starting development work.* Development work will be started as soon as feasible after the loan is closed. Except in cases in which advance commitments are made in accordance with Subpart A of Part 1944 of this chapter or according § 1924.13(e)(1)(vi)(A) or § 1924.13(e)(2)(ix) (A) of this subpart, no commitments with respect to performing planned development will be made by the County Supervisor, District Director, or the applicant before the loan is closed. The applicant will be instructed that before the loan is closed, debts should not be incurred for labor or materials, or expenditures made for such purposes, with the expectation of being reimbursed from loan funds except as provided in Subpart A of Part 1943 of this chapter and Subparts A and

VOL 51
ISS 51
MR 17
1986
UMI

E of Part 1944 of this chapter. However, with the prior approval of the National Office, a State Supplement may be issued authorizing County Supervisors to permit applicants to commence welldrilling operations prior to loan closing, provided (1) it is necessary in the area to provide the water supply prior to loan closing, (2) the applicant agrees in writing to pay with personal funds all costs incurred if a satisfactory water supply is not obtained, (3) any contractors and suppliers understand and agree that loan funds may not be available to make the payment, (4) such action will not result under applicable State law in the giving of priority to mechanics and materialmen's liens over the later recorded FmHA mortgage, and (5) FmHA does not guarantee that the cost will be paid.

§ 1924.6 Performing development work.

All construction work will performed by one, or a combination, of the following methods: Contract, borrower, mutual self-help, or owner-builder. All development work must be performed by a person, firm, or organization qualified to provide the service.

(a) *Contract method.* This method of development will be used for all major construction except in cases where it is clearly not possible to obtain a contract at a reasonable or competitive cost. Work under this method is performed in accordance with a written contract. (Conditional commitment construction is not covered under this paragraph).

(1) *Forms used.* Form FmHA 1924–6, "Construction Contract," should be used. However, other contract documents acceptable to the loan approval official and containing the requirements of Subpart E of Part 1901 of this chapter, may be used provided they are customarily used in the area and protect the interest of the borrower and the Government with respect to compliance with items such as the drawings, specifications, payments for work, inspections, completion, nondiscrimination in construction work and acceptance of the work. If needed, the Office of the General Counsel (OGC) will be consulted. The United States (including FmHA) will not become a party to a construction contract or incur any liability under it. Form FmHA 1924–19, "Builder's Warranty," or an insured 10-year home warranty as described in Exhibit L of this subpart, and normal trade warranties on items of equipment will issued to the borrower by the contractor at the completion of:

(i) New Building construction,

(ii) Dwelling rehabilitation by the contract method,

(iii) All cases of newly completed and previously unoccupied dwellings, or

(iv) Construction under conditional commitments issued to builders and sellers.

(2) *Contract provisions.* Contracts will have a listing of attachments and the provisions of the contract will include:

(i) The contract sum.

(ii) The dates for starting and completing the work.

(iii) The amount of liquidated damages to be charged.

(iv) The amount, method, and frequency of payment.

(v) Whether or not surety bonds will be provided.

(vi) The requirement that changes or additions must have prior written approval of FmHA.

(3) *Surety requirements.* (i) Unless an exception is granted in accordance with paragraph (a)(3)(iii) of this section or when interim financing will be used, surety that guarantees both payment and performance in the amount of the contract will be furnished when one or more of the following conditions exist:

(A) The contract exceeds $100,000.

(B) The loan approval official determines that a surety bond appears advisable to protect the borrower against default of the contractor.

(C) The applicant requests a surety bond.

(D) The contract provides for partial payments in excess of the amount of 60 percent of the value of the work in place.

(E) The contract provides for partial payments for materials suitably stored on the site.

(ii) If surety bonds are required the construction contract must indicate that the contractor will furnish properly executed surety bonds prior to the start of any work. Exhibits F and G of this subpart as revised by OGC if necessary to comply with local or State Statutory requirements will be used as the forms of payment bond and performance bond to be provided. Unless noncorporate surety is provided, the surety bonds may only be obtained from a corporate bonding company listed on the current Department of the Treasury Circular 570 (published annually in the Federal Register), as holding a certificate of authority as an acceptable surety on Federal bonds and as legally doing business in the State where the land is located. Noncorporate sureties are not recommended and the State Director will be responsible for determining the acceptability of the individual or individuals proposed as sureties on the bonds. The State Director must determine that an individual or individuals proposed as sureties must have cash or other liquid assets easily convertible to cash in an amount at least equal to 25 percent more than the contract amount in order to be acceptable. The individual(s) will pledge such liquid assets in an amount equal to the contract amount. Fees charged for noncorporate sureties may not exceed fees charged by corporate sureties on bonds of equal amount, and in no case may surety be provided by the applicant or any person or organization with an identity of interest in the applicant's operation. The United States (including FmHA) will incur no liability related in any way to a performance or payment bond provided in connection with a construction contract. FmHA will be named as a co-obligee in the performance and payment bonds unless prohibited by State law.

(iii) When an experienced and reliable contractor cannot obtain payment and performance bonds meeting the surety requirements of paragraph (a)(3)(ii) of this section, the State Director may entertain a request from the applicant for an exception to the surety requirements. The applicant's request must specifically state why the proposed contractor is unable to obtain payment and performance bonds meeting the surety requirements, and why it is financially advantageous for the applicant to award the contract to the proposed contractor without the required bonds. If the applicant's request is reasonable and justified, and if the proposed contractor is reliable and experienced in the construction of projects of similar size, design, scope, and complexity, the State Director may grant an exception to the the surety requirements for loans or grants within the State Director's approval authority and accept one or a combination of the following:

(A) An unconditional and irrevocable letter of credit issued by a lending institution which has been reviewed and approved by OGC. In such cases, the construction contract must indicate that the contractor will furnish a properly executed letter of credit from a lending institution accepable to FmHA prior to the start of any work. The letter of credit must remain in effect until the date of final acceptance of work by the owner and FmHA. In addition, the letter of credit must stipulate that the lending institution, upon written notification by FmHA of the contractor's failure to perform under the terms of the contract, will advance funds up to the amount of the contract (including all FmHA approved contract change orders) to satisfy all prior debts incurred by the contractor in performing the contract

and all funds necessary to complete the work. *Payments may be made to the contractor in accordance with paragraph (a)(12)(i)(C) of this section as if full surety bonds were being provided.*

(B) If a letter of credit satisfying the conditions of paragraph (a)(3)(iii)(A) cannot be obtained, the State Director may accept a deposit in the amount of the contract, into an interest or non-interest bearing supervised bank account. In such cases the construction contract must indicate that the contractor will furnish the required deposit prior to the start of any work and that the funds shall remain on deposit until final acceptance of work by the owner and FmHA. Payments may be made to the contractor in accordance with paragraph (a)(12)(i)(C) of this section as if full surety bonds were being provided.

(C) When the provisions of paragraph (a)(3)(iii) (A) or (B) of this section can be met except that a surety bond, a letter of credit, and/or deposits are not obtainable in full amount of the contract, the State Director may accept an amount less then the full amount of the contract provided all of the following conditions are met:

(*1*) The contractor provides a surety bond, a letter of credit, or deposits in the greatest amount possible, and provides documentation indicating the reasons why amounts exceeding the proposed amount cannot be provided.

(*2*) The applicant agrees to the amount of the surety bond, letter of credit, or deposits proposed, and the State Director determines that the applicant has the financial capability to withstand any financial loss due to default of the contractor.

(*3*) In the opinion of the State Director, the proposed amount and the method of payment will provide adequate protection for the borrower and the Government against default of the contractor.

(*4*) The contract provides for partial payments not to exceed 90 percent of the value of the work in place for that portion of the total contract which is guaranteed by an acceptable surety bond, letter of credit, or deposits, and partial payments not to exceed 60 percent of the value of the work in place for that portion of the total contract which is not guaranteed by surety, letter of credit, or deposits.

Example:

Contractor has a surety bond which guarantees payment and performance in an amount of $150,000 which represents 75 percent of the total contract amount of $200,000. The contractor's first request for payment appears thus:

• value of work in place is $10,000 • payment for work guaranteed by surety=75 percent x $10,000 x 90 percent=	$6,750
• payment for work guaranteed by surety=25 percent x $10,000 x 60 percent=	$1,500
Authorized payment=	$8,250

(Each partial payment shall reflect values for work guaranteed by surety, letter of credit, or deposits, and work not so guaranteed.)

(iv) In cases where the contractor does not obtain payment and performance bonds in accordance with the surety requirements of paragraph (a)(3)(ii) of this section, or where an exception to the surety requirements is granted by the State Director, the following steps will be taken to protect the borrower and the government against latent obligations and/or defects in connection with the construction:

(A) The contractor will furnish a properly executed corporate latent defects bond or a maintenance bond in the amount of 10 percent of the construction contract; or

(B) An unconditional and irrevocable letter of credit in the amount of 10 percent of the construction contract issued by a lending institution which has been reviewed and approved by OGC; or

(C) A cash deposit into an interest or non-interest bearing supervised bank account in the amount of 10 percent of the construction contract;

(D) The period of protection against latent obligations and/or defects shall be one year from the date of final acceptance of work by the owner and FmHA;

(E) Final payment shall not be rendered to the contractor until the provisions of paragraphs (a)(3)(iv) (A), (B) or (C) of this section have been met;

(F) The contract will contain a clause indicating that the contractor agrees to provide surety or guarantee acceptable to the owner and FmHA against latent obligations and/or defects in connection with the construction.

(4) *Equal Opportunity.* Section 1901.205 of Subpart E of Part 1901 of this chapter applies to all loans or grants involving construction contracts and subcontracts in excess of $10,000.

(5) *Labor Provisions.* The provisions of Subpart D of Part 1901 of this chapter concerning wage and labor requirements will apply when the contract involves either LH grant assistance, or 9 or more units in a project being assisted under the HUD Section 8 housing assistance payment program for new construction.

(6) *Historical and archaeological preservation.* The provisions of Subpart F of Part 1901 of this chapter concerning the protection of historical and archaeological properties will apply to all construction financed in whole or in part by FmHA loans and grants. These provisions have special applicability to development in areas designated by SCS as Resource Conservation and Development (RC&D) areas. (See Part 1942, Subpart I of this chapter.)

(7) *Air and water acts.* Under executive Order 11738, all loans or grants involving construction contracts for more than $100,000 must meet all the requirements of section 114 of the Clean Air Act (42 U.S.C. 7414) and section 308 of the Water Pollution Control Act (33 U.S.C. 1813). The contract should contain provisions obligating the contractor as a condition for the award of the contract as follows:

(i) To notify the owner of the receipt of any communication from EPA indicating that a facility to be utilized in the performance of the contract is under consideration to be listed on the EPA list of Violating Facilities. Prompt notification is required prior to contract award.

(ii) To certify that any facility to be utilized in the performance of any nonexempt contractor subcontract is not listed on the EPA list of Violating Facilities as of the date of contract award.

(iii) To include or cause to be included the above criteria and requirements of paragraphs (a)(7) (i) and (ii) of this section in every nonexempt subcontract, and that the contractor will take such action as the Government may direct as a means of enforcing such provisions.

(8) *Architectural barriers.* In accordance with the Architectural Barriers Act of 1968, (Pub. L. 90–480) as implemented by the General Services Administration regulations (41 CFR 101–19.6) and section 504 of the Rehabilitation Act of 1973 (Pub. L. 93–112) as implemented by 7 CFR, Parts 15 and 15b, all facilities financed with FmHA loans and grants and which are accessible to the public or in which physically handicapped persons may be employed or reside must be developed in compliance with this Act. Copies of the Act may be obtained from the Executive Director, Architectural and Transportation Barriers Compliance Board, Washington, DC 20201.

(9) *National Environmental Policy Act.* The provisions of Subpart G of Part 1940 of this chapter concerning environmental requirements will apply to all loans and grants including those being assisted under the HUD section 8

VOL 51
ISS 51
MR 17
1986
UMI

housing assistance payment program for new construction.

(10) Obtaining bids and selecting a contractor.

(i) The applicant may select a contractor and negotiate a contract or contact several contractors and request each to submit a bid. For complex construction projects, refer also to § 1924.13(e) of this subpart.

(ii) When a price has already been negotiated by an applicant and a contractor, the County Supervisor, District Director or other appropriate FmHA official will review the proposed contract. If the contractor is qualified to perform the development and provide a warranty of the work and the price compares favorably with the cost of similar construction in the area, further negotiation is unnecessary. If the FmHA official determines the price is too high or otherwise unreasonable, the applicant will be requested to negotiate further with the contractor. If a reasonable price cannot be negotiated or if the contractor is not qualified, the applicant will be requested to obtain competitive bids.

(iii) When an applicant has a proposed development plan and no contractor in mind, competitive bidding will be encouraged. The applicant should obtain bids from as many qualified contractors, dealers or tradespeople as feasible depending on the method and type of construction.

(iv) If the award of the contract is by competitive bidding, Form FmHA 1924–5, "Invitation for Bid (Construction Contract)," or another similar invitation bid form containing the requirements of Subpart E of Part 1901 of this chapter, may be used. All contractors from whom bids are requested should be informed of all conditions of the contract including the time and place of opening bids. Conditions shall not be established which would give preference to a specific bidder or type of bidder. When applicable, copies of Forms FmHA 1924–6 and FmHA 400–6, "Compliance Statement," also should be provided to the prospective bidders.

(11) *Awarding the contract.* The borrower, with the assistance of the County Supervisor or District Director, will consider the amount of the bids or proposals, and all conditions which were listed in the "Invitation for Bid." On the basis of these considerations, the borrower will select and notify the lowest responsible bidder.

(i) Before work commences, there will be a preconstruction conference between the borrower(s), contractor, architect/engineer (if applicable), and the County Supervisor, District Director, or other FmHA employee having a knowledge of contracts and construction practices. During this discussion, a mutual understanding will be reached on the items shown in Exhibit E of this subpart.

(ii) A brief summary of the items covered should be entered in the running case record.

(iii) The contract will then be prepared and executed and copies distributed in accordance with the FMI for Form FmHA 1924–6.

(iv) After a borrower/contractor's contract or subcontract in excess of $10,000 is received in the FmHA County or District Office, the responsible FmHA official will send within 10 calendar days of the date of the contract or subcontract, a report similar in form and content to Exhibit C of Subpart E of Part 1901 of this chapter to the Area Director, Office of Federal Contract Compliance Programs, U.S. Department of Labor, at the applicable address listed in Exhibit E, Subpart E of Part 1901 of this chapter. The report must contain, at least, the following information: contractor's name, address and telephone number; employer's identification number; amount, starting date and planned completion date of the contract; contract number; and city and DOL region of the contract site. The information for this report should be obtained from the contractor when the contract is awarded.

(12) *Payments for work done by the contract method.* (i) Payments will be made in accordance with one of the following methods unless prohibited by State statute, in which case the State Director shall issue a state supplement to this section:

(A) The "One Lump-Sum" payment method will be used when the payment will be made in one lump-sum for the whole contract.

(B) The "Partial payments not to exceed 60 percent of the value of the work in place" payment method will be used when the contractor does not provide surety bond, a letter of credit, or deposits.

(C) The "Partial payments in the amount of 90 percent of the value of the work in place and of the value of the materials suitably stored at the site" payment method will be used when the contractor provides a surety bond equal to the total contract amount.

(D) The "Partial payments which reflect the portions of the contract amount which is guaranteed" method will be used when the contractor provides surety bonds, a letter of credit, or deposits less than the total amount of the contract in accordance with the provisions of paragraph (a)(3)(iii)(C) of this section.

(ii) When Form FmHA 1924–6 is used, the appropriate payment clause will be checked and the other payment clauses not used will be effectively crossed out.

(iii) When a contract form other than Form FmHA 1924–6 is used, the payment clause must conform with paragraph (a)(12)(i) of this section and the appropriate clause as set forth in Form FmHA 1924–6.

(iv) The borrower and FmHA must take precautionary measures to see that all payments made to the contractor are properly applied against bills for materials and labor procured under the contract. Prior to making any partial payment on any contract where a surety bond is not used, the contractor will be required to furnish the borrower and the FmHA with a statement showing the total amount owed to date for materials and labor procured under the contract. The contractor also may be required to submit evidence showing that previous partial payments were applied properly. When the borrower and the County Supervisor or District Director have reason to believe that partial payments may be applied properly, checks may be made jointly to the contractor and persons who furnished materials and labor in connection with the contract.

(v) When partial payments are requested by the contractor and approved by the owner, the amount of the partial payment will be determined by either of the following methods:

(A) Based upon the percentage completed as shown on a recently completed and properly executed Form FmHA 1924–12, "Inspection Report," or

(B) Based upon an application for payment containing an estimate of the value of work in place which has been prepared by the contractor and accepted by the borrower and FmHA. When the contract provides for partial payments for materials satisfactorily stored at the site, the application for payment may include these items. Prior to receiving the first partial payment, the contractor should be required to submit a list of major subcontractors and suppliers and a schedule of prices or values of the suppliers and a schedule of prices or values of the various phases of the work aggregating the total sum of the contract such as excavation, foundations, framing, roofing, siding, mill work, painting, plumbing, heating, electric wiring, etc., made out in such form as agreed upon by the borrower, FmHA, and the contractor. In applying for payments, the contractor should submit a statement based upon this schedule. See Exhibit A of this subpart for guidance in reviewing the contractor's schedule of prices, and also guidance in

computing the value of the work in place.

(vi) Final payment. (A) Final payment of the amount due on the contract or disbursal of the FmHA loan funds where an interim loan was used will be made only upon completion of the entire contract, final inspection by FmHA, acceptance of the work by FmHA and the borrower, issuance of any and all final permits and approvals for the use and occupancy of the structure by any applicable state and local governmental authorities, and compliance by the contractor with all terms and conditions of the contract. In the event the work of construction is delayed or interrupted by reason of fire, flood, unusually stormy weather, war, riot, strike, an order, requisition or regulation of any governmental body (excluding delays related to possible defects in the contractor's performance and excluding delays caused by the necessity of securing building permits or any required inspection procedures connected therewith) or other contingencies reasonably unforeseeable and beyond the reasonable control of the contractor, then with the written consent of FmHA, the date of completion of the work may be extended by the period of such delay, provided that the contractor shall give the owner and FmHA written notice within 72 hours of the occurrence of the event causing the delay or interruption.

(B) Prior to making final payment on the contract when a surety bond is not used or disbursing the FmHA loan funds when an interim loan was used, FmHA will be provided with a Form FmHA 1924–9, "Certificate of Contractor's Release," and Form 1924–10, "Release by Claimants," executed by all persons who furnished materials or labor in connection with the contract. The borrower should furnish the contractor with a copy of the "Release by Claimants" form at the beginning of the work in order that the contractor may obtain these releases as the work progresses.

(*1*) If such releases cannot be obtained, the funds may be disbursed provided all the following can be met:

(*i*) Release statements to the extent possible are obtained;

(*ii*) The interests of FmHA can be adequately protected and its security position is not impaired;

(*iii*) Adequate provisions are made for handling the unpaid account by witholding or escrowing sufficient funds to pay any such claims or obtaining a release bond;

(*2*) The State Director may issue a State Supplement which will:

(*i*) Not require the use of Form FmHA 1924–10, if, under existing State statutes, the furnishing of labor and materials gives no right to a lien against the property, or

(*ii*) Provide an alternative method to protect against mechanic's and materialmen's liens. In this case, the use of Form FmHA 1924–10 is optional.

(b) *Borrower method.* The borrower method means performance of work by or under the direction of the borrower, using one or more of the ways specified in this subsection. Development work may be performed by the borrower method only when it is not practicable to do the work by the contract method; the borrower possesses or arranges through an approved self-help plan for the necessary skill and managerial ability to complete the work satisfactorily; such work will not interfere seriously with the borrower's farming operation or work schedule, and the County Office caseload will permit a County Supervisor to properly advise the borrower and inspect the work.

(1) *Ways of performing the work.* The borrower will:

(i) Purchase the material and equipment and do the work.

(ii) Utilize lump-sum agreements for (A) minor items or minor portions of items of development, the total cost of which does not exceed $5,000 per agreement, such as labor, material, or labor and material for small service buildings, repair jobs, or land development; or (B) material and equipment which involve a single trade and will be installed by the seller, such as the purchase and installation of heating facilities, electric wiring, wells, painting, liming, or sodding. All agreements will be in writing, however, the County Supervisor may make an exception to this requirement when the agreement involves a relatively small amount.

(2) *Acceptance and storage of material on site.* The County Supervisor will advise the borrower that the acceptance of material as delivered to the site and the proper storage of material will be the borrower's responsibility.

(3) *Payment for work done by the borrower method.* (i) *Payments for labor.* Before the County Supervisor countersigns checks for labor, the borrower must submit a completed Form FmHA 1924–11, "Statement of Labor Performed," for each hired worker performing labor during the pay period. Ordinarily, checks for labor will be made payable to the workers involved. However, under justifiable circumstances, when the borrower has paid for labor with personal funds and has obtained signatures of the workers on Form FmHA 1924–11 as having received payment, the County Supervisor may countersign a check made payable to the borrower for reimbursement of these expenditures. Under no circumstances will the County Supervisor permit loan funds or funds withdrawn from the supervised bank account to be used to pay the borrower for the borrower's own labor or labor performed by any member of the borrower's household.

(ii) *Payments for equipment, materials or lump-sum agreements.* (A) Before countersigning checks for equipment or materials, the County Supervisor must normally have an invoice from the seller convering the equipment or materials to be purchased. When an invoice is not available at the time the check is issued, and itemized statement of the equipment or materials to be purchased may be substituted until a paid invoice from the seller is submitted, at which time the itemized statement may be destroyed.

(B) When an invoice is available at the time the check is drawn the check will include a reference to the invoice number, the invoice date if unnumbered and, if necessary, the purpose of the expenditure.

(C) The check number and date of payment will be indicated on the appropriate Form FmHA 1924–11, invoice, itemized statement of equipment or materials and/or lump-sum agreement.

(D) Ordinarily, checks for equipment or materials will be made payable to the seller. Under justifiable circumstances, when the borrower has paid for equipment or materrials with personal funds and furnished a paid invoice, the County Supervisor may countersign a check made payable to the borrower for reimbursement of these expenses.

(E) When an invoice includes equipment or materials for more than one item of development, the appropriate part of the cost to be charged against each item of development will be indicated on the invoice by the borrower, with the assistance of the County Supervisor.

(F) Payment made under lump-sum agreements will be made only when all items of equipment and materials have been furnished, labor has been performed as agreed upon, and the work has been accepted by the borrower and FmHA.

(G) Each paid Form FmHA 1924–11, invoice, itemized statement of equipment or material and/or lump-sum agreement will be given to the borrower as provided for in Exhibit A to FmHA

VOL 51 ISS 51 MR 17 1986 UMI

Instruction 2083–A (available in any FmHA office).

(c) *Mutual self-help method.* The mutual self-help method is performance of work by a group of families by mutual labor under the direction of a construction supervisor, as described in Exhibit E of Subpart A of Part 1944 of this chapter. The ways of doing the work, buying materials, and contracting for special services are like those used for the borrower method. Materials can be bought jointly by the group of families, but payments will be made individually by each family. In the case of RH loans to families being assisted by Self-Help Technical Assistance (TA) grants in accordance with Subpart I of Part 1933 of this chapter, the County Supervisor may countersign checks for materials and necessary contract work made payable directly to the TA grantee, provided the District Director determines that:

(1) The grantee acts in the same capacity as a construction manager in the group purchase of material and services.

(2) The grantee has an adequate bookkeeping system approved by the District Director to assure that funds in each RH account are properly distributed and maintained.

(3) The grantee receives no compensation in the way of profit or overhead for this service and all discounts and rebates received in connection with the purchase of materials or services are passed on to the participating families.

(4) The grantee has a record-keeping system which shows that the costs of the materials and services were prorated to each borrower's account in relation to the actual material and service used by each borrower.

(d) *Owner-builder method.* This method of construction applies only to RRH loans made under Subpart E of Part 1944 of this chapter. Regulations governing this method are found at § 1924.13(e)(2) of this subpart.

§ 1924.7 [Reserved]

§ 1924.8 Development work for modular/panelized housing units.

(a) Exhibit B of this subpart applies to all loans involving modular/panelized housing units.

(b) Complete drawings and specifications will be required as prescribed in Exhibit C of this subpart. Each set of drawings will contain the design of the foundation system required for the soil and slope conditions of the particular site on which the modular/panelized house is to be placed.

(c) The manufacturer will provide a certification (Exhibit B, Attachment 5 of this subpart), stating that the building has been built substantially in accordance with the drawings and specifications. The builder will also provide a certification that the onsite work complies with drawings, specifications, and the applicable development standard (Exhibit B, Attachment 5 of this subpart).

(d) Responsibility for field inspections will be in accordance with § 1924.9(a) of this subpart. Frequency and timing of inspections will be in accordance with § 1924.9(b) of this subpart, except that the Stage 2 inspection should be made during the time and in no case later than two working days after the crews commence work on the site and the house is being erected or placed on the foundation, to determine compliance with the accepted drawings and specifications.

(e) Periodic plant inspections may be performed by the FmHA employee responsible for such inspections in the area in which the manufacturing plant or material supply yard is located.

(1) Inspections will be made in the plants if the type construction method used could restrict adequate inspections on the building site.

(2) Plant inspections will be made as often as necessary. However, after initial inspection and acceptance of the building submitted, inspection should be made only when it appears advisable to ascertain the performance and continuing stability of accepted materials and construction.

(f) Only one contract will be accepted for the completed house on the site owned or to be bought by the borrower. The manufacturer of the house or the manufacturer's agent may be the prime contractor for delivery and erection of the house on the site or a builder may contract with the borrower for the complete house in place on the site. Such contracts should provide that payments will be made only for work in place on the borrower's site.

(g) Payments for modular/panelized units will be made in accordance with the terms of the contract and in compliance with § 1924.6(a)(12) of this subpart.

§ 1924.9 Inspection of development work.

The following policies will govern the inspection of all development work.

(a) *Responsibility for inspection.* The County Supervisor or District Director, accompanied by the borrower when practicable, will make final inspection of all development work and periodic inspections as appropriate to protect the security interest of the government. In this respect, inspections other than final inspections, may be conducted by other qualified persons as authorized in paragraph (b)(3) of this section and in § 1944.17(a)(2)(iv) of Subpart A of Part 1944 of this chapter, and as authorized under other agreements executed by, or authorized by, the National Office. The borrower will be responsible for making inspections necessary to protect the borrower's interest. FmHA's inspections are not to assure the borrower that the house is built in accordance with the plans and specifications. The inspections create or imply no duty or obligation to the particular borrower. FmHA inspections are for the dual purposes of determining that FmHA has adequate security for its loan and enabling FmHA to determine that FmHA is working toward achieving the statutory goal of providing adequate housing. If difficult technical problems are encountered, the County Supervisor or District Director should request the assistance of the State Office or a qualified technician from SCS or the State University Cooperative Extension Service.

(b)*Frequency of inspections.* The County Supervisor or District Director will inspect development work as frequently as necessary to assure that construction and land development conforms with the drawings and specifications. The final inspection will be made at the earliest possible date after completion of the planned development. When several major items of development are involved, final inspection will be made upon completion of each item.

(1) For new buildings and additions to existing buildings inspections will be made at the following stages of construction and at such other stages of construction as determined by the County Supervisor or District Director except as modified by paragraph (b)(3) of this section.

(i) *Stage 1.* Customarily, the initial inspection in construction cases is made just prior to or during the placement of concrete footings or monolithic footings and floor slabs. At this point, foundation excavations are complete, forms or trenches and steel are ready for concrete placement and the subsurface installation is roughed in. However, when it is not practicable to make the initial inspection prior to or during the placement of concrete, the County Supervisor or District Director will make the initial inspection as soon as possible after the placement of concrete and before any backfill is in place.

(ii) *Stage 2.* The Stage 2 inspection will be made when the building is enclosed, structural members are still exposed, roughing in for heating, plumbing and electrical work is in place and visible, and wall insulation and vapor barriers are installed. Customarily, this is prior to installation of brick veneer or any interior finish which would include lath, wallboard and finish flooring.

(iii) *Stage 3.* The final inspection will be made when all on-site and off-site development has been completed and the structure is ready for occupancy or its intended use.

(2) For rehabilitation of existing buildings, inspections will be made in accordance with paragraphs (b)(1) (ii) and (iii) of this section, and at such other stages of construction to assure that construction is being performed in a professional manner and in accordance with the FmHA approved drawings and specifications.

(3) For new construction when the structure will be covered by an insured 10-year warranty plan as described in Exhibit L of this subpart, only the final inspection is required. For this exception to apply:

(i) The insurer's construction inspector must provide FmHA with any available copies of inspection reports showing percentage of completion immediately after the inspections are completed. To make partial payments when copies of inspection reports are not available, the responsible FmHA official will make the inspections or will be guided by the provisions of §1924.6(a)(12)(v)(B) of this subpart. If further assurance is deemed necessary to justify partial payments, the FmHA official may make onsite inspections or require additional information.

(ii) The insurer must provide an insured 10-year warranty policy (or a binder if the policy is not available) before final payment is made to the builder.

(4) Arrangements should be made to have the borrower join the County Supervisor or the District Director in making periodic inspections as often as necessary to provide a mutual understanding with regard to the progress and performance of the work.

(5) The borrower should make enough periodic visits to the site to be familiar with the progress and performance of the work, in order to protect the borrower's interest. If the borrower observes or otherwise becomes aware of any fault or defect in the work or nonconformance with the contract documents, the borrower should give prompt written notice thereof to the contractor with a copy to the County Supervisor or District Director responsible for servicing the type of loan or grant involved.

(6) The borrower should, when practicable, join the County Supervisor or District Director in making all final inspections.

(7) When irrigation equipment and materials are to be purchased and installed, a performance test under actual operating conditions by the person or firm making the installation should be required before final acceptance is made. The test should be conducted in the presence of the borrower, a qualified technician, and, when practicable, the County Supervisor or District Director. If the FmHA official is not present at the performance test, he or she should request the technician to furnish a report as to whether or not the installation meets the requirements of the plans and specifications.

(8) For irrigation and drainage construction or any dwelling construction where part or all of the work will be buried or backfilled, interim inspections should be made at such stages of construction that compliance with plans and specifications can be determined.

(c) *Recording inspections and correction of deficiencies.* All periodic and final inspections made by the County Supervisor or District Director will be recorded on Form FmHA 1924–12 in accordance with the FMI. The County Supervisor or District Director will be responsible for following up on the correction of deficiencies reported on Form FmHA 1924–12. When an architect/engineer is providing services on a project, the District Director should notify the architect/engineer immediately of any fault or defect observed in the work or of any nonconformance with the contract document. If the borrower or the contractor refuses to correct the deficiencies, the District Director will report the facts to the State Director who will determine the action to be taken. No inspection will be recorded as a final inspection until all deficiencies or nonconforming conditions have been corrected.

(d) *Warranty period.* Form FmHA 1924–19 or an acceptable insurd 10 year warranty on RH loans for new construction will be provided by the contractor and/or warrantor. If the warranty is not an insured 10-year warranty, a completed Form FmHA 1924–19, with warranty protection for 1 year, must be provided by the builder upon final acceptance of the work by the owner and the FmHA. If an insured 10-year warranty is provided, the requirements of Exhibit L of this subpart apply, and a copy of the warranty policy or a binder must have been received by FmHA prior to disbursement of the final payment to the builder.

If, for some reason, the policy cannot be issued, the contractor wil be required to execute Form FmHA 1924–19 and the case will be forwarded to the State Director for consideration of debarment under the provisions of Subpart F of Part 1924 of this chapter. The County Supervisor will assist the borrower to the extent necessary under the provisions of the warranty and Subpart F of Part 1924 of this chapter and will take the following action prior to the expiration of the first year of the warranty period:

(1) As soon as the warranty has been executed, the follow-up date for sending Form FmHA 1924–21, "Notice of Expiration of First Year of Warranty," which will be used for the 1 year warranty or the first year of the insured 10-year warranty, will be posted to the "Servicing and Supervision" section of the Management System card.

(2) Form FmHA 1924–21 is provided for use in notifying the borrower of the expiration date of the first year of the warranty. This letter will be mailed to the borrower early in the second month preceding the expiration date of the first year of the warranty period.

(3) If the County Supervisor or District Director does not hear from the borrower within 30 days, it can reasonably be assumed that no complaint exists or that any complaint has been satisfied unless information to the contrary has been received.

(4) If the borrower notifies FmHA that any complaint has not been satisfied, an onsite inspection shall be made as early as possible, but not later than 1 month preceding the expiration date of the first year of the warranty. The results of the inspection visit wil be recorded on Form FmHA 1924–12. If the borrower has complaints the case should be handled in accordance with the provisions of Subpart F of Part 1924 of this chapter, or as otherwise provided in this subpart.

(e) *Acceptance by responsible public authority.* When local (city, county, State, or other public authority) codes and ordinances require inspections, final acceptance by the local authority having jurisdiction wil be required prior to final inspection or acceptance by FmHA.

(f) *Acceptance by project architect.* If architectural services pursuant to § 1924.13(a) of this subpart have been obtained. Final acceptance by the project architect pursuant to § 1924.13(a)(5)(v) of this subpart will be required prior to acceptance by FmHA.

§ 1924.10 Making changes in the development plan.

Changes in the planned development may be made at the request of the borrower in accordance with this section.

(a) *Authority of the County Supervisor.* The County Supervisor is authorized to approve changes in the planned development involving loans and grants within the County Supervisor's approval authority provided:

(1) The change is for an authorized purpose and within the scope of the orginal proposal.

(2) Sufficient funds are deposited in the borrower's supervised bank account or with the interim lender, as appropriate, to cover the contemplated changes when the change involves additional funds to be furnished by the borrower.

(3) The change will not adversely affect the soundness of the operation or FmHA's security. If uncertain as to the probable effect the change would have on the soundness of the operation or FmHA security, the County Supervisor will obtain advice from the District Director on whether to approve the change.

(4) If a surety bond has been provided on the full amount of the construction contract, the aggregate amount of all contract change orders on Form FmHA 1924–7, "Contract Change Order," or other acceptable form will not exceed 20 percent of the original contract amount. Change orders for contracts on which a surety bond has been provided which increases the original contract amount by more than 20 percent may only be approved if additional surety is provided in the full revised amount of the contract. For purposes of this paragraph, letters of credit and deposits are not considered surety.

(5) Change orders for contracts on which letters of credit or deposits have been provided on the full amount of the contract which will increase the original contract amount are approved only if additional letters of credit or deposits are provided in the full revised amount of the contract.

(b) *Authority of the District Director.* The District Director is authorized to approve changes in the development planned with RRH, RCH, and RHS loans and LH loans and grants within the District Director's approval authority, provided the conditions in § 1924.10(a) have been met. For such loans in excess of the District Director's approval authority, the borrower's request with the District Director's recommendation will be forwarded to the State Director for consideration.

(c) *Recording changes in the planned development.* (1) Changes should be accomplished only after FmHA written approval. Changes will not be included in payment requests until approved by the borrower; the contractor, if applicable; the architect/engineer, if applicable; and the FmHA loan approval official. Examples of changes requiring documentation are:

(i) Any changes in labor and materials and their respective costs.

(ii) Changes in facility design.

(iii) Any decrease or increase in unit-price on final measurements that are different from those shown in the bidding schedule.

(iv) Any increase or decrease in the time to complete the project.

(2) All changes shall be recorded in chronological order as follows:

(i) Contract method. Changes shall be numbered in sequence as they occur using Form FmHA 1924–7 with necessary attachments.

(ii) Borrower method. An increase or decrease in the cash cost, extension of time, transfer of funds between items, or an addition or deletion of items of development, will be summarized on the front of Form FmHA 1924–1 by striking through the original figures on items and writing in the changes. Changes made in the "Development Plan," in the working drawings, or in the plans and specifications will be dated and initialed by all parties.

(iii) Mutual self-help method. [See paragraph (c)(2)(ii) of this section.]

(iv) Owner-builder method. [See paragraph (c)(2)(i) of this section.]

§ 1924.11 District Director's review of incomplete development.

During monthly District Office work organization meetings and during regular visits to the County Office, the District Director will review the progress that is being made in completing development financed with loans within the District Director's and County Supervisor's responsibility.

(a) Once each year the District Director will make a comprehensive review of all development work not completed within the time scheduled. For incomplete development financed with loan or grant funds within the responsibility of the District Director, the District Director will take the necessary actions to assure that the borrower or grantee completes the planned development. For incomplete development financed with loan or grant funds within the responsibility of the County Supervisor, the District Director will give the necessary direction to the County Supervisior to assure completion of the work. In connection with these responsibilities, the District Director will consider:

(1) The current farm and home operations with respect to the need for the development as originally planned.

(2) Revisions to the development plan.

(3) Funds remaining in the supervised bank account.

(4) Need for additional funds.

(5) Personal funds that could be furnished by the borrower.

(6) Estimated completion dates.

(7) The borrower's attitude with respect to completing the development.

(b) After a complete review of the status of development in both the District and County Offices has been made, the District Director will make a written report to the State Director which will include observations and recommendations regarding incomplete development. The report may be included in the District Director's regular report, and will include:

(1) The number of cases in which borrowers have not completed their development within 9, 15 or 24 months when authorized, and also the number of cases in which funds have been exhausted and the work is incomplete.

(2) The number of borrowers who have not completed their development within 3 years from the loan closing, and indicate the action that was taken in each such case.

(c) If the borrower has not completed development work within 3 years after the date of loan closing and the District Director has determined that the borrower cannot or will not complete the development, the District Director will so indicate on Form FmHA 1924–1 and request the State Director to withdrawn, for application on the loan, any unused development funds remaining in the borrower's supervised bank account, if the borrower will not sign a check for a refund to the loan account.

§ 1924.12 [Reserved]

§ 1924.13 Supplemental requirements for more complex construction.

This section includes additional provisions that apply to planning and conduct of construction work on all multiple family housing projects and other projects that are more extensive in scope and more complex in nature than individual housing units or farm buildings. This section will apply in addition to all other requirements contained elsewhere in this subpart.

(a) *Architectural services.* Complete architectural services, as defined in § 1924–4(o)(1) of this subpart are recommended on all projects. They are

required for projects involving an LH grant and for all loans for RRH, RCH, and LH projects consisting of more than 4 units unless prior consent to making an exception to the requirements for complete architectural services is obtained from the National Office. If the applicant or contractor is an architect or organization with architectural capability, the applicant must, nevertheless, hire an independent qualified architect or architectural firm to inspect the construction work and perform other needed services during the construction and warranty phases. See Guide 4, Attachment 1, "Attachment to AIA Document—Standard Form of Agreement Between Owner and Architect" for further information (Guide 4 is available in any FmHA office). (Revised 2–5–86)

(1) *Exception.* Any request for National Office consent to an exception being made for complete architectural services should include the proposed drawings and specifications, method of providing specific services, the comments and recommendations of the FmHA State Architect, and any other pertinent information. The State Director must determine that any services for which an exception is requested can be performed by qualified State or District Office staff members.

(2) *Selecting the architect.* The applicant is responsible for selecting the architect. The District Director with the advice of the State architect/engineer should discuss with the applicant the selection of the architect for the job as early as possible to assist in the site selection and participate in early consultations regarding project scope and design.

(3) *Architectural fees.* Fees for architectural services shall not exceed the fee ordinarily charged by the profession for similar work when FmHA financing is not involved.

The fee should cover only the architectural services rendered by the architect. Fees for special services rendered by architects, such as the packaging of the loan application or additional non-architectural services, will not be authorized to be paid with loan funds.

(4) *Agreement between borrower and architect.* The borrower and the architect will execute a written agreement. The agreement must provide:

(i) The services listed in paragraph (a)(5) of this section.

(ii) The amount of the fee and how it will be determined and paid.

(iii) That the agreement and any amendments to the agreement shall not be in full force and effect until approved in writing by the State Director or the State Director's delegate, and it will contain the following provision:

The Farmers Home Administration, as potential lender or insurer of funds to defray the costs of this agreement and without liability for any payments thereunder, hereby approves the form, content and the execution of this agreement.

Date ———,

———,
FmHA Approval Official.

———,
Title.

(5) *Specific services.* Architectural services will include six consecutive phases as follows:

(i) *Schematic design phase.* The architect will:

(A) Consult with the applicant to obtain available information pertinent to the project requirements.

(B) Consult with FmHA State architect/engineer about FmHA requirements and procedures.

(C) Assist in preparing the project design after analyzing engineering and survey data on the site selected by applicant.

(D) Prepare schematic design studies consisting of drawings and other documents illustrating the scale and relationship of project components for the applicant's approval.

(E) Submit estimates of current development costs based on current area, volume, or other unit costs.

(F) When the applicant and FmHA have accepted the schematic design studies and estimated development costs, the project architect may be authorized to proceed with the next phase.

(ii) *Design development phase.* The architect will:

(A) Prepare the design development exhibits from the accepted schematic design studies for approval by the applicant. These exhibits should consist of drawings and other documents to fix and describe the size and character of the entire project as to structural, mechanical, and electrical systems, materials, and other essentials as appropriate.

(B) Submit a further statement of probable construction cost.

(C) Obtain applicant and FmHA approval of drawings, specifications, and authorization to proceed with next phase.

(iii) *Construction documents phase.* The architect will:

(A) Prepare the working drawings and specifications from the approved design development drawings and set forth in detail the requirements for the construction of the entire project in accordance with applicable regulations and codes; for example, necessary bidding information, assistance in preparing bidding forms, conditions of the construction contract, and the form of agreement between applicant/owner and contractor.

(B) Submit a final and more comprehensive statement of probable development cost. It should show a breakdown of the estimated total development cost of the project and the various trades in enough detail for an adequate review.

(C) Obtain the acceptance of the applicant and FmHA for contract documents, including approval of the final drawings and specifications and authorization to proceed.

(D) Discuss with the applicant various items as they develop.

(iv) *Bidding or negotiation phase.* The architect will, as appropriate, for a bidded or negotiated contract:

(A) Assist in review and selection of bidders and submission of contract documents to selected bidders.

(B) Assist in the interpretation of drawings and specifications, and other contract documents.

(C) Receive and tabulate all bids.

(D) Review the bids and the negotiated proposals and assist in the award and preparation of construction contracts.

(v) *Contruction phase.* This phase includes the administration of the construction contract. It will commence with award of the construction contract and end when the borrower makes final payment to the contractor. The architect will:

(A) Advise and consult with the borrower (or the borrower's representative) and issue the borrower's instructions to the contractor.

(B) Prepare change orders.

(C) Keep construction accounts and work as the general administrator of the project during construction.

(D) Interpret the contract documents and have the authority to reject all work and materials which do not comply.

(E) Review and approve shop drawings, samples, and other submissions of the contractor for conformance with design concept and for compliance with the contract documents.

(F) Conduct periodic inspections of all phases of construction to determine compliance with the contract documents and certify as to the amount of work that is in place and materials suitably stored on site for partial payment estimates. These inspections will be augmented, when necessary, by inspections performed by structural,

VOL 51
ISS 51
MR 17
1986
UMI

mechanical and electrical representatives. Periodic inspections should be made as frequently as is necessary to verify that the work conforms with the intent of the contract documents and that a high quality of workmanship is maintained. The State Director may require a full-time project representative on projects with a total development cost of $750,000 or more, when in the opinion of the State Director there is a need for such representative, and the State Director states the reasons for such need to the borrower.

(G) Determine, based on the inspections, the dates of substantial completion and final completion; receive on the borrower's behalf all written guarantees and related documents assembed by the contractor; and issue a final certificate for payment.

(vi) *Warranty phase.* The architect will advise and consult with the borrower, as the borrower's representative, about items to be corrected within the warrantly period. The architect will accompying the FmHA representative during the inspection required one month prior to expiration of the warranty period.

(b) *Other professional services.* The State Director, on the recommendation of the State architect/engineer, may request that additional professional services be provided.

(1) Professional services would typically include soils engineering, structural engineering, civil engineering, surveying, land planning, or professional cost estimation or certifiction. Fees for these services may be paid directly by the borrower or by the architect as reimbursable expenses.

(2) When a project repersentatiave is utilized, unless otherwise agreed, the representative will be provided by the consulting architect/engineer. Prior to the preconstruction conference, the architect/engineer will submit a resume of qualifications of the project representative to the applicant and to FmHA for acceptance in writing. If the applicant provided the project representative, the applicant must submit a resume of the representative's qualifications to the project architect/engineer and FmHA for acceptance in writing, prior to the preconstruction conference. The project representative will attend the preconstruction conference where duties and responsibilities will be fully discussed. The project representative will work under the general surpervision of the architect/engineer. The project representative will maintain a daily diary in accordance with the following:

(i) The diary shall be maintained in a hard-bound book.

(ii) The diary shall have all numered and all entries in ink.

(iii) All entries shall be on daily basis, beginning with the date and weather conditions.

(iv) Daily entries shall include daily work performed, number of men and equipment used in the performance of the work, and all signficant happenings during the day.

(v) The diary shall be made available to FmHA personnel and will be reviewed during project inspections.

(vi) The project representative's diary will become the property of the owner after the project is accepted and final payments are made.

(c) *Drawings.* The type and kinds of drawings should be in accordance with Exhibit C of this subpart and Subpart D of Part 1944 of this chapter.

(1) The drawings must be clear, accurate, and with adequate dimensions and should be of sufficient scale for estimating purposes.

(2) Construction sections and large-scale details sufficient for accurate bidding and for the purpose of correlating all parts of the work should be part of the general drawings. This is particularly important where the size of a project makes necessary the preparation of the general drawings at a scale of ⅛ inch equals 1 foot or less.

(3) Mechanical and electrical work should be shown on separate plans.

(4) Schedules should be provided for doors, windows, finishes, electrical fixtures, finish hardware, and any other specialty items necessary to clarify drawings.

(d) *Specifications.* Trade-type specifications (specifications divided into sections for various trades) should be used. The specifications should be complete, clear, and concise, with adequate description of the various classes of work shown under the proper sections and headings.

(e) *Methods of administering construction.* Projects involving a total development cost of less than $100,000 which do not include an LH grant may, with the approval of the State Director, follow the contract procedure in Section 1924.6(a) of this subpart without modification. Construction of all other projects, however, will be administered by the contract method or owner-builder method as set forth in this section.

(1) *Contract method.* This method of development will be used for all complex construction except in cases where owner-builder method is authorized. Development under this method is done in accordance with Section 1924.6(a) of this subpart except as modified by this paragraph. All construction work will be completed under one written construction contract. Guide I, "Contract Documents" of this subpart (available in any FmHA office) is provided to assist FmHA personnel and applicants in assembling and reviewing contract documents for more complex construction such as that administered under this section.

(i) *Competitive bidding methods.* (A) All construction contracts must be awarded on the basis of competitive bidding unless an exception is granted in accordance with paragraph (e)(1)(vii) of this section thereby permitting contract negotiation. The applicant's architect should prepare the bidding documents. Public notice must be given inviting all interested bidders to submit a bid. Prospective bidders may be contacted asking for their bids; however, public notice is necessary so that all local contractors have the opportunity to submit bids.

(B) A bid bond is required from each bidder in the amount of 5 percent of the bid price as assurance that the bidder will, upon acceptance of the bid, execute the required contract documents within the time specified.

(C) The construction contract will be awarded based on the contract cost, and all conditions listed in the "Invitation to Bid."

(D) If advertising does not provide a satisfactory bid in the opinion of the applicant and FmHA, the applicant shall reject all bids and will then be free to negotiate with bidders or anyone else to obtain a satisfactory contract. The following conditions must be met:

(*1*) The State Director determines that the original competitive bid process was handled in a satisfactory manner and that there is no advantage to advertising for competitive bid again.

(*2*) If appropriate, the applicant provides a copy of a duly authorized resolution by its governing body requesting FmHA to permit awarding the construciton contract without formal bidding.

(*3*) The applicant is permitted by State law, local law and/or organizational by-laws to negotiate a construction contract.

(*4*) The proposed contractor is experienced in construction of similar size, scope, and complexity, and is recognized as a reliable builder. The State Director must determine that there is no conflict of interest in the award of the contract to the proposed contractor.

(E) If there is no agreement by FmHA and the applicant as to the construction cost, the State Director will cease any further action on the preapplication and inform the applicant of the right to

appeal in accordance with Subpart B of Part 1900 of this chapter.

(ii) *Contract documents.* Contract documents will conform with recognized professional practices as prescribed in this paragraph. Such contract documents will contain substantially the following:

Item I Invitation for Bids (Form FmHA 1924–5)
Item II Information for Bidders
Item III Bid
Item IV Bid Bond
Item V Agreement (Construction Contract)
Item IV Compliance Statement (Form FmHA 400–6)
Item VII General Conditions
Item VIII Supplemental General Conditions
Item IX Payment Bond (Exhibit F of this subpart)
Item X Performance Bond (Exhibit G of this subpart)
Item XI Notice of Award
Item XII Notice to Proceed
Item XIII Drawings and Specifications
Item XIV Addenda
Item XV Contract Change Order (Form FmHA 1924–7)
Item XVI Labor Standards Provisions (Exhibit A to Subpart D of Part 1901 of this chapter, where applicable)
Item XVII Monthly Employment Utilization Report (Form CC–257)
Item XVIII Partial Payment Estimate (Form FmHA 1924–18)
Item XIX Builder's Warranty (Form FmHA 1924–19)

(A) Substitution of term "architect" for "engineer" will be necessary on some of the forms. Other modifications may be necessary in some cases to conform with the nature and extent of the project. All such contract documents and related items will be approved by the State Director, with the assistance of OGC prior to the release of invitations to bid.

(B) Items listed as I through IV and item XI above may be omitted when an exception to the competitive bidding requirement is granted in accordance with paragraph (e)(1)(vii) of this section, thereby permitting a negotiated contract.

(C) All negotiated contracts shall include a provision to the effect that the borrower, USDA, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the contractor which are directly pertinent to a specific Federal loan program for the purpose of making audit, examination, excerpts, and transcriptions.

(D) Liquidation damages *will* be included in all contracts. The liquidated damage amount must be reasonable and represent the best estimate possible of how much interest or other costs will accrue on the loan, and also represent any loss of rent or other income which would result from a delay in the completion of the project beyond the estimated completion date.

(E) All contracts shall include a provision for compliance with the Copeland "Anti-Kickback" Act (18 U.S.C. 874) as supplemented in Department of Labor regulations (29 CFR Part 3). This Act prohibits anyone from inducing any person in connection with the construction to give up any part of the compensation to which the person is otherwise entitled.

(F) All contracts will contain a certification by the applicant indicating that there is not now nor will there be an identity of interest between the applicant and any of the following: contractor, architect, engineer, attorney, subcontractors, material suppliers, equipment lessors, or any of their members, directors, officers, stockholders, partners, or beneficiaries unless specifically identified to FmHA in writing prior to the award of the contract. All contracts must also indicate that when any identity of interest exists or comes into being, the contractor agrees to provide certification as to the actual cost of the work performed under the construction contract and to have all construction records audited by an independent Certified Public Accountant (CPA) or Licensed Public Accountant (LPA) (licensed prior to December 31, 1970) who will provide an unqualified opinion as to the actual cost of construction.

(G) All contracts on any form other than Form FmHA 1924–6, must contain the language of clause (D) of Form FmHA 1924–6, which is available in all FmHA offices. The language of clause (D) of Form FmHA 1924–6 sets forth the Notice of Requirement for Affirmative Action to Ensure Equal Employment Opportunity required by Executive Order 11246, the Equal Opportunity clause published at 41 CFR 60–1.4 (a) and (b), and the Standard Federal Equal Employment Opportunity Construction Contract Specifications required by Executive Order 11246. For contract forms other than Form FmHA 1924–6, Form AD 767, "Equal Employment Opportunity Contract Compliance Notices," which can be obtained from the Finance Office, should be attached and made a part of the contract.

(H) All contracts will contain a provision that they are not in full force and effect until they have been approved by the State Director or the State Director's delegate, in writing. Therefore, before loan closing or before the start of construction, whichever occurs first, the State Director or the State Director's delegate will approve the contract form, content, and execution by including the following paragraph at the end of the contract:

The Farmers Home Administration, as potential lender or insurer of funds to defray the costs of this contract, and without liability for any payments thereunder, hereby approves the form, content, and execution of this contract.

Date ———.

FmHA Approval Official.

———.

Title.

(I) The requirements of § 1924.6(a)(11)(iv) of this subpart apply to all contracts or subcontracts in excess of $10,000.

(iii) *Surety.* When multiple advances of loan or grant funds are utilized, surety that guarantees both payment and performance in the full amount of the contract will be provided in accordance with § 1924.6(a)(3)(ii) of this subpart. Exceptions to the surety requirements shall be governed by the following:

(A) In accordance with the guidance and recommendations of OMB Circulars A–102 and A–110, exceptions to the surety requirements of § 1924.6(a)(3)(ii) of this subpart will not be granted for nonprofit organization or public body applicants.

(B) For loans or grants to applicants other than non-profit organizations or public bodies that are within the State Director's approval authority, the State Director may, upon request of the borrower or grantee, grant exceptions to the surety requirements in accordance with the provisions of § 1924.6(a)(3)(iii) of this subpart. Before granting such an exception, however, the State Director should be provided the following information from the proposed contractor in order to fully evaluate the experience and capabilities of the contractor:

(*1*) A resume indicating the contractor's history, ability, and experience.

(*2*) A current, dated, and signed financial statement indicating the payment status of the contractor's accounts and any contingent liabilities that may exist.

(*3*) A credit report (obtained at no expense to FmHA) attesting to the contractor's credit standing.

(*4*) A listing of trade references that could be contacted to substantiate the contractor's experience and good standing.

VOL 51 ISS 51 MR 17 1986 UMI

(*5*) Statements from owners for whom the contractor has done similar work, indicating the scope of the work and the owner's evaluation of the contractor's performance.

(C) For loans or grants to applicants other than nonprofit organization or public bodies that are in excess of the State Director's approval authority, the State Director may request National Office authorization to grant one of the exceptions to the surety requirements as indicated in § 1924.6(a)(3)(iii) of this subpart. The following information must be submitted with the request to the National Office:

(*1*) An explanation of why interim financing is not available.

(*2*) An explanation of why the proposed contractor cannot obtain surety bonds meeting the requirements of § 1924.6(a)(3)(ii) of this subpart.

(3) The information listed in paragraph (e)(1)(iii)(B) of this section.

(*4*) The drawings and specifications for the proposed project, together with the comments of the State architect/engineer.

(*5*) The applicant's written request for an exception.

(*6*) An explanation of why the requirements of § 1924.6(a)(3)(iii) (A) or (B) of this subpart cannot be met in those cases where the State Director requests authorization to grant an exception as indicated in § 1924.6(a)(3)(iii)(C) of this subpart. When such a request is made, the documentation required of the contractor under that provision must also be forwarded.

(*7*) The State Director's recommendation.

(D) Adequate steps will be taken to protect the interests of the borrower and the government in accordance with the payment provisions of § 1924.6(a)(12)(i) of this subpart and any alternative as outlined in § 1924.6(a)(3)(iii)(C) of this subpart.

(iv) *Contract cost breakdown.* In any case where the loan approval official feels its appropriate, and prior to the award or approval of any contract in which there is an identity of interest as defined in § 1924.4(i) of this subpart, the contractor and any subcontractor, material supplier, or equipment lessor sharing an identity of interest must provide the applicant and FmHA with a trade-item cost breakdown of the proposed contract amount for evaluation. The cost of any surety as required by § 1944.222 (k) and (l) of Subpart E of Part 1944 of this chapter and § 1924.6(a)(3) of this subpart, or cost certification fee will be included in the proposed contract amount. Form FmHA 1924–13, "Estimate and Certificate of Actual Cost" which is available in all FmHA offices, may be used for this purpose.

(v) *Cost certification.* Whenever the State Director determines it appropriate, and in all situations where there is an identity of interest as defined in § 1924.4(i) of this subpart, the borrower, contractor and any subcontractor, material supplier or equipment lessor having an identity of interest must each provide certification using Form FmHA 1924–13 as to the actual cost of the work performed in connection with the construction contract. All construction records must also be audited by an independent CPA, or by an LPA licensed on or before December 31, 1970, except for owner-builders not required to provide cost certification who must follow the instructions provided in § 1924.13(e)(2)(viii) of this subpart.

(A) Instructions specifically addressing the functions and responsibilities of the CPA or LPA are set forth in the FmHA handbook. "Instructions to Independent Certified Public Accountants and Licensed Public Accountants Performing Audits of Farmers Home Administration Borrowers and Grantees" (available in any FmHA District Office), which must be provided to the CPA or LPA. The objectives of the audit are to determine whether the project costs incurred are eligible under the terms of the contract and in accordance with FmHA policies, rules and regulations. It is not required that the CPA or LPA provide an opinion on any other financial statement such as a balance sheet or operating statement.

(B) In all cases, the CPA or LPA is expected to render an opinion. FmHA perfers an unqualified opinion concerning the cost certification. If other than an unqualified opinion is expressed, or if any deviations from generally accepted accounting principles are noted, the reasons must be fully explained in the audit report. Qualifying statements may render the certification unacceptable or may require evaluation before a decision can be made. The State Director will determine the acceptability of any qualifying opinions. If the State Director determines it necessary, guidance may be obtained from the National Office or from the OGC.

(C) Prior to the start of construction, the borrower, contractor and any subcontractor, material supplier, or equipment lessor sharing an identity of interest must submit the accounting system that the borrower, contractor, subcontractor, material supplier, or equipment lessor and/or the CPA or LPA proposes to set up and use in maintaining a running record of the actual cost. In order to be acceptable, it must allow for a trade-item basis comparison of the actual cost as compared to the estimated cost submitted in accordance with paragraph (e)(1)(iv) of this section.

(D) The CPA or LPA will audit the books, accounts, and records of the borrower and the contractor (and any subcontractor, material supplier, or equipment lessor sharing an identity of interest) concerning the work performed, services rendered, and materials supplied in connection with the construction contract to the extent necessary to assure that the amounts claimed as costs are necessary and reasonable, and present fairly the actual costs incurred. Upon completion of construction and prior to final payment, the CPA or LPA will provide an opinion concering the actual cost. The CPA or LPA must also certify that the examination has been made in accordance with generally accepted auditing standards and accordingly, included such tests of the accounting records and such other auditing procedures as considered necessary, that to the best of the CPA or LPA's knowledge and belief the actual cost of construction performed under the contract is accuate and correct as represented, and that the CPA or LPA has no identity of interest with the borrower, contractor, architect, engineer, attorney, subcontractors, material suppliers or equipment lessors. FmHA reserves the right to determine, upon receipt, whether or not the certified statement of cost is satisfactory to FmHA.

(E) If the auditor is able to express an unqualified opinion the following format is suggested for the certification:

We have examined the "Estimate and Certificate of Actual Cost," (Form FmHA 1924–13) related to the development of the *(project name and case number).*

Our examination was made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

The certificate of actual cost has been prepared on the bais of accounting and reporting practices prescribed by the Farmers Home Administration and conforms with generally accepted accounting principles. Other financial statements such as a balance sheet or operating statement have not been prepared. This report is intended solely for filing with FmHA and is not intended for any other purpose.

In our opinion, the accompanying form FmHA 1924–13 referred to above, presents fairly the actual cost in the amount of $———, of the *project name.*

Amount paid and to be paid are shown as of the close of business ———, 19—.

We certify that we have no financial interest in or with the borrower, contractor, architect, engineer, attorney, subcontractors, material suppliers or equipment lessors, other than in the practice of our profession.

(F) Prior to final payment to anyone required to cost certify, a trade-item breakdown showing the actual cost compared to the estimated cost must be provided to the owner and FmHA. Form FmHA 1924–13 is the form of comparative breakdown that should be used, and contains the certifications required of the applicant and contractor prior to final payment. The amount for builder's general overhead and builder's profit shall not exceed the percentage represented on the estimate of cost breakdown provided in accordance with paragraph (e)(1)(iv) of this section for any contractor, subcontractor, material supplier or equipment lessor having or sharing an identity of interest with the applicant. Contract change orders will be processed to adjust the contract amount downward prior to final payment to the contractor, if necessary, to assure that the fees shown in the certificate of actual cost do not exceed the percentages represented in the contract cost breakdown.

(vi) *Method of payments.* Partial payments may be requested in accordance with the terms of the FmHA approved construction contract on Form FmHA 1924–18, "Partial Payment Estimate," or other professionally recognized form that contains the architect's certification, approval of the owner, and conditional acceptance of FmHA as shown on the reverse of Form FmHA 1924–18.

(A) If interim financing is available at reasonable rates and terms for the construction period, such financing shall be obtained. Exhibit D of Subpart E of Part 1944 of this chapter shall be used to inform the interim lender that FmHA will not close its loan until the project is substantially complete, ready for occupancy, evidence is furnished indicating that all bills have been paid or will be paid at loan closing for work completed on the project, all inspections have been completed and all required approvals have been obtained from municipal and governmental authorities having jurisdiction over the project. Upon presentation of proper partial payment estimates approved by the applicant and accepted by FmHA, the interim lender may advance construction fund in accordance with the payment terms of the contract. It is suggested that partial payments not exceed 90 percent of the value of work in place and materials suitably stored on site.

(B) When interim financing is not available, payments will be made in accordance with § 1924.6(a)(12) of this subpart.

(vii) *Exception to competitive bidding.* (A) *For profit applicants.* When State and local laws permit, an applicant other than a nonprofit organization or public body may negotiate a construction contract provided the State Director grants an exception and documentation shows that:

(*1*) The contract price is competitive with other projects similar in construction and design being built in the area under contracts whcih have been competitively bid.

(*2*) The proposed contractor is experienced in construction of similar size, scope, and complexity, and is recognized as a reliable builder.

(*3*) The proposed development work meets all requirements of this subpart.

(*4*) The requirements of paragraphs (e)(1) (ii), (iii), (iv), and (v) of this section are met.

(B) In considering an exception to competitive bidding for the applicants indicated above, the following additional steps will be taken in all cases.

(*1*) If after a full review of the case documents by the appropriate members of the State Office staff the State Director determines that the requirements have been met and the costs are reasonable, an exception to competitive bidding will be granted.

(*2*) If after the full review by the State Office staff the State Director determines that the negotiated contract price is not competitive with other similar projects in construction and design being build in the area, then the applicant will be requested to competitively bid the construction of the project in accordance with paragraph (e)(1)(i) of this section.

(*3*) If there is no agreement by FmHA and the applicant as to the construction cost, the State Director will cease any further action on the preapplication and inform the applicant of the right to appeal in accordance with Subpart B of Part 1900 of this chapter.

(C) Any requests for exceptions to competitive bidding that are not covered in this section may be submitted to the National Office for consideration.

(viii) *Exception to contract mthod—public body.* With the approval of the National Office, the State Director may grant to a public body an exception to the requirement for using contract method construction under the following circumstances;

(A) The loan or grant is for repair or rehabilitation of existing facilities and it is not practicable to perform all work by the contract method.

(B) The applicant has the managerial ability and qualified employees necessary to complete the work successfully.

(C) The applicant submits a written request to the District Director indicating:

(*1*) The scope of work and construction timetable;

(*2*) What phases of work can be contracted and what cannot;

(*3*) Why is it not practicable to contract all phases;

(*4*) Management ability and employee qualifications for performing the work;

(*5*) Proposed method of fund control and frequency of payments;

(*6*) How changes in scope of work and construction timetable will be approved; and,

(*7*) Proposed method of certifying progress and requesting payments.

(D) The request, recommendations of the District Director, appropriate members of the State Office staff and the State Director and the application file will be sent to the National Office.

(2) *Owner-builder method.* This method of development is used only when requested by profit or limited profit RRH applicants when the applicant or any of its controlling principals (such as stockholders, members, partners other than limited partners, directors, or officers), are general contractors by profession, and will serve as the builder of the project without a written construction contract. The State Director may make an exception to the contract method of construction and authorize proceeding by the owner-builder method of construction in accordance with the provisions of this section if the amount of the loan(s) does not exceed the State Director's approval authority. For projects over the State Director's authority, prior written consent of the National Office is required. In such cases, the drawings, specifications, cost estimates, copy of the State Architect/Engineer's review and detailed information on the applicant's qualifications will be submitted to the National Office along with the State Director's recommendations.

(i) The applicant's request to construct a project by the owner-builder method of construction shall be in the form of a letter giving specific and detailed

VOL 51
ISS 51
MR 17
1986
UMI

information concerning the owner-builder's proposal, and the qualifications and past experience of the owner-builder. The following information must be included with the request:

(A) A résumé indicating the owner-builder's history, ability, and experience.

(B) Dated and signed financial statements (including balance sheets and statements of income and expense) from current and prior years indicating the payment status of the owner-builder's accounts and any contingent liabilities that may exist.

(C) A written, dated, and signed statement agreeing to provide any funds necessary in excess of the applicant's contribution and the loan amount to complete the project.

(D) A credit report (obtained at no expense to FmHA) attesting to the owner-builder's credit standing.

(E) A listing of trade references that could be contacted to substantiate the owner-builder's experience and good standing.

(F) Statements from other persons for whom the owner-builder has done similar work, indicating the scope of the work and that person's evaluation of the owner-builder's performance.

(G) A current, dated and signed trade-item cost breakdown of the estimated total development cost of the project which has been prepared by the owner-builder. Form FmHA 1924–13 will be used for this purpose. If cost certification or cost estimation services are required by FmHA, the cost of such services may be included in the total development cost of the project. Any subcontractor, material supplier or equipment lessor sharing an identity of interest with the applicant/owner-builder as defined in § 1924.4(i) of this subpart must also provide a trade-item cost breakdown of the proposed amount.

(H) An example of the ledger-type accounting system that the owner-builder and/or the owner-builder's CPA or LPA proposes to set up and use in maintaining a running record of the actual cost of the project. In order to be acceptable, it must allow for a trade item basis comparison of the actual cost as compared to the estimated cost submitted in accordance with paragraph (e)(2)(i)(G) of this section.

(I) A written, dated, and signed statement agreeing to permit U.S. Department of Agriculture, the Comptroller General of the United States, or any of their duly authorized representatives, to have access to any books, documents, papers, and records which are directly pertinent to the specific Federal program for the purpose of making audit, examination, excerpts and transcriptions.

(ii) In order to grant an exception to the contract method of construction and proceed with the owner-builder method of construction, the State Director must determine that the following conditions exist:

(A) The applicant or at least one of its principals is a fully qualified and licensed (if necessary under applicable local law) builder by profession, has adequate experience in constructing the type of units proposed as well as projects of similar size, scope, and complexity and will be able to complete the work in accordance with the FmHA approved drawings and specifications.

(B) Based upon the information presented in the applicant's financial statements, the applicant is presently able and is likely to continue to be able to provide any funds necessary in excess of the applicant's contribution and the loan amount to complete the project.

(C) The total development cost of the project does not exceed that which is typical for similar type projects in the area. When the State Director determines it advisable, the State Director may require independent cost estimation by a professionally recognized cost estimation firm to help substantiate the total development cost of this project. The total development cost recognized by FmHA for each individual case will be determined by the Multiple Family Housing Coordinator with the advice of the State Architect.

(D) The owner-builder has provided sufficient information on all contracts or subcontracts in excess of $10,000 to permit compliance with § 1924.6(a)(11)(iv) of this subpart.

(iii) In addition to the requirements for the State Director to authorize the owner/builder method of construction as indicated in § 1924.13(e)(2) (i) and (ii) of this subpart, the following additional steps will be taken by the State Director.

(A) If, after a full review of the case documents by the appropriate members of the State Office staff, the State Director determines that the requirements have been met and the construction cost is reasonable, an exception to competitive bidding will be granted.

(B) If, after the full review by the State Office staff, the State Director determines that the construction cost is not competitive with other similar projects in construction and design being built in the area, the applicant will be requested to competitively bid the construction of the project in accordance with paragraph (e)(1)(i) of this section.

(C) If there is no agreement by FmHA and the applicant as to contraction cost and the applicant is not agreeable to any of the aforementioned alternatives, the State Director will cease any further action on the preapplication and inform the applicant of the right to appeal, in accordance with Subpart B of Part 1900 of this chapter.

(iv) The development cost of the project may include a typical allowance for general overhead and a builder's profit. These amounts may be determined by local investigation and also from HUD data for the area. The applicant/owner-builder and any subcontractors, material suppliers and equipment lessors having or sharing an identity of interest with the applicant/owner-builder may not be permitted a builder's profit or general overhead which exceed the percentage represented on their cost breakdown.

(v) Under no circumstances will loan funds be used to pay the applicant or its stockholders, members, directors or officers, directly or indirectly, any profit from the construction of the project except a typical builder's fee for performing the services that would normally be performed by a general contractor under the contract methods of construction. Discounts and rebates given the owner-builder in advance must be deducted before the invoices are paid. If discounts or rebates are given after the invoices are paid, the funds must be returned to the supervised bank account or applied on the interim construction loan, as appropriate.

(vi) The plans and specifications must be specific and complete so that there is a clear understanding as to how the facility will be constructed and the materials that will be used.

(vii) When architectural services are required by § 1924.13(a) during the construction and warranty phases they must be provided by an architect who has no identity of interest with the applicant/owner-builder. The services to be rendered during the construction and warranty phases include, but are not limited to inspections, changes in the scope of project or work to be done, administration of construction accounts, rejection of work and materials not conforming to the FmHA approved drawings and specifications, and other appropriate service listed in § 1924.13(a)(5) (v) and (vi) of this subpart.

(viii) The applicant/owner-builder and any subcontractor, material supplier or equipment lessor sharing an identity

of interest as defined in § 1924.4 (i) of this subpart must each provide certification as to the actual cost of the work performed in connection with the construction of the project of Form FmHA 1924–18 prior to final payment. For all such projects involving a total development cost of more than $350,000, and any other project where the State Director determines it appropriate, the applicant/owner-builder must provide an audit of all construction records by an independent CPA (or by an LPA licensed on or before December 31, 1979).

(A) Instructions specifically addressing the functions and responsibilities of the CPA or LPA are set forth in the FmHA handbook, "Instructions to Independent Certified Public Accountants and Licensed Public Accountants Performing Audits of Farmers Home Administration Borrowers and Grantees," which must be provided to the CPA or LPA. The objectives of the audit are to determine whether the project costs incurred are eligible and in accordance with FmHA policies, rules and regulations. It is not required that the CPA or LPA provide an opinion on any other financial statement such as a balance sheet or operating statement.

(B) In all cases, the CPA or LPA is expected to render an opinion. FmHA prefers an unqualified opinion concerning the cost certification. If other than an unqualified opinion is expressed, or if any deviations from generally accepted accounting principles are noted, the reasons must be fully explained in the audit report. Qualifying statements may render the certifications unacceptable or may require evaluation before a decision can be made. The State Director will determine the acceptability of any qualifying opinions. If the State Director determines it necessary, guidance may be obtained from the National Office or from the OGC.

(C) The CPA or LPA will audit the books, accounts and records of the applicant/owner-builder (and any subcontractor, material supplier or equipment lessor sharing an identity or interest) concerning the work performed, services rendered, and materials supplied in connection with the construction of the project to the extent necessary to assure that the amounts claimed as costs are necessary and reasonable, and present fairly the actual costs incurred. Upon completion of contraction and prior to final payment the CPA or LPA will provide an opinion concerning the actual cost. The CPA or LPA must also certify that examination has been made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as considered necessary, that to the best of the CPA or LPA's knowledge and belief the autual cost of construction performed under the contract is accurate and correct as represented, and that the CPA or LPA has no identity of interest with the applicant/owner-builder, architect, engineer, attorney, subcontractors, material suppliers or equipment lessors. FmHA reserves the right to determine, upon receipt, whether or not the certified statement of cost is satisfactory to FmHA.

(D) If the auditor is able to express an unqualified opinion, the following format is suggested for the certification:

We have examined the "Estate and Certificate of Actual Cost," (Form FmHA 1924–13) related to the development of (*project name and case number*).

Our examination was made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

The certificate of actual cost has been prepared on the basis of accounting and reporting practices prescribed by the Farmers Home Administration and conforms with generally accepted accounting principles. Other financial statements, such as a balance sheet or operating statement, have not been prepared. This report is intended solely for filing with FmHA and is not intended for any other purpose.

In our opinion, the accompanying Form FmHA 1924–13 referred to above, presents fairly the actual cost in the amount of $———, of the ——— project name———.

Amount paid and to be paid are shown as of the close of business———, 19—.

We certify that we have no financial interest in or with applicant/owner/builder, architect, engineer, attorney, subcontractors, material suppliers or equipment lessors, other than in the practice of our profession.

(E) Prior to final payment to anyone required to cost certify, FmHA must be provided with a certification and trade-item breakdown showing the actual cost compared to the estimated cost furnished in accordance with paragraph (e)(2)(i)(G) of this section Form FmHA 1924–13 is the form of comparative breakdown that must be used, and contains the certification required of the applicant/owner-builder prior to final payment. The amount for builder's general overhead and builder's profit shall not exceed the percentage represented on the estimate of cost breakdown provided in accordance with paragraph (e)(2)(i) (G) of this section for the owner-builder or any contractor, subcontractor, material supplier or equipment lessor having or sharing an identity of interest with the applicant/owner-builder. Final payment of the owner-builder will be adjusted, if necessary, to assure that the amounts shown on the certificate of actual cost do not exceed the percentage represented on the cost breakdown.

(ix) Requests for payment for work performed by the owner-builder method, shall be submitted to the FmHA District Director for review and approval prior to each advance of funds in order to insure that funds are used for authorized purposes. Requests for payment shall be made on Form FmHA 1924–18 or other professionally recognized form containing the following certifications to FmHA:

I hereby certify to the Farmers Home Administration that I have carefully inspected the work and as a result of my inspection and to the best of my knowledge and belief, the quantities shown in this estimate are correct and have not been shown in previous estimates and the work has been performed in accordance with the contract documents.

The review and acceptance of partial payment estimates by FmHA does not attest to the correctness of the quantities shown or that the work has been performed in accordance with the plans and specifications.

(A) If interim financing is available to reasonable rates and terms for the construction period, such financing shall be obtained. Exhibit D of Subpart E of Part 1944 of this chapter shall be used to inform the interim lender that FmHA will not close its loan until the project is complete, ready for occupancy, evidence is furnished indicating that all bills have been paid for for work completed on the project, all inspections have been paid for work completed on the project, all

VOL 51
ISS 51
MR 17
1986
UMI

inspections have been completed and all required approvals have been obtained from any governmental authorities having jurisdiction over the project. Upon presentation of proper partial payment estimates containing an estimate of the value of work in place which has been prepared and executed by the owner-builder, ceritified by the applicant's architect, and accepted by FmHA, the interim lender may advance construction funds in accordance with the provisions of this section. It is suggested that the partial payment not exceed 90 percent of the value of work in place and material suitably stored on site.

(B) If interm financing is not available, partial payments not to exceed 90 percent of the value of work in place and materials suitably stored on site may be made to the owner-builder for that portion of the estimated cost of development guaranteed by a letter of credit or deposits meeting the requirements of § 1924.6(a)(3)(iii) (A), (B) or (C) of this subpart. Partial payments may not exceed 60 percent of the value of work in place will be based upon an application for payment containing an estimate of the value of work in place which has been prepared and executed by the owner-builder, certified by the borrower's architect, and accepted by FmHA. Prior to receiving the first partial payment, the owner-builder must submit a schedule of prices or values of the various trades or phases of the work aggregating the total development cost of the project as required in § 1924.13(e)(2)(i) (G) and (H). Each application for payment must be based upon this schedule, and show the total amount owned and paid to date for materials and labor procured in connection with the project. With each application for payment, the owner-builder must also submit evidence showing how the requested the requested partial payment is to be applied, evidence showing that previous partial payments were properly applied, and a signed statement form the applicant's attorney, title insurance company, or local official in charge of recording documents certifying that the public records have been searched and that there are no liens of record. When the District Director has reason to believe that partial payments may not be applied properly, checks will be made payable to persons who furnish materials and labor for eligible purposes in connection with the project.

(x) Under no circumstances shall funds be released for final payment or to pay any items of the builder's profit until the project is 100 percent complete, ready for occupancy, and the owner-builder has completed and properly executed Form FmHA 1924-13 or complied with the cost certification procedures § 1924.13(e)(2)(viii) of this subpart.

§§ 1924.14—1924.50 [Reserved]

Exhibit A—Breakdown of Dwelling Costs for Estimating Partial Payments

	With slab on grade (percent)	With crawl space (percent)	With basement (percent)
1. Excavation	3	5	6
2. Footings, foundations, columns	8	8	11
3. Floor slab or framing	6	4	4
4. Subflooring	0	1	1
5. Wall framing, sheathing	7	7	6
6. Roof and ceiling framing, sheathing	6	6	5
7. Roofing	5	5	4
8. Siding, exterior trim, porches	7	7	6
9. Windows and exterior doors	9	9	8
10. Plumbing—roughed in	3	2	3
11. Sewage disposal	1	1	1
12. Heating—roughed in	1	1	1
13. Electrical—roughed in	2	2	2
14. Insulation	2	2	2
15. Dry wall or plaster	8	8	7
16. Basement or porch floor, steps	1	1	6
17. Heating—finished	3	3	3

26. Gutters and downspouts	1	1	1
27. Grading, paving, landscaping	3	3	3
	100	100	100

Exhibit B—Requirements for Modular/Panelized Housing Units

For the benefit of FmHA this Exhibit prescribes evaluation, acceptance, inspection and certification procedures for modular/panelized housing units proposed for use in Farmers Home Administration (FmHA) Rural Housing programs. It applies to proposed development packages provided either under a contract between an FmHA borrower and a single contractor or under a conditional commitment. This Exhibit also describes the use of background information available through the Department of Housing and Urban Development (HUD) for analysis of manufactured products. This Exhibit also applies to the evaluation of manufactured farm service buildings in paragraph XI, below. For the purpose of this Exhibit, County Supervisor and County Office also mean the District Director and District Office, respectively.

I. Applicable Standards and Manuals

A. The HUD Handbook 4950.1, Technical Suitability of Products Program Technical and Processing Procedures, must be followed by housing manufacturers to obtain acceptance of their products. Acceptance documents issued by HUD include: Structural Engineering Bulletins (SEB) on a national basis, Area Letters of Acceptance (ALA) which when accepted by all Area HUD Offices in a HUD region will, in essence, become Regional Letters of Acceptance (RLA), Truss Connector Bulletins (TCB): and, Mechanical Engineering Bulletins (MEB). These documents as well as the Use of Material Bulletins (UM) and Materials Release Bulletins (MR) are addendums to the HUD Minimum Property Standards (MPS).

B. All State FmHA Offices should maintain a close working relationship with each HUD office in their jurisdiction to assure coordination. Any deviations in structure, materials or design from HUD acceptance documents must comply with one of the other applicable development standards.

II. Modular Housing Units That Require Factory Inspections

Only those types which cannot be completely inspected on site are required to obtain acceptance from HUD. Those that receive acceptance will be periodically factory inspected by HUD, usually about every 6 months.

III. Panelized Housing Units That Do Not Require Factory Inspections

A. Housing completely assembled on the building site does not require HUD acceptance. This will include housing that is manufactured but is assembled on the site such as: precut pieces, log wall houses, trussed roof rafters or floor trusses; open panel walls, and other types that can be completely inspected on site.

B. Housing that is assembled in local materials dealers' yards for moving to local sites and to be purchased by an FmHA applicant, will be inspected during construction in the yard by the local FmHA County representative. These units must be constructed according to the applicable development standard and not transported out of the local FmHA County Office jurisdiction. The inspection must be recorded on Form FmHA 1924-12, "Inspection Report."

IV. Manufacturer's Actions Required for Submissions to FmHA Are Listed in Attachment 1 to This Exhibit B

V. State FmHA Office Actions When Manufacturing Facilities Are in its Jurisdiction. The State Office, Upon Receipt of Manufacturer's Submission, Must

A. Determine that the unit structural system has been accepted by HUD as appropriate under HUD Handbook 4950.1 requirements.

B. Review the thermal characteristics and approach of the calculations to determine actions to be taken in compliance with paragraph IV C of Exhibit D of this subpart.

C. Review the proposal for compliance with § 1924.5(d)(1) of this subpart.

D. Determine that the prerequisites for consideration of acceptance by FmHA are met. The prerequisites include all of the following:

1. A current acceptance document from HUD (SEB, RLA, LLA), except for Category III housing (modular/panelized housing that does not have to have a Structural Engineering Bulletin as prescribed in HUD Handbook 4950.1, which is available in any FmHA State Office). In Category III states, the state government requirements for manufactured housing must be followed.

2. A current HUD Factory Inspection Report, Form No. 2051m, or in the case of Category III states, a copy of the inspection report from the state government or accepted third party performing the factor inspection. Each report must be made by HUD or a HUD authorized agency, and must be no older than 6 months.

3. A letter from the manufacturer requesting a review for acceptance for loan consideration. Enclosed with the letter shall be all the information listed in Attachment 1 to this Exhibit B.

E. Issue acceptance letters to the manufacturer stating the conditions of acceptance in the format of Attachment 2 to this Exhibit B. The letter shall have an attachment listing all models accepted in the format of Attachment 3 to this Exhibit B. A copy of the acceptance letter and list of models shall be sent to each County Office in the State and, when requested by the manufacturer, to each other State FmHA Office in which the product is to be marketed.

F. After initial review of a submission, maintain a master file of accepted manufacturers and models and review the file twice yearly to determine the currency of the factory inspection reports and HUD or HUD or state government acceptance documents.

G. Notify manufacturers of overdue factory inspection reports, for acceptance of documents review and updating, using the format of Attachment 4 to this Exhibit B. Accompanying the notification will be a temporary acceptance sheet (Attachment 3 to this Exhibit B) indicating to the manufacturer that the company models have temporary acceptance for 60 days. If the manufacturer provides evidence that a review is being processed by HUD, a maximum of an additional 90 days may be granted. Otherwise, the acceptance shall terminate on the last extension date and it will be necessary for the manufacturer to resubmit as if it is for initial acceptance.

H. Distribute a list of added models, deleted models, or notice of deletion of any manufacturer's product to the County Offices and other State FmHA Offices as necessary.

I. Issue an initial supply of Manufacturer's and Builder's Certification forms (Attachment 5 to this Exhibit B) to each existing and newly accepted manufacturer. Manufacturers are to duplicate this form as necessary in their market areas.

(J) Resolved any problems with the manufacturer, as reported by the County Office. Action may include coordination, FmHA plant inspections or cancellation of Acceptance Letters when problems persist.

VI. County Office Action

A. When an application is received involving any of the manufacturer's products on the acceptance list, the County Office FmHA authorized personnel will:

1. Review the drawings and description of materials described in paragraphs A and B of Attachment 1 to this Exhibit B. The floor plans and elevations must be identifiable with the model listed in the acceptance list issued by the State Office.

2. Require a builder/dealer or the manufacturer to provide any drawings necessary to adapt the house to the site conditions where the house will be located.

3. Require site plan drawing such as illustrated in Attachments 1 and 2 to Exhibit C of this subpart.

4. Inspect and identify the model delivered against the manufacturer's certification and the accepted drawings and description of materials before the unit has been set on the foundation.

5. Require the builder/dealer to certify that the work for which the builder/dealer is responsible has been erected in compliance with the applicable development standard. This certification will be completed on a copy of Attachment 5 to this Exhibit B, and filed in County Office case file.

6. Observe any noncompliance with the applicable development standard or with paragraphs IV and V of this Exhibit B. In this respect:

a. Minor noncompliance will be resolved by the manufacturer through the builder/dealer. In cases where there is no builder/dealer, the County Office may resolve such issues with the manufacturer directly.

b. Noncompliance that cannot be resolved at the County Office level will be reported to the State Office.

7. Inspect manufactured housing according to § 1924.8(d) of this subpart.

8. Be aware that the Accepted List may include many models from which loan applicants may choose. No changes from accepted model designs are permitted. The model selected by an application should be apropriate to the needs of that particular family in accordance with FmHA Instruction 1944-A which is available in all FmHA offices.

VII. Noncompliance Issues

A. When minor issues are noted, the County Office will attempt to resolve them as described above. If they cannot be resolved locally, they will be referred to the State Office. When any issues cannot be resolved at State Office level, the National Office Program Support Staff (PSS) will be contacted for guidance.

B. The National Office PSS, coordinating with HUD, will take the appropriate actions to resolve the issues reported.

C. Manufacturers and builder/dealers must be aware that if the FmHA inspector finds any of the following conditions, the inspector may refuse to accept the construction until corrections have been made:

1. Evidence of noncompliance with any option of the method described in the HUD—SEB, RLA, or LLA.

2. Faulty shop fabrication, including surface defects.

3. Damage to shop fabricated items or materials due to transportation, improper storage, handling or assembly operation.

4. Unsatisfactory field or site workmanship.

VIII. Actions by Other State FmHA Offices.

When a State Office receives a copy of the Accepted List from the State Office in which a manufacturing plant is located, it will:

VOL 51
ISS 51
MR 17
1986
UMI

A. Maintain a file, by manufacturer, of each acceptance list models.

B. Provide copies of the acceptance list of models to each County Office in the State.

C. Request a copy of the drawings, description of materials, and the thermal calculations to determine compliance with the thermal requirements for the county in which the house is to be located according to Exhibit D of this subpart.

D. Check to see that County Offices within the State will act as prescribed in paragraph VI of this Exhibit B.

E. When two or more State Offices have different interpretations of the acceptability of a particular model, there must be an agreement between the States so that they will have the same requirements. If the States cannot agree, the National Office, PSS, shall be consulted for guidance.

IX. Subsequent Review

FmHA will make periodic reviews of houses, both site-built and houses manufactured offsite, to determine acceptability of the finished product. If, in the judgment of the FmHA, the product has failed to perform satisfactorily, acceptance may be withdrawn. The State Director will notify the manufacturer and/or the builder/dealer of the reasons for the withdrawal no later than the time of withdrawal. Negotiations for corrections will be carried out by the County Office with the assistance of the State Office or National Office, as necessary.

X. Materials and Products Acceptance—Material Release Bulletins, Use of Materials Bulletins, Manufacturer's Instructions.

A. The Materials Release (MR) and Use of Materials Bulletins (UM) provide for the national acceptance of specific nonstandard materials and products not covered in the current MPS.

B. When contractors or builders intend to use products or materials not listed as approved in the MPS, the FmHA personnel reviewing or concerned with the approval of construction in which the product is to be used, will require the contractor or builder to furnish a Materials Release Bulletin or Use of Materials Bulletin on the materials or products. If the product has been accepted, the supplier should be able to obtain the bulletin for the contractor or builder from the manufacturer. These bulletines describe the product or materials limitations to use, method of installing or applying, approved type of fasteners, if used, etc. and will provide the contractor with instructions as to proper installation or application.

C. When FmHA personnel are unfamiliar with any materials or products which have been accepted in the MPS, they will request the contractor or builder to furnish the manufacturer's instructions to assure that the materials or products are properly installed or applied. Any questions on any product that cannot be resolved in the County Office should be referred to the State Office. When the question cannot be resolved at the State Office level, the National Office PSS should be consulted for guidance.

XI. Manufactured Farm Service Buildings

A. When a loan application is received that involves a manufactured building or special equipment that cannot be completely inspected on the site, the local State Land Grant University recommendations should be requested.

B. When the County Office questions the advisability of making a loan on a manufactured building, the State Office should also be consulted.

C. The State Office should review and make recommendations to the County Office. If doubt still exists, the National Office, PSS, should be consulted for guidance.

Attachment 1—Required Information for Acceptance of Modular/Panelized Housing Units

The manufacturer or sponsor of modular/panelized housing units wishing to participate in the Farmers Home Administration (FmHA), Rural Housing programs shall submit to the FmHA State Director having jurisdiction over the State in which the proposed housing is to be manufactured, two complete sets of the information listed below for evaluation. Submissions not including all the information requested will be returned to the manufacturer or sponsor.

A. *Statements.*

1. Name and location of organization, including titles and names of its principal officers.
2. A brief description of plant facilities.
3. Extent of intended market distribution, including a list of any other States in which units will be marketed.
4. The method of quality control during site installation.
5. A copy of the applicable current HUD Structural Engineering Bulletin (SEB), Regional Letter of Acceptance (RLA), or Area Letter of Acceptance (ALA).
6. A current factory inspection report made within 6 months by HUD or HUD authorized agency.
7. Name and address of any third party inspection agency.
8. Location of nearest assembled product for inspection.
9. Field manuals for site installation and/or set-up procedures.
10. Specifications or descriptions of materials using either Form FmHA 1924–2, (HUD–FHA Form 2005), "Description of Materials," including sizes, species and grade of all building and finishing materials. All blanks should be filled and additional sheets may be attached as well as equipment manufacturer's brochures. Use an asterisk (*) to denote all items of onsite construction that will be provided by the builder-dealer. The builder-dealer must complete a form for the builder-dealer's portion of the work. Use N/A in any blank which is not applicable.
11. Names and addresses of other public and private agencies which have rendered or been asked to render a technical suitability or acceptance determination with respect to the products or structural methods employed.
12. Written certification that construction drawings and specifications conform with the applicable development standard.
13. Any other pertinent information.
14. An index of all documents submitted.

B. *Working Drawings.* For emphasis as to the details required for modular/panelized housing proposals, the following items are listed in addition to and in more detail than the requirements in Exhibit C of this subpart. In some cases, the drawing presentation sheets may be required to be reduced to 200 mm by 266 mm (8 x 10½ inches) sheet size:

1. Foundation and/or Basement Plan. This plan shall include anchorage details, exterior and interior dimensions, typical footings, wall thickness, pilaster sizes and locations, column or pier sizes and locations and girders required to support the structures. Show location of all equipment (furance, water heater, laundry tubs, sump, etc.) floor drains, electrical outlets, electrical entrance panels, and all doors and windows or crawl space vents with all sizes indicated.

2. Floor Plans of all levels. Show square footage of each habitable room with square footage of each area of natural light and ventilation. In addition, a design sketch scaled properly to illustrate a typical furniture arrangement for all habitable levels is required to indicate intended occupancy functions of the design. A window and door schedule should also be provided indicating glazed size, sash, size, and thermal conductance of each type.

3. All exterior elevations including openings and sizes; wall finish materials, flashing, finish grades intended, depth of footings when known, finish floor, ceiling heights, roof slope, location of downspouts, gutters, vents for both structural spaces and for equipment. Indicate construction joint locations and details of connections between sections, modules or components.

4. Building cross sections showing size and spaces of all framing members from lowest member (bottom of footing) to highest point of roof (ridge) plus:

a. Type of material and method of application of all covering materials, such as, subflooring, combination subflooring and underlayment, sheathing and interior and exterior finishes;

(b) Complete details including computations of trussed rafter systems with the architect/engineer's stamp of those responsible for the design.

(c) Details of insulation and vapor barrier installation and attic ventilation. If the thermal characteristics to be provided are determined according to the optional method for overall structure performance allowed in Exhibit D of this subpart, the submission and complete engineering calculations with all details of construction shall be sent to Administrator, Attn. PSS, FmHA, Washington, DC 20250, for analysis as prescribed in paragraph IV C of Exhibit D of this subpart.

(d) Special details as necessary to show any special features of construction including method of fabricating, erection, joining, and finishing of all elements; and

(e) Details and sections of stairways including all critical dimensions, such as, rise, run, and headroom.

5. Interior elevations of kitchen cabinets and bathroom elevations with schedule of all shelf, counter top and drawer footage. Indicate whether kitchen cabinets are to be custom made for each model or made for any model by a cabinet manufacturing company.

6. Plumbing schematics, including pipe materials, sizes and plumbing code compliance.

7. Heating plan, including heat loss of each room, is needed for heating systems, sizings and capacities, forced air, electric baseboard, or electric space heaters and, if applicable, heat gain. For forced air systems, include supply and return duct layout and location of appropriate diffusers.

8. Electrical plan, including circuit chart or diagram.

9. Any other pertinent facts or drawings that will better explain why and how certain unusual materials or structural methods are employed.

John Dough Manufacturing Company,
3444 Residence Avenue, Elkton, Indiana 00051

Dear Sirs: Although the documents submitted to this office have only received a cursory review, they appear to be in substantial compliance to qualify your firm for the type of acceptance indicated on the attached list.

The acceptance being issued is subject to this letter of conditions, compliance with HUD Handbook 4950.1, Technical Suitability of Products Program Technical and Processing Procedures, compliance with Farmers Home Administration (FmHA) Thermal Performance Construction Standards, and compliance with the conditions set forth in the HUD acceptance document, if applicable, whose number appears on the acceptance.

The manufacturer and the authorized builder-dealer bear the responsibility of complying with the above exhibits submitted and the applicable development standard.

The manufacturer and/or builder-dealer also shall:

1. Provide positive identification of the modular unit by model, date of manufacture and factory in which the unit was manufactured.
2. Furnish with each home to be financed by FmHA in (State), a written certificate (Attachment 5 to this Exhibit B) endorsed by the builder-dealer certifying that all requirements have been satisfied.
3. Furnish the local FmHA County Supervisor with a complete set of drawings including site plans, description of materials, structural engineering bulletins when applicable in the State, and documentation relating to the manufacture, transportation, erection, and installation for each model of modular-panelized housing to be financed in the county. Electrical, plumbing and heating plans must be furnished for each model in addition to the basic drawings. Floor plans and elevation drawings may vary from those listed in Attachment 1 of Exhibit B to FmHA Instruction 1924–A to reflect each of the manufacturer's models provided they are in compliance with the applicable development standard and the FmHA Thermal Performance Construction Standards and provided they have been accepted and listed in this state's approval of manufactured structures. No field alterations to the accepted models will be allowed.
4. Furnish, when required by the County Supervisor, foundation drawings (including special foundation design considerations when the unit is to be erected in seismic zones 1, 2 or 3) adapting the modular home to any unusual site conditions needing information additional to that furnished by the standard drawings.
5. Furnish the County Office with a copy of inspection reports of the manufacturing facilities immediately after the inspection reports have been completed.
6. Allow FmHA personnel to inspect the plant facilities at any time and furnish all FmHA State Offices, where acceptance has been obtained, with a copy of any Farmers Home Administration Inspection Reports of the firm's manufacturing facilities immediately after the inspection reports have been completed.
7. In the event there are major changes to the submitted drawings obtain approval under the HUD Technical Suitability of Products Program and submit verification of this approval to the County Office for FmHA State Acceptance Listing. Any modular home shipped with major changes incorporated and not having such changes on file at the County Office may be rejected.

(Each State can add state and local requirements appropriate to this letter of conditions)

This acceptance may be subject to corrective action when deficiencies are noted in the product, field inspections, manufacturing facilities, or when there is noncompliance with the provisions of the HUD Technical Suitability of Products Program.

The inclusion of these models on the acceptance list is based only on the material and structural aspects of the manufactured units. Final determination of acceptability rests with FmHA personnel. Other factors relating to the property in its entirety such as appraisal, location, sustained market acceptance, architectural planning and appeal, thermal qualities, mechanical and electrical equipment, etc., must be considered in the final determination.

Your cooperation in this acceptance program is appreciated.

Sincerely,

State Director.

John Dough Manufacturing Company.
3444 Residence Drive, Elktown, Indiana 00061

Dear Sirs: As set forth in acceptance letters issued by this office, acceptance of modular/panelized homes in this state is based on HUD's Technical Suitability of Products Program and the conditions stated in the acceptance letter. Your file has been reviewed and the following has been noted

_____ An inspection report of your plant facilities is overdue. Inspections are required twice yearly. The last inspection report on file at this office is dated _____

_____ Your Structural Engineering Bulletin No. ___ dated _____ has not been reviewed by HUD. Reviews are generally required every three years. Temporary acceptance will be considered when you provide evidence that the review documents have been submitted to HUD.

_____ The drawings being used for the construction of your homes are not listed in your Structual Engineering Bulletins. Drawings used in the field should be those upon which the Structural Engineering Bulletin was issued.

_____ There have been ___ revisions to the development standards since _____, the date of the last drawings we have on file for your homes. It is recommended that you review the revisions to ascertain whether your drawings need to be updated.

Please submit a written response and appropriate documents for the above items within ___ days, or your product will be removed from the acceptance list until your firm can again qualify. If you have any problems furnishing the above within the time stated, please contact this office

We look forward to receiving the materials indicated so that your firm's listing may be continued.

Sincerely,

State Director.

Attachment 5—Certification by Manufacturer

Delivery location of structure or component—

This is to certify that Model _________ Serial Number _______ Manufactured _____ 19___ in our _________ plant and being sold to (name of builder-dealer or borrower) has been manufactured in accordance with drawings and specifications on file in the FmHA State Office and that the construction complies with applicable development standards except as modified by HUD Acceptance Document (SEB, RLA, LLA) No. _______ dated _______, and in compliance with the FmHA Thermal Performance Construction Standards.

Title

Exhibit C—List of Required Drawings and Specifications

This exhibit applies to all new buildings to be constructed, including all single family housing and related facilities and, as applicable, farm housing and farm service buildings.

I. General

The documents recommended in this Exhibit correspond with the list of Exhibits required in Chapter 3 of the Department of Housing and Urban Development (HUD) "Architectural Handbook for Building Single-Family Dwellings" No. 4145.2. This exhibit may be used as a public handout and shall be used as a guide for drawings and specifications to be submitted in support of any type of application involving construction of major new buildings or extensive rehabilitation, alterations or additions to existing buildings. Descriptions of work for minor alterations or repairs need pertain only to work to be done and may be in narrative form when acceptable to the County Supervisor. Complete and accurate drawings and specifications are necessary.

A. To detemine the acceptability of the proposed development,

B. To determine compliance with the applicable standards and codes,

C. To perpare a cost estimate, and

D. To provide a basis for inspections and the builder's warranty.

II. Drawings for a Specific Structure

Drawing for individual single dwellings shall provide at least the following:

A. *Plot Plan.* Refer to Example Plot Plan No. 1, Attachment 1 to this Exhibit C. Ratio: 1:240 (1″=20′) (at scale, 1″=20′ or 1/16″=1′0″ minium):

1. Lot and block number.

2. Dimensions of plot and north point.

3. Dimensions of front, rear, and side yard.

4. Location and dimensions of garage, carport, and other accessory buildings.

5. Location and sizes of walks, driveways, and approaches.

6. Location and sizes of steps, terraces, porches, fences, and retaining walls.

7. Location and dimensions of easements and established setback requirements, if any.

8. Elevations at the following points: (a) First floor of dwelling and floor of garage, carport and other accessory building; (b) finish curb or crown of street at points of extension of lot lines; (c) finish grade elevation at each principal corner of structure; (d) finish grade at bottom of drainage swales at extension of each side of structure as feasible.

9. The following additional elevations, as applicable, if the topography of the site or the design of the structure is such that special grading, drainage or foundations may be necessary. Examples are irregular or steeply sloping sites, filled areas on sites, or multi-level structure designs; (a) Finish and existing grade elevations at each corner of the plot; (b) existing and finishi grade at each principal corner of dwelling; (c) finish grade at both sides of abrupt changes of grade such as retaining walls, slopes, etc.; (d) other elevations that may be necessary to show grading and drainage.

10. Indication of type and approximate location of drainage swales.

11. When an individual water supply and/or sewage system is proposed, drawings, specifications and other items prescribed in Paragraph V of this Exhibit.

B. *Floor Plans:*

1. Scale, 1:50 (¼″=1′0″).

2. Floor plan of each floor and basement, if any. Show typical furniture locations to suggest intended use of each habitable space.

3. Plan of all attached terraces and porches, and of garage or carport.

4. If dwelling is of crawl-space type, a separate foundation plan. Slab-type foundation may be shown on sections.

5. Direction, size and spacing of all floor and ceiling framing members, girders, columns or piers.

6. Location of all partitions and indication of door sizes, and direction of door swing.

7. Location and size of all permanently installed construction and equipment such as kitchen cabinets, closets, storage shelving, plumbing fixtures, water heaters, etc. Details of kitchen cabinets may be on separate drawing.

8. Location and symbols of all electrical equipment, including switches, outlets, fixtures, etc.

9. Heating system on separate drawing, or when it may be shown clearly it may be part of the floor or basement plan showing: (a) Layout of system; (b) location and size of ducts, piping, registers, radiators, etc.; (c) location of heating unit and room thermostat; (d) total calculated heat loss of dwelling including heat loss through all vertical surfaces, ceiling and floor. When a duct or piped distribution system is used, calculated heat loss of each heated space is required.

10. Cooling system, on separate drawings or, as part of heating plan, floor or basement plan showing: (a) Layout of system; (b) location and size of ducts, registers, compressors, coils, etc.; (c) heat gain calculations, including estimated heat gain for each space conditioned; (d) model number and Btu capacity of equipment or units in accordance with applicable Air Conditioning and Refrigeration Institute (ARI) or American Socity of Refrigerating Engineers (ASRE) Standard; (e) Btu capacity and total Kilowatt (KW) input at stated local design conditions; (f) if room or zone conditioners are used, provide location, size and installation details.

C. *Exterior Elevations:*

1. Scale, 1:50 (¼″=1′0″). Elevations, other than main elevation, which contain no special details may be drawn at 1:100 (⅛″=1′0″).

2. Front, rear and both side elevations, and elevations of any interior courts.

3. Windows and doors—indicate size unless separately scheduled or shown on floor plan.

4. Wall finish materials where more than one type is used.

5. Depth of wall footings, foundations, or piers, if stepped or at more than one level.

6. Finish floor lines.

7. Finish grade lines at buildings.

D. *Details and Sections:*

1. Section through exterior wall showing all details of construction from footings to highest point of road. Where more than one type of wall material is used, show each type. Scale, 1:25 (⅜″=1′0″) minimum.

2. Section through any portion of dwelling where rooms are situated various levels or where finished attic is proposed, Scale, 1:50 (¼″=1′0″) minimum.

3. Section through stair wells, landings, and stairs, including headroom clearances and surrounding framing. Scale, 1:50 (¼″=1′0″) minimum.

4. Details of roof trusses if proposed, including connections and stress or test data with seal of architect or engineer responsible. Scale of connections, 1:25 (⅜″ = 1′0″) minimum.

5. Elevation and section through fireplace. Scale, 1:25 (⅜″ = 1′0″) minimum.

6. Elevations and section through kitchen cabinets, indicating shelving. Scale, 1:50 (¼″ = 1′0″) minimum.

7. Sections and details of all critical construction points, fastening systems, anchorage methods, special structural items or special millwork. Scale as necessary to provide information, 1:25 (⅜″ = 1′0″) minimum.

III. Master Drawings for Group Structures

Drawings for a group of structures (such as for several conditional commitments) may be submitted in lieu of drawings for each individual property when a number of applications are simultaneously submitted involving repetition of the same type structure.

A. *Master plot plan* shall include the following:

1. Scale which will provide the following information in a clear and legible manner.

2. North point.

3. Location and width of streets and rights-of-way.

4. Location and dimensions of all easements.

5. Dimensions of each lot.

6. Location of each dwelling on lot with basic dimensions.

7. Dimensions of front, rear and side yard.

8. Location and dimensions of garages, carports, or other accessory buildings.

9. Identification of each lot by number and indication of basic plan and elevation type.

10. Location of walks, driveways, and other permanent improvements.

B. *Typical plot plan* for each basic type dwelling may be submitted in lieu of fully detailing each lot on master plot plan, when topography and lot arrangements present no individual planning or construction problems.

1. Information not shown on the typical plot plan shall be included on the master plot plan.

2. Typical plot plans shall not be used for corner lots, lots with irregular boundaries, lots involving pronounced topographic variations or other lots where individual detailing is necessary.

3. Location of dwelling on typical lot and full dimensions.

4. Location and dimensions of all typical improvements, such as garage, carport, accessory buildings, walks, drives, steps, porches, terraces, trees, shrubs, retaining walls, fences, etc.

C. *Grading* many be shown on separate grading plan or on the master plot plan. Scale shall be sufficiently large to provide the following information in clear and legible manner:

1. Contours of existing grade at intervals of not more than 1.524 m (5 feet). Intervals less than 1.524 m (5 feet) may be required when indicated by the character of the topography.

2. Location of house and accessory buildings on each lot.

3. Identification of each lot by number.

4. Elevations in accordance with individuals plot plan including bench mark and datum or, in lieu of finish grade elevations, contours of proposed finish grading may be submitted. Contour intervals selected shall be appropriate to the topography of the site.

5. Lot grading shall be shown by indicating protective slopes and approximate location of drainage swales.

6. Location of drainage outfall, if any drainage is not to a street.

D. *Floor Plans, Elevations Sections, and Details* shall be submitted for each basic plan. Alternate elevations to basic plan may be shown at scale, 1:100 (⅛″=1′0″).

IV. Specifications

Form FmHA 1924–2, "Description of Materials," or other acceptable and comparable descriptions of all materials forms shall be submitted with the drawings. The forms shall be completed in accordance with the instructions of Form FmHA 1924–2 to describe the materials to be used in the construction.

A. Form FmHA 1924–2 may be reproduced provided size, format and printed text are identical to the current official form. When it is reproduced, the following deletions must be made:

1. All lines indicating FmHA form numbers or other Government agency initials and/or numbers, and

2. The United States Government Printing Office (GPO) imprint and reference number.

B. The material identification shall be in sufficient detail to fully describe the material, size, grade and when applicable, manufacturer's model or identification numbers. When necessary, additional sheets must be attached as well as manufacturers specification sheets for equipment and/or special materials, such as aluminum siding or carpeting.

V. Individual Water Supply and Sewage Disposal Systems

When an individual water and/or sewage disposal system is proposed, the following additional information must be submitted.

A. *Approval and recommendations of other authorities.*

VOL 51
ISS 51
MR 17
1986
UMI

1. A written opinion by the health authority having jurisdiction that the site is suitable and acceptable for the proposed system(s) and.

2. If available a soils report from the local USDA-Soil Conservation Service Office and any recommendations they may have.

3. Approval of appropriate environmental control authority.

4. A signature of the health authority on the plot plan indicating approval of design of the proposed system.

B. *Plot Plan.* Refer to Example Plot Plan No. 2 Attachment 2 to this Exhibit C.

1. Location and size of septic tank, distribution box, absorption field or bed, seepage pits and other essential parts of the sewage disposal system and distance to all individual wells and open streams or drainageways.

2. Location of well, service line and other essential parts of the water supply system and distance to other wells and/or sewage disposal system.

3. Exact location of individual systems (water or sewage) on adjacent properties and decription of system if available.

C. Construction details of all component parts of individual water supply and sewage disposal system shall clearly indicate material, equipment and construction. Extra sheets and drawings should be added as necessary to fully explain the proposed installation.

Exhibit D—Thermal Performance Construction Standards

I. Purpose

This Exhibit prescribes thermal performance construction standards to be used in all housing loan and grant programs. These requirements shall supersede any of the development standards defined in § 1924.4(h) of this subpart.

II. Policy

All loan or grant application involving new construction and all applications for conditional commitments shall have drawings and specifications prepared to comply with paragraphs IV A or IV C and D of this Exhibit. All existing dwellings to be bought with FMHA loan funds shall be considered in accordance with paragraphs IV B or C of this Exhibit.

III. Definitions

A. *British thermal unit* (Btu) means the quantity of heat required to raise the temperature of one pound (.4535 Kg.) of water by one degree Fahrenheit. For example, one Btu is the amount of heat needed to raise the temperature of one pound of water from 59 degrees Fahrenheit to 60 degrees Fahrenheit.

B. *Glazing* is the material set into a sash or door when used as a natural light source and/or for occupant's views of the outdoors.

C. *"R" value,* thermal resistence, is a unit of measure of the ability to resist heat flow. The higher the R value, the higher the insulating ability.

D. *"U" value* is the overall coefficient of heat transmission and is the combined thermal value of all the materials in a building section. U is the reciprocal of R. Thus U=1/R or R=1/U or 1/C where C is the thermal conductance and is the unit of measure of the rate of heat flow for the actual thickness of a material one square foot in area at a temperature of one degree Fahrenheit. The lower the U value, the higher the insulating ability.

E. *Winter degree-day* is a unit based on temperature difference and time. For any one day, when the mean temperature is less than 65 degrees Fahrenheit (18.3 degrees Celsius), there are as many degree-days as the number of degrees difference between the mean temperature for the day and 65 degrees Fahrenheit. The daily mean temperature is computed as half the total of the daily maximum and daily minimum temperatures.

IV. Minimum Requirements

A. All dwellings, single family or multifamily, to be constructed with FmHA loans and/or grant funds and all repair, remodeling or renovation work performed on dwellings with FmHA loan/or grant funds shall be in conformance with the following, except as provided in paragraphs IV B 3 and IV D of this Exhibit:

NEW CONSTRUCTION

[Maximum U values for ceiling, wall and floor section or various construction]

Winter degree days (Note 1)	Ceilings (Note 2)	Walls	Floors (Note 3)	Glazing (Note 4)	Doors (Note 5)
1,000 or less	.05	.08	0.8	1.13	
1,001 to 2,500	.04	.07	0.7	.69	
2,501 to 4,500	.03	.05	0.5	.69	(1)
4,501 to 8,000	.03	.05	0.5	.47	(2)
8,001 or more	.026	.05	.05	.47	(2)

[1] Storm door if hollow core door or if over 25% glass.
[2] Storm door.

(U values are not adjusted for framing. Values calculated for components may be rounded. For example, a total R Value of 18.88 concerts to a U value of .0529 rounded to .05)

Note 1.—Winter degree-days may be obtained from the ASHRAE Handbook; the "NAHB Insulation Manual for Homes Apartments"; local utilities; and the National Climatic Center, Federal Building, Asheville, NC. Manuals are available from NAHB RF, Rockville, MD 20850, or NMWIA, 382 Springfield Avenue, Summit, NJ 07901. Other sources of degree day data may be used if available from a recognized authority.

Note 2.—Insulation must be installed uniformly above the ceiling including all ceiling joists. In pitched roof construction, compression of insulation at the outside building walls is permitted to allow for a 1 inch ventilation space under the roof sheathing. For any loose fill insulation, a baffle must be provided. Raised trusses are not required.

Note 3.—For floors of heated spaces over unheated basements, unheated garages or unheated crawl spaces, the U value of floor section shall not exceed the value shown. A basement, crawl space, or garage shall be considered unheated unless it is provided with a positive heat supply to maintain a minimum temperature of 50 F. Positive heat supply is defined by ASHRAE as "heat supplied to a space by design or by heat losses occurring from energy-consuming systems or components associated with that space."

Where the walls of an unheated basement or crawl space are insulated in lieu of floor insulation, the total heat loss attributed to the floor from the heated area shall not exceed the heat loss calculated for floors with required insulation.

Insulation may be obtained from floors over heated basement areas or heated crawl spaces if foundation walls are insulated. The U value of the foundation wall section shall not exceed the value shown. This requirement shall include all foundation wall area, including header joist (band joist), to a point 50 percent of the distance from a finish grade to the basement floor level. Equivalent Uo configurations are acceptable.

MAXIMUM U VALUES OF THE FOUNDATION WALL SECTIONS OF HEATED BASEMENT NOT CONTAINING HABITABLE LIVING AREA OR HEATED CRAWL SPACE

Winter degree days (65 F base)	Maximum U value	Glazing [1]
2,500 or less	No requirement	1.13
2,501 to 4,500	0.17	1.13
4,501 or more	0.10	0.69

[1] Glazing in heated basement shall be limited to 5 percent of floor area unless alternative Uo combination is documented.

Note 4.—Sliding glass doors are considered as glazing. The glazing value is for glass only. Glazing shall be limited to 15 percent of the gross area of all exterior walls enclosing heated space, except when demonstrated that the winter daily solar heat gain exceeds the heat loss and the glass area is properly screened from summer solar heat gain.

Note 5.—1¾ inch metal-faced door systems with rigid insulation core and durable weatherstripping providing a "U" value equivalent to a wood door with storm door and an infiltration rate no greater than .50 cfm per foot of crack length tested according to ASTM E-283 at 1.567 psf of air pressure, may be substituted for a conventional door and storm door. All doors shall be weatherstripped. Any glazed areas must be double-glazed.

MINIMUM R VALUES OF PERIMETER INSULATION FOR SLABS-ON-GRADE

Winter degree-days (65 F base)	Minimum R values [1]	
	Heated slab	Unheated slab
500 or less	2.8	
1000	3.5	
2000	4.0	2.5
3000	4.8	2.8
4000	5.5	3.5
5000	6.3	4.2
6000	7.0	4.8
7000	7.8	5.5
8000	8.5	6.2
9000	9.2	6.8
10000 or greater	10.0	7.5

[1] For increments between degree days shown, R values may be interpolated.

B. All existing dwellings to be purchased with RH loan and grant funds shall be insulated in accordance with the following:

EXISTING CONSTRUCTION—MAXIMUM U VALUES FOR CEILING, WALL AND FLOOR SECTION OR VARIOUS CONSTRUCTION

Winter degree days (note 1)	Ceilings	Walls (note 2)	Floors (note 3)	Glazing	Doors (note 5)
1,000 or less.	.05		.08	1.13	
1,001 to 2,500.	.04		.07	.69	

VOL 51 ISS 51 MR 17 1986

EXISTING CONSTRUCTION—MAXIMUM U VALUES FOR CEILING, WALL AND FLOOR SECTION OR VARIOUS CONSTRUCTION—Continued

Winter degree days (note 1)	Ceilings	Walls (note 2)	Floors (note 3)	Glazing	Doors (note 5)
2,501 to 4,500.	.03		.05	.69	Storm door if hollow core door or if over 25% glass.
4,501 to 6,000.	.03		.05	.69	Storm door.
6,001 or 7,000.	.026		.05	.69	Do.
7,001 or more.	.026		.05	.69	Do.

(U values are not adjusted for framing. Values calculated for components may be rounded. For example, a wall section with a total R Value of 18.86 converts to a U value of .0520 rounded to .05)

Note 1.—Winter degree days may be obtained from the ASHRAE Handbook; the "NAHB Insulation Manual for Homes Apartments;" local utilities; and the National Climatic Center, Federal Building, Asheville, NC. Manuals are available from NAHB RF, Rockville, MD 20850, or NMWIA, 382 Springfield Avenue, Summit, NJ 07901. Other sources of degree day data may be used if available from a recognized authority.

Note 2.—Walls shall be insulated as near to new construction standards as economically feasible. Any exterior wall framing exposed during repair or rehabilitation work shall have vapor barrier installed and be fully insulated.

Note 3.—For floors of heated spaces over unheated basements, unheated garages or unheated crawl spaces the U value of floor section shall not exceed the value shown.

A basement, crawl space or garage shall be considered unheated unless it is provided with a positive heat supply to maintain a minimum temperature of 50 F. Positive heat supply is defined by ASHRAE as "heat supplied to a space by design or by heat losses occuring from energy-consuming systems or components associated with that space."

Where the walls of an unheated basement of crawl space are insulated in lieu of floor insulation, the total heat loss attributed to the floor from the heated area shall not exceed the heat loss calculated for floors with required insulation.

Insulation may be omitted from floors over heated basement areas or heated crawl spaces if foundation walls are insulated. The U value of foundation wall sections shall not exceed the value shown. This requirement shall include all foundation wall area, including header joist (band joist), to a point 50 percent of the distance from a finish grade to the basement floor level. Equivalent Uo configurations are acceptable.

MAXIMUM U VALUES OF THE FOUNDATION WALL SECTIONS OF HEATED BASEMENT NOT CONTAINING HABITABLE LIVING AREA OR HEATED CRAWL SAPCE

Winter degree-days (65°F base)	Maximum U value	Glazing[1]
2,500 or less	No requirement	1.13
2,501 to 4,500	0.17	1.13
4,501 or more	0.10	0.69

[1] Glazing in heated basement shall be limited to 5 percent of floor area unless alternative Uo combination is documented.

Note 4.—Slab edge insulation should be provided wherever practical in areas of 21,500 or more winter degree-days. Rigid insulation placed on the exterior face of the slab shall be protected by a durable and weather resistant material.

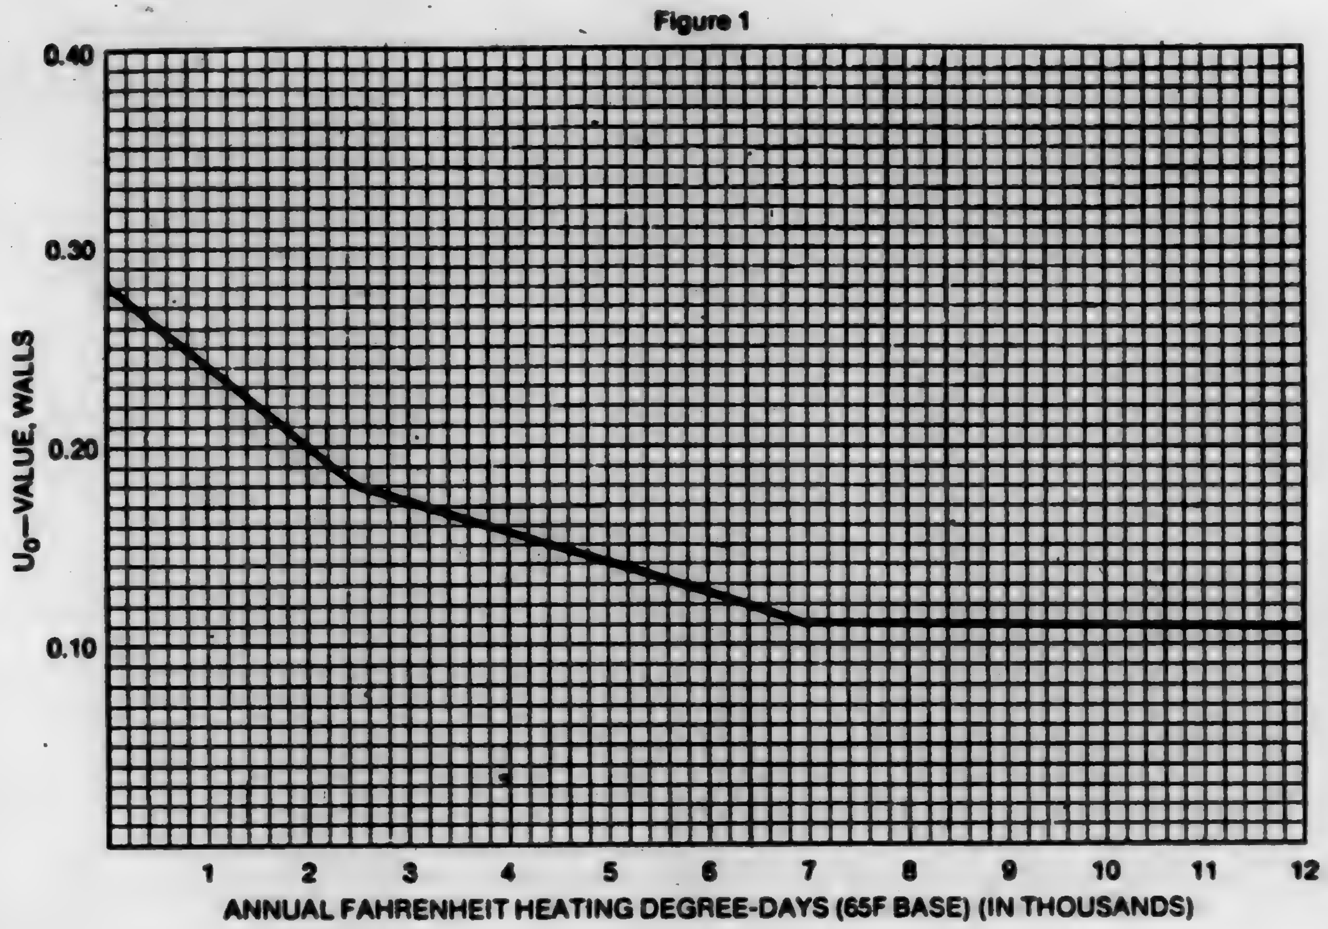
Note 5.—Storm doors are not required for double doors, sliding doors or others where installation would be economically infeasible. 1¾ inch metal faced door systems with rigid insulation core and durable weatherstripping providing a "U" value equivalent to a wood door with storm door and an infiltration rate no greater than 0.50 cfm per foot of crack length, tested according to ASTM E-283 at 1.567 psf of air pressure, may be substituted for a conventional door and storm door. All doors shall be weatherstripped.

C. *Optional Standards.* Housing design not in compliance with the requirements of paragraphs IV A or B of this Exhibit may be approved in accordance with the provisions of this paragraph. Requests for acceptance proposed under paragraph C 1 below, must be approved by the State Director. Requests for acceptance proposed under paragraph C 2 must be approved by the Administrator. All submissions of proposed options to the State Director of Administrator shall contain complete descriptions of materials, engineering data, test data when U values claimed are lower than the ASHRAE Handbook of Fundamentals, and calculations to document the validity of the proposal. All data and calculations will be based upon the current edition of the ASHRAE Handbook of Fundamentals or other universally accepted data sources.

1. *Overall "U" values for enveloped components.* The following requirements shall be used in determining acceptable options to the requirements of paragraphs IV A and IV B of this Exhibit.

a. Uo (gross wall)-Total exterior wall area (opaque wall and window and door) shall have a combined thermal transmittance value (Uo value) not to exceed the values shown in Figure 1. Equation 1 shall be used to determine acceptable combinations to meet the requirements of Figure 1.

Figure 1



Equation 1, formula for determining combinations (See Figure 1):

$$U_o = \frac{U_{wall}A_{wall} + U_{window}A_{window} + U_{door}A_{door}}{A_o}$$

where:

U_o = the average thermal transmittance of the gross wall area, Btu/h.ft ^{2}.F

A_o = the gross area of exterior walls, ft ^{2}

U_{wall} = the thermal transmittance of all elements of the opaque wall area, Btu/h.ft ^{2}.F

A_{wall} = opaque wall area, ft ^{2}.

U_{window} = the thermal transmittance of the window area, Btu/h.ft^2.F

A_{window} = window area (including sash), ft^2

U_{door} = the thermal transmittance of the door area. Btu/h.ft^2.F

A_{door} = door area, ft^2

Note.—Where more than one type of wall, window and/or door is used, the U x A term for that exposure shall be expanded into its sub-elements as:

$U_{wall1}A_{wall1} + U_{wall2}A_{wall2}$ etc.

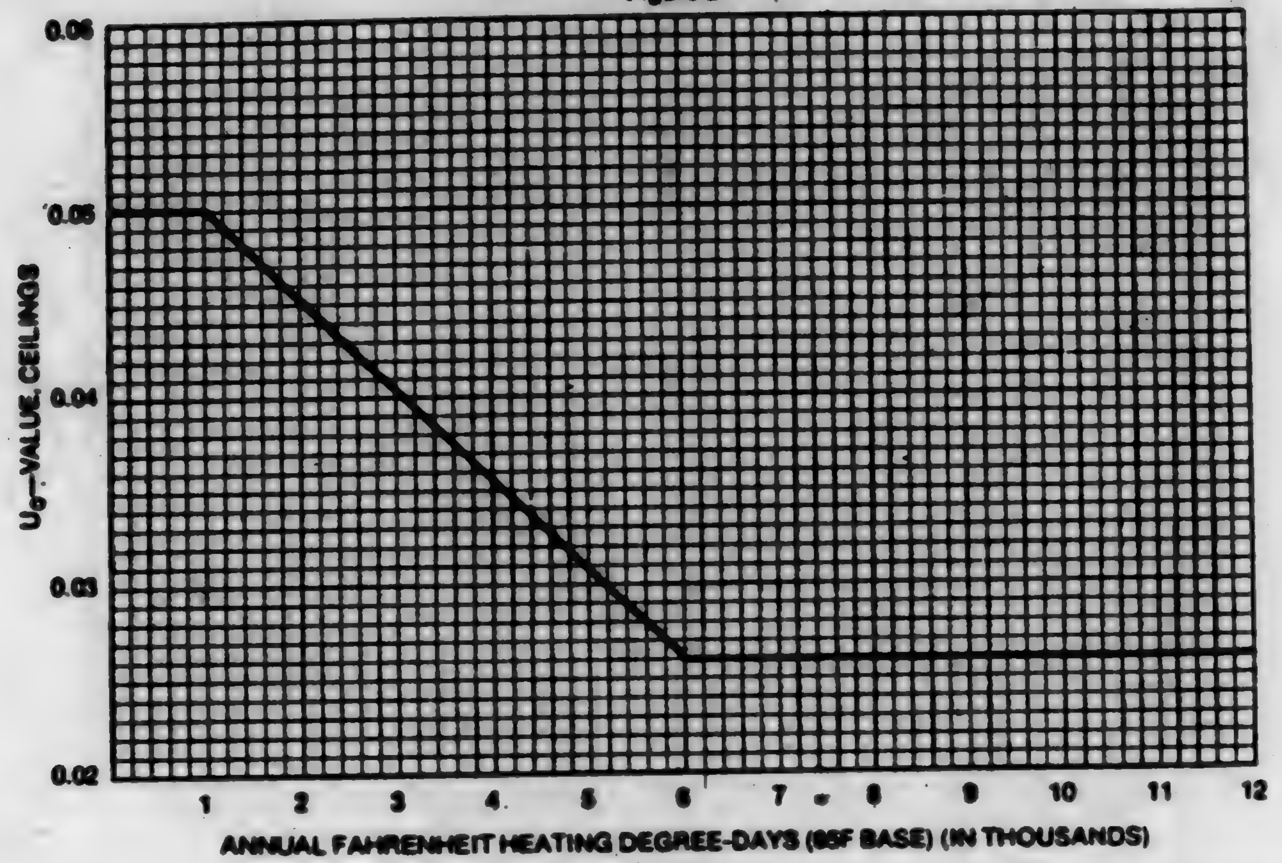
b. U_o (gross ceiling)—Total ceiling area (opaque ceiling and skylights) shall have a combined thermal transmittance value (U_o-value) not to exceed the values shown in Figure 2. Equation 2 shall be used to determine acceptable combinations to meet the requirements of Figure 2.

BEST COPY AVAILABLE

UMI

VOL
51
ISS
51
MR
17
1986
UMI

Figure 2



Equation 2, formula for determining roof/ceiling combinations:

$$U_o = \frac{U_{roof}A_{roof} + U_{skylight}A_{skylight} + U_{door}A_{door}}{A_o}$$

where:

U_o = the average thermal transmittance of the gross roof/ceiling area, Btu/h.ft ^{2}.F

A_o = the gross area of a roof/ceiling assembly, ft ^{2}

U_{roof} = the thermal transmittance of all elements of the opaque roof/ceiling area, Btu/h.ft ^{2}.F

A_{roof} = opaque roof/ceiling area, ft ^{2}

$U_{skylight}$ = the thermal transmittance of all skylight elements in the roof/ceiling assembly Btu/h.ft^2.F

$A_{skylight}$ = skylight area (including frame), ft^2

Note.—Where more than one type of roof/ceiling and/or skylight is used, the U x A term for that exposure shall be expanded into its sub-elements as:

$U_{roof1}A_{roof1} + U_{roof2}A_{roof2}$ etc.

2. *Overall structure performance.* The following requirements shall be used in determining acceptance options to the requirements of paragraphs IV A and B of this Exhibit.

a. The methodology must be cost effective to the energy user, and must not adversely affect the structural capacity, durability or safety aspects of the structure.

b. All data and calculations must show valid performance comparisons between the proposed option and a structure comparable in size, configuration, orientation and occupant usage designed in accordance with paragraphs IV A or B. Structures may be considered for FmHA loan consideration which can be shown by accepted engineering practice to have energy consumption equal to or less than those which would be attained in a representative structure utilizing the requirements of paragraphs IV A or B.

3. *Special consideration for seasonally occupied farm labor housing.* The following sets forth the minimum acceptable options to the requirements of paragraphs IV A or B of this Exhibit for seasonally occupied housing serving as security for farm labor housing loans and grants.

a. When the period of occupancy does not encounter 500 or more heating degree-days (HDD) as determined by an average of the previous 10 years based upon local climatological data published by the National Oceanic and Atmospheric Administration, Environmental Data Service, the standards of paragraphs IV A or B will not apply.

b. When the period of use exceeds 500 heating degree-days (HDD), the 10-year average value of the period of occupancy shall be used to determine the degree to which the thermal insulation requirements of paragraphs IV A or B shall apply.

c. If mechanical cooling is provided and the period of occupancy encounters more than 700 cooling degree-days (CDD), as determined by an average of the previous 6 years based upon local climatological data published by the same source cited in paragraph IV C 3 a above, the thermal insulation requirements for 1,000 and less degree days as stated in paragraph IV A or B shall apply.

D. *Energy efficient construction practices.* This section prescribes those items of design and quality control which are necessary to guarantee the energy efficiency of homes built according to the standards of this Exhibit. Also included are recommendation for extra energy efficiency in dwellings.

1. *Infiltration.*

a. Requirements: All construction shall be performed in such a manner as to provide a building envelope free of excessive infiltration.

(i) Caulking and sealants. Exterior joints around windows and door frames, between wall cavities and window or door frames, between wall and foundation, between wall and roof, between wall panels, at penetrations of utility services through walls, floors and roofs, and all other openings in the exterior envelope shall be caulked, gasketed, weatherstripped, or otherwise sealed. Caulking shall be silicone rubber base or butyl rubber base, conforming to Federal Specifications TT–S–1543 and TT–S–1657 respectively, or materials demonstrating equivalent performance in resilince and durability.

(ii) Windows shall comply with ANSI 134.1, NWMA 15–2; the air infiltration rate shall not exceed 0.5 ft 3/min per ft. of sash crack.

(iii) Sliding glass doors shall comply with ANSI 134.2, NWM 15–3; the air infiltration rate shall not exceed .5 ft 3/min per square ft. of door area.

(iv) All insulation placed in open cavity walls shall be installed so that all space behind electrical switches and receptacles, plumbing, ductwork and other obstructions in the cavity are insulated as completely as possible. Insulation shall be omitted on the side facing the conditioned area, however, the vapor barrier in walls must not be cut or destroyed.

b. Recommendations:

(i) Wrap outside corners of wall sheathing with 15 lb. asphalt impregnated building felt before siding application.

(ii) Utilize vestibules for entry doors, expecially those facing into the direction of winter wind.

(iii) Install plumbing, mechanical and electrical components in interior partitions as much as possible. All water piping should be insulated from freezing temperatures.

2. *Heating and/or Cooling Equipment.*

a. Requirements: All mechanical equipment for heating and/or cooling habitable space shall be designed to provide economy of operation.

(i) All space heating equipment (including fireplaces) requiring combustion air shall be sealed combustion types, or be located in a nonconditioned area (such as unheated basements) or adequate combustion air must be provided from outside the conditioned space.

(ii) All ductwork shall be designed and installed so as to minimize leakage. All metal to metal connections shall be mechanically joined and taped.

b. Recommendations:

(i) Whenever possible, locate ductwork inside of conditioned areas in dropped ceiling, interior partitions or other similar areas.

(ii) Locate outside cooling units in areas not subject to direct sunlight or heat buildup.

3. *Vapor Barrier.*

a. Requirements: Adequate vapor barriers must be provided adjacent to the interior finish material of the wall or other closed envelope components which do not have ventilation space on the nonconditioned side of the insulation.

(i) A vapor barrier at the inside of the wall or other closed envelope component must have a perm rating less than that of any other material in that component and in no case have a perm rating greater than one. All vapor barriers must be sealed around all openings in the interior surface. Vapor barriers are not required in ceilings and floors. Continuous vapor barriers on ceilings, walls, and floors require adequate moisture vapor control in the conditioned space.

(ii) All vapor producing or exhausting equipment shall be ducted to the outside and be equipped with dampers. The equipment includes rangehoods, bathroom exhaust fans, and clothes dryers. If a dwelling design proposes the use of windows to satisfy the kitchen and/or bathroom ventilation requirements of the development standards, the incorporation of dehumidification equipment should be considered in accordance with paragraph IV D 3 b. Exhaust of any equipment shall not terminate in an attic or crawl space.

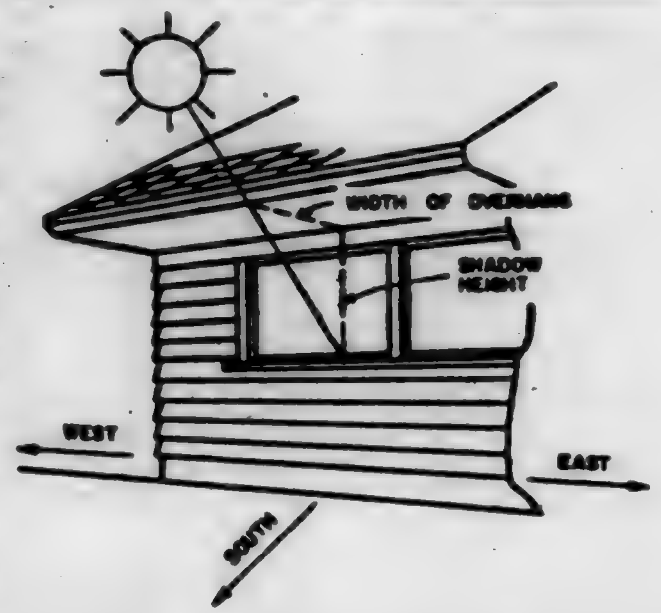
V. General Design Recommendations

A. Orient homes with greatest glass area facing south with adequate overhangs to control solar gain during non-heating periods.

BILLING CODE 3410-07-M

VOL
51
ISS
51
MR
17
1986
UMI

ROOF OVERHANGS

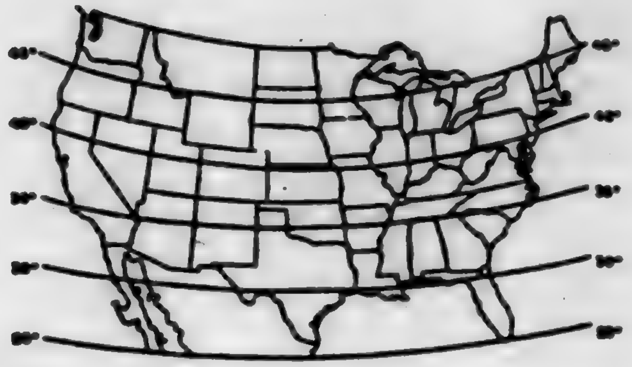


Roof overhangs, or extensions of the roof, over south walls are usually easy to incorporate into house designs. To determine the *width of overhang* needed to shade a south wall or window, follow this method:

(1) Consider the *latitude* of the geographical area in which your house is located. (See map below.) Latitude, together with season of the year, determines the angle at which the sun's rays strike the earth at different times of day.

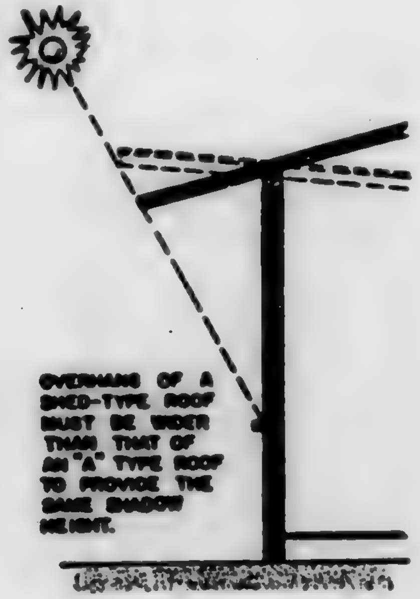
(2) Measure on your plan or house the number of feet the south windows extend below the eave of the roof or horizontal overhang. This measurement is the *shadow height*.

(3) Then for that specific latitude and shadow height, you will find, from the table given here, the exact width of overhang needed.



NORTH LATITUDE (DEGREES)	SHADOW HEIGHT (FEET)					
	3	4	5	6	7	8
	WIDTH OF OVERHANG (FEET)					
25	1.1	1.5	1.9	2.2	2.6	3.0
30	1.4	1.9	2.4	2.9	3.4	3.8
35	1.8	2.4	3.0	3.5	4.1	4.7
40	2.1	2.8	3.6	4.3	5.0	5.7
45	2.6	3.4	4.3	5.1	6.0	6.8
50	3.0	4.1	5.1	6.1	7.1	8.2

For example, in a latitude of 35° and for a shadow height of 5 feet, the width of overhang needed is 3 feet.



OVERHANG OF A SHED-TYPE ROOF MUST BE WIDER THAN THAT OF AN "A" TYPE ROOF TO PROVIDE THE SAME SHADOW HEIGHT.

BILLING CODE 3410-07-C

B. Arrange plantings with evergreen wind buffers on north side and deciduous trees on south.

C. Wheneve possible orient entry door away from winter winds.

D. Design house with simple shape to minimize exterior wall area.

E. Minimize glass areas within constraints of required light and ventilation, applicable safety codes and other appropriate consideration.

F. Minimize the amount of paved surface adjacent to the structure where heat gain is not desirable.

VI. State Supplements

State supplements or policies will not be issued or adopted to either supplement or set requirements different from those of this Exhibit without the prior written approval of the National Office.

Exhibit E.—Preconstruction Conference

Prior to the signing of a construction contract, there shall be a discussion between the borrower(s), prospective contractor, architect (if applicable), and the County Supervisor or District Director, as applicable. During this discussion a mutual understanding should be reached on the following points:

1. The contract is between the borrower and the contractor and although FmHA is interested in the proper execution of the contract it will not become a party to the contract nor incur any responsibility or liability thereunder.

2. The contractor's obligation under the terms of the contract to do the work in accordance with the drawings and specifications.

3. Compliance with the provisions of Form FmHA 1924.6, "Construction Contract," or any other authorized contract form being used.

4. Any changes made to the drawings and/or specifications must be initialed and dated on all copies by the contractor, the borrower, and the County Supervisor.

5. FmHA will be consulted prior to any changes in the contract. Changes will be made only upon approval of FmHA. Form FmHA 1924–7, "Contract Change Order" must be executed by the borrower and contractor, and approved by FmHA. Any additional funds required must be provided by the owner.

6. The time for completion of construction and provisions for liquidated damages.

7. Consideration of the State laws regarding the rights of persons furnishing material, equipment, or labor to place a claim or lien against the property in cases in which their bills are not paid.

8. The use of Forms FmHA 1924–10, "Release by Claimants," and FmHA 1924–9, "Certificate of Contractor's Release".

9. The borrower's responsibility to make site visits as the work progresses. Periodic and final inspections will be made by an authorized FmHA employee or representative to protect the security interest of the Government. The borrower is responsible for making any inspections necessary to adequately protect the interest of the borrower.

10. The contractor's responsibility to notify FmHA that work is ready for inspection 2 working days prior to the date of the inspection.

11. The contractor's responsibility to provide a warranty upon completion of the work.

12. Any other pertinent information.

Exhibit F.—Payment Bond

Know all persons by these presents: that ——— (Name of Contractor) ——— (Address of Contractor) ———; a (Corporation, Parnership or Individual) ——— hereinafter called principal and ——— (Name of Surety) hereinafter called surety, are held and firmly bound unto ——— (Name of Owner) ——— (Address of Owner) hereinafter called owner and the United States of America acting through the Farmers Home Administration hereinafter referred to as Government, and unto all persons, firms, and corporations who or which may furnish labor, or who furnish materials to perform as described under the contract and to their successors and assigns in the total aggregate penal sum of ———, Dollars ($———) in lawful money of the United States, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors, and assigns, jointly and severally, firmly by these presents.

The condition of this obligation is such that whereas, the principal entered into a certain contract with the owner, dated the ——— day of ——— 19—, a copy of which is hereto attached and made a part hereof for the construction of:

Now, therefore, if the principal shall promptly make payment to all persons, firms, and corporations furnishing materials for or performing labor in the prosecution of the work provided for in such contract, and any authorized extension or modification thereof, including all amounts due for materials, lubricants, oil, gasoline, coal and coke, repairs on machinery; equipment and tools, consumed or used in connection with the construction of such work, and for all labor cost incurred in such work including that by a subcontractor, and to any mechanic or materialman lienholder whether it acquires its lien by operation of State or Federal law; then this obligation shall be void, otherwise to remain in full force and effect.

Provided, that beneficiaries or claimants hereunder shall be limited to the subcontractors, and persons, firms, and corporations having a direct contract with the principal or its subcontractors.

Provided, further, that the said surety for value received hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the contract or to the work to be performed thereunder or the specifications accompanying the same shall in any way affect its obligation on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of this contract or to the work or to the specifications.

Provide, further, that no suit or action shall be commenced hereunder by any claimant: (a) Unless claimant, other than one having a direct contract with the principal (or with the government in the event the government is performing the obligations of the owner), shall have given written notice to any two of the following: The principal, the owner, or the surety above named within ninety (90) days after such claimant did or performed the last of the work or labor, or furnished the last of the materials for which said claim is made, stating with substantial accuracy the amount claimed and the name of the party to whom the materials were furnished, or for whom the work or labor was done or performed. Such notice shall be served by mailing the same by register mail or certified mail, postage prepaid, in an envelope addressed to the principal, owner, or surety, at any place where an office is regularly maintained for the transaction of business, or served in any manner in which legal process may be served in the state in which the aforesaid project is located, save that such service need not be made by a public officer. (b) After the expiration of *one* (1) year following the date of which principal ceased work on said contract, it being understood, however, that if any limitation embodied in the bond is prohibited by any law controlling the construction hereof, such limitation shall be deemed to be amended so as to be equal to the minimum period of limitation permitted by such law.

Provided, further, that it is expressly agreed that this bond shall be deemed

VOL 51
ISS 51
MR 17
1986
UMI

amended authomatically and immediately, without formal and separate amendments hereto, upon amendment to the Contract not increasing the contract price more than 20 percent, so as to bind the principal and the surety to the full and faithful performance of the Contract as so amended. The term "Amendment", wherever used in this bond and whether referring to this bond, the contract or the loan Documents shall include any alteration, addition, extension or modification of any character whatsoever.

Provided, further, that no final settlement between the owner or government and the contractor shall abridge the right of any beneficiary hereunder, whose claim may be unsatisfied.

In witness whereof, this instrument is executed in ——— Number counterparts, each one of which shall be deemed an original, this the ——— day of ———.

(Address) ———.

Note.—Date of bond must not be prior to date of Contract.

If contractor is partnership, all partners should execute bond.

Important: Surety companies executing bonds must appear on the Treasury Department's most current list (Circular 570 as amended) and be authorized to transact business in the State where the Project is located.

Exhibit G.—Performance Bond

Know all persons by these presents: that ——— (Name of Contractor) ——— (Address of Contractor) ———, hereinafter call principal, and (Corporation, Partnership, or Individual) ———(Name of Surety) ——— (Address of Surety) hereinafter called surety, are held and firmly bound unto ———(Name of Owner) ———(Address of Owner) hereinafter called owner, and the United States of America acting through the Farmers Home Administration hereinafter referred to as the government in the total aggregate penal sum of ——— Dollars ($———) in lawful money of the United States, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors, and assigns, jointly and severally, firmly by these presents.

The condition of this obligation is such that whereas, the principal entered into a certain contract with the owner, dated the ——— day of ——— 19—, a copy of which is hereto attached and made a part hereof for the construction of:

Now, therefore, if the principal shall well, truly and faithfully perform its duties, all the undertakings, covenants, terms, conditions, and agreements of said contract during the original term thereof, and any extensions thereof which it may be granted by the owner, or government, with or without notice to the surety and during the guaranty period and if the principal shall satisfy all claims and demands incurred under such contract, and shall fully indemnify and save harmless the owner and government from all costs and damages which may suffer by reason of failure to do so, and shall reimburse and repay the owner and government all outlay and expense which the owner and government may incur in making good any default, then this obligation shall be void, otherwise to remain in full force and effect.

Provided, further, that the liability of the principal and surety hereunder to the government shall be subject to the same limitations and defenses as may be available to them against a claim hereunder by the owner, provided, however, that the government may, at its option, perform any obligations of the owner required by the contract.

Provided, further, that the said surety, for value received hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the contract or to work to be performed thereunder or the specifications accompanying the same shall in any way affect its obligation on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the contract or to the work or to the specifications.

Provided, further, that it is expressly agreed that the bond shall be deemed amended automatically and immediately, without formal and separate amendments hereto, upon amendment to the Contract not increasing the contract price more than 20 percent, so as to bind the principal and the surety to the full and faithful performance of the contract as so amended. The term "Amendment", wherever used in this bond, and whether referring to this bond, the Contract or the Loan Documents shall include any alteration, addition, extension, or modification of any character whatsoever.

Provided, further, that no final settlement between the owner or government and the principal shall abridge the right of the other beneficiary hereunder, whose claim may be unsatisfied. The owner and government are the only beneficiaries hereunder.

In witness whereof, this instrument is executed in ——— Number counterparts, each one of which shall be deemed an original, this the ——— day of ———.

Exhibit H.—Prohibition of Lead-Based Paints

I. Purpose

This Exhibit prescribes the methods to be used to comply with the requirements of the Lead-Based Paint Poisoning Prevention Act, Pub. L. 91–695, as amended, (42 U.S.C. 4801 et seq.) and the amendment to Section 501(3) of Pub. L. 91–695 (42 U.S.C. 4841(3)) as amended by the National Consumer Health Information and Health Promotion Act of 1976, Pub. L. 94–317.

II. Policy

The Farmers Home Administration (FmHA) shall not permit the use of lead-based paint on applicable surfaces of any housing or buildings purchased,

repaired, or rehabilitated for human habitation with financial assistance provided by this agency. Paints used on applicable surfaces shall not contain more than 0.06 percent lead by weight calculated as lead metal in the total nonvolatile content of liquid paints or in the dried film of paint already applied.

III. Definitions

A. Housing and buildings mean any house, apartment, or structure intended for human habitation. This includes any institutional structure where persons reside, such as an orphanage, boarding school, dormitory, day care center or extended care facility, college housing, domestic or migratory labor housing, hospitals, group practice facilities, community facilities, and business or industrials facilities.

B. Applicable surfaces means all interior surfaces, whether accessible or not, and those exterior surfaces which are readily accessible to children under 7 years of age, such as stairs, decks, porches, railings, windows, and doors.

C. Lead-based paint means any paint containing more than .5 of 1 percentum lead by weight, or with respect to paint manufactured after June 22, 1977, lead-based paint containing more than six one-hundredths of 1 percentum lead by weight.

IV. Requirements

A. All new housing and buildings shall comply with paragraph II of this Exhibit H.

B. For all existing housing and buildings built *after* 1950, on which a loan is closed after July 19, 1978, FmHA rquires that the applicant, borrower or tenant be notified of the potential hazard of lead-based paints, of the symptoms and treatment of lead poisoning, and of the importance and availability of maintenance and removal techniques for eliminating such hazards. This will be accomplished by providing each borrower or tenant with a copy of Attachment 1 to this Exhibit H, "Lead-based Paint Hazards, Symptoms, Treatment and Techniques for Eliminating Hazards," available in any FmHA County Office. Copies of Attachment 1 may be obtained by the County Supervisor from the Finance Office, 1520 Market Street, St. Louis, MO. 63103.

C. For all existing housing or buildings built *before* 1950 on which a loan is closed after July 19, 1978, FmHA requires that the applicant, borrower, or tenant be notified as in paragraph IV B and a copy of Attachment 2 to this Exhibit H, "Caution Note on Lead-Based Paint Hazard," available in any FmHA County Office, shall be delivered to the hands of the borrower.

D. For all property transfers and inventory property sales, Attachments 1 and 2 to this Exhibit H shall be handed to the purchaser by the FmHA representative.

E. All inventory housing or buildings built before 1950 to be repaired, renovated, or rehabilitated shall have tests for lead content, and where found to be hazardous, shall have any interior lead-based paint removed entirely. Loss or cracked surfaces shall be cleaned down to the base surface before repainting with a paint containing not more than six one-hundredths of 1 percentum lead by weight in the total nonvolatile content of the paint or the equivalent measure of lead in the dried film of paint already applied or both. Contracting officers shall include the following provision prohibiting the use of lead-based paint in all contracts and subcontracts for construction or rehabilitation of housing or buildings:

Lead-Based Paint Prohibition

No lead-based paint containing more than .5 of 1 percentum lead by weight (calculated as lead metal) in the total nonvolatile content of the paint, or the equivalent measure of lead in the dried film of paint already applied, or both, or with respect to paint manufactured after June 22, 1977, no lead-based paint containing more than .06 of 1 percentum lead by weight (calculated as lead metal) in the total nonvolatile content of the paint, or the equivalent measure of lead in the dried film of paint already applied, or both, shall be used in the construction or rehabilitation of residential structures under this contract or any subsequent subcontractors.

Authority: This amendment is made under provisions of 5 U.S.C. 301, 40 U.S.C. 486(c).

Done at ———, ———, this ——— day of ———, 19—.

———

FmHA Representative.

V. Summary

Section 401 of the Lead-based Paint Poisoning Prevention Act as amended by the National Consumer Health Information and Health Promotion Act of 1976, Pub. L. 94–317, provides a requirement that each federal agency issue regulations and to take such other steps necessary to prohibit the use of lead-based paint on all applicable surfaces in Federal and Federally-assisted construction or rehabilitation of residential structures. The Lead-Based Paint Poisoning Act, Pub. L. 91–695, January 13, 1971, provides for grants to units of general local government in any State for the purpose of detecting and treating incidents of lead-based paint poisoning. Title II of this Act also provides for grants to the same units to identify those area of risk including testing to detect the presence of lead-based paint on surfaces of residential housing.

Attachment 1.—Lead-Based Paint Hazards, Symptoms, Treatment, and Techniques for Eliminating Hazards

Your Federal Government is acting to provide children better protection from poisoning by lead in paint, but there are precautions parents can and should take for child safety.

If you live in a house with old, peeling paint containing lead, your children may be quietly poisoning themselves.

By eating only a small number of lead paint chips a day, a young child can consume enough to poison himself or cause permanent brain damage. Lead poisoning, known as plumbism, kills about 200 children a year and causes the life-time institutionalization of 150 more who suffer severe mental retardation.

An estimated 600,000 children in metropolitan areas have elevated blood lead levels, however. And about 2.5 million children are exposed to the danger of being poisoned from lead paint.

The problem of lead paint poisoning came about because many years ago, lead-containing pigments were used extensively to give paint its colors. Anywhere from 10 percent to 50 percent of the actual paint, after it had dried on the wall, constituted a form of lead. As layer after layer of paint was applied, the walls become veritable lead mines. They also became sources of poison for your children.

The use of expensive lead became increasingly uneconomical. Shortly before World War II a substitute for lead pigments was developed, and the use of lead in paint gradually decreased thereafter. Since 1955, paint manufacturers have limited the lead in their interior paints to one percent.

Thus, any housing in this country built before the mid 1950's is a potential lead hazard. For the hazard to be real, two other ingredients are needed. One is poor maintenance which permits paint to peel and flake. The second is the presence of small children who might pick paint from the wall or floor and put it in their mouths. By eating a paint chip the size of a fingernail, a young child can swallow as much as 100 times more than his body can safely handle. Over a period of weeks or months, children can slowly poison themselves.

VOL
51
ISS
51
MR
17
1986
UMI

The most serious hazards are in cities where most of the housing was built before the 1950's and is now poorly maintained. This includes most of the ghetto areas of America. The Department of Housing and Urban Development estimates there are seven million of these old rundown houses.

Although most lead poisoning occurs in dilapidated houses, even a well-maintained house can be a hazard for small children. For example, if a child bangs a crib or toys against a wall and old paint chips off, it could contain lead. Even in the best of homes, a child can chew on a windowsill painted with lead paint.

Lead poisoning poses a particular hazard for children between the ages of 1 and 6 because of an eating abnormality called pica. This is a craving to eat things which are not food. Children with pica will eat anything within reach—cigarette butts, matches, dirt, newspapers, clay, plaster . . . and paint.

Pica is an old phenomenon, observed all over the world. The Romans many centuries ago named the condition "pica" after the magpie which picks up a wide variety of objects in its beak out of hunger or curiosity.

The dominant characteristic of pica is its compulsive hold on children. A mother can be hard put to prevent her child from eating nonfood substances.

Doctors know little about the causes of pica, and are a long way from finding a cure, if there is one. Studies have shown that up to 40 percent of children around one year old have pica. The tendency decreases as the child gets older, and averages around 20 percent for the entire age group of 1 to 6 years.

If a child does become poisoned by eating lead paint, medicines can be administered to remove the lead from the body. Medicines keep the mortality rate down from lead paint poisoning to 5 percent of the human victims. However, one out of four survivors of acute lead poisoning suffers permanent brain damage, and has learning difficulties, mental retardation, or epilepsy.

The only effective way to fight lead poisoning is to remove the child from contact with the source of lead. This can be accomplished in two ways:

1. Take the child away from the lead.
2. Take the lead away from the child.

Where housing is scarce, the first solution will in the long run only be a form of musical apartments. Whichever child moves into the residence with lead paint on the walls becomes "it."

Only the second solution deals with the problem in a permanent way. The obstacle here is money. Lead paint cannot just be painted over, because it would still be present in any paint chips which might flake off.

The only really permanent solutions are to remove all the old paint by blow torch, scraping, or other method, or to cover up old paint with wallboard or another covering.

Symptoms and Treatment

Here are some steps which parents can take to prevent their children from being poisoned by lead:

1. Never allow your child to eat paint or plaster.
2. Be alert for several of the symptoms listed below.

Symptoms of lead poisoning:

- decreased appetite
- irritability
- clumsiness
- unwillingness to play
- headache
- abdominal pain
- drowsiness
- vomiting

3. If your child has several of these symptoms or you suspect he or she may be eating paint, your child should be tested. Call your local health department to find out if your city has a lead poisoning prevention program. If it does, ask the program officers where to take your child for a blood-lead test.

If your community does not have a lead poisoning prevention program, take your child to a doctor or clinic and explain that you want to find out if he or she has lead poisoning. If the blood test shows your child has too much lead, make sure the doctor reports this to the local health department so it can test the paint in your home to find our whether it should be replaced or covered over. In many cities the landlord can be ordered by the city to remove or cover over dangerous paint.

Eliminating Hazards

To eliminate the lead hazard, you ought to take precautions. Remove all peeling plaster or paint from walls, or ceiling. Do as much as possible by brushing or scraping. When sanding is necessary, get lots of ventilation since breathing lead paint dust can also be dangerous. If the peeling is caused by moisture from a leaky pipe, fix it.

After all loose paint has been removed, cover the walls. It is important that the walls be scraped smooth of peeling paint and any grease is washed off because peeling paint or a greasy wall makes if difficult for any covering to stick to the wall. There are several ways to cover the walls: You can repaint them with an interior paint. A latex paint is appropriate. You can also cover then with wallpaper, contact paper, or paneling.

Remember that a child can chew right through a new coat of paint on edges like windowsills, banisters, and door edges. These should either be covered with contact paper or scraped and sanded down to the wood to remove the lead paint. Replaster any holes in the wall so they make a smooth surface, flat with the rest of the wall. This will make it harder for children to grab onto the plaster and pull off pieces to put into their mouths.

Lead poisoning from paint is a serious and difficult problem which a previous generation inadvertently created for our children. Once lead paint is on the walls, it is difficult and costly to remove. This is why a limit on the amount of lead in paint is so important, why you must use reasonable caution today, and why the Congress and FDA have taken action to protect the children of tomorrow.

Reminders

In carrying out these steps to prevent lead poisoning, you should bear these facts in mind to direct increased attention where it is needed:

- Although children get lead poisoning between the ages of 1 and 6, the most vulnerable are those around 1 or 2 years old. They should be watched with special care.
- The vast majority of lead poisonings occur during the summer months. Children should be carefully watched during the summer to prevent them from eating lead paint.
- The most likely place in an apartment to have high lead content is the windowsill, which is often painted with a different kind of paint than the walls. The windowsill is also one place where children can gnaw on the paint even if it is not peeling. Make sure to remove or cover any paint on the windowsill which might contain lead.

This information was adapted from DHEW Publication No. (FDA) 73–7016, a reprint from October 1972 FDA "Consumer" magazine.

USDA–Fm HA–PSS January 1978

Attachment 2

For all existing housing or buildings constructed before 1950, FmHA requires that the applicant, borrower or tenant be notified of a potential lead-based hazard by delivering to them a copy of the caution note provided below.

Caution Note on Lead-Based Paint Hazard

This House Was Constructed Before 1950

There is a possibility that it may contain some lead-based paint that was in use before 1950.

See Lead-Based Paint Hazards attachment for more information.

Caution Note on Lead-Based Paint Hazard

This House Was Constructed Before 1950

There is a possibility that it may contain some lead-based paint that was in use before 1950.

See Lead-Based Paint Hazards attachment for more information.

Caution Note on Lead-Based Paint Hazard

This House Was Constructed Before 1950

There is a possibility that it may contain some lead-based paint that was in use before 1950.

(Cut along lines)

Exhibit I.—Guidelines for Seasonal Farm Labor Housing

Section 100

General

This Exhibit sets forth the guidelines and minimum standards for planning and construction of new Labor Housing (LH) that will be occupied on a seasonal basis. Rehabilitation LH projects will be in substantial conformance with these guidelines and standards. A "seasonal basis" is defined as 6 months or less per year. Seasonal housing for the farm worker need not be convertible to year-round occupancy; however, the living units shall be designed for the intended type of tenant, the time of occupancy, the location, the specific site, and the planned method of operation. It is important that the design of the labor housing site and buildings will help to create a pleasing lifestyle which will promote human dignity and pride among its tenants.

Section 200

Codes and Regulations—Compliance is required with National, State and local codes or regualtions affecting design, construction, mechanical, electrical, fire prevention, sanitation, and site improvement.

Section 300

Planning

300–1 Complete architectural/engineering services in accordance with this subpart will be required if an LH grant is involved or the LH loan will involve more than four individual family units, or any number of group living units, or dormitory units accommodating 20 or more persons.

300–2 Building and site design shall provide for a safe, secure, economical, healthful, and attractive living facility and environment suited to the needs of the domestic farm laborer and his/her family.

300–3 At leat 5 percent of the individual family units in a project, or one unit, whichever is greater, and all common use facilities will be accessible to or adaptable for physically handicapped persons. This requirement may be modified if a recipient/borrower shows, through a market survey acceptable to FmHA, that a different percentage of accessible or adaptable units is more appropriate for a particular project and its service area.

Site Design

301–1 General—The site design shall be arranged to utilize and preserve the favorable features and characteristics of the property and to avoid or minimize the potential harmful effect of unfavorable features. Particular attention is directed to Section 1944.164(k), (1) and (m) of Subpart D of Part 1944 of this chapter with reference to compliance with Subpart G of Part 1901 of this chapter. Some of the features which must be considered are the topography, drainage, access, building orientation to sun and breezes; and advantageous features, such as vegetation, trees, good views, etc. or disadvantageous features, such as offensive odors, noxious plants, noise, dust, health hazards, etc.

301–2 Drainage—Surface and subsurface drainage systems shall be provided in accordance with the applicable development standard and Subpart D of Part 1804 of this chapter (FmHA Instruction 424.5.)

301–3 Water and Sewage Disposal—Water supply and sewage disposal installations shall comply with Subpart D of Part 1804 of this chapter (FmHA Instruction 424.5), the applicable development standard and all governing State and local department of health requirements. Where environmentally and economically feasible, the labor housing facility shall connect to public water and waste disposal systems.

301–4 Electrical—Adequate electrical service shall be provided for exterior and interior lighting and for the operation of equipment.

301–5 Vehicular Access and Parking.

301–5.1 Safe and convenient all-weather roads shall be provided to connect the site and its improvements to the off-site public road.

301–5.2 All weather drives and parking shall be provided for tenants, and for trucks and buses as needed within the site. Driveways, parking areas and walkway locations shall be in substantial conformance with the applicable development standard.

301–6 Walks.

301–6.1 Walks shall be provided for safe convenient access to all dwellings and for safe pedestrian circulation throughout the development between location, and facilities where major need for pedestrian access can be anticipated, such as, laundry, parking to dwelling units, common dining rooms and other.

301–6.2 Walkways shall be hard surface such as concrete, asphalt or stabilized gravel and shall be adequately drained.

301–7 Building Location.

301–7.1 Side and rear yards, and distances between buildings shall conform to the applicable development standard.

301–8 Garbage and Refuse.

301–8.1 Garbage and refuse containers for individual units are required and shall be stored on durable functional racks or shall be located in a central screened area with easily cleaned surfaces. Single containers for multiple units shall be screened and in locations designed to accommodate collection vehicle functions.

301–9 Fencing.

301–9.1 Fencing used in the site design for project privacy or building security shall be harmonious in appearance with other fences and surrounding facilities which fall within the same view.

301–10 Outdoor living.

301–10.1 All public areas where pedestrian use can be anticipated after sunset shall be adequately lighted for security purposes, such as walkways to common use facilities—launday, dining halls, building entrances, parking areas, etc.

301–11 Planting and Landscaping.

301–11.1 Planting and lawns or ground covers shall be provided as required to protect the site from erosion, control dust, for active and passive recreation areas, and provide a pleasant environment.

Building Design

302–1.1 Living Units Design.

VOL
51
ISS
51
MR
17
1986
UMI

302-1.1. *Individual Family Unit*—One family or extended family to a unit which shall contain adequate space for living, dining, kitchen, bath and bedrooms. Multifamily type units are required whenever possible for economy of site and building construction.

a. The minimum total net living unit size shall be 400 square feet. This size assumes occupancy of four persons. Units planned for additional occupants shall include an additional 60 square feet for living area per person.

b. A living/dining area shall be provided to accommodate a table and chairs with adequate dining and circulation space for the intended number of occupants. The living/dining area should be combined with the kitchen area.

c. The kitchen shall contain a sink, cooking range and refrigerator. A minimum free countertop area of six square feet is required. A minimum of 40 square feet of shelf area is required.

d. Each bathroom shall contain adequate space and circulation for a bathtub and/or shower, water closet and lavatory. Access to the bathroom shall not be through another bedroom in dwelling units containing more than one bedroom.

e. Bedroom areas separate from living areas are required. The design of the unit shall provide a minimum of 50 square feet of sleeping area per intended occupant including storage. Housing for families with children shall have a separate bedroom or sleeping area for the adult couples. A two foot by two foot shelf with a two foot long clothes hanging rod is required for each occupant.

302-1.2 *Group Living Unit*—A living unit designed for the occupancy of more than one family or for separate occupancy of male and/or female groups. Common bath spaces shall be contained in the same building. Group living units for families shall have separate bedrooms for each adult couple.

a. The design of the unit shall provide for a minimum of 620 square feet of total net living area for eight persons and an additional 60 square feet for each additional occupant.

Additional area shall be planned for a second bathroom when anticipated occupancy will exceed eight persons, or if it will be occupied by persons of both sexes.

b. The kitchen shall contain an adequate sink, cooking range, refrigerator, and space the size of which is commensurate with the needs of the group living unit. A minimum of free countertop area of eight square feet is required. A minimum of 50 square feet of shelf area is required.

c. Refer to paragraph 302-1.1 b for living/dining requirements.

d. Each bathroom shall contain adequate space and circulation for comfortable access to, and use of, fixtures which will include a bathtub and/or shower, water closet and lavatory. In no case shall minimum fixtures be less than that required per paragraph 302-1.3 c below.

e. Refer to paragraph 302-1.1 e for bedroom requirements.

302.1.3 *Dormitory Living Unit*—A building which provides common sleeping quarters for persons of the same sex and may or may not contain kitchen and/or dining facilities in the same building as the sleeping quarters.

a. The design of areas for sleeping purposes, using single beds, shall provide for not less than 72 square feet per occupant including storage.

b. The design of areas for sleeping purpose, using double bunk beds, shall provide for not less than 40 square feet per occupant. Triple bunk beds will not be allowed.

c. The design of each dormitory building must include a water closet and a bathtub or shower for each 12 occupants, and a lavatory for each 8 persons. Urinals may be substituted for men's water closets on the basis of one urinal for one water closet, up to maximum of one-third of the required water closets.

d. Adequate kitchen and dining facilities must be provided which may be in the dormitory building or detached at a distance of not more than 200 feet from the sleeping quarters. In either case, the space must contain adequate cooking ranges, refrigerators, sinks, countertop, food storage shelves, tables and chairs, circulation space. These facilities will comply with the requirements of the "Food Service Sanitation Ordinance and Code," Part V of the "Food Service Sanitation Manual," U.S. Public Health Service Publication 934 (1965).

302-2 Other Facilities.

302-2.1 *General*—Other facilities authorized by Subpart D of Part 1944 of this chapter, needed by farm workers may be provided in several ways: part of a living unit, located in the project, or, with the exception of laundry facilities, available nearby.

302-2.2 *Laundry Facilities*—Laundry facilities shall be required on-site. Drying yards shall be provided if dryer units are not provided. The design of washing facilities shall plan for a minimum rate of one washer for each 20 occupants. One drying unit may be provided for every two washers, if automatic dryers are customarily provided for rental housing in the community. Laundry facilities shall have adequate space for loading the units, circulation, and clothes folding.

302-2.3 *Office and Maintenance*—An office and maintenance space shall be provided or available, commensurate with the number of living units served, and shall meet the criteria of the FMHA Manual of Acceptable Practices. If necessary, the maintenance space shall have sufficient area to accommodate furniture storage.

302-2.4 *Child Care Center*—Where feasible, a child care center may be included to provide supervised activity and safety for children while the parents work. Supervisors and workers for such centers are sometimes enlisted on a volunteer basis and the cost borne by nonprofit associations or community organizations. Grants are sometimes available through Federal or State programs. Consequently, the design of the child care center should meet the requirements of those sources providing organizational personnel and/or financing.

302-2.5 *Manager's Dwelling*—If a manager's dwelling unit is to be provided as a part of the FmHA loan or grant, it will meet these guidelines. However, if it is necessary to provide a year-round caretaker/manager dwelling unit with FmHA loan or grant funds, it will meet the applicable development standard.

302-2.6 *Recreation*—Outdoor recreation space is required and shall be commensurate with the needs of the occupants. Active and passive recreation areas will be provided which may consist of outdoor sitting areas, playfields, tot lots and play equipment.

General Requirements

303-1 Materials and Construction—All materials and their installation in a labor housing facility shall meet the applicable development standard. Any exceptions to these requirements for materials and their installation must be obtained with the approval of the FmHA National Office. Material should be selected that is durable and easily cleaned and maintained.

303-2 Fire Protection—Fire protection and egress shall be provided to comply with the applicable development standard.

303-3 Light, Ventilation, Screening—Natural light and ventilation requirements as specified in the applicable development standard shall be followed. Screening of all exterior openings is required.

303-4 Ceiling Heights—Ceiling heights of habitable rooms shall be a minimum of seven feet six inches clear, and seven feet in halls or baths in dwelling units. Public rooms shall have a minimum of eight feet clear ceiling height. Sloping ceilings shall have at least seven feet six inches for ½ the room with no portion less than five feet in height.

303-5 Heating and Cooling—Heating and cooling and/or air circulation equipment shall be installed as needed for the comfort of the tenants, considering the climate and time of year the facility will be in operation. Maximum feasible use of passive solar heating and cooling techniques shall be required. All equipment installed will be in accordance with the applicable development standard to protect the health and safety of occupants.

303-6 Plumbing—Plumbing materials and their installation shall meet the applicable development standard. Hot water will be required to all living units, baths, kitchens and laundry facilities.

303-7 Insulation, Thermal Standards, Winterization—Insulation will be required where either heating or cooling is provided as per pargraph 303-5 above or when climatic conditions dictate a need for installation. Insulation Standards will comply with Exhibit D, paragraph IV C 3, of this subpart, or the State insulation standards, whichever are the more stringent.

303-8 Electrical—Electrical design, equipment and installation shall comply with the requirements of the latest edition of the National Electrical Code, and the applicable development standard for materials and their installation. Individual family units may be separately metered; other types of dwelling units may be separately metered as required.

303-9 Security and Winterization—Adequate management and physical measures will be provided as necessary to protect the facility during off-season periods, including adequate heating and insulation as required.

Exhibit K.—Classifications for Multi-Family Residential Rehabilitation Work

I. General

This Exhibit distinguishes between what FmHA considers maintenance and repair work, moderate rehabilitation and substantial rehabilitation. In all cases the building or project to be rehabilitated shall be structurally sound. The applicant shall have a structural analysis of the existing building made to determine the adequacy of all structural systems for the proposed rehabilitation.

II. Definitions

Maintenance and Repair—Work involved in the selective replacement and general maintenance and repair of certain materials, appliances or components of an existing residential building.

Moderate Rehabilitation—All work directly involved in the rearrangement of interior space, the replacement of finish materials or components of the electrical, plumbing, heating or conveyance systems of an existing multi-family residential building. Work and improvements are considered to be more than routine maintenance and repair.

Substantial Rehabilitation—All work directly involved in the rearrangement of interior space that involves alteration of load bearing partitions and columns; the replacement of the electrical, plumbing, heating or conveyance systems; and the addition to and/or major conversion of existing multi-family residential buildings or other building structures.

Moderate rehabilitation and repair shall not be limited to building changes for cosmetic or convenience purposes. In all cases moderate rehabilitation shall involve a minimum of three (3) components of building rehabilitation listed as moderate. Unless combined with other improvements in a project that are considered to be moderate or substantial rehabilitation the items identified as maintenance and repair are considered to be cosmetic and convenience changes.

When a rehabilitation project consists of both moderate and substantial rehabilitation components, those substantial rehabilitation components shall be in accordance with FmHA's development standards and local codes and regulation requirements. Where the majority of project components of building rehabilitation are considered substantial the project shall be considered in the substantial rehabilitation category.

Those site components of rehabilitation such as landscaping, grading, drainage, fencing, parking areas, recreation areas, water and waste disposal systems, etc., whether considered either maintenance and repair, moderate rehabilitation or substantial rehabilitation shall be in accordance with FmHA's development standards for site development work; all local codes and regulation requirements; and sound engineering and architectural practices.

Any alteration of a structure listed or eligible for listing on the National Register of Historic Places may be considered either moderate or substantial rehabilitation. However, it shall conform first to the Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings and then to FmHA's requirements. In cases where the Secretary of the Interior's standards cannot be met, rehabilitation will conform to the agreed upon approaches, treatments and techniques resulting from the consultation process between FmHA, the borrower, the State Historic Preservation Officer and the Advisory Council of Historic Preservation.

III. Components of Multi-Family Building Rehabilitation

The components of multi-family building rehabilitation necessary and generally considered by FmHA to be either maintenance and repair, moderate rehabilitation or substantial rehabilitation include but are not limited to these listed in the follwing chart.

COMPONENTS OF MULTI-FAMILY BUILDING REHABILITATION

Exhibit L.—Insured 10-year Home Warranty Plan Requirements

I. Purpose

In recent years, numerous third-party home warranty plans have been developed offering new homeowners varying degrees of protection against builder default and/or major structural defects in their homes. This exhibit establishes the criteria and procedures by which a warranty plan is found acceptable for new construction of single family homes financed by Farmers Home Administration (FmHA). An acceptable warranty plan will:

A. Assure that FmHA borrowers receive adequate warranty coverage.

B. in certain circumstances, eliminate the requirement for FmHA personnel to make the first two construction inspections, and

C. permit a loan up to the market value of the security (less the unpaid principal balance and past due interest of any other liens against the security) even though FmHA personnel did not perform periodic inspections during construction.

II. Types of acceptable Warranty Companies

A. An insured warranty company is underwritten by an insurance carrier, licensed to operate as an insurer in the states where the warranty company plans to operate and has an acceptable rating from a nationally recognized rating company such as A. M. Best Company.

B. A risk retention group is a company which is chartered in one state and is authorized, under the Products Liability Risk Rentention Act of 1981, to operate in all states. This authority is not challenged by FmHA; however, if at some future time any state insurance commission or regulatory agency challenges the legal authority of such group, FmHA will reconsider its acceptance of the group.

C. Individual state warranty plans, such as that offered by the State of New Jersey, are backed by the full faith and credit of the state government.

III. Plan Requirements

To be considered acceptable, a warranty plan must include the following features:

A. The entire cost (fee, premium, etc.) of the coverage is prepaid and coverage automatically transfers ot subsequent owners without additional cost.

B. The coverage is not cancellable by the warrantor (builder), warranty company or insurer.

C. The coverage includes at least the following:

(1) For one year from the effective date, any defects caused by faulty workmanship or defective materials.

(2) During the second year after the effective date, the warranty continues to cover the wiring, piping and duct work of the electrical, plumbing, heating and cooling systems, plus the items in (3).

(3) During the third through the tenth years, the warranty continues to cover major structural defects. A major structural defect is actual damage to the load-bearing portion of the home including damage due to subsidence, expansion or lateral movement of the soil (excluding movement caused by flood or earthquake) which affects its load-bearing function and which vitally affects or is imminently likely to affect use of the home for residential purposes.

D. A system is provided for complaint (claims) handling which includes a conciliation and, if necessary to resolve matters in dispute, arbitration arranged by the American Arbitration Association or similar organization.

E. A construction inspection plan is required if FmHA is to eliminate the first two FmHA inspections or permit a full market value loan when FmHA inspections are not conducted.

IV. The Review Process

A. Companies submitting warranty plans for a determination of acceptability must support requests with the following information.

(1) Evidence that the insured warranty company has met the state licensing and/or regulatory requirements in the state in which the company plans to operate.

(2) Evidence that the insurance carrier underwriting the warranty plan is licensed to operate as an insurer in the states in which the company plans to operate and has an acceptable rating from a nationally recognized rating company such as A. M. Best Company.

(3) A company claiming authority to operate as a risk retention group must submit certification it has complied with all requirements of the Products Liability Risk Retention Act of 1981 (Pub. L. 97–45) and information indicating the state in which it is chartered and licensed.

(4) State warranty plan agencies will provide evidence that the plan is backed by the full faith and credit of the state.

(5) A full description of the warrantly plan including information on the fees, builder and home registration procedures, required construction standards, construction inspection prcedures, coverage provided and claims procedures.

(6) A sample copy of the warranty information and/or policy which is provided to the homeowner.

(7) Suggested means by which FmHA field offices can readily assure that the builder is a member in good standing prior to loan approval and that a warranty will be issued upon the completion of construction prior to the final release of funds.

B. Submission and Acceptance.

(1) Insured warranty companies and state warranty plan agencies will submit their requests and supporting information to the FmHA State Director in the state in which they plan to operate.

(2) State Directors will determine the acceptability of insured warranty plans and state warranty plans in their jurisdictions, notify the appropriate company or agency of the decision in writing and notify field offices by issuance of a State Supplement including the names and addresses of acceptable warranty companies and any other pertinent information.

(3) Risk retention groups will submit their requests and supporting information to the FmHA National Office, Single Family Housing Processing Division.

(4) The National Office will determine the acceptability of risk retention groups, notify the organization of the decision in writing and notify field offices by publication of an attachment to the Exhibit.

V. Warranty Performance

A. County Supervisors will report inadequate warranty performance through their District Director to the State Director. State Directors will review the situation, assist in resolving any problems and, if necessary, initiate action under Subpart F of Part 1924 of this chapter. State Directors will inform, by memorandum, the Director, Single Family Housing Processing Division, National Office, of any problems with warranty performance and if any debarment action is initiated.

B. State Directors will annually monitor each warranty company and/or its insurer to assure continued compliance with state licensing and/or regulatory requirements.

Attachment 1—Acceptable Warranty Companies

The warranty company listed below claims authority to provide 10-year home warranties as a risk retention group under the Products Liability Risk Retention Act of 1981 and as such is authorized to operate in all states, subject to any future challenge to that authority by any state insurance commissioner or regulatory agency.

Name and Address: Home Owners Warranty Corporation, 2000 L Street, NW., Washington, DC. Telephone: 202–452–0450.

Area of Operation: All states.

Subpart F—Complaints and Compensation for Construction Defects

5. In § 1924.253, paragraph (c) is revised to read as follows:

§ 1924.253 Definitions.

* * * * *

(c) Newly constructed dwelling. A newly constructed dwelling is one which (1) is financed with a Section 502 RH insured loan, (2) was, at the time the loan was closed, not more than one year old and not previously occupied as a residence, and (3) the required construction inspections were made by Farmers Home Administration (FmHA), Department of Housing and Urban Development (HUD), Veterans Administration (VA) or as authoriged in Subpart A of Part 1924 of this chapter.

* * * * *

PART 1944—HOUSING

6. The authority citation for Part 1944 continues to read as follows and all other authority citation continued in this Part are revised.

Authority: 42 U.S.C. 1480; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Section 502 Rural Housing Loan Policies, Procedures, and Authorizations

7. In § 1944.16, paragraphs (a)(1)(i) and (a)(5) are revised to read as follows:

§ 1944.16 Building requirements.

(a) * * *

(1) * * *

(i) Living area will include all finished areas as well as unfinished areas that are designed for or normally considered as living area.

* * * * *

(5) Solid fuel burning devices may be authorized only if the loan approval official determines and documents in the case file that:

(i) A dependable and economical fuel supply is available,

(ii) the device complies with paragraph IVD2 of Exhibit D of Subpart A of Part 1924 of this chapter,

(iii) the device and installation drawings should be approved and will be inspected upon completion by at least one of the following:

(A) Local fire department official or the authority having jurisdiction,

(B) An insurance company representative that is providing fire coverage on the property; or,

(C) If required by local codes, the code authority having jurisdiction; and

(iv) The State Office policies and guidelines with respect to such devices are being followed.

* * * * *

Dated: January 30, 1986.

BILLING CODE 3410-07-M

Animal and Plant Health Inspection Service

9 CFR Part 71

[Docket No. 86–023]

Interstate Movement of Cattle

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of comment period for proposed rule.

SUMMARY: This document extends the comment period for a proposal to amend the regulations concerning the requirement that an owner-shipper statement or other document containing specified information accompany certain cattle during interstate movement.

DATE: Written comments must be received on or before April 16, 1986.

ADDRESS: Written comments should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Comments should state that they are in response to Docket Number 84–118. Written comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. R.E. Wagner, Chief Staff Veterinarian, Interstate and Compliance Staff, VS, APHIS, USDA, Room 808, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8684.

SUPPLEMENTARY INFORMATION: A document published in the Federal Register (50 FR 53330–53332) on December 31, 1985, proposed to amend the regulations in 9 CFR Part 71 with respect to the requirement that an owner-shipper statement or other document containing specified information accompany certain cattle during interstate movement. It was proposed to delete the requirement that cattle be accompanied by an owner-shipper statement or other document when moved interstate if the following

VOL
51
ISS
51
MR
17
1986
UMI

conditions are met: If the cattle are moved interstate to a slaughtering establishment operating under Federal or State inspection or to a stockyard specifically approved under 9 CFR 78.25(b); if the cattle are moved from a farm or other premises where the cattle to be moved interstate have been kept for not less than four months prior to the date of movement; and if such farm or other premises have not had on the premises any cattle or bison from any other premises within four months prior to the date of movement. Further, for those movements of cattle for which an owner-shipper statement or other document would still be required, it was proposed to require additional information on the owner-shipper statement or other document.

The proposed rule provided for receipt of comments on or before March 3, 1986. An industry representative has requested additional time to review the proposal and offer substantive comments. It has been determined that additional time is needed to allow industry representatives and other interested persons adequate time in which to prepare comments. Therefore, the comment period is extended for an additional 30 days.

Done at Washington, DC, this 12th day of March 1986.

J. K. Atwell,

Deputy Administrator Veterinary Services.

BILLING CODE 3410-34-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 86; 0063]

Occidental Petroleum Corp. et al.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would, among other things, allow Occidental Petroleum Corp to proceed with its tender offer for MidCon Corp. and their subsequent merger. Respondent would be required to divest MidCon's subsidiary, Mississippi River Transmission Corp. (MRT), within one year after the order becomes final. Additionally, respondent and its subsidiary, Cities Service Oil and Gas Corp., would be prohibited from entering into any new agreements to sell natural gas to MRT until the divestiture is completed.

DATE: Comments will be received until May 16, 1986.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: FTC/B-908, Ronald B. Rowe, Washington, DC 20580. (202) 724-1441.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and section 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

Mergers, Natural gas, Trade practices.

Agreement

Before Federal Trade Commission

[File 861 0063; Agreement Containing Consent Order]

In the matter of Occidental Petroleum Corp., a corporation, and MidCon Corp., a corporation.

The agreement herein, by and among Occidental Petroleum Corporation ("Occidental"), MidCon Corp. ("MidCon"), and counsel of the Federal Trade Commission ("Commission"), is entered into in accordance with the Commission's Rules governing consent order procedures. In accordance herewith the parties agree that:

1. Occidental is a corporation organized under the laws of California with its executive office at 10889 Wilshire Boulevard, Los Angeles, California 90024.

MidCon is a corporation organized under the laws of Delaware with its executive office at 701 East 22nd Street, Lombard, Illinois 60148.

2. Occidental and MidCon have been furnished a draft complaint, here attached, that the Bureau of Competition will present to the Commission for its consideration, which Occidental and MidCon understand may then be issued by the Commission, charging Occidental and MidCon with violations of the Clayton Act and Federal Trade Commission Act.

3. Occidental and MidCon admit only the jurisdictional facts set forth in the Commission's draft complaint in the proceeding.

4. Occidental and MidCon waive:

a. Any further procedural steps;

b. The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

c. All rights to seek judicial review or otherwise challenge or contest the validity of the Order entered pursuant to this agreement; and

d. All rights under the Equal Access to Justice Act.

5. This agreement is for purposes of settlement of the complaint and does not constitute an admission by Occidental and MidCon that the law has been violated as alleged in the complaint.

6. This agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commision. If this agreement is accepted by the Commission, it will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify Occidental and MidCon, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

7. If this agreement is accepted by the Commission, the Commission shall not request that a temporary restraining order, preliminary injunction, or permanent injunction be sought with respect to the Acquisition, provided, however, that nothing contained in this Agreement shall bar the Commission from further investigation of the Acquisition or from issuing an administrative complaint concerning any other aspect of the Acquisition or from seeking judicial relief to enforce the Order or to enforce any order arising from such administrative proceeding.

8. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to Occidental and MidCon: (1) Issue its decision containing the following Order to divest in disposition of the complaint and (2) make information public with respect thereto. When so entered, the

Order to divest shall have the same force and effect andy may be altered, modified or set aside in the same manner and within the same time provided by statute for other Orders. The Order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to Order to Occidental's and MidCon's addresses as stated in this agreement shall constitute service. Occidental and MidCon waive any rights they may have to any other manner of service. The complaint may be used in construing the terms of the Order, and no agreement, understanding, representation or interpretation not contained in the Order or the agreement may be used to vary or contradict the terms of the Order.

9. Occidental and MidCon have read the draft complaint and Order contemplated hereby. They understand that once that Order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the Order. Occidental and MidCon further understand that they may be liable for civil penalties in the amount provided by law for each violation of the Order after it becomes final.

Order

I

It is hereby Ordered that as used in this Order the following definitions shall apply:

1. "Acquisition" means Occidental's acquisition of shares of the Common Stock of MidCon and the subsequent merger of MidCon into an affiliate of Occidental pursuant to an Agreement and Plan of Reorganization.

2. "MRT" means Mississippi River Transmission Corporation, an indirect, wholly-owned subsidiary of MidCon.

3. "Occidental" means Occidental Petroleum Corporation, its subsidiaries, divisions, groups and affiliates controlled by Occidental and their respective directors, officers, employees, agents and representatives, and their respective successors and assigns.

4. "MidCon" means MidCon Corp. as it was constituted prior to the Acquisition, including its parents, subsidiaries, divisions, groups and affiliates controlled by MidCon, and their respective directors, officers, employees, agents and representatives, and their respective successors and assigns.

II

It is further ordered that:

A. Within 12 months of the date this Order becomes final, Occidental shall divest, absolutely and in good faith, MRT.

B. Divestiture of MRT shall be made only to an acquirer or acquirers and only in a manner that receives the prior approval of the Federal Trade Commission. The purpose of the divestiture of MRT is to ensure the continuation of MRT as an ongoing, viable enterprise engaged in the same business in which it is presently engaged and to remedy the lessening of competition resulting from the Acquisition as alleged in the Commission's complaint.

C. So long as Occidental shall own MRT, Occidental and its subsidiary, Cities Service Oil and Gas Corporation, shall not enter into any new agreement(s) for sale of natural gas to MRT.

III

It is further ordered that:

A. If Occidental has not divested MRT within the 12-month period, Occidental shall consent to the appointment of a trustee in any action that the Federal Trade Commission may bring pursuant to section 5(*l*) of the Federal Trade Commission Act, 15 U.S.C. 45 (*l*), or any other statute enforced by the Commission. In the event the court declines to appoint a trustee, Occidental shall consent to the appointment of a trustee by the Commission pursuant to this Order.

B. If a trustee is appointed by a court or the Commission pursuant to paragraph III(A) of the Order, Occidental shall consent to the following terms and conditions regarding the trustee's duties and responsibilities:

1. The Commission shall select the trustee, subject to Occidental's consent, which shall not be unreasonably withheld. The trustee shall be a person with experience and expertise in acquisitions and divestitures.

2. The trustee shall have 18 months from the date of appointment to accomplish the divestiture, which shall be subject to the prior approval of the Commission, and if the trustee was appointed by the court, subject also to the prior approval of the court. If, however, at the end of the 18-month period the trustee has submitted a plan of divestiture or believes that divestiture can be achieved within a reasonable time, the divestiture period may be extended by the Commission or by the court, if the trustee was appointed by a court.

3. The trustee shall have full and complete access to the personnel, books, records, and facilities of MRT and Occidental shall develop such financial or other information relevant to the assets to be divested as such trustee may reasonably request. Occidental shall cooperate with the trustee and shall take no action to interfere with or impede the trustee's accomplishment of the divestiture.

4. The power and authority of the trustee to divest shall be at the most favorable price and terms available consistent with the Order's absolute and unconditional obligation to divest and the purposes of the divestiture as stated in paragraph II(B). If bona fide offers are received by the trustee from more than one prospective purchaser, the Commission shall determine whether to approve each such purchaser, and the trustee shall divest to the purchaser elected by Occidental from among the purchasers approved by the Commission.

5. The trustee shall serve at the cost and expense of Occidental on such reasonable and customary terms and conditions as the Commission or a court may set. The trustee shall account for all monies derived from the sale and all expenses incurred. After approval by the court or the Commission of the account of the trustee, including fees for his or her services, all remaining monies shall be paid to Occidental and the trustee's power shall be terminated. The trustee's compensation shall be based at least in significant part on a commission arrangement contingent on the trustee divesting MRT.

6. Promptly upon appointment of the trustee and subject to the approval of the Commission, Occidental shall, subject to the Commission's prior approval and consistent with provisions of this Order, execute a trust agreement that transfers to the trustee all rights and powers necessary to permit the trustee to cause divestiture.

7. If the trustee ceases to act or fails to act diligently, a substitute trustee shall be appointed for the balance of the 18-month period specified in paragraph III(B)(2) or any extension thereof.

8. The trustee shall report in writing to Occidental and the Commission every sixty (60) days concerning the trustee's efforts to accomplish divestiture.

C. Occidental shall maintain the viability and marketability of MRT and shall not cause or permit the destruction, removal or impairment of any assets of MRT except in the ordinary course of business and except for ordinary wear and tear. Occidental shall use its best efforts to ensure that MRT continues to be an ongoing, viable

VOL 51 ISS 51 MR 17 1986 UMI

enterprise engaged in the same business in which it is presently engaged.

IV

It is further ordered that, within sixty (60) days after the date this Order becomes final and every sixty (60) days thereafter until Occidental has fully complied with the provisions of paragraphs II and III of this Order, Occidental shall submit to the Commission a verified written report setting forth in detail the manner and form in which it intends to comply, is complying or has complied with those provisions. Occidental shall include in compliance reports, among other things that are required from time to time, a full description of contacts or negotiations for the divestiture of MRT, including the identity of all parties contacted. Occidental also shall include in its compliance reports copies of all written communications to and from such parties, and all internal memoranda, reports and recommendations concerning divestiture.

V

It is further ordered that for a period commencing on the date this Order becomes final and continuing for ten (10) years from and after the date this Order becomes final, Occidental shall cease and desist from acquiring, without the prior approval of the Federal Trade Commission, directly or indirectly, through subsidiaries or otherwise, assets used or previously used by (and still suitable for use by), any interest in or the whole of any substantial part of the stock or share capital of any natural gas transmission line located in whole or part in the St. Louis MSA; these prohibitions shall not relate to participation in any joint venture in which Occidental or MidCon is a participant on the date of service of this Order or to the construction of new facilities.

VI

It is further ordered that for the purposes of determining or securing compliance with this Order, and subject to any legally recognized privilege, upon written request and on reasonable notice to Occidental and MidCon made to its principal office, Occidental and MidCon shall permit any duly authorized representatives of the Commission;

A. Access, during office hours and in the presence of counsel, to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of Occidental and MidCon relating to any matters contained in this Order; and

B. Upon five days notice to Occidental and MidCon and without restraint or interference from them, to interview officers or employees of Occidental and MidCon who may have counsel present, regarding such matters.

VII

It is further ordered that Occidental shall notify the Commission at least thirty (30) days prior to any proposed change in the corporation such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change that may affect compliance obligations arising out of the Order.

Analysis To Aid Public Comment

The Federal Trade Commission has accepted for public comment from Occidental Petroleum Corporation and MidCon Corp. an agreement containing consent order. This agreement has been placed on the public record for sixty days for reception of comments from interested persons.

Comments received during this period will become part of the public record. After sixty days, the Commission will again review the agreement and the comments received, and will decide whether it should withdraw from the agreement or make final the agreement's order.

The Commission's investigation of this matter concerns the February 1986 acquisition by Occidental Petroleum Corporation ("Occidental") of the stock of MidCon Corp. ("MidCon"). Occidental is a producer of natural gas. MidCon owns an extensive natural gas transmission system that transports gas from the natural gas producing areas of the country to various consuming areas. One pipeline subsidiary of MidCon, Mississippi River Transmission Corporation ("MRT"), supplies gas to the St. Louis area. Another MidCon pipeline subsidiary, Natural Gas Pipeline Company of America ("NGPL") supplies gas to various markets in Illinois, including Chicago. MidCon owns a number of additional pipeline subsidiaries, including United Gas Pipeline Company ("UGPL") which supplies markets in Louisiana.

The agreement containing consent order would, if issued by the Commission, settle the complaint that alleges an anticompetitive effect in the St. Louis market. The potential for such an anticompetitive effect is described in the United States Department of Justice, 1984 Merger Guidelines, 2 Trade Reg. Rep. (CCH) 14,490 (1984), as follows:

> 4.23 Evasion of Rate Regulation
>
> Non-horizontal mergers may be used by monopoly public utilities subject to rate regulation as a tool for circumventing that regulation. The clearest example is the acquisition by a regulated utility of a supplier of its fixed or variable inputs. After the merger, the utility would be selling to itself and might be able arbitrarily to inflate the prices of internal transactions. Regulators may have great difficulty in policing these prices, particularly if there is not an independent market for the product (or service) purchased from the affiliate. As a result, inflated prices could be passed along to consumers as "legitimate" costs. In extreme cases, the regulated firm may effectively preempt the adjacent market, perhaps for the purpose of suppressing observable market transactions, and may distort resources allocation in that adjacent market as well as in the regulated market. In such cases, however, the Department recognizes that genuine economies of integration may be involved. The Department will consider challenging mergers that create substantial opportunities for such abuses.[1]

If MidCon pipelines have market power in any consumer market, Occidental's acquisition of MidCon would be analogous to the situation set out in the Department of Justice Guidelines for the following reasons: First, as a result of the acquisition, Occidental will be able to internally transfer large quantities of deregulated natural gas to MidCon pipelines. Second, although MidCon's interstate pipeline subsidiaries are subject to Federal Energy Regulatory Commission rate-of-return regulation, Occidental is likely to be able to inflate the price of the gas it sells to its own pipelines in a manner that escapes regulatory strictures. Third, MidCon will be able to pass along inflated prices to customers in any market where MidCon pipelines have market power. Fourth, and finally, MidCon is likely to have market power in the St. Louis area because MidCon pipelines are the sole suppliers of the area. MRT, one of MidCon's interstate pipeline subsidiaries, is the sole supplier to the local gas distribution company for the city of St. Louis. MRT is not required by state or federal law to transport gas for others and alternative transportation facilities for natural gas into the St. Louis area are not available.

Because of the conditions described above, the Commission has reason to believe that the acquisition would have an anticompetitive effect in the St. Louis market that violates section 7 of the Clayton Act and section 5 of the Federal Trade Commission Act, unless an effective remedy eliminates the anticompetitive effect. The order accepted for public comment contains provisions requiring the divestiture (sale) of MRT within twelve months of the date that the order becomes final. If Occidental fails to divest MRT within the twelve-month period, Occidental shall consent to the appointment of a trustee, who would have eighteen additional months to divest MRT. Any proposal to divest MRT must be approved by the Federal Trade Commission after the divestiture proposal has been placed on the public record for reception of comments from interested persons. Prior to divestiture, the order prohibits Occidental from entering into any new agreements for the sale of natural gas to MRT.

For a period of ten years from its effective date, the order would also prohibit Occidental from acquiring, without prior Commission approval, any interest in any natural gas transmission line located in whole or in part in the St. Louis area.

It is anticipated that the provisions of the order would resolve the competitive problems alleged in the complaint. After divestiture, MRT would be an independent company serving the St. Louis area and would have an incentive to buy gas at the lowest possible prices.

The purpose of this analysis is to invite public comment concerning the consent order and any other aspect of the acquisition. In this regard, the agreement containing consent order makes clear that nothing in the agreement shall bar the Commission from further investigation or from issuing an administrative complaint concerning any other aspect of the acquisition.

This analysis is not intended to constitute an official interpretation of the agreement and order or to modify its terms in any way.

Emily H. Rock,

Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 150

[Docket No. 86N-0019]

Fruit Jelly and Fruit Preserves and Jams; Advance Notice of Proposed Rulemaking on the Possible Amendment of the U.S. Standards of Identity and Establishment of U.S. Standards of Quality and Fill of Container

AGENCY: Food and Drug Administration.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Food and Drug Administration (FDA) is offering interested persons an opportunity to review the Codex Standard for Jams (Fruit Preserves) and Jellies (Codex Standard 79-1981) (Codex standard) developed by the Codex Alimentarius Commission and to comment on the desirability of and need for amending the U.S. standards of identity and establishing U.S. standards of quality and fill of container for these foods to achieve consistency with the Codex standard. The Codex standard was submitted to the United States for consideration for acceptance. If the comments received do not support the need to amend the U.S. standards of identity and establish U.S. standards of quality and fill of container for fruit jelly and fruit preserves and jams, FDA will not propose their amendment or establishment .

DATE: Comments by May 16, 1986.

ADDRESS: Written comments, data, or other information to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Howard A. Anderson, Center for Food Safety and Applied Nutrition (HFF-214), Food and Drug Administration, 200 C St., SW., Washington, DC 20204, 202-485-0118.

SUPPLEMENTARY INFORMATION: The Food and Agriculture Organization (FAO) and the World Health Organization (WHO) jointly sponsor the Codex Alimentarius Commission, which conducts a program for developing worldwide food standards. The program has developed a number of Codex standards, among which is the Codex standard for Jams (Fruit Preserves) and Jellies (Codex Standard 79-1981).

As a member of the Codex Alimentarius Commission, the United States is obligated to consider all Codex standards for acceptance. The rules of procedure of the Codex Alimentarius Commission state that a Codex standard may be accepted by a participating country in one of three ways: full acceptance, target acceptance, or acceptance with specified deviations. A commitment to accept at a designated future date constitutes target acceptance. A country's acceptance of a Codex standard signifies that, except as provided for by specified deviations, a product that complies with the Codex standard may be distributed freely within the accepting country. A participating country which concludes that it will not accept a Codex standard is requested to inform the Codex Alimentarius Commission of this fact and the reasons therefor, the manner in which similar foods marketed in the country differ from the Codex standard, and whether the country will permit products complying with the Codex standard to move freely in that country's commerce.

For the United States to accept some or all of the provisions of a Codex standard for any food to which the Federal Food, Drug, and Cosmetic Act (the act) applies, it is necessary either to establish a standard under the authority of section 401 of the act (21 U.S.C. 341) or to appropriately revise an existing standard to incorporate the provisions within the U.S. standard. At present the United States has standards of identity for fruit jelly (21 CFR 150.140) and fruit preserves and jams (21 CFR 150.160) which differ in some respects from the Codex standard. There are no U.S. standards of quality and fill of container for these foods.

Under the procedure prescribed in 21 CFR 130.6(b)(3), FDA is providing an opportunity for review and informal comment on: (1) The desirability of and need for amending the U.S. standards of identity and establishing U.S. standards of quality and fill of container for fruit jelly and fruit preserves and jams, (2) the specific provisions of the Codex standard, (3) additional or different requirements that should be in the U.S. standards, and (4) any other pertinent points.

FDA advises that if comments received do not support the need to amend the U.S. standards of identity or establish U.S. standards of quality and fill of container, no amendment or new standards will be proposed. If this decision is reached, FDA will inform the Codex Alimentarius Commission of the differences between the Codex and U.S. requirements and that imported foods may move freely in interstate commerce in this country, providing they comply

VOL 51
ISS 51
MR 17
1986
UMI

with the applicable U.S. laws and regulations which include the U.S. standards of identity for fruit jelly and fruit preserves and jams.

Certain provisions of the Codex standards may not be consistent with aspects of U.S. policy and regulations. Codex standards customarily include hygiene requirements, certain basic labeling requirements such as declaration of the net quantity of contents, name of manufacturer and country of origin, and other factors. These factors are not considered a part of U.S. food standards under section 401 of the act, rather, they are dealt with under the authority of other sections of the act.

For the benefit of interested persons who may wish to submit comments relative to this notice, FDA points out that the following major differences exist between the Codex standard and the U.S. standards for fruit jelly and fruit preserves and jams:

(1) *Fruit Ingredients.* The Codex standard in sections 2.1.1 and 2.1.2 states that fruit jelly and fruit preserves and jams are prepared from a suitable fruit ingredient. Section 2.2.1 of the Codex standard states that fruit means all recognized fruits and those vegetables recognized as suitable in making jams, including but not limited to chestnuts, ginger, melon, rhubarb, and tomatoes. The U.S. standards in §§ 150.140(b)(1) and 150.160(b)(1) list 28 fruits for fruit jelly and 34 fruits, including rhubarb and tomatoes, for fruit preserves and jams.

(2) *Optional Ingredients.* The Codex standard provides for the following ingredients not provided for by the U.S. standards: in section 3.1.2 for the addition of herbs and spirituous liquors and for the use of butter, margarine, and other vegetable or animal oils; in 4.2 for the use of mono- and diglycerides of fatty acids of edible oils and dimethyl polysiloxane as antifoaming agents; and in 4.7 for the use of certain firming agents on the fruit ingredient. The Codex standard in section 3.1.2(7) also provides for the optional use of fruit juice or fruit juice concentrates in the case of jams. Of these optional ingredients, the U.S. standards of identity in §§ 150.140(c)(7) and 150.160(c)(7) provide only for the use of safe and suitable antifoaming agents that are not derived from animal fat.

(3) *Fruit Content.* The Codex standard in section 3.2 provides, with certain exceptions, specifications for two levels of fruit (or fruit juice) content for both fruit jelly and fruit preserves and jams. Specification A (3.2.1.1) requires not less than 45 parts by weight of fruit (or fruit juice) ingredient, exclusive of any added sugar or optional ingredients, for each 100 parts by weight of the finished product, except that blackcurrant, rosehip, or quince may contain not less than 35 parts, or ginger 25 parts, or cashew apple 23 parts, or passionfruit 8 parts. Specification B (3.2.1.2) requires not less than 33 parts by weight of fruit (or fruit juice) ingredient, exclusive of any added sugar or optional ingredients, for each 100 parts by weight of the finished product, except that blackcurrant, rosehip, or quince may contain not less than 25 parts, or cashew apple 16 parts, or ginger 15 parts, or passionfruit 6 parts. The U.S. standard of identity for fruit jelly in § 150.140(d)(1) requires not less than 45 parts by weight of fruit juice ingredient to each 55 parts by weight of the saccharine ingredient. The U.S. standard of identity for fruit preserves and jams in § 150.160(d)(1), requires not less than 47 parts by weight of fruit ingredient for Group I fruits, or permitted combination thereof, as specified in § 150.160(b)(1), and not less than 45 parts by weight of fruit ingredient for all other fruits (Group II) to each 55 parts by weight of the saccharine ingredient.

(4) *Mixtures of Fruits.* The Codex standard in section 3.2.2 requires, with limited exceptions, that the first named fruit in a two-fruit product be not less than 50 percent nor more than 75 percent of the total fruit content (3.2.2.1); in a three-fruit product, not less than 33⅓ percent nor more than 75 percent of the total fruit content (3.2.2.2); and in a four- or more fruit product, not less than 25 percent nor more than 75 percent of the total fruit content (3.2.2.3). There are no compositional requirements in the Codex standard for fruits other than the first named fruit. The U.S. standards in §§ 150.140(b)(2) and 150.160(b)(2) require, with limited exceptions, that each fruit in such mixed fruit products be not less than 20 percent of the weight of the combined fruits.

(5) *Conserve.* The Codex standard in section 7.1.1 recognizes the name "conserve" as an optional name for "preserve" or "jam." The U.S. standard does not recognize "conserve" as a permitted name for this food.

(6) *Labeling.* The Codex standard in section 7.1.1(a) provides for the labeling of products meeting Specification A as "Extra jam," "High fruit jam," or "Jam" (or "Jelly," "Preserve," or "Conserve," as appropriate). The Codex standard in section 7.1.1(b) provides for the labeling of products meeting Specification B as "Low fruit jam," "Light jam," "Jam", or "Fruit spread" (or "Jelly," "Preserve," or "Conserve," as appropriate). The U.S. standards of identity for fruit jelly and fruit preserves and jams in §§ 150.140(e)(1) and 150.160(e)(1) provide for the labeling of products as "Jelly," "Preserve," or "Jam," and when the fruit ingredient is a combination of two, three, four, or five fruits (or fruit juices), the name is "Jelly" or "Preserve" or "Jam" followed by the words "Mixed fruit" or by the names or synonyms of the fruit (or fruit juice) ingredients as designated by the respective standards.

(7) *Percentage Labeling.* The Codex standard in section 7.1.3 requires percentage labeling of the fruit ingredient(s). The U.S. standards have no such requirement.

(8) *Compliance.* The Codex standard specifies analytical methods by which compliance with certain provisions would be determined. In making such determinations, FDA prefers to rely on methods of analysis recognized by the Association of Official Analytical Chemists.

Under § 130.6(c), all persons who wish to submit comments are encouraged and requested to consult with different interested groups (consumers, industry, academic community, professional organizations, and others) in formulating their comments, and to include a statement of any meetings or discussions that have been held with other groups.

List of Subjects in 21 CFR Part 150

Food standards, Fruits.

The Codex standard under consideration is as follows:

CODEX STAN 79-1981—CODEX STANDARD FOR JAMS (FRUIT PRESERVES) AND JELLIES[1]

(Wolrld-wide Standard)

1. *SCOPE.*

1.1 This standard applies to a class of fruit spreads commonly known as jams and jellies and which may be prepared from single fruits or from two or more fruits.

1.2 The distinguishing characteristics of the product are:

(a) a substantial amount of fruit ingredient is required in the formulation; and

(b) the end product has a relatively high soluble solids value.

1.3 The terms "jams" and "preserves" are frequently used interchangeably. "Jellies" are differentiated from jams in that the fruit ingredient consists of the juice that has been extracted from whole fruits and clarified by filtration or other means.

1.4 This standard does not apply to:

(a) Products prepared with non-carbohydrate sweeteners and which are clearly intended or labelled as intended for diabetic or dietetic use; or

(b) Products with a low sugar content; or

(c) Products prepared from citrus fruit, commonly referred to as marmalade, which products are covered by the "Codex

Recommended International Standard for Citrus Marmalade" (CODEX STAN. 80-1981); or

(d) Products clearly intended and marked as for manufacturing use.

2. *DESCRIPTION.*

2.1 *Product Definitions.*

2.1.1 "Jam" or "Preserve" or "Conserve" is the product prepared from a suitable fruit ingredient (as defined in 2.2.2.1):

(a) which may be whole fruit, pieces of fruit, fruit pulp, or fruit puree; and

(b) with or without fruit juice or concentrated fruit juice as optional ingredient(s); and

(c) mixed with a carbohydrate sweetner, with or without water; and

(d) processed to a suitable consistency.

2.1.2 "Jelly" is the product prepared from a suitable fruit ingredient (as defined in 2.2.2.2):

(a) which is practically free from suspended fruit particles; and

(b) mixed with a carbohydrate sweetener, with or without water; and

(c) processed to a semi-solid consistency.

2.2 *Other Definitions.*

2.2.1 "Fruit" means all of the recognized fruits and those vegetables recognized as suitable in making jams, including but not limited to chestnuts, ginger, melon, rhubarb, tomato.

2.2.2 "Fruit ingredient" means:

2.2.2.1 *In the case of jams, preserves or conserves* the product:

(a) prepared from fruit which is fresh, frozen, canned, concentrated or otherwise processed or preserved; and

(b) prepared from fruit which is substantially sound, wholesome, of suitable ripeness and clean; not deprived of any of its main constituents, except that it is trimmed, sorted and otherwise treated to remove objectionable bruises, stems, toppings, tailings, cores, pits (stones), and may or may not be peeled. In the case of ginger, rhubarb, and melon, it means respectively the drained edible and cleaned root of ginger (Zingiber officinale) preserved in syrup, trimmed rhubarb stems, and melons with seeds, stem, and rind removed; and

(c) containing all natural soluble solids (extractives) except for those lost during preparation under good manufacturing practices.

2.2.2.2 *In the case of jelly* the juice or aqueous extract:

(a) obtained from fruit which is fresh, frozen, canned, concentrated, or otherwise processed or preserved; and

(b) prepared from fruit which is substantially sound, wholesome, clean, and which is trimmed, sorted and otherwise treated to remove objectionable material; and

(c) prepared by removal of all, or practically all, of this insoluble solids and may be concentrated by the removal of water.

2.2.3 "Fruit Pulp" means the edible portions of the fruit, mashed, or cut into pieces, but not reduced to a puree.

2.2.4 "Fruit Puree" means fruit ingredient finely divided by sieving, screening, or other mechanical means.

2.2.5 "Soluble Solids" means percent by weight of soluble solids as determined by the refractometric method corrected to 20°C using the International Sucrose Scale but making no correction for insoluble solids or acids.

3. *Essential Composition and Quality Criteria.*

3.1 *Composition.*

3.1.1 Basic Ingredients.

(1) Fruit ingredient as defined in 2.2.2.

(2) One or more of the carbohydrate sweetener(s) (sugar(s)) defined by the Codex Alimentarius Commission, including sucrose, dextrose, invert sugar, invert sugar syrup, fructose, glucose syrup, dried glucose syrup.

3.1.2 Optional Ingredients.

(1) Citrus juice.

(2) Herbs, spices (including powdered ginger) and vinegar.

(3) Essential oils.

(4) Spirituous liquors.

(5) Butter, margarine, other edible vegetable or animal oils (used as anti-foaming agents).

(6) Honey.

(7) Fruit juice or fruit juice concentrates in the case of jams. In Labrusca grape jam, grape juice and grape juice concentrate may constitute a part of the required fruit content.

3.2 *Formulation.*

3.2.1 Fruit Content.

3.2.1.1 Specification A.

The product shall be manufactured from not less than 45 parts, by weight, of original fruit ingredient, exclusive of any added sugar or optional ingredients for each 100 parts, by weight, of finished product except for the following:

	Parts
Blackcurrant, rosehip, quince	35
ginger	25
cashew apple	23
passion fruit	8

When concentrated or diluted fruit ingredient is used, the formulation is based upon the equivalent of single strength fruits as determined by the relationship between the soluble solids of the concentrate or the dilution and the soluble solids of the natural (single strength) fruit.

3.2.1.2 Specification B.

The product shall be manufactured from not less than 33 parts, by weight, of original fruit ingredient, exclusive of any added sugar or optional ingredients used in the preparation of the fruit ingredient, for each 100 parts, by weight, of finished product except for the following:

	Parts
Blackcurrant, rosehip, quince	25
ginger	15
cashew apple	16
passionfruit	6

When concentrated or diluted fruit ingredient is used, the formulation is based upon the equivalent of single strength fruits as determined by the relationship between the soluble solids of the concentrate or the dilution and the soluble solids of the natural (single strength) fruit.

3.2.2 Mixtures of fruits.

3.2.2.1 Two fruits.

When a jam or jelly contains a mixture of two fruits, the first-named fruit shall contribute not less than 50 percent, nor more than 75 percent, of the total fruit content except when melon, passionfruit, lemon, papaya, or ginger is one of the two fruits. When melon or papaya is a constituent it may be present up to a level of 95 percent and where pineapple, passionfruit, lemon, and ginger are present they shall be present at a level of not less than 5 percent with the major ingredient being permitted at a level greater than 75 percent.

3.2.2.2 Three fruits.

When a jam or jelly contains a mixture of three fruits, the first-named fruit shall contribute not less than 33⅓ percent, nor more than 75 percent, of the total fruit content.

3.2.2.3 Four or more fruits.

When a jam or jelly contains a mixture of four or more fruits, the first-named fruit shall contribute not less than 25 percent nor more than 75 percent, of the total fruit content.

3.3 *Soluble solids* (finished product).

The soluble solids value of the finished product shall not be less than 65 percent (see sub-sections 7.1.3 and 8.2.1).

3.4 *Quality criteria.*

3.4.1 General requirements.

The end product shall be viscous or semi-solid, have a colour and flavour normal for the type or kind of fruit ingredient taking into consideration any flavour imparted by optional ingredients. Characteristic colour shall not, however, be a requirement where the colour of the product has been adjusted by use of permitted colouring agents. It shall be reasonably free from defective materials normally associated with the fruits.

In the case of jellies, the product shall be at least reasonably clear or transparent and shall contain no apparent defects.

Seeds, in the case of berries and passionfruit, are a natural fruit component and are not considered defects unless the product is presented as "Seedless".

3.4.2 Defects and allowances—Jams (Preserves).

Based on a sample unit of 450 g the product shall have not more than the following:

(a) *Harmless extraneous plant material.* (consisting of plant material common to specific fruit and includes leaves, full caps, stems over 10 mm in length and sepal bracts aggregating an area of 5 mm² or larger.)	2 pieces.
(b) *Pit (Stone)* (whole pit or stone in fruits such as cherries that are normally pitted; or a piece of pit of approximately one-half pit.)	1 piece.
(c) *Pit fragments* (a piece of pit less than the equivalent of one-half pit and which weighs at least 5 milligrammes.)	2 pieces.
(d) *Damaged*	5 pieces.

---

[1] Formerly CAC/RS 79-1976.

VOL 51 ISS 51 MR 17 1986 UMI

(a piece of fruit that is blemished, discoloured, or bruised by pathological or other means to the extent that it is materially affected.)

(e) *Mineral impurities* (see 8.2.4)

Strawberry jam (percent by weight). 0.04.

Other (percent by weight)...... 0.01.

3.4.3 Classification of "defectives".

A container that fails to meet one or more of the applicable quality requirements, as set out in sub-sections 3.4.1 and 3.4.2 shall be considered a "defective".

3.4.4 Lot Acceptance.

A lot will be considered as meeting the applicable quality requirements referred to in sub-section 3.4.1 when the number of "defectives", as defined in sub-section 3.4.3, does not exceed the acceptance number (c) of the appropriate sampling plan (AQL-6.5) in the FAO/WHO Codex Alimentarius Sampling Plans for Prepackaged Foods (Ref. No. CAC/RM 42-1969).

	Maximum level
4. *Food Additives.*	
4.1 *Acidifying and pH Regulating Agents*	
4.1.1. Citric acid	Insufficient amount to maintain the pH at a level of 2.8–3.5.
4.1.2. Malic acid	
4.1.3. Lactic acid	
4.1.4. L-tartaric acid	
4.1.5. Fumaric acid	L-tartaric acid and fumaric acid and their salts expressed as the acid, 3g/kg.
4.1.6 Sodium, potassium and calcium salts of any of the acids listed in 4.1.1 through 4.1.5	
4.1.7 Sodium and potassium carbonates	
4.1.8 Sodium and potassium bicarbonates	
4.2 *Anti-Foaming Agents.*	
4.2.1. Mono-and diglycerides of fatty acids of edible oils.	Not more than is necessary to inhibit foaming.
4.2.2. Dimethyl polysiloxane	10 mg/kg.
4.3 *Thickening Agents.*	
4.3.1. Pectin (non-amidated)	Limited by GMP.
4.3.2. Pectin (amidated)	5 g/kg.
4.4 *Colours.*	
4.4.1. Erythrosine 45430	200 mg/kg singly or in combination.
4.4.2 Amaranth 16185 [1]	
4.4.3 Fast Green FCF 42053	
4.4.4 Ponceau 4R 16255	
4.4.5 Tarazine 19140	
4.4.6 Sunset Yellow FCF 15985	
4.4.7 Brilliant Blue FCF 42090	
4.4.8 Indigo Carmine (Indigotin) 73015	
4.4.9 Caramel colours (not made by the Ammonia Sulphite process)	
4.10 Caramel colours (made by the Ammonia Sulphite process) [1]	
4.4.11 Cholorophylls 75810	
4.4.12 Beta-apo-8'-carotenal 40820	
4.4.13 Ethyl ester of beta-apo-8'-carotenoic acid 40825	
4.4.14 Canthaxanthine	
4/5 *Preservatives.*	
4.5.1. Sodium benzoate	1 g/kg. singly or in combination.
4.5.2 Sorbic acid and potassium salt	
4.5.3 Esters of parahydroxy benzoic acid [2]	
4.5.4. Sulphur dioxide (as a carryover from raw material).	100 mg/kg—based on the end product.
4.6 *Flavours*	
4.6.1. Natural fruit essences of the named fruit(s) in the product.	
4.6.2 Natural mint flavour	
4.6.3 Natural cinnamon flavour	
4.6.4 Vanilla and vanillin (in chestnut preserves only)	Limited by CMP
4.7. *Firming Agents* (for use only on the fruit).	
4.7.1. Calcium bisulphite	200 mg/kg expressed as Ca, singly or in combination.
4.7.2 Calcium carbonate	
4.7.3 Calcium chloride	
4.7.4 Calcium lactate	
4.7.5 Calcium gluconate	
4.8 *Antioxidant.*	
4.8.1. L-ascorbic acid—generally	500 mg/kg.
4.8.2. L-ascorbic acid in blackcurrant jam	750 mg/kg.

[1] Temporarily endorsed.

[2] Methyl, ethyl and propyl esters

5. *Hygiene*

5.1 It is recommended that the product covered by the provisions of this standard be prepared in accordance with the Recommended International Code of Hygienic Practice for Canned Fruit and Vegetable Products (Ref. No. CAC/RCP 2-1969).

5.2 To the extent possible in good manufacturing practice the product shall be free from objectionable matter.

5.3 When tested by appropriate methods of sampling and examination, the product:

(a) shall be free from microorganisms capable of development under normal conditions of storage; and

(b) shall not contain any substances originating from microorganisms in amounts which may represent a hazard to health.

6. *Weights and Measures*

6.1 *Fill of container*

6.1.1 Minimum fill

The container shall be well filled with the product. When packed in rigid containers, the product shall occupy not less than 90% of the water capacity of the container. The water

capacity of the container is the volume of distilled water at 20°C which the sealed container will hold when completely filled (see 8.2.3).

6.1.2 Classification of "defectives"

A container that fails to meet the requirement for minimum fill (90 percent container capacity) of 6.1.1 shall be considered a "defective".

6.1.3 Lot Acceptance

A lot will be considered as meeting the requirement of 6.1.1 when the number of "defectives" does not exceed the acceptance number (c) of the appropriate sampling plan (AQL-6.5) in the FAO/WHO Codex Alimentarius Sampling Plans for Prepackaged Foods (Ref. No. CAC/RM 42-1969).

7. *Labeling*

In addition to Sections 1, 2, 4 and 6 of the General Standard for the Labelling of Prepackaged Foods (Ref. CODEX STAN. 1-1981) the following specific provisions apply:

7.1 *The name of the food*

7.1.1 The name of the product shall be:

(a) with respect to Specification A:

Extra Jam or High Fruit Jam or Jam	(or Jelly, Preserve or Conserve as appropriate)

(b) with respect to Specification B:

Low Fruit Jam or Light Jam or Jam or Fruit Spread	(or Jelly, Preserve or Conserve as appropriate)

7.1.2 The name of the product may be:

(a) "Creme" for products made from chestnuts.

(b) When any ingredient has been added which imparts to the food the distinctive flavour of the ingredient, the name of the food shall be accompanied by the term "flavoured with X" or "X flavoured", as appropriate. In the case of apple jelly that is coloured green and flavoured with mint, the traditional name "Mint Jelly" may be used.

7.1.3 In all cases the name of the product shall be accompanied by a statement on the label showing the parts of fruit ingredient used in the preparation of 100 parts of finished product. In the case of products with soluble solids levels below 65%, the word "Jam (Preserve, Conserve or Jelly)" may, in accordance with the law and custom of the Country in which the product is sold, be included in the name provided that the name includes appropriate words other than "Jam (Preserve, Conserve or Jelly)" and the name of the fruit or fruits.

7.1.4 The name of the product shall be preceded or followed by the name of the fruit, or fruits, used in order of proportion by weight.

7.1.5 The name of the product may include the name of the variety of fruit (e.g. Victoria Plum Jam) or type descriptions (e.g. Yellow Plum Jam).

7.1.6 The name of the product or fruit may include and adjective describing the character (e.g., Seedless Blackberry Jam).

7.1.7 Jam made from ginger, or pineapple, or figs, with or without the addition of citrus fruit, may be designated "Ginger Marmalade", "Pineapple Marmalade", or "Fig Marmalade" if such product is customarily so described in the country in which it is sold.

7.2 *List of ingredients*

7.2.1 A complete list of ingredients shall be declared on the label in descending order of proportion in accordance with sub-sections 3.2(b) and (c) of the General Standard for the Labelling of Prepackaged Foods (Ref. CODEX STAN. 1-1981).

7.2.2 If ascorbic acid is added to preserve colour, its presence shall be declared in the list of ingredients as ascorbic acid.

7.3 *Net Contents*

The net contents shall be declared by weight in either the metric system ("Systéme international" units) or avoirdupois or both systems of measurement as required by the country in which the product is sold.

7.4 *Name and Address*

The name and address of the manufacturer, packer, distributor, importer, exporter, or vendor of the product shall be declared.

7.5 *Country of Origin*

The country of origin of the product shall be declared if its omission would mislead or deceive the consumer.

7.6 *Lot Identification*

Each container shall be embossed or otherwise permanently marked in code or in clear to identify the producing factory and the lot.

8. *Methods of Sampling, Analysis and Examination*

8.1 *Sampling*

In accordance with the FAO/WHO Codex Alimentarius Sampling Plans for Prepackaged Foods (Ref. No. CAC/RM 42-1969).

8.2 *Test Procedures*

8.2.1 Soluble Solids

Soluble solids shall be determined by the refractometric method, disregarding any adjustment of water insoluble solids and invert sugars, in accordance with the AOAC Method. (Reference: Official Methods of Analysis of the Association of Official Analytrical Chemists (1975) XII, 22.024 and 31.011).

8.2.2 Determination of Calcium in Jams

In accordance with the FAO/WHO Codex Alimentarius Recommended Method (Ref. No. CAC/RM 38-1970) ais shown in Methods of AOAC (1975) XII, 32.014 through 32.016 (complexometry).

8.2.3 *Method of Determination of Water Capacity of Containers*

In accordance with the FAO/WHO Codex Alimentarius Recommended Method (Ref. No. CAC/RM 46-1972).

8.2.4 Determination of Mineral Impurities

In accordance with the FAO/WHO Codex Alimentarius Recommended Method (Ref. No. CAC/RM 49-1972).

For the convenience of the reader, FDA is also including the text of the existing U.S. standards of identity for fruit jelly and fruit preserves and jams which are as follows:

§ 150.140 Fruit jelly.

(a) The jellies for which definitions and standards of identity are prescribed by this section are the jelled foods each of which is made from a mixture of one or a permitted combination of the fruit juice ingredients specified in paragraph (b) of this section and one or any combination of the optional ingredients specified in paragraph (c) of this section, which meets the specifications in paragraph (d) of this section and which is labeled in accordance with paragraph (e) of this section. Such mixture is concentrated with or without heat. The volatile flavoring materials or essence from such mixture may be captured during concentration, seperately concentrated, and added back to any such mixture, together with any concentrated essence accompanying any optional fruit ingredient.

(b)(1) Each of the fruit juice ingredients referred to in paragraph (a) of this section is the filtered or strained liquid extracted with or without the application of heat and with or without the addition of water, from one of the following mature, properly prepared fruits which are fresh, frozen and/or canned:

FACTOR REFERRED TO IN PARAGRAPH (D)(2) OF THIS SECTION

Name of fruit	
Apple	7.5
Apricot	7.0
Blackberry (other dewberry)	10.0
Black raspberry	9.0
Boysenberry	10.0
Cherry	7.0
Crabapple	6.5
Cranberry	9.5
Damson, damson plum	7.0
Dewberry (other than boysenberry, loganberry, and youngberry)	10.0
Fig	5.5
Gooseberry	12.0
Grape	7.0
Grapefruit	11.0
Greengage, greengage plum	7.0
Guava	13.0
Loganberry	9.5
Orange	8.0
Peach	8.5
Pineapple	7.0
Plum (other than damson, greengage, and prune)	7.0
Pomegranate	5.5
Pricky pear	11.0
Quince	7.5
Raspberry, red raspberry	9.5
Red currant, currant (other than black currant)	9.5
Strawberry	12.5
Youngberry	10.0

(2) The permitted combinations are of two, three, four, or five of the fruit juice ingredients specified in paragraph (b)(1) of this section, the weight of each is not less than one-fifth of the weight of the combination. Each such fruit juice ingredient in any such combination is an optional ingredient.

(c) The following safe and suitable optional ingredients may be used:

BEST COPY AVAILABLE

VOL
51
ISS
51
MR
17
1986
UMI

(1) Nutritive carbohydrate sweeteners.

(2) Spice.

(3) Acidifying agents.

(4) Pectin, in a quantity which reasonably compensates for deficiency, if any, of the natural pectin content of the fruit juice ingredient.

(5) Buffering agents.

(6) Preservatives.

(7) Antifoaming agents except those derived from animal fats.

(8) Mint flavoring and artificial green coloring, in case the fruit juice ingredient or combination of fruit juice ingredients is extracted from apple, crabapple, pineapple, or two or all of such fruits.

(9) Cinnamon flavoring, other than artificial flavoring, and artificial red coloring in case the fruit juice ingredient or combination of fruit juice ingredients is extracted from apple or crabapple or both such fruits.

(d) For the purposes of this section:

(1) The mixture referred to in paragraph (a) of this section shall contain not less than 45 parts by weight of the fruit juice ingredients as measured in accordance with paragraph (d)(2) of this section to each 55 parts by weight of saccharine ingredient as measured in accordance with paragraph (d)(4) of this section.

(2) Any requirement with respect to the weight of any fruit juice ingredient, whether prepared from concentrated, unconcentrated, or diluted fruit juice means the weight determined by the following method: (i) Determine the percent of soluble solids in such fruit juice ingredient by the method for soluble solids referred to in paragraph (d)(3) of this section: (ii) multiply the percent so found by the weight of such fruit juice ingredient; (iii) divide the result by 100; (iv) subtract from the quotient the weight of any added saccharine ingredient solids or other added solids; and (v) multiply the remainder by the factor for such fruit juice ingredient prescribed in paragraph (b) of this section. The result is the weight of the fruit juice ingredient.

(3) The soluble-solids content of the finished jelly is not less than 65 percent, as determined by the method prescribed in "Official Methods of Analysis of the Association of Official Analytical Chemists," 13th Ed. (1980), section 31.011, under "Solids by Means of Refractometer—Official Final Action," which is incorporated by reference. Copies may be obtained from the Association of Official Analytical Chemists, P.O. Box 540, Benjamin Franklin Station, Washington, DC 20044, or may be examined at the Office of the Federal Register, 1100 L St. NW., Washington, DC 20408.

(4) The weight of any optional saccharine ingredient means the weight of the solids of such ingredient.

(e)(1) The name of each jelly for which a definition and standard of identity is prescribed by this section is as follows:

(i) In case the jelly is made with a single fruit juice ingredient, the name is "Jelly", preceded or followed by the name or synonym whereby the fruit from which such fruit juice ingredient was extracted is designated in paragraph (b) of this section.

(ii) In case the jelly is made with a combination of two, three, four, or five fruit juice ingredients, the name is "Jelly", preceded or followed by the words "Mixed fruit" or by the names or synonyms whereby the fruits from which the fruit juice ingredients were extracted are designated in paragraph (b) of this section, in the order of predominance, if any, of the weights of any such fruit juice ingredients in the combination.

(2) Each of the optional ingredients specified in paragraphs (b) and (c) of this section shall be declared on the label as required by the applicable sections of Part 101 of this chapter, except that:

(i) The name(s) of the fruit or fruits used may be declared without specifying the particular form of the fruit or fruits used.

(ii) When the optional ingredients listed in paragraphs (c) (3), (4), and (5) of this section are declared on the label, the declaration may be followed by the statement "Used as needed" on all jellies to which they are customarily, but not always, added to compensate for natural variations in the fruit juice ingredients used.

§ 150.160 Fruit preserves and jams.

(a) The preserves or jams for which definitions and standards of identity are perscribed by this section are the viscous or semi-solid foods; each of which is made from a mixture composed of one or a permitted combination of the fruit ingredients specified in paragraph (b) of this section and one or any combination of the optional ingredients specified in paragraph (c) of this section which meets the specifications in paragraph (d) of this section, and which is labeled in accordance with paragraph (e) of this section. Such mixture, with or without added water, is concentrated with or without heat. The volatile flavoring material from such mixture may be captured during concentration, separately concentrated, and added back to any such mixture, together with any concentrated essence accompanying any optional fruit ingredient.

(b)(1) The fruit ingredients referred to in paragraph (a) in this section are the following mature, property prepared fruits which are fresh, concentrated, frozen and/or canned:

Group I

Blackberry (other than dewberry), Black raspberry, Blueberry, Boysenberry Cherry, Crabapple, Dewberry (other than boysenberry, loganberry, and youngberry) Elderberry, Grape, Grapefruit, Huckleberry, Loganberry, Orange, Pineapple, Raspberry, Red raspberry, Rhubarb, Strawberry, Tangerine, Tomato, Yellow tomato, Youngberry

Group II

Apicot, Cranberry, Damson, damson plum, Fig, Gooseberry, Greengage, greengage plum, Guava, Nectarine, Peach, Pear, Plum (other than greengage plum and damson plum), Quince, Red currant, currant (other than black currant)

(2) The following combinations of fruit ingredients may be used:

(i) Any combination of two, three, four, or five of such fruits in which the weight of each is not less than one-fifth of the weight of the combination; except that the weight of pineapple may be not less than one-tenth of the weight of the combination.

(ii) Any combination of apple and one, two, three, or four of such fruits in which the weight of each is not less than one-fifth and the weight of apple is not more than one-half of the weight of the combination; except that the weight of pineapple may be not less than one-tenth of the weight of the combination.

In any combination of two, three, four, or five fruits, each such fruit is an optional ingredient. For the purposes of this section the word "fruit" includes the vegetables specified in this paragraph.

(c) The following safe and suitable optional ingredients may be used:

(1) Nutritive carbohydrate sweeteners.

(2) Spice.

(3) Acidifying agents.

(4) Pectin, in a quantity which reasonably compensates for deficiency, if any, of the natural pectin content of the fruit ingredient.

(5) Buffering agents.

(6) Preservatives.

(7) Antifoaming agents, except those derived from animal fat.

(d) For the purposes of this section:

(1) The mixture referred to in paragraph (a) of this section shall be composed of not less than: (i) In the case of a fruit ingredient consisting of a Group I fruit or a permitted combination exclusively of Group I fruits, 47 parts by

weight of the fruit ingredient to each 55 parts by weight of the saccharine ingredient; and (ii) in all other cases, 45 parts by weight of the fruit ingredient to each 55 parts by weight of the saccharine ingredient. The weight of the fruit ingredient shall be determined in accordance with paragraph (d)(2) of this section, and the weight of the saccharine ingredient shall be determined in accordance with paragraph (d)(5) of this section.

(2) Any requirement with respect to the weight of any fruit, combination of fruits, or fruit ingredient means:

(i) The weight of fruit exclusive of the weight of any sugar, water, or other substance added for any processing or packing or canning, or otherwise added to such fruit.

(ii) In the case of fruit prepared by the removal, in whole or in part, of pits, seeds skins, cores, or other parts; the weight of such fruit, exclusive of the weight of all such substances removed therefrom.

(iii) In the cases of apricots, cherries, grapes, nectarines, peaches, and all varieties of plums, whether or not pits and seeds are removed therefrom; the weight of such fruit, exclusive of the weight of such pits and seeds.

(iv) In case of concentrated fruit, the weight of the properly prepared fresh fruit used to produce such concentrated fruit.

(3) The term "concentrated fruit" means a concentrate made from the properly prepared edible portion of mature fresh or frozen fruits by removal of moisture with or without the use of heat or vacuum, but not to the point of drying. Such concentrate is canned or frozen without the addition of sugar or other sweetening agents and is identified to show or permit the calculation of the weight of the properly prepared fresh fruit used to produce any given quantity of such concentrate. The volative flavoring material or essence from such fruits may be captured during concentration and separately concentrated for subsequent addition to the concentrated fruit either directly or during manufacture of the preserve or jam, in the original proportions present in the fruit.

(4) The weight of any optional saccharine ingredient means the weight of the solids of such ingredient.

(5) The soluble-solids content of the finished jam or preserve is not less than 65 percent, as determined by the method prescribed in "Official Methods of Analysis of the Association of Official Analytical Chemists," 13th Ed. (1980), section 22.024, under "Soluble Solids by Refractometer in Fresh and Canned Fruits, Jellies, Marmalades, and preserves—Official Final Action," which is incorporated by reference, except that no correction is made for water-insoluble solids. Copies may be obtained from the Association of Official Analytical Chemists. P.O. Box 540, Benjamin Franklin Station, Washington, DC 20044, or may be examined at the Office of the Federal Register, 100 L St. NW., Washington, DC 20408.

(e)(1) The name of each preserve of jam for which a definition and standard of identity is prescribed by this section is as follows:

(i) If the fruit ingredient is a single fruit, the name is "Preserve" or "Jam", preceded or followed by the name or synonym whereby such fruit is designated in paragraph (b) of this section.

(ii) If the fruit ingredient is a combination of two, three, four, or five fruits, the name is "Preserve" or "Jam", preceded or followed by the words "Mixed fruit" or by the names or synonyms whereby such fruits are designated in paragraph (b) of this section, in the order of predominance, if any, of the weights of such fruits in the combination.

(2) Each of the optional ingredients specified in paragraphs (b) and (c) of this section shall be declared on the label as required by the applicable sections of Part 101 of this chapter, except that:

(i) The name(s) of the fruit or fruits used may be declared without specifying the particular form of the fruit or fruits used.

(ii) When the optional ingredients listed in paragraphs (c) (3), (4), and (5) of this section are declared on the label, the declaration may be followed by the statement "used as-needed" on all preserves or jams to which they are customarily, but not always, added to compensate for natural variations in the fruit ingredients used.

Interested persons may, on or before May 16, 1986, submit to the Dockets Management Branch (address above) written comments regarding this notice. Two copies of any comments are to be submitted, except that individuals may submit one copy. Each comment should identify the title of the Codex standard and the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Any comments submitted in support of amending the U.S. standards of identity and establishment of U.S. standards of quality and fill of container for fruit jelly and fruit preserves and jams should be supported by appropriate infomation and data regarding impact on small business consistent with requirements of the Regulatory Flexibility Act (Pub. L. 96–354).

Dated: March 4, 1986.

Robert Scheuplein,

Acting Director, Center for Food Safety and Applied Nutrition.

[CGD3-86-02]

Temporary Regulations, New York Harbor, July 2–5, 1986

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking; correction.

SUMMARY: The Coast Guard is correcting the proposed rule containing the temporary regulations for the Port of New York governing port activities and vessel movement and control during the forthcoming Opsail '86 and International Naval Review, July 2–5, 1986, that appeared in the **Federal Register** of February 19, 1986 (51 FR 6066). This action is necessary to correct typographical errors in certain latitudes and longitudes and to correct an error in identifying boat and spectator anchorages on Chartlet III, Appendix A. For the convenience of the reader, Chartlet III is reproduced in its entirety and relabeled as Chartlet III-change 1.

DATE: Comments on the proposed rule must be received on or before April 7, 1986.

ADDRESSES: Comments should be mailed to Commander, Coast Guard Group New York, Bldg. 109, Governors Island, New York, NY 10004. The comments and other materials referenced in this notice will be available for inspection and copying at the Vessel Movement Office, Bldg. 109, Governors Island, New York. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand delivered to this address.

FOR FURTHER INFORMATION CONTACT: Lieutenant Junior Grade T. S. Kuhaneck, Vessel Movement Officer, Commander, Coast Guard Group New York, at (212) 668–7933.

SUPPLEMENTARY INFORMATION: The following corrections are made FR Doc.

33 CFR Part 117

[08–84–10]

Drawbridge Operation Regulations: Gulf Intracoastal Waterway, Harvey Canal Route, Louisiana; Withdrawal of Proposed Rule

AGENCY: Coast Guard, DOT.

ACTION: Withdrawal of proposed rule.

SUMMARY: At the request of the Louisiana Department of Transportation and Development (LDOTD), the Coast Guard is withdrawing a proposed rule concerning the LA 18 (Fourth Street) bridge over the Harvey Canal, mile 0.24 in Harvey, Jefferson Parish, Louisiana. The proposed rule was to provide that the draw need not open for the passage of vessels from 6:15 to 8:15 a.m. and 4:30 to 5:45 p.m. Monday through Friday except holidays. The draw is presently required to open on signal at all times. The proposal is being withdrawn at the applicant's request pending completion of construction of the nearby expressway with its new high level fixed span bridge.

FOR FURTHER INFORMATION CONTACT: Perry Haynes, Chief, Bridge Administration Branch, Eighth Coast Guard District, 500 Camp Street, New Orleans, LA 70130–3396, telephone (504) 589–2965.

SUPPLEMENTARY INFORMATION: On January 7, 1985, the Coast Guard published (50 FR 860) a proposal to revise these regulations. The Commander, Eighth Coast Guard District also published the proposal in a public notice dated January 18, 1985. In each notice interested persons were given until February 21, 1985, to submit comments.

The new expressway bridge will provide an additional crossing of the Harvey Canal just 0.6 mile from the LA 18 drawbridge and a substantial number of LA 18 users will divert to the new fixed span bridge. At that time, LDOTD may reevaluate the need for rush hour traffic closures of the LA 18 drawbridge.

List of Subjects in 33 CFR Part 117

Bridges.

Accordingly, the proposed rule published in the **Federal Register** (50 FR 860) on January 7, 1985, is hereby withdrawn.

Dated: March 3, 1986.

Clyde T. Lusk, Jr.,

Rear Admiral, U.S. Coast Guard, Commander, Eighth Coast Guard District.

BILLING CODE 4910-14-M

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 223

Sale and Disposal of Timber; Suspension and Debarment

AGENCY: Forest Service, USDA.

ACTION: Notice of extension of public comment period.

SUMMARY: On January 23, 1986, the Forest Service published a notice of proposed rulemaking to clarify Forest Service procedures for suspension and debarment of National Forest System timber sale purchasers (51 FR 3158). The intended effect of the rule is to ensure that Forest Service timber sale contracts are awarded to responsible purchasers. The proposed rule incorporates editorial changes to improve overall clarity of the text of the current interim rule, as well as changes that specifically clarify that the rule would apply solely to suspension and debarment from Forest Service timber sales. The proposed rule also substantially adopts the revisions to the governmentwide procurement regulations published as the Federal Acquisition Regulations (FAR), 48 CFR 9.4 (effective April 1, 1984). Because many timber sales purchasers have been developing operating plans for the forthcoming field season since publication of the proposed rule, they have not had adequate time to consider the proposed rule and provide comments. Therefore, the public comment period is extended until April 18, 1986.

DATE: Comments must be received on or before April 18, 1986.

ADDRESS: Send comments to R. Max Peterson, Chief (2400), Forest Service, USDA, P.O. Box 2417, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Lloyd W. Olson, Timber Management Staff, Forest Service, USDA, (202) 475–3758.

Dated: March 10, 1986.

Peter C. Myers,

Assistant Secretary, Natural Resources and Environment.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 260, 262, 264, 265, and 270

[FRL No. 2979–7]

Hazardous Waste Management System; Standards for Hazardous Waste Storage and Treatment Tank Systems

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of data and information; solicitation of comments.

SUMMARY: The Environmental Protection Agency (EPA) today notifies the public that the draft reports for the Hazardous Waste Tank Risk Analysis are available for review and comment. These reports are title, "Hazardous Waste Tank Failure and Release Model" and "Hazardous Waste Tank Risk Analysis." EPA may use these reports in developing or implementing regulations for hazardous waste tanks, including underground tanks that cannot be entered for inspection, pursuant to section 3004(w) of the Resource Conservation and Recovery Act. The Agency solicits comments relating to these reports and other matters.

DATES: EPA will accept comments from the public on these draft reports until April 16, 1986. EPA may conduct additional anaylses and provide the docket with descriptions of the methodology and results by March 31 1986. If the Agency does complete such additional analyses, they will be available for public comment for 30 days from the date the descriptions are received in the docket.

ADDRESSES: Comments may be mailed to the Docket Clerk (Docket No. 3004, Revised Tank System Standards), Office of Solid Waste (WH–562), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Comments received by EPA and all references used in this document may be inspected in Room S–212(C), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC, from 9:00 am to 4:00 pm, Monday through Friday, excluding holdiays.

FOR FURTHER INFORMATION CONTACT: The RCRA/Superfund Hotline, at (800) 424–9346 (toll free) or (202) 382–3000 in Washington, D.C., or Betsy Tam, Office of Solid Waste (WH–565), U.S. Environmental Protection Agency, Washington, D.C. 20460, (202) 382–2791.

SUPPLEMENTARY INFORMATION: On June 26, 1985, the Environmental Protection Agency proposed to amend its regulations under the Resource Conservation and Recovery Act (RCRA) for tank systems storing or treating hazardous waste (50 FR 26444). These proposed regulations would revise substantially and would supplement existing regulations for hazardous waste tanks. In the preamble to the proposed regulations, EPA explained that it would develop a risk assessment that might be used in developing the final regulations.

Among the alternatives that the Agency discussed in the preamble to the proposed regulation were technical approaches such as full secondary containment, partial secondary containment, ground water monitoring, leak testing, and corrosion protection. In addition, the Agency solicited public comment on alternative regulatory strategies, such as national risk-based standards, minimum Federal performance standards, banning underground tanks, and forced retirement of underground tanks (50 FR 26451; June 26, 1985).

The Agency has developed a risk assessment methodology in order to examine these regulatory alternatives and has obtained preliminary results. Today the Agency is making the methodology and preliminary results available for public comment. The Agency has not decided whether to use the risk assessment in developing the final hazardous waste tank regulations or, if so, in what manner to use it.

One use to which the analysis may be put is to serve as guidance for implementing a risk-based variance or waiver from otherwise applicable standards. The proposed regulations contained provisions for such waivers at § 264.193(i) and 265.193(f). The risk analysis may also serve in other ways, such as supporting differences in regulatory requirements, or in the dates upon which requirements must be met, based upon the relative risks presented by differences in tank systems, such as age or size.

Methodology and Preliminary Results of the Risk Analysis

In order to examine the risks associated with hazardous waste tanks, the risk analysis examines the results of the Tank Risk Analysis Model (TRAM). The Tank Risk Analysis Model is composed of the following three component sub-models:

- The Hazardous Waste Tank Failure (HWTF) model, a Monte Carlo simulation model that predicts failure events for hazardous waste tanks and estimates release volumes associated with these failure events;
- A subsurface transport and environmental fate model that simulates contaminant transport and degradation in the unsaturated and saturated zones through the use of modified versions of the McWhorter-Nelson Wetting Front and Prickett-Lonnquist Random Walk models, respectively; and
- An exposure and risk model that estimates human exposure to hazardous chemicals via contaminated drinking water and calculates non-carcinogenic and carcinogenic risk to an exposed individual.

The analysis uses the TRAM to examine risks from different tank types (above-ground, underground, etc.), different tank materials (carbon steel, fiberglass, etc.), and different hazardous waste streams.

The Hazardous Waste Tank Failure Model

The Hazardous Waste Tank Failure (HWTF) Model is a Monte Carlo simulation model that simulates failure events and the volume of released waste for hazardous waste tanks. Its purpose is to simulate the various failure mechanisms associated with hazardous waste tanks in terms of: (1) The timing of occurrence for these failure events; and (2) the magnitude of release volumes associated with these failure events. The model relies on two basic techniques: Fault tree analysis and Monte Carlo simulation.

The model uses fault tree analysis to evaluate the reliability of complex tank systems. The fault trees are used to identify the sequence of contributing events leading to a tank system failure that results in a release of waste to the environment. Failure events considered in the model by fault trees include:

- Overflows
- Leaks and ruptures
- Natural catastrophes
- Secondary containment failures
- Operator errors.

The frequency of occurance and timing of these failure events is predicted using a Monte Carlo Simulation model.

In Monte Carlo simulation, probability distributions are assigned to model variables for which deterministic values are not available. These probability distributions reflect the uncertainty regarding a real value for a particular parameter. As a result, the degree to which the model is representative of a particular situation is dependent upon the availability of data for the construction of the probability distribution. Once these distributions are constructed, a value for each variable is randomly chosen from the distribution for that parameter, and the model calculates a release estimate.

Distributions for both the timing and magnitude of failure events are sampled randomly for 250 iterations for each model tank. The analysis assumed a 20-year time horizon for tanks; therefore, each iteration contains annual release volumes for 20 years. For each iteration, annual release volumes for failure events are calculated from the year in which a failure event occurred to the year in which the model predicts that the release is detected. At the time of detection the model assumes that the tank system is taken out of operation such that the source of the release ceases to exist.

The 250 iterations represent the spectrum of a model tank's performance over a 20-year time horizon. Of the 250 iterations, five or six were used in the contaminant transport and exposure sub-models. These five or six selected iterations are called "representative release profiles" because they represent what we consider the typical performance of a tank.

The HWTF model may be used not only to identify the failure events and release volumes for different tank systems (above-ground, underground, etc.), but it may also be used to estimate the effectiveness of various protective measures in preventing or reducing releases from hazardous waste tanks. This is accomplished within the model by varying the probability distributions for failure events associated with the protective measures.

Subsurface Transport Model

In the Tank Risk Analysis Model (TRAM), the representative release profiles from the HWTF model are input to a subsurface transport model that predicts the transport and environmental fate of contaminants released from hazardous waste tanks. The subsurface transport model simulates contaminant transport in both the unsaturated and saturated zones. The model uses in McWhorter-Nelson Wetting Front Model to simulate the transport of contaminants in the unsaturated zone and the Prickett-Lonnquist Random Walk Model to simulate saturated zone transport. These models are described briefly below.

McWhorter-Nelson Wetting Front Model: In this model, contaminant transport is represented by the movement of a wetting front generated by the release of liquid from the tank system. The travel time for the wetting front through the unsaturated zone is related to the difference in water content in the layers immediately above and below the wetting front, the distance traveled in the unsaturated zone, the leakage rate (Darcian flux), and the retardation of contaminant flow by soil adsorption.

Extensive testing has revealed that the McWhotrer-Nelson Model results depend on seven factors:

- Thickness of unsaturated zone
- Retardation coefficient of the contaminant
- Specific discharge of material from the contaminant source
- Porosity of the unsaturated zone
- Soil moisture content in the unsaturated zone
- Unsaturated zone permeability
- Pore size distribution.

Thus, contaminant transport in the unsaturated zone, as modeled by the McWhorter-Nelson Wetting Front Model, is dependent not only upon properties of the unsaturated zone, but also upon the quantity and physical and chemical properties of the released contaminants.

The McWhotrer-Nelson Model has been used extensively in subsurface transport studies and is a well documented and widely accepted unsaturated zone model. However, to use this model in the TRAM, we had to make several assumptions regarding soil properties and such contaminant characteristics as degradation and dispersion factors. While these assumptions tend to oversimplify transport and attenuation processes occurring in the unsaturated zone, they are consistent across all situations and thus allow for direct risk comparisions between different tank scenarios. The unsaturated zone model provides as its output a mass loading to the saturated zone for each contaminant released from the model tank used in the analysis.

Prickett-Lonnquist Random Walk Model: The Tank Risk Analysis Model uses the Prickett-Lonnquist ground water transport model with random walk particle tracking to simulate the transport of contaminants in the saturated zone. This model is a numerical (finite difference) model that simulates transport in two dimensions (longitudinal and vertical) and accounts for dispersion through the use of the random walk stochastic submodel. It is a widely used and well documented ground water transport model that has been utilized in many ground water contamination studies.

The TRAM does not actually use the Prickett-Lonnquist code, but rather a set of standard breakthrough curves are used to calculate the concentration of a particular contaminant at an exposure well for a given set of hydrogeologic and mass loading conditions over time. Hydrogeologic conditions such as horizontal and vertical ground water velocities and aquifer conditions are represented in the model by a set of nine generic flow fields.

Although the saturated zone model is considered adequate for comparing the transport of contaminants in hypothetical, generic situations, the model, as included in the TRAM, is not suitable for site-specific analyses. In addition, developing and using the saturated zone transport model required several simplyfying assumptions that affect the model's results and limit its applicability. However, since all assumptions are consistent to all situations in this analysis, EPA considers the model useful for comparative purposes.

Exposure and Risk Model

The subsurface transport model results are input to an exposure and risk model. This model estimates the time and magnitude of exposure to individuals using contaminated ground water as a drinking water source. The model also predicts the probability that the exposed individual will suffer an adverse health effect as a result of using the contaminated water supply. The yearly dose to an individual using a particular well is equal to the well contaminant concentration times the ratio of the intake rate of drinking water divided by the receptor weight.

The model calculates risk for the exposed individual based on dose and the inherent hazard of the particular contaminant to which the individual is exposed. For carcinogens, the analysis uses a linear dose-response model that assumes no minimum threshold. Thus, risks are estimated for carcinogens at very low concentrations.

The model used EPA unit risk values, when available, to estimate the inherent hazard for carcinogens and the one-hit model to estimate unit risk. When EPA unit risk values were unavailable, the inherent hazard was estimated by applying the one-hit equation to an appropriate set of experimental data. For non-carcinogens, the analysis assumes a threshold, or minimum effective dose (MED), and uses a non-linear dose-response model to calculate risk.

Limitations of the Tram

1. Limits for Use in Establishing Risk-Based Standards

During the course of this analysis, the Agency determined that there were insufficient data to establish different levels of protection based on levels of risk posed by different tank system, waste stream, and environmental combinations. In addition, the model structure is generalized such that it does not represent the entire spectrum of the regulated community's characteristics. Such complete representation would be essential for us to determine specific regulatory levels of stringency for different tank system, waste stream, and environmental combinations.

Among the data for which we have insufficient information are the following:

- Waste streams and constituent composition and concentrations for the hazardous waste tank population
- Hydrogeologic setting for the hazardous waste tank population
- Distances between drinking water wells and hazardous waste tanks
- Populations associated with those drinking water wells.

These data vary significantly on a site-by-site basis. Thus, it appears that the best way to utilize such information effectively may be to implement risk-based variances from the general standards.

2. Limits for Examining Effects of Banning Underground Tanks

The Tank Risk Analysis Model structure is inappropriate for examining the effects of banning underground hazardous waste tanks since the focus is on the effects of ground water contamination. One of the primary reasons for using underground tanks is the safe storage of ignitable or explosive wastes. Because the risk model does not simulate risks from fires or explosions, we would not be adequately addressing the risks associated with banning the use of underground tanks.

Further Analyses

The risk model may be used to assist the Agency in examining the effects of forced retirement of underground tanks, under the assumption that once the tank is retired it is replaced with a secondary contained underground tank. In addition to phasing-in secondary containment for underground tanks, we could examine the effect of phasing-in secondary containment for the entire tank population.

Before issuing a final rule, the Agency also hopes to analyze regulatory options in addition to those specified in the proposal. These alternatives include excavation zone monitoring (vapor well monitoring in the tank backfill area that is of a known consistency and permeability, not in the native soil) for

an appropriate volatile hazardous waste and corrosion protection in combination with leak detection methods, such as leak testing or excavation zone monitoring.

If the Agency analyzes these additional options, we will provide the docket with a description of the methodology and the results of these analyzes by March 31, 1986. The new analyses will then be available for comment for a period of 30 days. As with the already completed analyses, it is uncertain whether or how these analyses will be used in developing the final rule.

At this time, however, the model has been used only to examine the relative risks associated with hazardous waste tanks under the proposed alternative technical requirements. The hazardous waste tank risk analysis is useful for comparing risks of tanks under the proposed alternative technical standards because waste stream and hydrogeology assumptions can be kept constant while the technical standards are changed. The following discussion presents a summary of the risk results associated with the technical alternatives that were considered in this analysis.

Preliminary Results

Preliminary results of the analysis showed that retrofitting full secondary containment significantly reduced risks for all tanks, with a typical reduction of 50 percent for those cases where risks were estimated. More importantly, high risk estimates (for this analysis, assumed to be risk greater than 10^{-4}) were reduced by 80 percent or more for most modeled tanks by retrofitting full secondary containment.

As a result, this analysis indicates that full secondary containment with leak monitoring is the most effective method of reducing risks associated with hazardous waste tanks. Secondary containment systems prevent most releases from escaping to the environment, allowing hazardous waste releases mainly as a result of very low probability catastrophic failures.

Based on the results of this risk analysis, possible regulatory strategies were ranked in descending order of risk reduction compared to risks estimated for the baseline situation (assuming compliance with the existing regulations) as follows:

- Secondary containment
- Partial secondary containment and ground water monitoring
- Leak testing and ground water monitoring
- Corrosion protection without leak detection
- Existing (baseline) regulations.

Direct comparisons cannot be made between all strategies since not all of the alternatives are applicable to all tank types. This ranking scheme does provide an indication of the overall effectiveness of each of the alternatives compared to the baseline.

The preliminary results indicate that the Agency's proposed requirements of full secondary containment with interstitial leak monitoring is the most effective strategy for preventing environmental damage caused by leaking hazardous waste tanks. The partial containment approach is effective for preventing releases from such causes as overfilling, spills, and operator error. However, the on-grade or in-ground portion of the tank may have a leak that cannot be seen. Such a leak is not detected until the ground water monitoring indicates contamination.

For steel underground tanks, leak testing with ground water monitoring appears to be substantially less effective than full secondary containment since this approach does not prevent releases from occurring. Although the leak detection and ground water monitoring option allows the source of the leak to be removed upon detection, it does not guarantee prevention of substantial environmental damage and risk to human health. This is because leak detection methods are not reliable enough to detect all leaks. In addition, depending on the frequency of the leak test, substantial contamination could occur between tests.

However, for fiberglass reinforced plastic (FRP) tanks, the results of this analysis indicate that the leak testing and ground water monitoring approach is comparable to full secondary containment in reducing risks. This result may be due to the types of failures associated with FRP tanks. The model simulates FRP tank failures as large seam cracks or ruptures that would generally be detected by leak testing. This is in contrast to steel tanks that may develop leaks due to corrosion that are too small to be detected by leak testing.

Finally, corrosion protection without any form of leak detection does not appear to be very effective in reducing the risks presented by carbon steel and stainless steel tanks. This is because, while corrosion protection prevents or delays corrosion, it does not address all the other failures that result in releases. Such failures include installation deficiencies, overfills, spills, and tank or pipe ruptures.

The risk estimates developed in this analysis are not only a function of tank failure events and release volumes, but are also a function of the waste streams stored in a particular tank and the hydrogeologic settings in which the tank is located. As a result, although the alternative technical requirements may substantially reduce the quantities of released waste, substantial risks may remain due to waste stream and hydrogeologic characteristics.

The summary of results presented here is not complete. The docket report, "Hazardous Waste Tank Risk Analysis," provides a more detailed discussion of the preliminary results of this risk analysis.

Solicitation of Comments

1. Risk Analysis

The Agency is soliciting comments on this analysis for a period of thirty days. It is necessary to obtain comments quickly because the Agency may use the analysis in the hazardous waste tank regulation. Under an Order of the United States District Court for the District of Columbia, the regulations are required to be promulgated by June 30, 1986. The Agency specifically encourages commenters to address the appropriateness of the methodology for this analysis, including the assumptions used, as well as how the Agency should consider using the analysis in developing or implementing the final hazardous waste tank Regulations.

2. Other Issues

The Agency also requests comments on the possibility of the Agency's making distinctions, in the final hazardous waste tank regulations, in regulatory requirements, or effective dates of those requirements based upon the Agency's estimates of differences in risks presented. Specifically, the Agency is considering basing such distinctions for non-leaking tanks on age and size of tanks. Other factors that might be considered are whether the tanks are above-ground, in-ground, or underground, and what the tank material is (carbon steel, fiberglass, concrete, etc). Finally, the Agency requests comments on the duration of leaks once they occur, and the median or mean time to failure for various tank systems, such as concrete or fiberglass tank systems.

Dated: March 11, 1986.

40 CFR Part 261

[SW-FRL-2985-1]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of data and request for comments.

SUMMARY: On May 1, 1985, the Environmental Protection Agency (EPA) proposed to list as hazardous three wastes generated during the production of linuron and bromacil. EPA has received additional information after the close of the comment period and is making these data available for public comment.

DATE: EPA will accept public comments on this notice until April 16, 1986.

ADDRESSES: Comments should be sent to the Docket Clerk, Office of Solid Waste (WH-562), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Comments should identify the regulatory docket "Listing Linuron and Bromacil." The public docket for this amendment is located in Room S-212, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: The RCRA/Superfund Hotline at (800) 424-9346 or at (202) 382-3000. For technical information contact Wanda LeBleu-Biswas, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 382-7392.

SUPPLEMENTARY INFORMATION:

I. Background

On May 1, 1985, EPA proposed to amend the hazardous waste list by adding three wastes generated during the production of linuron and bromacil (see 50 FR 18622). These wastes are:

- K119—Wastes from the decanter in the production of linuron,
- K120—Wastes from the spill control trap in the production of linuron, and
- K121—Wastewater from product filtration and water washing in the production of bromacil.

Comments were received from E.I. du Pont de Nemours & Company, Inc., the sole producer of linuron and bromacil. In their comments, Du Pont argued that the listing of these wastes should not be made final since they believe that they are not hazardous.

Du Pont, after the close of the comment period, contacted EPA to request a meeting to clarify their comments. The Agency met with Du Pont on December 16, 1985, at which time EPA received additional data. The major subjects discussed were as follows:

- Du Pont current surface impoundments and wastewater treatment process were described. Also discussed was the impact of the Clean Water Act's effluent guidelines for pesticide chemicals (made final (see 50 FR 40672) on October 4, 1985, after the close of the comment period) on the management of proposed waste K121.
- Du Pont's commented that proposed waste K119 is not a waste because it is recycled back into the process. Earlier information submitted by Du Pont, however, stated that this waste is incinerated off-site. Du Pont clarified that residues from cleaning the decanter are incinerated, but the organic material in the decanter is recycled back into the process continuously.
- Du Pont explained how wastes from the bromacil formulation process, rather than the bromacil production process, enter the spill control trap that services the linuron plant,

In addition, EPA received a letter from Du Pont dated January 17, 1986, in which they stated that:

(1) Linuron and bromacil should not be added to the list of commercial chemical products which are hazardous wastes when discarded (40 CFR 261.33(f)), and

(2) The one-pound CERCLA RQ is illogical.

These comments were based on Du Pont's belief that this would be inconsistent with linuron and bromacil's FIFRA registration as pesticide products for use on food crops.

Copies of these new data and comments (as well as the minutes of the meeting that was held with Du Pont) are available for public inspection from the RCRA Docket, in Room S-212. Du Pont also submitted data that is confidential business information; these data are not available to the public. Comments are solicited only on the new data. These comments must be received by EPA on or before April 16, 1986 to ensure their consideration.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86-75; RM-5002]

FM Broadcast Station in Clayton, GA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to allot Channel 281A to Clayton, Georgia, as its first FM service in response to a petition filed by Richard J. Turner, Jr.

DATES: Comments must be filed on or before April 28, 1986, and reply comments on or before May 13, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and exectuve order provisions authorizing or interpreted or applied by specific sections are cited to text.

In the matter of Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations. (Clayton, Georgia); MM Docket No. 86-75; RM-5002.

Adopted: February 14, 1986.

Released: March 6, 1986.

By the Chief, Policy and Rules Division:

1. Before the Commission is a petition for rule making filed by Richard J. Turner, Jr. ("petitioner") which requests the allotment of Channel 281A to Clayton, Georgia, as its first FM channel. Petitioner stated his intention to apply for the channel.

2. Channel 281A can be allotted to Clayton in compliance with the minimum distance separation requirements.[1] In view of the fact that the proposed allotment could provide a first FM service to Clayton, the Commission proposes to amend the FM Table of Allotments, § 73.202(b) of the Rules, as follows:

City	Channel No.	
	Present	Proposed
Clayton, GA		281A

3. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

4. Interested parties may file comments on or before April 28, 1986, and reply comments on or before May 13, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Edward W. Hummers, Jr., Esq., Fletcher, Heald and Hildreth, 1225 Connecticut Avenue NW., Suite 400, Washington, DC 20036. (Attorney).

5. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules,* 46 FR 11549, published February 9, 1981.

6. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Divison, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice,* they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply commments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See §§1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during reguler business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

Notice of Proposed Rule Making

In the matter of Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations (Mattoon, Illinois); MM Docket No. 86–77 RM–4935.

Adopted: February 11, 1986.
Released: March 11, 1986.

By the Chief, Policy and Rules Division.

1. Before the Commission is a petition for rule making filed by Randal J. and Cathaleen R. Miller ("petitioners") which seeks the allotment of Channel 282A to Mattoon, Illinois, as its second FM service. Petitioners stated their intention to apply for the channel. However, the allotment of Channel 282A would be short-spaced to the recent allotment of Channel 282B1 for Casey, Illinois, Docket 84–231, *Memorandum Opinion and Order*, 50 FR 47391, published November 18, 1985. Our staff engineering study indicates that Channel 267A can be allotted instead. The proposal for Channel 267A at Mattoon meets the minimum spacing requirements of § 73.207 of the Rules.

PART 73—[AMENDED]

2. In view of the fact that the proposal could provide a second FM service to Mattoon, the Commission proposes to amend the FM Table of Allotments, § 73.202(b) of the Rules, with regard to the community listed below:

City	Channel No.	
	Present	Proposed
Mattoon, IL	245	245, 267A

3. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

4. Interested parties may file comments on or before May 2, 1986, and reply comments on or before May 17, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Randal J. Miller, Post Office Box 121, Mattoon, Illinois 61938, ("petitioner").

5. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

6. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634–6530. However, members of the Public should note that from the time a Notice of Proposed Rule Making is issued until the matter is not longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contract is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.
Charles Schott,
Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 171, 172, and 174

[Docket No. HM–180, Notice No. 86–1]

Placarding Tank Cars Which Contain Hazardous Material Residue

AGENCY: Research and Special Programs Administration, DOT.

ACTION: Notice of proposed rulemaking; disposition of petitions for reconsideration.

SUMMARY: The Research and Special Programs Administration (RSPA) recently published amendments to the Department of Transportation's Hazardous Materials Regulations (HMR) changing the placarding and shipping paper requirements for tank cars which contain the residues of hazardous materials. The amendments, which contained a quantitative definition for "residue" were promulgated in a final rule issued under Docket HM–180, which was published on September 26, 1985 (50 FR 39005). Eight petitions for reconsideration were filed in connection with these amendments. This notice, requests comments regarding the changes which the RSPA is proposing in response to these petitions, as well as a change that relates to another recent amendment (Docket HM–196; 50 FR 41092, October 8, 1985).

DATE: Comments must be received on or before April 22, 1986.

ADDRESS: Address comments to: Dockets Branch, Office of Hazardous Materials Transportation (DHM–53), U.S. Department of Transportation, Washington, DC 20590. Comments should be submitted, when possible, in five copies. The Dockets Branch is located in Room 8426 of the Nassif Building, 400 Seventh Street, SW, Washington, DC Office hours are 8:30 a.m. to 5:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Lee Jackson, Standards Division, Office of Hazardous Materials Transportation, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Telephone: (202) 426–2075.

SUPPLEMENTARY INFORMATION:

I. Background

On September 26, 1985, the RSPA published a final rule [Docket HM–180; 50 FR 39005], which concerned the placarding of empty tank cars. In the final rule, RSPA changed the placarding and shipping paper requirements for tank cars that contain residues of hazardous materials. Also contained in the final rule was a quantitative definition for the word "residue."

In response to the final rule, RSPA received eight petitions for reconsideration under 49 CFR 106.35. Each of the petitioners objected to the definition of residue which was contained in the final rule. Specifically, concern was expressed about that portion of the definition which states:

> "Residue of a hazardous material, as applied to the contents of a tank car (other than DOT Specification 106 or 110 tank cars), means a quantity of material not greater than 3 percent of the car's marked volumetric capacity."

One of the petitioners, Shell Oil Company, requested that RSPA reconsider the quantitative wording of the residue definition. Shell, as well as the other petitioners, contend that the public was given no opportunity to comment on the residue definition and that it is not operationally possible to comply with the definition. Commenters state that there is no accurate method of determining exactly how much material remains in a tank car after unloading.

Although the RSPA does not necessarily agree with certain of the factual statements made in the petition submitted by Shell, we believe their comments on the final rule concerning the residue definition represent a consensus of the concerns expressed by the other petitioners. For this reason, the substantive points of the Shell petition are quoted as follows:

> "There is no practical method of determining precisely how much material remains in a tank car after unloading, considering tank car design and the limitations of facilities at many unloading locations.
>
> Some gauging tapes are designed to gauge the liquid level at the top of the car rather than at the bottom.
>
> Devices used in pressure cars don't reach to the bottom of the car and therefore can't measure the remaining liquid which may be more or less than 3% depending on the pumping effort expended.
>
> Some receivers unload butane and other compressed gases by heating a small amount of the liquid and pumping the resulting vapor through the vapor line to force out the liquefied gas. The remaining vapors occupy 100% of the marked volumetric capacity of the car. Although for all practical purposes, the car contains only the residue of a hazardous material, it does not meet the definition in Section 171.8 and presumably would be considered a loaded car.
>
> Viscous liquids such as resins and regulated asphalts also present a problem since there is no accurate method of measuring the clingage on the tank walls.
>
> Weighing cars before they leave the unloading location is not a viable alternative since most facilities don't have track scales. Installing scales at all locations receiving hazardous material tank cars would be prohibitively expensive. Moving a car from the unloading point to a railroad scale to determine its status could result in a violation, if for example, a car displayed residue placards and the scale weight indicated it contained more than 3% of the volumetric capacity. The additional switching would also be costly in terms of time and money.
>
> The definition of what constitutes an empty car does not enhance safety but merely increases the potential for unintentional violations of the regulations. The 3% measure is basically an economic issue and is already covered in Rule 35 of the Uniform Freight Classification.
>
> There is no need for a specific percentage figure to be included in the residue definition since fire fighters would follow the same procedure regardless of the exact amount of the residue. Shell suggests the following definition be added to § 171.8 in lieu of the one in the final rule.
>
> "Residue means the hazardous material remaining in a packaging, including a tank car, after its contents have been emptied and before the packaging is refilled or cleaned and purged of vapor to remove any potential hazard."

II. Response to Comments

In response to the petitions, the RSPA proposes to redefine "residue" by limiting it to liquids (excluding vapor and gases) and expanding the quantitative limitation from 3% to 4% with a tolerance of plus or minus one percent in order to provide shippers greater flexibility in their determination of compliance with the rule. The RSPA is taking this action because of the problems that may be encountered in accurately determining the amount of residue which remains in an unloaded tank car. Aside from weighing the car, which may be impractical because most unloading facilities don't have track scales, there appears to be no accurate method of measuring the precise amount of residue which remains in a tank car. However, RSPA believes that a quantitative requirement must be adopted in order to make the rule effective.

The public is invited to submit any substantive comments or information which they may have concerning the "residue" definition proposed in this notice. Comments should, as a minimum, address the maximum amount of residue which, from a safety standpoint, could be left in a tank car which is placarded with the RESIDUE placard.

In addition to the petitions addressed to the definition of residue, the RSPA also received comments stating that it was inconsistent and confusing to require a COMBUSTIBLE placard to

VOL 51
ISS 51
MR 17
1986
UMI

remain on a tank car which only contains the residue of a combustible liquid. Currently, tank cars which contain residue of hazardous material may be placarded with the appropriate RESIDUE placards.

The only exception to this is for tank cars which contain combustible liquid residue. These cars must continue to display the COMBUSTIBLE placard. Upon further consideration of this point, the RSPA agrees that this is inconsistent and may cause confusion. For this reason, the RSPA believes that a RESIDUE Placcard should be required on tank cars which contain combustible liquid residues. Therefore, the RSPA proposes to remove the second sentence in footnote 4 to Table 2 of § 172.504 and paragraph (c) of § 172.510. Revision to both of these sections is necessary to require the display of a RESIDUE placard on a tank car which contains residue of a combustible liquid. Further, RSPA proposes to revise § 172.525 to require the lower triangle of the combustible RESIDUE placard to be white and to require and word "RESIDUE" to be black on this same placard. This change is necessary to identify those tank cars which contain combustible residue so they are not subjected to the train placement requirements. In addition, it is proposed to reinstate the first sentence of footnote 4 to Table 2 of § 172.504 as it appeared prior to Amendment No. 172-98(50 FR 39005).

For clarification, the RSPA proposes to revise paragraph (c) of § 172.334. This revision was inadvertantly omitted from Docket HM-196, the final rule that addressed the *Packaging and Placarding Requirements for Liquids Toxic by Inhalation.* This revision would prohibit the display of identification numbers on subsidiary placards such as the POISON placard required by § 172.505. The RSPA proposes to revise § 172.525 to authorize the display of identification numbers on the RESIDUE placard or orange panel in accordance with the marking requirements contained in Subpart D of Part 172. The RSPA also proposes to revise the Table in paragraph (a)(2) of § 174.25 to clarify the shipping paper requirements for tank cars which contain combustible liquids.

Editorially, the RSPA proposes to amend § 172.525(a)(2) to include a reference to § 172.544 so there is a citation in this section which refers to the RESIDUE placard for combustible liquids. Further, the RSPA proposes to amend paragraph (c) of § 174.25 to clarify exactly when the letters "RQ" must be entered on the shipping paper and to remove the combustible liquid exception from the description requirements.

Also, § 174.93 would be amended to except tank cars which contain combustible liquid residue from the train placement requirements. This is consistent with the provision for loaded tank cars which contain Combustible liquids. In the case of a tank car which contains the residue of a hazardous material, the letters "RQ" are required to be shown on the shipping paper when the quantity of the residue is equal to or exceeds the reportable quantity level and the residue or a constituent of the residue is a hazardous substance. Comments are requested on the changes proposed to §§172.334, § 172.504, § 172.510, § 172.525, § 174.25 and § 174.93.

The RSPA is also interested in receiving comments on the placarding requirements for tank cars which carry residues of materials which exhibit inhalation toxicity. After April 30, 1986 tank cars loaded with these materials are required to display POISON placards as well as the placards required in § 172.504. When the tank car is unloaded, each of these placards would have to be changed to RESIDUE placards. The RSPA is interested in receiving suggestions on optional placarding methods that could be employed when placarding tank cars which contain residue of materials which exhibit inhalation toxicity.

III. Review by Sections

1. It is proposed to revise § 171.8 by expanding the quantitative limits of the "residue" definition and to restrict the application of the definition to liquids.

2. It is proposed to revise paragraph (c) of § 172.334 to prohibit the display of an identification number marking on a subsidiary placard.

3. It is proposed to reinstate the first sentence of footnote 4 to Table 2 of § 172.504 as it appeared prior to Amendment No. 172-98 and to remove the second sentence which prohibits a RESIDUE (EMPTY) placard on a tank car containing Combustible liquid.

4. It is proposed to revise paagraph (c) of § 172.510 by removing the prohibition against using a RESIDUE placard for combustible liquid residues.

5. It is proposed to revise § 172.525 so a reference to the RESIDUE placard for combustible liquids is shown.

6. It is proposed to revise § 172.525 to require the lower triangle of the RESIDUE placard for combustible liquid residues to be white and to require the word "RESIDUE" to be black on the combustible liquid RESIDUE placard.

7. It is also proposed to revise § 172.525 to authorize identification numbers to be displayed on RESIDUE placards or on orange panels in association with RESIDUE placards.

8. It is proposed to revise § 174.25 for clarification.

9. It is proposed to revise § 174.93 to except tank cars which contain combustible liquid residue from train placement requirements.

IV. Administrative Notice

A. Executive Order 12291

The effect of this rule, as proposed, does not meet criteria specified in section 1(b) of Executive Order 12291 and is, therefore, not a major rule. This rule is not considered to be a significant rule under the regulatory procedures of the Department of Transportation (44 FR 11034). This proposed rule does not require a Regulatory Impact Analysis, or an environmental impact statement under the National Environmental Policy Act (42 U.S.C. 4321 et seq.) The economic impact of this document has been found to be so minimal that further evaluation is unnecessary.

B. Impact on Small Entities

Based on limited information concerning the size and nature of entities likely affected by this proposed rule, I certify this proposal will not, if promulgated, have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects

49 CFR Part 171

Hazardous materials transportation, Definitions.

49 CFR Part 172

Hazardous materials transportation, Placarding.

49 CFR Part 174

Hazardous materials transportation, Railroad safety.

Rules and Regulations

In consideration of the foregoing, it is proposed to amend Parts 171, 172 and 174 of Title 49 of the Code of Federal Regulations as follows:

PART 171—GENERAL INFORMATION, REGULATIONS AND DEFINITIONS

1. The authority citation for Part 171 continues to read as follows:

Authority: 49 U.S.C. 1803, 1804, 1808; 49 CFR Part 1, unless otherwise noted.

2. Section 171.8 would be amended by the addition in, its correct alphabetic sequence, the following definition.

§ 171.8 Definition and abbreviations.

* * * * *

"Residue" means the hazardous material remaining in a packaging after its contents have been emptied to the maximum extent practicable and before the packaging is refilled, or cleaned of hazardous material and purged of vapor to remove any hazard. Residue of a hazardous material, as applied to the contents of a tank car (other than DOT Specification 106, 107 and 110 tank car tanks), means a quantity of material not exceeding 4% (plus or minus one percent) of the cars marked volumetric capacity and applies only to the liquid phase of the material in the tank car.

* * * * *

PART 172—HAZARDOUS MATERIALS TABLES AND HAZARDOUS MATERIALS COMMUNICATIONS REGULATIONS

3. The authority citation for Part 172 continues to read as follows:

Authority: 49 U.S.C. 1803, 1804; 49 CFR Part 1, unless otherwise noted.

4. In § 172.334, paragraph (c) would be revised as follows:

§ 172.334 Indentification numbers; prohibited display.

* * * * *

(c) Except as required by § 172.332(c)(4) for a combustible liquid, the identification number of a material may be displaced only on the placards required for the material by § 172.504.

* * * * *

5. In § 172.504, Footnote 4 to Table 2 would be revised to read as follows:

§ 172.504 General placarding requirements.

* * * * *

Table 2

* * * * *

4. A FLAMMABLE placard may be used on a cargo tank or portable tank during trasnportation by highway, rail or water, and on a compartmented tank car containing materials classed as Flammable liquid and Combustible liquid.

* * * * *

6. In § 172.510, paragraph (c)(1) is removed and paragraphs (c)(2) and (c)(3) are redesigned as (c)(1) and (c)(2) and are revised to read as follows:

§ 172.510 Special placarding provisions: Rail.

* * * * *

(c) * * *

(1) Is reloaded with a material requiring no placards or different placards; or

(2) Is sufficiently cleaned of residue and purged of vapor to remove any potential hazard.

* * * * *

7. In § 172.525, paragraph (a) would be revised to read as follows:

§ 172.525 Standard requirements for the RESIDUE placard.

(a) Each RESIDUE placard must be as follows:

(1) Except as provided in paragraph (a)(3) of this section, the lower triangle of the RESIDUE placard must be black and the word "RESIDUE" must be in white letters approximately 1½ inches (40 mm) high made with approximately ¼ inch (6 mm) of an inch stroke.

(2) Except for the POISON GAS, RADIOACTIVE or EXPLOSIVES placard, the RESIDUE placard may be used to display the appropriate identification number in accordance with the provisions of Subpart D of this part.

(3) For a combustible liquid residue, the lower traingle of the RESIDUE placard must be white with the word "RESIDUE" in black letters.

(4) Otherwise, the RESIDUE placard must be as specified in § 172.519 and Appendix B to this Part, and §§ 172.528, 172.530, 172.532, 172.536, 171.540, 172.542, 172.544, 172.546, 172.548, 172.550, 172.552, 172.554, or 172.558, as appropriate for the residue of the hazardous material being transported and required by this subchapter to be placarded. No other placard may be used as a RESIDUE placard.

* * * * *

PART 174—CARRIAGE BY RAIL

8. The authority citation for Part 174 continues to read as follows:

Authority: 49 U.S.C. 1803, 1804, 1808; 49 CFR Part 1, unless otherwise noted.

9. In 174.25, the last entry in the table which follows paragraph (a)(2)(ii) is deleted and the following two entries are added to the end of the Table, and paragraph (c) of this section is revised, as follows:

§ 174.25 Additional information on waybills, switching orders and other billings.

(a) * * *

Hazardous material or class	Placard notation	Placard endorsement
* * *	* *	* *
Tank cars which contain a residue of a hazardous material other than a combustible liquid.	See sec. 174.25(c)	Dangerous.
Tank cars which contain a residue of a combustible liquid	See sec. 174.25(c)	None.

* * * * *

(c) For a tank car that contains only the residue of a hazardous material, the shipping papers must contain the words "RESIDUE: Last Contained * * *", followed by the basic description of the hazardous material last contained in the tank car and the placard notation specified in the second column of the table in paragraph (a)(2) of this section followed by the word RESIDUE. For example, "RESIDUE: Last Contained Petroleum Naptha, Combustible liquid, UN 1255, Placarded: COMBUSTIBLE—RESIDUE". For a tank car that contains a residue that is a hazardous substance, the letters "RQ" must also be entered on the shipping paper either before or after the basis description.

* * * * *

10. In 174.93, the text would be revised to read as follows:

§ 174.93 Position in train of a tank car displaying RESIDUE placards.

Except for a tank car placarded COMBUSTIBLE—RESIDUE, a tank car displaying RESIDUE placards in a moving or standing train may not be placed nearer than the second car from an engine or occupied caboose.

Issued in Washington, DC on March 11, 1986, under the authority delegated in 49 CFR Part 106, Appendix A.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Public Hearing and Reopening of Comment Period on Proposed Threatened Status and Critical Habitat for the Concho Water Snake (Nerodia Harteri Paucimaculata)

AGENCY: Fish and Wildlife Service, Interior.

VOL 51
ISS 51
MR 17
1986
UMI

ACTION: Proposed rule; notice of public hearing and reopening of comment period.

SUMMARY: The U.S. Fish and Wildlife Service gives notice that a public hearing will be held to discuss its proposal to list the Concho water snake (*Nerodia harteri paucimaculata*) as a threatened species and to designate critical habitat for it. The period for acceptance of comments on this proposal is reopened. Comments are solicited on this proposal from all interested parties.

DATES: A public hearing will be held on this proposal on April 3, 1986 (Thursday), from 7:00 to 9:00 p.m. c.s.t. in Ballinger, Texas. The comment period on this proposal is reopened on April 3, 1986. The comment period, which originally closed on March 24, 1986, will now close on May 2, 1986. Comments received after the closing date may not be considered in the final decision on this proposal.

ADDRESSES: The public hearing will be held at the Runnels County Courthouse, 2nd floor courtroom, in Ballinger, Texas. Written comments and materials concerning this proposal should be sent to the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, 500 Gold Avenue, SW., Room 4000, Albuquerque, New Mexico 87103. Comments and materials received will be available for public inspection during normal business hours, by appointment, at the above address.

FOR FURTHER INFORMATION CONTACT: Sally Stefferud, Endangered Species Biologist, U.S. Fish and Wildlife Service, 505/766–3972 (FTS 474–3972) (see "ADDRESSES").

SUPPLEMENTARY INFORMATION:

Background

The Concho water snake is found only in the Colorado and Concho Rivers in Runnels, Tom Green, Concho, McCulloch, Coleman, Brown, Mills, San Saba, and Lampasas Counties, Texas. It is presently found in 199 miles of those rivers with the majority of the snakes concentrated in only 105 miles of that range. Twenty-eight percent of its known historic range has been destroyed due primarily to dam and reservoir construction and water diversion. The limited range, low numbers, and narrow habitat requirements of this riffle-dwelling snake make it vulnerable to further habitat loss from proposed water development and other activities. A proposal to list the Concho water snake as a threatened species and to designate critical habitat for this species was published in the **Federal Register** on January 22, 1986 (51 FR 2923). Critical habitat is proposed for 131 miles of the Colorado and Concho Rivers in Runnels, Tom Green, Concho, McCulloch, and Coleman Counties, Texas.

Section 4(b)(5)(E) of the Endangered Species Act of 1973, as amended, requires that a public hearing be held, if requested, within 45 days of the publication of a proposed rule. The 45-day period for this proposal ended on March 10, 1986. Requests for a hearing were received from the Colorado River Municipal Water District, Big Spring, Texas on February 7, 1986, from Congressman Charles Stenholm, 17th District, Texas on February 24, 1986, and from M.C. Vinson, Midland, Texas, on February 28, 1986. In response to these requests, the Service has scheduled a public hearing for April 3, 1986, from 7:00 to 9:00 p.m. c.s.t., at the Runnels County Courthouse, 2nd floor courtroom, Ballinger, Texas. Those parties wishing to make statements for the record should have available a copy of their statements, to be presented to the moderator at the start of the hearing. Oral statements may be limited to 5 or 10 minutes, if the number of statements to be presented necessitates some limitation. There are no limits on the length of written comments which may be presented at this hearing or mailed to the Service during the comment period.

The comment period on this proposal originally closed on March 24, 1986. To accommodate this hearing, the Service is reopening the comment period on this proposal. Written comments will now be received from April 3 until May 2, 1986 (see "ADDRESSES").

ACTION

Proposed Student Service-Learning Project Guidelines

AGENCY: ACTION.

ACTION: Notice of proposed Student Service-Learning Project Guidelines.

SUMMARY: The following Notice sets out the guidelines under which student service-learning projects will operate in the future. The Guidelines are divided into seven parts which deal with the overall program philosophy, responsibilities of the sponsor, staff, volunteers, and volunteer placement sites. It also includes basic data on the administration of a student service-learning project.

DATE: Written comments should be submitted no later than April 16, 1986, to Suzanne Gibson Wise, Director of VISTA/Service-Learning Programs, ACTION, 806 Connecticut Avenue, NW., Washington, DC 20525.

FOR FURTHER INFORMATION CONTACT: Suzanne Gibson Wise, Director of VISTA/Service-Learning Programs, ACTION, 806 Connecticut Avenue, NW., Washington, DC, 800–424–8867, or 202–634–9445.

SUPPLEMENTARY INFORMATION: Section 420 of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 5060) was amended in 1979 to define the term regulation and to detail the procedures to be followed in prescribing regulations. Through its broad definition of a regulation, the section requires that "any rule, regulation, guidelines, interpretation, order, or requirement of general applicability" issued by the Director of ACTION must be published with a 30 day comment period except in certain limited circumstances. These Guidelines, although not regulations under this Administrative Procedure Act (5 U.S.C. 551 et seq.), may, in whole or in part, be required by our Act to be published in proposed form for comments.

ACTION has determined that student service-learning project guidelines are not major rules as defined in E.O. 12291. This determination is based on the proposed grants' size and purpose, neither of which will result in the economic impact of a major rule.

Student Service-Learning Project Guidelines

I. Introduction

This Notice sets forth the guidelines under which student service-learning projects will operate. Student service-learning project guidelines are contained in seven parts:

Part I—Introduction
Part II—Purpose
Part III—Grantee Eligibility and Selection Criteria
Part IV—Grant Application Procedures
Part V—Project Management
Part VI—Student Volunteer Assignments
Part VII—Restrictions

These guidelines supersede Young Volunteers in ACTION (YVA) Program Guidelines published in the **Federal Register**, dated August 12, 1982, and instructions and technical assistance provided to grants previously awarded under Title I, Part B of the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93–113). However, existing YVA grantees eligible for second year renewal will be permitted to apply for second year funding under YVA Program Guidelines published in the **Federal Register** dated August 12, 1982, and must abide by requirements and procedures as outlined therein.

II. Purpose

Student service learning projects are authorized under Title I, Part B, sec. 111 and sec. 114 of the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93–113). The statutory purpose of student service-learning projects is to encourage students to undertake volunteer service in their communities in such a way as to enhance the educational value of the service experience, through participation in activities which address poverty-related problems. Student volunteers must be enrolled in secondary, secondary vocational or post-secondary schools on an in-school or out-of-school basis. They serve on a part-time, non-stipended basis.

Service opportunities must result in student volunteers gaining experiences through service in poverty communities which relate to classroom, vocational, or other learning needs.

It is the intent of student service-learning projects to join community, school and youth in developing the scope and nature of volunteer experiences which serve the needs of poverty communities while securing resources by which the effort can be continued and expanded after federal support ends.

Local communities should determine what their problems are and how best to solve them. ACTION resources can be made available to assist in helping communities solve some of their problems through fostering student volunteer service. The community must generate increasing resources to enable the project to continue once ACTION grant funds are no longer provided. Technical assistance and training in project management, fund raising and recruiting will be provided by ACTION as required.

III. Grantee Eligibility and Selection Criteria

The following criteria will be employed by ACTION staff in the selection and approval of student service-learning projects:

a. The applicant must be a Federal, State, or local agency, or private non-profit organization or foundation in the United States, the District of Columbia, Virgin Islands, Puerto Rico, American Samoa, or Guam, which has the authority to accept and the capability to administer a student service-learning project grant.

b. Student volunteer activities must be poverty-related in scope and otherwise comply with the provisions of the legislative authority outlined in Part II.

c. Grant funds must be used to initiate or expand a student volunteer service-learning project which addresses the needs of the low-income community.

d. The grantee must develop and maintain community support for the student service-learning project through a planned program including public awareness and communications.

e. Community representation in the project's operation, including representatives of youth groups, school

VOL 51
ISS 51
MR 17
1986
UMI

systems, educational institutions, etc., must be identified in the grant application.

f. The grant application must demonstrate that project goals and objectives are quantifiable, measurable, and show benefits to the student volunteers and to the low-income community. The projected number of student volunteers who will serve in the project and hours of service are to be included in project goals and objectives.

g. The grant application must demonstrate how student volunteers will be recruited and how they will receive orientation appropriate to their assignments.

h. The grantee must identify resources which will permit continuation of the service-learning project upon the conclusion of federal funding as outlined in Part II.

i. The grantee must comply with all programmatic and fiscal aspects of the project and may not delegate or contract this responsibility to another entity. This does not refer to agreements made with volunteer placement sites as discussed in Part VI. This includes compliance with applicable financial and fiscal requirements established by ACTION or other elements of the Federal Government.

j. The grantee must ensure compliance with the restrictions outlined in Part VII.

IV. Grant Application Procedures

A. Scope of Grant

Student service-learning project grants are awarded for up to a twelve month period. Requests for second or third year reduced funding can be sought by grantees. Maximum federal awards over a period of three years are up to $15,000 for the first year, up to $10,000 for the second, and up to $5,000 for the third. The grantee is required to contribute a local share of at least $3,000 each year. Final determination of the actual amount of grant awards rests with the ACTION Regional Director.

ACTION seeks sponsoring organizations which can demonstrate the ability to raise sufficient local support in order to achieve 100% non-ACTION funding of their student service-learning projects after Federal funding ends.

Applicants for new or renewal grants must comply with the provisions of Executive Order 12372, the "Intergovernmental Review of Federal Programs and Activities" as set forth in 45 CFR Part 1233. ACTION State Offices will provide applicant organizations with technical assistance regarding this requirement.

B. Procedures for New Grantees

Project application forms are available from ACTION State or Regional Offices which will also establish schedules for application submission. Grant allowable costs are contained in ACTION Handbook 2650.2, *Grants Management Handbook for Grantees*, which is available from the ACTION State or Regional Offices.

Applications will be submitted to the appropriate ACTION State Office for programmatic and technical review. ACTION Regional Offices will review all new applications recommended for funding by the State Offices and send them, along with Regional recommendations, to the Director of VISTA/Service-Learning Programs. The Director of VISTA/Service-Learning will render final decisions on new student service-learning project grant applications.

Regional Grants and Contracts Officers will issue Notices of Grant Awards upon notification from the Director of VISTA/Service-Learning Programs.

C. Procedures for Renewal Grantees

Applications for renewal will be evaluated using the factors identified in selecting initial grantees, as well as the grantee's compliance with these guidelines and the grantee's performance during the previous year(s), particularly in the achievement of measurable goals and objectives. All project renewals are subject to the availability of funds.

Renewal applications from first and second year grantees are reviewed at the ACTION State Office level and submitted to the ACTION Regional Director for final approval.

If the renewal application is denied, the sponsor will be notified that ACTION intends to deny the application for renewal and the sponsor will be given an opportunity to show cause why the application should not be denied in accordance with 45 CFR Part 1206. This regulation is available from ACTION State or Regional Offices.

V. Project Management

Sponsors shall manage grants awarded to them in accordance with the provisions of these guidelines and ACTION Handbook 2650.2, *Grants Management Handbook for Grantees*, which will be furnished the sponsor at the time the initial grant is awarded.

Project support provided under an ACTION grant will be furnished at the lowest possible cost consistent with the effective operation of the project. Project costs for which ACTION funds are budgeted must be justified as being essential to project operations.

A. Local Support Contributions

The student service-learning project sponsor shall be responsible for providing at least $3,000 in non-federal share contribution for each year of the grant's operation. This amount can be obtained through cash and/or allowable in-kind contributions.

Local share can include, but is not limited to, cash or in-kind contributions such as office space, office equipment, supplies, accounting services, insurance, vehicles, telephones, printing, postage, recognition, travel and personnel which directly benefit the project.

B. Reporting Requirements

Sponsors must comply with fiscal reporting requirements as outlined in ACTION Handbook 2650.2 and must maintain records in accordance with generally accepted accounting principles. Records shall be kept available for inspection at the request of ACTION and shall be preserved for at least three years following the date of submission of the final Financial Status Report for each budget period.

A quarterly project progress report shall also be submitted to the ACTION State Office no later than 30 days after the end of each project quarter. The report shall include, but not be limited to, the following items:

1. A comparison of actual accomplishments with the goals and objectives established for the period.
2. The number of volunteers participating in the project during the quarter.
3. The number of volunteer hours generated during the quarter.
4. Problems, delays, or adverse conditions that have affected or will affect the attainment of project objectives.

C. Insurance

Grantees are responsible for ensuring that student volunteers, while performing their assignments, have adequate accident, personal liability, and automobile liability insurance coverage consistent with other insurance maintained by the organization, or with sound institutional and business practice.

D. Transportation

The sponsor should structure student volunteer assignments to minimize transportation expenses and requirements.

When transportation is not provided, volunteers may be reimbursed for actual costs within the limitations prescribed by the local project and the availability of funds. Transportation reimbursement should be provided on the basis of need, at the discretion of the project director.

E. Project Staff

Each grantee will designate a person to serve as the Project Director. A full-time Director is desirable yet fiscal realities or project needs may dictate otherwise. A rationale for less than a full-time Project Director must be included with the project application. Supervision of the Project Director is the responsibility of the sponsor.

Student service-learning project staff are employees of the grantee organization and are subject to its personnel policies and practices.

F. Community Relations

1. *Public Awareness.* A strong community relations program ensures public awareness of start-up and continuing project activities. It is essential for the successful recruiting of volunteers and for the recognition of volunteer service. The project sponsor and Project Director should inform community, city and county officials, and the media about development, growth, and success of the student service-learning project.

2. *Volunteer Recognition.* With the participation of the sponsor, the staff, and volunteer placement sites, recognition should be given to student volunteers for service to the community. Projects can also provide recognition to local individuals and agencies or organizations for significant activities in support of project goals.

3. *Community support.* A viable community support system needs to be initiated to ensure project success and project continuation without federal funds. Project support may be sought from school districts, governmental entities, religious and service groups, United Way, foundations, the business community, youth organizations, etc. One method of enlisting and maintaining community support for the project's operation is through the establishment of a project advisory council and/or working committee of the sponsor's board.

VI. Student Volunteer Assignments

Student volunteers are assigned to serve low-income communities in a variety of ways. Local sponsors are expected to develop volunteer service opportunities taking into consideration the focus of the project, the age, skills, and interests of student volunteers, as well as the value of the learning experience itself.

Clear understanding concerning the responsibilities of volunteer placement sites must be reached between representatives of the grantee's project staff and the volunteer site supervisor. Agreements may be formally arranged through the utilization of a Memorandum of Understanding, a Letter of Agreement or other means.

A formal agreement between the project staff and volunteer site will greatly assist the staff and volunteers in the management of volunteers. Issues and responsibilities concerning volunteer orientation/training, volunteer transportation, recognition and reporting of service hours, are functions outlined in this agreement.

VII. Restrictions

A. Special Restrictions on Student Service-Learning Project Grantees

1. *Political Activities.* a. Grant funds shall not be used to finance, directly or indirectly, any activity to influence the outcome of any election to public office or any voter registration activity.

b. No project shall use grant funds to provide services, employ or assign personnel or volunteers for, or take any action which would result in the identification or apparent identification of the project with:

(1) Any partisan or non-partisan political activity or any other political activity associated with a candidate, or contending faction or group, in an election for public or party office;

(2) Any activity to provide voters or prospective voters with transportation to the polls or similar assistance in connection with any election; or

(3) Any voter registration activity.

2. *Lobbying.* a. No grant funds or volunteers may be used by the sponsor in any activity for the purpose of influencing the passage or defeat of legislation or proposals by initiative petition, except as follows:

(1) In any case in which a legislative body, a committee of a legislative body, or a member of a legislative body requests a student volunteer, a sponsor chief executive, his or her designee, or project staff to draft, review, or testify regarding measures or to make representations to such legislative body, committee, or member; or

(2) In connection with an authorization or appropriation measure directly affecting operation of the program.

Regulations found in 45 CFR Part 1226, "Prohibitions on Electoral and Lobbying Activities," apply fully hereto, and provide further details on the limitations of political and lobbying activities that apply to volunteers and sponsors. Each grantee is obliged to know, and communicate to staff and volunteers, the prohibitions included therein.

3. *Special Restrictions on State or Local Government Employees.* If the sponsor receiving a grant from ACTION is a state or local government agency, certain restrictions contained in Chapter 15 of Title 5 of the United States Code are applicable to persons who are principally employed in activities associated with the project. The restrictions are not applicable to employees of educational or research institutions. An employee subject to these restrictions may not:

a. Use his or her official authority or influence for the purpose of interfering with or affecting the result of an election or nomination for office.

b. Directly or indirectly coerce, attempt to coerce, command, or advise a State or local officer or employee to pay, lend, or contribute anything of value to a party, committee, organization, agency or person for political purposes; or

c. Be a candidate for elective office, except in a non-partisan election. "Non-partisan election" means an election at which none of the candidates is to be nominated or elected as representing a political party any of whose candidates for Presidential election received votes in the last preceding election at which Presidential electors were selected.

If a project staff member, whose salary is traceable in whole or in part to an ACTION grant, is also a State or local government employee, the staff member is covered by provisions of the Hatch Act, restricting in many instances public participation in partisan political activities. Questions about the coverage of the Hatch Act may be addressed to the Office of General Counsel, ACTION, Washington, D.C. 20525.

4. *Non-discrimination.* No person with responsibility for the operation of a project shall discriminate with respect to any activity or program because of race, creed, belief, color, national origin, sex, age, handicap, or political affiliation.

5. *Religious Activity.* Volunteers and project staff funded by ACTION shall not give religious instruction, conduct worship services, or engage in any form of proselytization as part of their duties.

6. *Labor and Anti-Labor Activity.* No grant funds shall be directly or indirectly utilized to finance labor or anti-labor organization or related activity.

7. *Non-displacement of Employed Workers.* A student vounteer may not perform any service or duty which could supplant the hiring of workers who would otherwise be employed to

VOL 51 ISS 51 MR 17 1986 UMI

perform similar services or duties; or result in the displacement of employed workers or impair existing contracts for service.

8. *Non-compensation for Services.* No volunteer or other person, organization, or agency shall request or receive any compensation for services of student volunteers. No volunteer site or any member or cooperating organization shall be requested or required to contribute or to solicit contributions to establish any part of a local share. This does not prevent the acceptance of cash contribution made voluntarily and without condition to the SSLP grantee for legitimate charitable purposes.

9. *Volunteer Status.* Student volunteers are not employees of the sponsoring organization or the U.S. Government while volunteers.

10. *Nepotism.* Persons selected for project staff positions may not be related by blood or marriage to other project staff, sponsor staff or officers, or members of the sponsor Board of Directors unless there is concurrence by ACTION.

(42 U.S.C. 4974)

Signed in Washington, DC, this 10th day of March, 1986.

Donna M. Alvarado,

Director.

BILLING CODE 6050-28-M

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

1986 Upland Cotton Marketing Quota Program; Producer Referendum

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Notice regarding the conduct of a producer referendum with respect to the 1986 Upland Cotton Marketing Quota Program.

SUMMARY: The purpose of this notice is to announce that the producer referendum with respect to the 1986 upland cotton marketing quota, originally proposed to be conducted during the week of December 9–13, 1985, and later postponed until no later than thirty-one days after adjournment sine die of the first session of the Ninety-ninth Congress, will not be conducted. The Food Security Act of 1985, Pub. L. 99–198, which provides for a 1986 upland cotton program, was signed into law on December 23, 1985, making the referendum unnecessary.

EFFECTIVE DATE: March 17, 1986.

ADDRESS: Dr. Howard C. Williams, Director, Commodity Analysis Division, Agricultural Stabilization and Conservation Service (ASCS), USDA, Room 3741 South Building, P.O. Box 2415, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Janise A. Zygmont, Agricultural Economist, USDA–ASCS, Room 3758 South Building, P.O. Box 2415, Washington, DC 20013, or call (202) 475–4645. A preliminary Regulatory Impact Analysis has been prepared and is available on request from the above named individual.

SUPPLEMENTARY INFORMATION: This notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Departmental Regulation No. 1512–1 and has been designated as "non-major". It has been determined that this notice will not have any of the significant effects specified in those documents. The purpose of this notice is to announce that the producer referendum with respect to the national marketing quota for upland cotton for the marketing year beginning August 1, 1986, will not be held since the provisions of the Agricultural Adjustment Act of 1938 which required the referendum have been suspended for the 1986–1990 crops of upland cotton.

The titles and numbers of the Federal assistance programs to which this notice applies are: Title—Cotton Production Stabilization; Number—10.052, and Title—Commodity Loans and Purchases; Number—10.051, as found in the Catalogue of Federal Domestic Assistance.

The Administrator, Agricultural Stabilization and Conservation Service (ASCS), certifies that this notice will not have a significant economic impact on a substantial number of small entities. Consequently, no regulatory flexibility analysis is required under the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment.

Therefore, neither an environmental assessment nor an Environmental Impact Statement is needed.

This program activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

Section 342 of the Agricultural Adjustment Act of 1938 (the "1938 Act") provides that, whenever a national marketing quota is proclaimed for upland cotton, the Secretary of Agriculture shall, not later than December 15 of the calendar year in which such quota is proclaimed, conduct a referendum of farmers to determine whether they favor or oppose marketing quotas. A notice of proposed determination was published in the **Federal Register** (50 FR 41541) on October 11, 1985, in which it was proposed that a producer referendum for the marketing year beginning August 1, 1986, would be conducted during the week of December 9–13, 1985.

Section 342 of the 1938 Act was amended by Pub. L. 99–157, effective November 15, 1985, to provide that the referendum with respect to the national marketing quota for upland cotton for the marketing year beginning August 1, 1986, may be conducted not later than thirty-one days after adjournment sine die of the first session of the Ninety-ninth Congress. On December 6, 1985, the Secretary of Agriculture announced by press release that the marketing quota referendum for upland cotton for the 1986 Upland Cotton Marketing Quota Program would be postponed. However, section 502 of the Food Security Act of 1985, Pub. L. 99–198, provides that section 342 of the 1985 Act is not applicable to the 1986–1990 crops of upland cotton.

Notice

Accordingly, notice is hereby given that the producer referendum to determine whether farmers favor or oppose marketing quotas for upland cotton for the marketing year beginning August 1, 1986, will not be conducted.

Signed at Washington, DC, on March 11, 1986.

Milton J. Hertz,

Acting Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc. 86–5713 Filed 3–14–86; 8:45 am]

BILLING CODE 3410-05-M

DEPARTMENT OF COMMERCE

Bureau of the Census

1990 Census Pub. L. 94–171 Program

Under the requirements of Pub. L. 94–171 (13 U.S.C. 141), the Director of the Bureau of the Census is issuing below a statement of the Census Bureau's plans for providing population counts for state legislative reapportionment/redistricting needs. The Census Bureau has provided this statement to the Governor, Secretary of State, and legislative leaders of each state. Copies are

available on request from the Director, Bureau of the Census, Washington, DC 20233.

Under the provisions of Pub. L. 94–171, the Census Bureau must provide each state with 1990 census population counts for legislative reapportionment/redistricting. In addition to counts by standard geographic areas (counties, minor civil or census county divisions, incorporated places, census tracts, and census blocks nationwide), the Census Bureau will provide population counts by voting district in participating states by aggregating data for census blocks within those voting districts that meet the criteria issued by the Census Bureau for the 1990 Census Pub. L. 94–171 Program.

The 1990 Census Pub. L. 94–171 Program has three major phases:

Phase 1

The Census Bureau announced this phase, the Block Boundary Suggestion Project, in the April 25, 1985 **Federal Register** and provided the guidelines and criteria to the Governor, Secretary of State, and legislative leaders of each state. The Census Bureau also offered to meet with officials in each state to discuss this program and answer questions; 40 states participated in such meetings.

The Block Boundary Suggestion Project afforded states the opportunity to suggest certain visible features they wanted the Census Bureau to use as block boundaries in the 1990 census to the extent those features conformed to the criteria issued by the Census Bureau. For any visible feature the state suggests that is not on the Census Bureau's maps, the state staff must provide topographic maps, aerial photographs, or other suitable materials for verification purposes.

July 31, 1985 was the deadline for the state to inform the Census Bureau of its intent to participate in this Project. Forty-two states elected to participate. A list of contact persons in the participating states is available from the Director, Bureau of the Census, Washington, DC 20233.

Phase 2

Beginning in late 1988, the Census Bureau will provide requesting states with copies of preliminary 1990 census maps showing block boundaries. State staff will delineate voting district boundaries using these blocks and the January 1, 1988 boundaries of counties, minor civil divisions, and incorporated places shown on these maps. The Census Bureau will include these voting district boundaries—updated for January 1, 1990 boundaries of counties, minor civil divisions, and incorporated places—in its census geographic system so that it can provide the state with counts for voting districts, voting district equivalents, standard census tabulation areas, and census blocks statewide no later than April 1, 1991.

Those states that are not participating in Phase 1 of the 1990 Census Pub. L. 94–171 Program may participate in Phase 2 by submitting their voting district boundaries on copies of these 1990 census block-numbered maps so long as they follow the boundaries of the census blocks.

Phase 3

The Census Bureau will deliver a copy of the final 1990 census block numbered maps and the 1990 Pub. L. 94–171 data to the Governor and the officers or public bodies having initial responsibility for legislative apportionment or districting in each state by April 1, 1991. States that did not participate in the earlier phases of this program will receive population counts and maps for standard census areas; i.e., counties, incorporated places, minor civil divisions, census tracts, block numbering areas, and census blocks. The planned subject content of these data is total population, major race groups, and Spanish origin. The Census Bureau is considering the feasibility of including voting age population counts.

Participation by a state in the Pub. L. 94–171 Program is voluntary, and questions concerning this Program should be addressed to the Director, Bureau of the Census, Washington, DC 20233.

Dated: March 11, 1986.

John G. Keane,

Director, Bureau of the Census.

BILLING CODE 3510-07-M

International Trade Administration

[A–588–504]

Erasable Programmable Read Only Memories (EPROMs) From Japan; Preliminary Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: We have preliminary determined that EPROMs from Japan are being, or are likely to be, sold in the United States at less than fair value, and have notified the U.S. International Trade Commission (ITC) of our determination. We have also directed the U.S. Customs Service to suspend the liquidation of all entries of EPROMs from Japan that are entered, or withdrawn from warehouse, for consumption , on or after the date of publication of this notice, and to require a cash deposit or bond for each entry in an amount equal to the estimated dumping margins as described in the "Suspension of Liquidation" section of this notice.

If this investigation proceeds normally, we will make our final determination by May 27, 1986.

EFFECTIVE DATE: March 17, 1986.

FOR FURTHER INFORMATION CONTACT: David Mueller, William Kane, or Raymond Busen, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377–2923, 377–1766, or 377–3464.

Preliminary Determination

We have preliminary determined that EPROMs from Japan are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733(b) of the Tariff Act of 1930, as amended (19 U.S.C. 1673(b)) (the Act). Except in the instances where we used the best information available, we made fair value comparisons on virtually all sales of the class or kind of merchandise to the United States by the respondents during the period of investigation, April 1 through September 30, 1985. The weighted-average margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

On September 30, 1985, we received a petition from Intel Corporation, Advanced Micro Devices, Inc., and National Semiconductor Corporation on behalf of the domestic manufactuers of EPROMs. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports of EPROMs from Japan are being, or are likely to be sold in the United States at less than fair value within the meaning of section 731 of the Act, and that these imports are materially injuring, or are threatening material injury to, a United States industry. The petition also alleged that sales of the subject merchandise were being made at less than the cost of production. After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping duty

BEST COPY AVAILABLE

VOL 51
ISS 51
MR 17
1986
UMI

investigation. We notified the ITC of our action and initiated such an investigation on October 21, 1985 (50 FR 43603). On November 14, 1985, the ITC detemined that there is reasonable indication that imports of EPROMs from Japan are materially injuring, or are threatening material injury to, a U.S. industry (50 FR 47852).

On December 2, 1985, we presented antidumping duty questionnaires to Hitachi Ltd. (Hitachi), Fujitsu Limited (Fujitsu), Toshiba Corporation (Toshiba), and NEC Corporation (NEC). Respondents were requested to answer the questionnaire in 30 days: However, at the requests of Hitachi, Fujitsu, Toshiba, and the Japanese Ministry of International Trade and industry, we granted an extension to January 17, 1986. On January 17, 1986, we received incomplete responses from Hitchi, Fujitsu, and Toshiba, and a letter from NEC stating that it would not respond to our questionnaire. In letters dated February 3, 1986, the Department requested supplemental information from each of the three respondents. Additional information was submitted by these respondents on February 18, 1986.

Products Under Investigation

The products covered by this investigation are erasable programmable read only memories (EPROMs), which are a type of memory integrated circuit that is manufactured using variations of Metal Oxide-Semiconductor (MOS) process technology, including both Complementary (CMOS) and N-Channel (NMOS). The products include processed wafers, dice and assembled EPROMs produced in Japan and imported into the United States from Japan.

Finished EPROMs are currently provided for in the Tariff Schedules of the United States Annotated (TSUSA) under item 687.7445. Unassembled EPROMs, inlcuding unmounted chips, wafers, and dice, are provided for under TSUSA item 687.7405.

In the notice of initiation in this case, we tentatively included in the scope of this investigation processed wafers and dice produced in Japan and assembled into finished EPROMs in another country prior to importation into the United States from the other country. Based on the responses received, there are currently no such third-country assembly/imports. We have preliminarily determined that the question as to whether we have authority to include these third country imports is dependent, in part, on certain factual considerations. Thus, we can not make such a determination in the abstract, absent information as to what might actually occur in the third country. Should we receive evidence at some future date that these third-country assembly/imports are occurring, we will determine whether to include them in the scope of the proceeding at that time.

Fair Value Comparisons

For the three responding firms, to determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with foreign market value as specified below. For NEC, we made our fair value comparison using the best information available for both United States price and foreign market value, as NEC did not respond to our questionnaire. The best information available was the United States price and foreign market value developed in the petition.

For purposes of this preliminary determination, we used the date of shipment as the date of sale in both the U.S. and home markets. We will continue to evaluate whether these are the appropriate dates at verificaiton and for the final determination.

United States Price

As provided in section 772(c) of the Act, we used exporter's sales price (ESP) to represent United States price, as the merchandise was sold to unrelated purchasers after the date of importation. A small number of Hitachi's sales were made to unrelated purchasers prior to importation, but no calculations were performed on these sales.

We calculated ESP based on the packed, duty paid, C.I.F. delivered price to unrelated purchasers in the United States. Where appropriate, we made deductions for brokerage charges in Japan and the U.S., foreign inland freight and insurance, air freight and insurance, U.S. duty, U.S. freight and insurance, commissions to unrelated parties, U.S. selling expenses incurred in Japan and the U.S., credit expenses, warranties, technical services, advertising, discounts, and rebates in the U.S. market. The cost of additional packing performed in the U.S. was deducted. For Fujitsu, the cost of further processing in the U.S. was also deducted.

Foreign Market Value

The petitioner alleged that sales in the home market by all the respondents were at prices below the cost of producing the merchandise.

In accordance with section 773(a) of the Act, we calculated foreign market value based on home market prices where there were sufficient home market sales at or above the cost of production to determine foreign market value. We used constructed value as the basis for calculating foreign market value where there were no sales of such or similar merchandise in the home market or where there were not sufficient sales above the cost of production, as defined in section 773(b) of the Act.

Where foreign market value was based on home market prices, we calculated a foreign market value for each product for each month of the period of investigation, due to sharp declines in monthly prices. Where foreign market value was based on constructed value we used a monthly constructed value for each product.

Cost of Production

The Department analyzed the unverified cost submissions of the respondents to determine the sufficiency of such data for the purposes of calculating the cost of production for the preliminary determination. Where the Department determined that a submission was substantially complete and sufficient, it used the submission for the preliminary determination. However, adjustments to the respondents' data were made when it appeared from the explanation provided in the response that certain costs necessary for the production of EPROMs were not included or were not appropriately quantified or valued.

Some adjustments were made to the cost of production of all the respondents. These were:

(1) Matching the sales to cost of production incurred two months prior to the sales.

(2) Including the expense of sales credit for the home market sales, and

(3) Including interest expense equal to the percentage of interest expense to the cost of sales, based on the consolidated operations of the company.

For Fujitsu, the product specific R&D was revised because the cost of production did not include historic R&D costs.

For Toshiba, the depreciation expense was revised because Toshiba based such expenses on a useful life of three years for its equipment; the product-specific R&D was revised because a clear explanation of the allocation method was not presented.

For Hitachi, general, administrative and selling expenses were revised because of the apparent omission of certain general costs.

Price to Price Comparisons

For each company examined, we found sufficient sales above the cost of production for certain products to allow use of home market prices in accordance with section 773(a)(1)(A) of the Act to determine foreign market value. Where we used home market prices as the basis for foreign market value, we calculated the home market price on the basis of the delivered price to unrelated purchasers. We made deductions, where appropriate, for foreign freight and insurance, discounts, rebates, and commissions to unrelated parties in the home market. We also made deductions, where appropriate, for differences in circumstances of sale for credit terms, technical services, and warranty, in accordance with § 353.15 of our regulations. We deducted home market packing costs and added U.S. packing costs. Where appropriate, we offset commissions paid on U.S. sales with indirect selling expenses in the home market, in accordance with § 353.15(c) of our regulations. We also used indirect selling expenses to offset United States selling expenses, in accordance with § 353.15(c) of our regulations.

On March 6, 1986, Fujitsu submitted a revised listing of home market sales reflecting a recalculation of credit expenses and discounts. We did not receive this new information in sufficient time to evaluate and incorporate it in our calculations. We will consider that information prior to our final determination.

Constructed Value

In accordance with section 773(e) of the Act, we calculated foreign market value based on constructed value when there were insufficient home market sales of such or similar merchandise above the cost of production for comparison. For constructed value, the Department used the materials, fabrication, and general expenses, based on the respondents submissions revised as detailed under the "Foreign Market Value—Cost of Production" section of this notice. The actual general expenses were used, since in all cases, such expenses exceeded the statutory minimum of 10 percent of materials and fabrication. "Since all of the respondents' submissions indicated that the actual profit for merchandise of the same general class or kind was less than 8 percent, the Department used the 8 percent statutory minimum for profit. We made adjustments under § 353.15 of the regulations for differences in circumstances of sale between the two markets.

Currency Conversion. For ESP comparisons, we used the official exchange rate for the date of purchase since the use of that exchange rate is consistent with section 615 of the Tariff and Trade Act of 1984 (1984 Act). We followed section 615 of the 1984 Act rather than § 353.56(a)(2) of our regulations because the later supersedes that section of the regulations.

Verification

We will verify all the information used in making our final determination in accordance with section 776(a) of the Act. We will use standard verification procedures, including examination of relevant sales and financial records of the company.

Suspension of Liquidation

In accordance with section 7733(d) of the Act, we are directing the United States Customs Service to suspend liquidation of all entries of EPROMs from Japan that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register**. The United States Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted-average amount by which the foreign market value of the merchandise subject to this investigation exceeded the United States price as shown in the table below. This suspension of liquidation will remain in effect until further notice.

Manufacturer/Producer/Exporter	Margin percentage
Hitachi Ltd.	29.9
Fujitsu Limited	145.9
Toshiba Corporation	21.7
NEC Corporation	188.0
All others	63.1

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information either publicly or under an administrative protective order without the consent of the Deputy Assistant Secretary for Import Administraton. The ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry, before the later of 120 days after we make our preliminary affirmative determination, or 45 days after we make our final determination.

Public Comment

In accordance with § 353.47 of our regulations (19 CFR 353.47), if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 1:00 p.m., on April 25, 1986, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary, Import Administration, Room B-099, at the above address within 10 days of this notice's publication. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by April 18, 1986. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, within 30 days of publication of this notice, at the above address in at least 10 copies.

This determination is published pursuant to section 733(f) of the Act (19 U.S.C. 1673b(f)).

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

March 10, 1986.

Certain Welded Carbon Steel Standard Pipe and Tube From India; Final Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: We have determined that certain welded carbon steel standard pipe and tube (standard pipe and tube) from India are being, or are likely to be, sold in the United States at less than fair value and that critical circumstances do not exist. We have notified the U.S. International Trade Commission (ITC) of our determination, and we have directed the U.S. Customs Service to suspend liquidation of all entries of the subject merchandise, except that

VOL 51
ISS 51
MR 17
1986
UMI

produced and exported by Zenith Steel Pipes and Industries Ltd. (Zenith) and Gujarat Steel Tubes Ltd. (Gujarat), as described in the "Suspension of Liquidation" section of this notice.

EFFECTIVE DATE: March 17, 1986.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Terri A. Feldman, or Jess M. Bratton, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–1769, (202) 377–0160, or (202) 377–1778.

SUPPLEMENTARY INFORMATION:

Final Determination

Based upon our investigation, we have determined that standard pipe and tube from India are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735(a) (19 U.S.C. 1673d(a)) of the Tariff Act of 1930, as amended (the Act).

Two of the three companies investigated, Zenith and Gujarat, have been excluded from this final affirmative determination since we have found no sales at less than fair value. The weighted-average margin of all TISCO sales is 7.08%. The margins ranged from 0.81% to 57.98%. The weighted-average margin for each company is shown in the "Suspension of Liquidation" section of this notice.

Case History

On July 16, 1985, we received a petition in proper form filed by the Standard Pipe and Tube Subcommittee of the Committee on Pipe and Tube Imports (CPTI), and by each of the member companies who produce standard pipe and tube. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports of the subject merchandise from India are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act and that these imports are materially injuring, or threatening material injury to, a United States industry.

After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping duty investigation. We notified the ITC of our action and initiated such an investigation on August 9, 1985 (50 FR 32244). On August 30, 1985, the ITC determined that there is a reasonable indication that imports of standard pipe and tube are materially injuring, or threatening material injury to, a U.S. industry (50 FR 37066).

On September 24, 1985, we received an amendment to the petition alleging that critical circumstances exist with respect to imports of standard pipe and tube from India.

On September 6, 1985, a questionnaire was presented to counsel for respondents. On October 21 and 22, 1985, Tata Iron & Steel Co., Ltd. (TISCO) and Zenith responded to our questionnaire. On November 13, 1985, Gujarat presented a voluntary response to our questionnaire. Because the above-named companies accounted for more than 60 percent of exports of the merchandise to the United States during the period of investigation, we limited our investigation to them. We investigated virtually all sales of standard pipe and tube by these companies for the period February 1, 1985, through July 31, 1985.

On December 31, 1985, we made an affirmative preliminary determination (50 FR 53356). We verified the questionnaire responses in January. A hearing was held in February.

Scope of Investigation

The products covered by this investigation are welded carbon steel pipe and tube with an outside diameter of 0.375 inch or more but not over 16 inches, of any wall thickness, currently classifiable in the *Tariff Schedules of the United States, Annotated* (TSUSA), under items 610.3231, 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3256, 610.3258 and 610.4925. These products are commonly referred to in the industry as standard pipe or tube produced to various ASTM specifications, most notably A–120, A–53 or A–135.

Fair Value Comparisons

To determine whether sales in the United States of the subject merchandise were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

As provided in section 772 of the Act, we used the purchase price of the subject merchandise as the United States price because the merchandise was sold to unrelated purchasers prior to its importation into the United States. We calculated the purchase price based on the packed F.O.B. or C&F prices to unrelated customers in the United States. Where appropriate, we made deductions for foreign inland freight, ocean freight, government quality control and inspection charges, and clearing/forwarding charges. Where appropriate, we also made additions for indirect tax rebates through the cash compensatory support (CCS) scheme, central excise duty (tax), import duty, duty drawback, separate sales tax payments made on hot-rolled coil, duty exemptions on imported hot-rolled coil and zinc, and the Steel Development Fund (SDF) Levy.

Foreign Market Value

In accordance with section 773(a) of the Act, we calculated foreign market value based on home market prices. We used packed C&F and F.O.B. delivered prices to unrelated home market purchasers to determine the foreign market value. We made deductions, where appropriate, for freight charges and discounts. We made comparisons of such or similar merchandise based upon product subgroups selected by Department of Commerce industry experts and, where appropriate, made adjustments for differences in physical characteristics based upon data provided by the companies and Department of Commerce industry experts. We also made adjustments for differences in packing costs. In accordance with § 353.15 of the Commerce Regulations, we made circumstance of sale adjustments for differences in advertising, the International Price Reimbursement Scheme (IPRS), commissions and credit terms in the two markets for all respondents.

We disallowed circumstances of sale adjustments claimed by TISCO for differences in technical services, legal expenses and bad debt. We disallowed these adjustments because they were not directly related to sales under consideration as required by § 353.15(a) of the Commerce Regulations.

We made currency conversions in accordance with § 353.56(a)(1) of the Commerce Regulations, using certified exchange rates as furnished by the Federal Reserve Bank of New York.

Final Negative Determination of Critical Circumstances

The petitioners alleged that imports of standard pipe and tube from India present "critical circumstances." Under section 735(a)(3) of the Act, critical circumstances exist if we determine that (1) there is a history of dumping in the United States or elsewhere of the class or kind of the merchandise which is the subject of the investigation or the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value, and (2) there have been massive imports of the class or kind of merchandise that is the subject of the investigation over a relatively short period.

In determining whether there is a history of dumping of standard pipe and tube from India in the United States or elsewhere, we reviewed past antidumping findings of the Department of the Treasury as well as past Department of Commerce antidumping duty orders. We also reviewed the antidumping actions of other countries. We did not find that there was a history of dumping of standard pipe and tube in the United States or elsewhere. Therefore, we considered whether importers of this product knew or should have known that it was being sold at less than fair value. We found the dumping margins too small to lead us to believe importers knew these firms were dumping.

Since we did not find a history of dumping in the United States or elsewhere, nor that importers of this product knew or should have known that it was being sold at less than fair value, we did not need to consider whether there have been massive imports over a relatively short period. Therefore, for the reasons described above, we determine that critical circumstances do not exist.

Verification

As provided in section 776(a) of the Act, we verified all information provided by respondents by using standard verification procedures, including on-site inspection of the manufacturers' operation and examination of accounting records and randomly selected documents.

Comments

Petitioners' Comments

Comment 1: Petitioners argue that the Department should not make a circumstances of sale adjustment to TISCO's home market sales price for the International Price Reimbursement Scheme (IPRS) because (1) the program might be countervailable; or (2) the program is not comparable to any situation in which circumstance of sale adjustments ordinarily are allowed; or (3) the program is merely an institutionalized cover for dumping because TISCO both pays into and receives rebates from the program.

DOC Response: We disagree. First, the countervailability of the IPRS should be addressed in the context of a countervailing duty investigation. Here, we are determining whether the IPRS meets the requirements for a difference in circumstances of sale adjustment, as provided for in the law and § 353.15 of the Commerce Regulations. Secondly, in this case, the IPRS rebate is directly related to, and in fact contingent upon, the export sale of the merchandise under investigation. Receipt of the IPRS effectively enhanced the net return to TISCO on those sales. Therefore, we believe this adjustment is comparable to other circumstances of sale adjustments.

Third, although TISCO pays required levies into and receives payments from the Engineering Goods Exports Assistance Fund (EGEAF), it does so according to the rates established by the Indian government. Monies for this generalized fund come from assessments included in the government-set price of steel. The formula for rebates is tied to the difference between domestically-produced and internationally-acquired steel prices. As such, the fact that this rebate acts as a revenue enhancement for TISCO does not constitute dumping.

Comment 2: Petitioners argue that no one in India pays the import duty on imports of hot-rolled coil (an input into pipes and tubes), even if the coil were to be imported for domestic consumption. Thus, the import duty is not "imposed" within the meaning of section 772(d)(1)(B) and Zenith and Gujarat are not entitled to an addition to United States price for duty drawback or exemption.

DOC Response: We verified that the Indian tariff schedule contains an entry establishing an import duty for hot-rolled coil. We found no evidence at verification that these duties would be rebated or not collected if hot-rolled coil were imported to be sold domestically. Based on verified information in the record, it is clear that the import duties set by the government of India were not collected on imports of coil because Zenith and Gujarat held import licenses showing they would export the pipes and tubes produced with the imported coil. Therefore, we allowed this adjustment to United States Price, under section 772(d)(1)(B) of the Tariff Act.

Comment 3: Petitioners contend that the amount of uncollected duties and taxes for Zenith should not include the four percent Central Sales Tax on hot-rolled coil because these payments have not been collected by reason of importation rather than exportation.

DOC Response: We disagree. Section 772(b)(1)(C) allows an adjustment for taxes on merchandise sold in the home market which are not paid on the product when exported to the United States. We verified that Zenith paid the Central Sales Tax on the hot-rolled coil input in its domestically sold pipe and tube. Since it is included in the price of the domestic goods and it is not collected on the exported product, we have made an appropriate adjustment.

Comment 4: Petitioners argue that the Department should not allow an adjustment for the Steel Development Fund levy because this amount is not collected by reason of importation of the steel coil, rather than by reason of exportation of the pipes and tubes.

DOC Response: Our analysis of this comment is similar to that in Petitioners Comment 2. This levy was included in the price of domestically sold pipe and tube but was not included in the price of the pipe and tube exported to the United States. Therefore, we made an adjustment as provided for in section 772(b)(1)(C).

Comment 5: Petitioners argue that the Department should not make an addition to the United States price for the CCS indirect tax rebate because no indirect taxes are actually "added to or included in the price of such or similar merchandise when sold in the country of exportation".

DOC Response: We disagree. Under section 772(b)(1)(C) we add to the United States price indirect taxes that would be included in the home market prices. For hot-rolled coil and zinc used to produce pipe and tube for the home market we verified that the companies paid a Central Sales Tax. Therefore, since this tax was not collected on the material inputs used to produce pipe and tube exported to the United States, we made an addition to the United States price, as required by the statute.

Comment 6: Petitioners argue that Department, consistent with its practice in the recent antidumping duty investigation on Circular Welded Carbon Steel Standard Pipes and Tubes from Thailand (51 FR 3384), should use domestic sales throughout the entire six month period of investigation to compare to the sales to the United States.

DOC Response: We agree, for reasons stated in DOC response to respondents' comment 9.

Comment 7: Petitioners argue that the Department should request that the Steel Authority of India, Limited (SAIL), the only known importer of hot-rolled coil for domestic use, submit documentation of imports of hot-rolled coil demonstrating that duties were actually paid on such imports when the finished product was sold domestically. The petitioners have submitted independent statements in their comments that SAIL never pays import duties on imported steel, whether imported for use in producing domestic or exported merchandise. Absent such

VOL 51
ISS 51
MR 17
1986
UMI

documentation, an adjustment for duty exemption should not be allowed.

DOC Response: We disagree. The information submitted by petitioners after verification is contradicted by information submitted by respondents. Absent further verification which is not possible because of the statutory deadline for the final determination, we are relying on verified information in the record for our final determination. Based on the verified information, as indicated above in our response to comment 1, we are allowing this adjustment.

Comment 8: Petitioners argue that the Department should not use a 12% export financing rate when calculating imputed credit on sales to the United States because the program under which exports are financed at this rate was found to constitute a countervailable subsidy in the countervailing duty investigation.

DOC Response: We disagree. We verified that Zenith and Gujarat received short-term financing for U.S. exports of pipe and tube at the 12% interest rate and so used this actual interest rate for Zenith and Gujarat. We verified that TISCO did not use the 12% interest rate to finance its exports. Therefore, we used the commercial rate for this firm.

Comment 9: Petitioners argue that adjustments for certain advertising expenses claimed by TISCO should not be allowed because there is not direct relationship between the advertisements and the pipe and tube sales.

DOC Response: We disagree. We verified that the advertisements for which adjustments were claimed were of TISCO pipe and tube aimed directly at the end users, and not simply promotion of the company name. Accordingly, we made an appropriate circumstances of sale adjustment for these expenses.

Comment 10: Petitioners contend that the Department should not allow a circumstances of sale adjustment for technical services claimed by TISCO. These charges encompass for more than what is usually included in technical services, and a direct relationship between these expenditures and specific home market sales of pipe and tube has not been established.

DOC Response: We agree. We verified that the technical service expenses claimed by TISCO included general service charges, such as salaries, branch office overhead expenses, research and development, and sales taxes that do not qualify for a circumstances of sale adjustment. Therefore, we did not make an adjustment for technical services.

Comment 11: Petitioners argue that the Department should find that critical circumstances exist with respect to these imports. U.S. importers should know that merchandise is being sold at less than fair value if it is imported at prices that are similar to prices of imports from other countries which recently have been found to be dumping. Critical circumstances also should be found to exist because recent imports have been massive in comparison to previous import levels from India.

DOC Response: We disagree. The fact that we have found companies from one country to be dumping does not necessarily indicate that companies from another country also are dumping. Home market prices and the costs of production may differ substantially from country to country. Therefore, we are maintaining our case by case analysis for determining whether critical circumstances are present. In this case, the relatively small margins do not indicate that the importers knew or should have known, that the exports from India were sold at less than fair value. This, plus the fact that there is no history of dumping of these products, led us to determine that critical circumstances are not present in this case.

Comment 12: Petitioners argue that setting two different "all others" rates, one for companies using IPRS and another for those that do not, is administratively unfeasible.

DOC Response: Having allowed the IPRS adjustment, the issue is no longer relevant.

Respondents' Comments

Comment 1: Respondents argue that an adjustment should be made for the credit cost on the two percent of payments yet to be received by TISCO on home market sales. Respondents state that the Department should take the number of days from the date of shipment to the date of verification and should apply this cost as an adjustment to home market sales.

DOC Response: We agree. The two percent of the sales price still outstanding is directly related to the sale of the merchandise in the home market. Therefore, we have allowed this adjustment as a circumstances of sale and have imputed credit costs on home market sales on this basis.

Comment 2: Respondents argue that the Department should not find that critical circumstances exist with respect to exports from TISCO. Importers could not have known that the merchandise was being dumped because the magnitude of TISCO's margins was due solely to the Department's treatment of the IPRS.

DOC Response: We have allowed the IPRS adjustment and therefore this argument is moot. In this final determination TISCO's margins are not high enough to assume that importers knew or should have known, that TISCO was selling pipe and tube at less than fair value. See our response to petitioners' Comment 12.

Comment 3: Respondents argue that the Department should change its current practice of considering negative margins as zero, and instead calculate weighted-average margins by using both positive and negative margins from each sales transaction.

DOC Response: We disagree. Our methodology in calculating a weighted-average margin for each individual company ensures that sales made at less than fair value on a portion of a company's product line to the United States market are not negated by more profitable sales.

Comment 4: Respondents claim that an adjustment for exemption from the Steel Development Fund levy on export sales by Zenith and Gujarat should be made. Zenith and Gujarat pay the tax on domestic steel, but not on steel that they are permitted to import to produce the pipes which they export. Therefore, under section 772(d)(1)(C), an addition to U.S. price is required.

DOC Response: We agree. Although Zenith and Gujarat do not pay the SDF levy directly, the tax is included in price which they pay the domestic producer of the coil. Therefore the adjustment is appropriate and has been made.

Comment 5: Respondents argue that the credit costs in both the U.S. and home markets for Zenith and Gujarat were incorrectly calculated. The imputed credit factor was multiplied by the "net purchase price" rather than the gross price which is the amount on which interest is actually paid.

DOC Response: We agree. For this final determination we have recalculated the interest cost accordingly.

Comment 6: Gujarat and Zenith demonstrated at verification that the interest rate charged in India for financing their sales to the U.S. was 12%. Therefore, the credit expenses on the U.S. sales should be corrected accordingly.

DOC Response: We agree. See also our responses to petitioners' Comments 8 and 9.

Comment 7: Respondents argue that in adjusting for the difference in merchandise, the Department understated the discount which both Zenith and Gujarat offer on plain ended pipe by calculating it on the basis of new home market rather than gross unit price.

DOC Response: We agree. We verified that the discount was applied to invoice (gross) price. Therefore, in this final determination we made the adjustment to gross price.

Comment 8: Respondents contend that the Department incorrectly adjusted for the differences in galvanization in the United States and home markets for Gujarat's fence tubes. The price difference should have been converted from dollars to rupees and subtracted from foreign market value, rather than added to foreign market value.

DOC Response: We agree and have changed our calculation for this final determination accordingly.

Comment 9: Respondents argue that Zenith's one U.S. sale should be compared to home market sales of that same month. The one U.S. sale was made in February prior to the announcement of an increase in the domestic prices of the major input, steel. Home market prices fixed after the end of February reflect the increase in raw material costs and are not representative of home market prices at the time the U.S. sale was made. Further, citing the Department's practice of using monthly foreign market values when investigating prices which are rapidly changing, respondent argues that this sudden price increase makes post-February home market prices unrepresentative.

DOC Response: We disagree. We use month to month comparisons only under exceptional circumstances, such as when examining prices in a hyperinflationary economy or where prices are rapidly changing. One price increase during the six-month period, in our opinion, does not constitute rapidly changing prices, nor does the inflation rate in India approach a hyperinflationary rate. Therefore, we do not believe a deviation from our normal practice is warranted and we have compared the sale to the U.S. during the period of investigation to those of such or similar merchandise in the home market during the same period, as established in the law.

Comment 10: Respondents argue that an adjustment should be made for the yearly performance discount Zenith extended in late November to its customers for sales during the period of October through November.

DOC Response: We disagree. Since the claim for this discount was not made prior to verification the Department followed its usual procedure and did not verify this late claim.

Continuation of Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, we are directing the United States Customs Service to continue to suspend liquidation of all entries of standard pipe and tube from India that are entered, or withdrawn from warehouse, for consumption, on or after the date on which the Department published its preliminary determination in the **Federal Register** (50 FR 53356). The retroactive suspension of liquidation of entries of the subject merchandise from TISCO is hereby terminated.

The Customs Service shall require a cash deposit or bond equal to the weighted/average amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price as shown in the table below. Zenith and Gujarat have been excluded from this determination since they have made no sales at less than fair value. The suspension of liquidation will remain in effect until further notice. The margins are as follows:

Manufacturers/Sellers/Exporters	Weighted-average margin percentage
TISCO	7.08
Zenith	[1] 0
Gujarat	[1] 0
All Other Manufacturers/Producers/Exporters	7.08

[1] Excluded.

For all entries of pipe and tube from Zenith and Gujarat and entries from TISCO made prior to December 31, 1985, the Customs Service is directed to terminate the suspension of liquidation, release any bond, refund any cash deposit and liquidate all entries or withdrawals from warehouse for consumption.

ITC Determination

In accordance with section 735(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it wil not disclose such information, either publicly or under an administrative protective order, without the consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry within 45 days of the publication of this notice.

If the ITC determines that materal injury or threat of material injury does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that such injury does exist, we will issue an antidumping duty order directing Customs officers to assess an antidumping duty on standard pipe and tube from India entered, or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value exceeds the United States price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673(d)).

Paul Freedenberg,

Assistant Secretary for Trade Administration.

March 10, 1986.

[FR Doc. 86-5767 Filed 3-14-86; 8:45 am]

BILLING CODE 3510-DS-M

Minority Business Development Agency

Financial Assistance Application Announcements; Florida

AGENCY: Minority Business Development Agency; Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting competitive applications under its Minority Business Develpment Center (MBDC) Program to operate an MBDC for a 3-year period, subject to available funds. The cost of performance for the first 12 months is estimated at $764,706 for the project performance of July 1, 1986 to June 30, 1987. The MBDC will operate in the Miami, FL Metropolitan Statistical Area (MSA). The first year cost for the MBDC will consist of $650,000 in Federal funds and a minimum of $114,206 in non-Federal funds (which can be a combination of cash, in-kind contribution and fees for services). The Project Number is 04-10-86009-01 for the Miami, FL SMSA.

The funding instrument for the MBDC will be a cooperative agreement and competition is open to individuals, nonprofit and for-profit organizations, local and state governments, American Indian tribes and educational institutions.

The MBDC will provide management and technical assistance to eligible clients for the establishment and

operation of businesses. The MBDC program is designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: Coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be judged on the experience and capability of the firm and its staff in addressing the needs of minority business individuals and organizations; the resources available to the firm in providing management and technical assistance; the firm's proposed approach to performing the work requirements included in the application; and the firm's estimated cost for providing such assistance. It is advisable that applicants have an existing office in the geographic region for which they are applying.

The MBDC will operate for a 3-year period with periodic reviews culminating in annual evaluations to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA based on such factors as an MBDC's satisfactory performance, the availability of funds, and Agency priorities.

Closing date: The closing date for applications is April 11, 1986. Applications must be postmarked on or before April 11, 1986.

ADDRESS: Atlanta Regional Office, 1371 Peachtree Street, NE., Suite 505, Atlanta, Georgia 30309, (404) 347–4091.

FOR FURTHER INFORMATION CONTACT: Carlton L. Eccles, Regional Director, Atlanta Regional Office.

SUPPLEMENTARY INFORMATION: Questions concerning the preceding information, copies of application kits and applicable regulations can be obtained at the above address.

A pre-application conference to assist all interested applicants will be held at the U.S. Department of Commerce, Minority Business Development Agency, 1371 Peachtree Street, NE., Suite 505, Atlanta, Georgia, Friday, March 21, 1986, at 9 am.

BILLING CODE 3510-21-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Additional Official of the Government of the Republic of the Philippines Authorized to Issue Export Visas and Exempt Certifications

March 12, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 18, 1985. For further information contact Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Background

On November 28, 1979, a CITA directive was published in the **Federal Register** (44 FR 68005), which established an export visa requirement and certification for exemption of certain cotton, wool and man-made fiber textile products, produced or manufactured in the Philippines and exported to the United States. One of the requirements is that the visas and certifications must be signed by an official authorized by the Government of the Republic of the Philippines. The Government of the Republic of the Philippines has named an additional official, Lorna del Rosario, to issue these documents in addition to those previously designated (49 FR 34389). A list of the currently authorized officials is published as an enclosure to the letter to the Commissioner of Customs which follows this notice. This list supersedes all previously such lists.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

March 12, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of November 23, 1979, as amended, from the Chairman of the Committee for the Implementation of Textile Agreements, which directed you to prohibit entry for consumption, or withdrawal from warehouse for consumption of certain cotton, wool and man-made fiber textile products in designated categories for which the Government of the Republic of the Philippines had not issued an appropriate export visa or exempt certification.

Effective on March 18, 1986, the directive of November 21, 1979, as amended, is hereby further amended to include the enclosed list of officials authorized by the Government of the Republic of the Philippines to issue export visas and exempt certifications. These are the only officials currently so authorized.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Announcing Import Levels for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in India Effective on January 1, 1986; Correction

March 12, 1986.

On December 27, 1985 a notice was published in the **Federal Register** (50 FR 52985), which established the 1986 import control limits for certain cotton, wool and man-made fiber textile products, produced or manufactured in India. In the letter to the Commissioner of Customs which followed that notice, the categories included in the apparel group limit of 115,634,600 square yards equivalent should be corrected to read as follows:

330–359, 431–459, and 630–659 [1]

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Announcing Revisions in Issuing Authorities Authorized To Issue Export Licenses/Commercial Invoices for Certain Cotton, Wool and Man-Made Fiber Textiles and Textile Products, Produced or Manufactured in the People's Republic of China

March 12, 1986.

Under the terms of the cotton, wool and man-made fiber export licensing

VOL 51 ISS 51 MR 17 1986 UMI

system, effected by an exchange of letters dated February 16, 1984, between the Governments of the United States and the People's Republic of China, the Government of the People's Republic of China has notified the United States Government that six additional authorities have been named to issue textile export licenses/commercial invoices for textile and apparel products subject to the terms of the bilateral agreement. The purpose of this notice is to advise the public of this change.

Following this notice is a complete list of issuing authorities of the Government of the People's Republic of China which are currently authorized to issue export licenses/commercial invoices.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation for Textile Agreements.

BILLING CODE 3510-DR-M

DEPARTMENT OF EDUCATION

Office of Postsecondary Education

Agency Information Collection Activities Under OMB Review; Guaranteed Student Loan Program

AGENCY: Department of Education.

ACTION: Notice of Need to Obtain OMB Paperwork Reduction Act Approval.

In February, 1986, the Department of Education issued Bulletin 86-L-87 with ED Form 799 Addendum to all lenders participating in the Guaranteed Student Loan Program, and Bulletin 86-L-89 (LD) with ED Form 799A Addendum to all lenders who make or purchase Guaranteed Student Loans with tax-exempt funds, to inform the lenders of the effect of the Balanced Budget and Emergency Deficit Control Act of 1985, Pub. L. 99-177. The Secretary publishes this notice to clarify the status of the bulletins and their addenda.

The ED Form 799 Addendum and Form 799A Addendum were issued without the requisite approval by the Office of Management and Budget (OMB) as required by the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). The Paperwork Reduction Act requires the assignment of a valid OMB control number to information collections of the sort contained in the two forms. No penalty will be imposed on lenders for failure to report using the addenda until the forms have been approved by OMB and assigned control numbers. The forms have been submitted to OMB for approval, and a notice will be published in the Federal Register to inform the public once approval is granted.

A presidential sequestration order, effective March 1, 1986, has been issued as required by section 256(c) of Pub. L. 99-177. The effect of the order is described in the bulletins issued by the Department. The effective date of the presidential sequestration order is not affected by OMB approval of the forms submitted by the Department.

FOR FURTHER INFORMATION CONTACT: Carol Roberts, Acting Chief, Guaranteed Student Loan Branch, Room 4310, ROB-3, 400 Maryland Ave., SW., Washington, DC 20202. Telephone: (202) 245-2475; or Joseph F. Lackey, Jr., Office of Information and Regulatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, DC 20503. Telephone: (202) 395-7316.

Dated: March 13, 1986.

William J. Bennett,

Secretary of Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Idaho Operations Office; Solicitation of Cooperative Agreement Proposals; Geothermal Research Holes in the Cascades

AGENCY: Department of Energy.

ACTION: Solicitation of cooperative agreement proposals (SCAP) No. DE-SC07-86ID12632 for geothermal research holes in the Cascades region of Washington, Oregon and California.

SUMMARY: The Department of Energy, Idaho Operations Office, desires to receive and consider for support proposals to enter into a Cooperative Agreement to perform the drilling of 3,000 feet or deeper geothermal research holes and to collect data. DOE will cost share up to 50% of the cost of drilling the hole and associated data collection. DOE will require access to the hole for further data and technology development for a specified period of time after drilling. The objectives of the program are: (1) To support research to understand the nature of the deep hydrothermal resource of the Cascade volcanic region, and (2) to transfer data to the public in order to understand the Cascades resource and to stimulate further technology development. Funding is estimated at approximately $400,000 in Fiscal Year 1986, anticipating a cost-sharing of 1-2 Cooperative Agreements.

Minimum Requirements

To qualify for evaluation under the SCAP, the proposer must meet the following qualification criteria: the proposed site must be located within the Cascades volcanic region of the United States; the proposal must include a cost-share plan in which DOE's share shall not exceed 50 percent; the proposed hole must be a minimum of 3,000 feet deep; the proposer must agree to meet minimum data collection requirements, complete the hole, and allow DOE access to the hole for data acquisition.

DATES: It is anticipated that the SCAP will be issued April 18, 1986, and proposals will be due May 30, 1986.

CONTACTS: Potential proposers desiring to receive a copy of the SCAP should request it from: U.S. Department of Energy, Idaho Operations Office, 785 DOE Place, Idaho Falls, ID 83402, Attn: Trudy Thorne, Contracts Management Division, (208) 526-9519.

Issued at Idaho Falls, ID, on March 5, 1986.

J. F. Marmo,

Director, Contracts Management Division.

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Docket No. 86-15-NG]

Application To Import Natural Gas From Canada; Ocelot Energy Corp.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application for blanket authorization to import natural gas from Canada for short-term and spot sales.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on February 28, 1985, of an application filed by Ocelot Energy Corporation (Ocelot), a wholly-owned subsidiary of Ocelot Mining Corporation and an affiliate of Ocelot Industries Limited, for a blanket authorization to import from Canada up to 300 Bcf of natural gas over a two-year period beginning on the date of first delivery. The gas will be supplied by Ocelot Industries Limited, its Canadian affiliate, as well as by a variety of other producer groups and associations and pipeline companies located in Canada. Ocelot would then resell the gas to local distribution companies, pipelines and industries and commercial end-users or would act as an agent on behalf of Canadian producers and marketers and the U.S. purchasers. Ocelot proposes to file quarterly reports showing the specific terms of each import and sale, including the price and volumes.

The application was filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than April 16, 1986.

FOR FURTHER INFORMATION CONTACT:

Clifford P. Tomaszewski, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-9760
Diane Stubbs, Office of General Counsel, Natural Gas and Mineral Leasing, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-6667

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant has asserted that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076, RG-23, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585. They must be filed no later than 4:30 p.m., April 16, 1986.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trail-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should

VOL 51 ISS 51 MR 17 1986 UMI

identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Ocelot's application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076-A at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

Issued in Washington, DC, March 7, 1986.

Paula A. Daigneault,

Director, Natural Gas Division, Economic Regulatory Administration.

[FR Doc. 86-5709 Filed 3-14-86; 8:45 am]

BILLING CODE 6450-01-M

Proposed Remedial Order; Ted True, Inc., and Ted True

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Ted True, Inc. and Ted True; 1201 Elm Street, Suite 5377; Dallas, Texas 75270. This Proposed Remedial Order alleges pricing violations in the amount of $944,771.00 plus interest in connection with the sale of crude oil during the period June 1979 through November 1980.

A copy of the Proposed Remedial Order may be obtained from the Office of Freedom of Information Reading Room; U.S. Department of Energy; Forrestal Building, Room 1E-190; 1000 Independence Avenue, SW.; Washington, DC 20585. Within fifteen (15) days of publication of this Notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals; U.S. Department of Energy; Forrestal Building, Room 6F-078; 1000 Independence Avenue, SW.; Washington, DC 20585, in accordance with 10 CFR 205.193.

Issued in Dallas, Texas on the 18 day of February 1986.

Ben Lemos,

Director, Office of Field Operations, Dallas, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Final Consent Order With Edwin L. Cox & Berry R. Cox

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Final action on proposed consent order.

SUMMARY: The Economic Regulatory Administration (ERA) has determined that a proposed Consent Order between the Department of Energy (DOE) and Edwin L. Cox & Berry R. Cox (Cox) shall be made a final order of the DOE. The Consent Order resolves issues of compliance by Cox with the federal petroleum price and allocation regulations concerning production and first sales of domestic crude oil for the period June 1, 1979 through January 27, 1981. Cox will pay to the DOE the sum of $1,206,698 within 10 days of publication of this notice. The Consent Order is effective as a final order of the DOE on the date of publication of this notice.

FOR FURTHER INFORMATION CONTACT: Sandra K. Webb, Director, Houston Office, Economic Regulatory Administration, U.S. Department of Energy, One Allen Center, Suite 610, 500 Dallas Street, Houston, Texas 77002, (713) 229-3715.

SUPPLEMENTARY INFORMATION:

I. Introduction

ERA previously issued a notice announcing a proposed Consent Order between DOE and Cox which would resolve matters relating to the company's compliance with the federal petroleum price and allocation regulations pertinent to production and first sales of domestic crude oil for the period June 1, 1979 through January 27, 1981 (50 FR 51586, December 18, 1985). The proposed Consent Order requires Cox to pay $1,206,698 within 10 days of the effective date of the Consent Order. The notice solicited written comments from the public relating to the terms and conditions of the settlement.

II. Comments Received

ERA received two comments. Those comments addressed the question of the ultimate disposition of the funds to be paid by Cox pursuant to the settlement, but did not question the basis of the settlement or the adequacy of the settlement amount.

The comments were devoted exclusively to establishing the proposition that monies received under Cox Consent Order that could not be paid to parties injured by alleged overcharges should be paid to the States and should not be deposited in the U.S. Treasury.

During the period covered by this Consent Order the violations allegedly committed by Cox related to the miscertification of its crude oil. Such violations resulted in cost increases that were distributed among all refiners by the entitlements program and refiners could then pass the overcharges on to others. See *United States* v. *Exxon Corp.*, 773, F.2d 1240 (EM. App. 1985).

The DOE's Office of Hearings and Appeals in a report to the District Court of the District of Kansas in *In re: the Department of Energy Stripper Well Litigation, MDL No. 378*, determined that where alleged crude oil violations involve crude oil miscertifications, the resulting harm cannot be traced to specific customers. As explained by the DOE in an accompanying Statement of Restitutionary Policy:

> Essentially, OHA concluded that the direct purchasers (as such) generally did not absorb the overcharges because they were reimbursed by the entitlements programs. Tracing of overcharges is impossible in view of the spreading effect of the entitlements program, the fungibility of refiner costs and the consequent inability of firms and OHA to determine which costs were passed through and which, if any, were retained, and the high proportion of cost passthrough, among other factors.
>
> OHA's finding that it is impossible to trace crude oil cost increases that were equalized by the entitlements program. . . . is consistent with the conclusions of two district courts that have previously determined that the harm resulting from crude oil miscertifications cannot be traced. 50 Fed. Reg. 27400 (July 2, 1985).

DOE then examined the possible use of econometric modeling methods to estimate the extent to which overcharges were passed through at the various distribution levels within the industry. With regard to this indirect methodology, DOE concluded:

> It is too inexact in determining injury to particular classes of claimants and yields no conclusions concerning the injury to individuals within any class. The governmental costs in resources and, more importantly, societal costs in years of continued litigation prior to distribution are unacceptably high. *Id.* at 27402.

The comments on the Cox Consent Order appear to assume that DOE will distribute, or attempt to distribute, funds received under the Consent Order to parties injured by the alleged overcharges. However, as discussed above, it is impossible to determine which persons were ultimately injured by crude oil miscertifications. Therefore, DOE will not attempt to make such a determination here, and the funds received from Cox pursuant to the Consent Order will not be the subject of a Subpart V petition and proceeding.

DOE's Statement of Policy also addressed the question of how to effect indirect restitution where refunds to individual injured claimants are not feasible. The policy statement provides that the ERA will retain the monies received in an escrow account for a reasonable time to allow Congress an opportunity to determine an appropriate disposition of the funds. If Congress does not enact legislation within a reasonable time, the DOE will transfer the funds to the general fund of the U.S. Treasury.

Because the terms of the settlement are consistent with the foregoing action, ERA has determined to make the Consent Order final. The ERA, however, modified the Consent Order to reflect a higher interest rate that would apply should the company not meet the 10-day payment deadline.

III. Decision

Pursuant to 10 CFR 205.199J, the Consent Order between Cox and DOE shall become a final order of the DOE on the date of publication of this notice in the Federal Register.

Issued in Houston, Texas, on February 20, 1986.

Sandra K. Webb,

Director, Houston Office, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of submission of request for clearance to the Office of Management and Budget.

SUMMARY: The Department of Energy (DOE) has submitted the energy information collections, listed at the end of this notice, to the Office of Management and Budget (OMB) for approval under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The listing does not contain information collection requirements contained in regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by DOE.

Each entry contains the following information and is listed by the DOE sponsoring office: (1) The collection number(s); (2) Collection title; (3) Type of request, e.g., new, revision, or extension; (4) Frequency of collection; (5) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (6) Type of respondent; (7) An estimate of the number of respondents; (8) Annual respondent burden, i.e., an estimate of the total number of hours needed to respond to the collection; and (9) A brief abstract describing the proposed collection.

DATE: Last Notice published Monday, February 24, 1986 (51 FR 6458).

FOR FURTHER INFORMATION CONTACT:

John Cross, Director, Data Collection Services Division (DCSD), Energy Information Administration, M.S. 1H-023, Forrestal Building, 1000 Independence Ave., SW., Washington, DC 20585, (202) 252-2308

Vartkes Broussalian, Department of Energy Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395-7313.

SUPPLEMENTARY INFORMATION: Copies of proposed collections and supporting documents may be obtained from Mr. Gross. Comments and questions about the items on this list should be directed to Mr. Broussalian within 10 days of this notice.

If you anticipate commenting on a collection, but find that time to prepare these comments will prevent you from submitting comments promptly, you should advise the OMB reviewer of your intent as early as possible.

Issued in Washington, DC, March 5, 1986.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

DOE COLLECTIONS UNDER REVIEW BY OMB

Collection No. (1)	Collection title (2)	Type of request (3)	Response frequency (4)	Response obligation (5)	Respondent description (6)	Estimated No. of respondents (7)	Annual respondent burden hrs. (8)	Abstract (9)
CE-189P, C, S	Industrial energy conservation program report forms.	Extension	Annually	Mandatory	Businesses or other for-profit.	12,222	124,598	CE-189P, C, and S collect data on energy efficiency improvement and on recovered materials utilization. Data are aggregated, analyzed and organized into an annual report to Congress and the President. Respondents are corporations identified by DOE as having used at least one trillion Btu's of energy.
EIA-846(F)	Manufacturing energy consumption survey.	New	Triennially	Mandatory	Businesses or other for-profit.	4,000	32,000	EIA-846 (F) will collect data on the consumption of energy sources and the fuel-switching capability of establishments in the manufacturing sector. Respondents are manufacturing establishments in the SIC 20-39.

Federal Energy Regulatory Commission

[Docket Nos. ER84-568-006 et al.]

Electric Rate and Corporate Regulation Filings; Gulf States Utilities Co. et al.

March 11, 1986.

Take notice that the following filings have been made with the Commission:

Gulf States Utilities Company

[Docket No. ER84-568-006]

Take notice that on February 21, 1986 Gulf States Utilities Company, pursuant to Commission order issued January 22, 1986, tendered for filing an amendment to the Agreement for wholesale electric service between Gulf States and the City of Abbeville.

Comment date: March 21, 1986, in accordance with Standard Paragraph H at the end of this notice.

Arkansas Power & Light Company

[Docket Nos. ER83-86-000, ER84-193-000, and ER84-194-000]

Take notice that on March 4, 1986, Arkansas Power & Light Company (AP&L) tendered for filing a redeterminded Transmission Demand Rate, revenue comparisons and supporting workpapers in accordance with the agreements between AP&L and the City of Hope, Arkansas, Cajun Electric Power Cooperative, Inc. and Louisiana Energy and Power Authority in the above-referenced dockets.

AP&L asks that the updated rate supersede the currently effective rate and become effective on March 1, 1986, subject to refund, in accordance with the provisions of the agreements.

Comment date: March 21, 1986, in accordance with Standard Paragraph E at the end of this notice.

Arkansas Power & Light Company

[Docket Nos. ER82-705-000, and ER83-230-000]

Take notice that on March 4, 1986, Arkansas Power & Light Company (AP&L) tendered for filing a redeterminded formula rate, revenue comparisons and supporting workpapers for the Cities of West Memphis, Osceola, and Jonesboro and the Arkansas Electric Cooperative Corporation in accordance with the Power Coordination, Interchange and Transmission Service Agreements and Settlement Agreements (Agreements) filed in the above-referenced dockets.

AP&L requests that the updated rates supersede those that became effective on March 1, 1985, and that the updated rates become effective for service on and after March 1, 1986, subject to refund, in accordance with the provisions of the Agreements.

Comment date: March 21, 1986, in accordance with Standard Paragraph H at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commision, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

H. Any person desiring to be heard or to protest this filing should file comments with the Federal Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, on or before the comment date. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Project Nos. 9783-000 et al.]

Hydroelectric Applications (North American Hydro, Inc., et al.)

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1 a. Type of Application: Preliminary Permit.

b. Project No.: 9783-000.

c. Date Filed: December 30, 1985.

d. Applicant: North American Hydro, Inc., and Renaissance Hydro Associates.

e. Name of Project: Mauston Dam Project.

f. Location: On the Lemonweir River in the City of Mauston, Juneau County, Wisconsin.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Charles Alsberg, North American Hydro, Inc., Post Office Box 167, Neshkoro, WI 54960, (414) 293-4628.

i. Comment Date: May 12, 1986.

j. Description of Project: The proposed project would consist of: (1) The existing Mauston Dam approximately 190 feet long and 9 feet high; (2) an existing 828-acre reservoir having a storage capacity of 1,150 acre-feet; (3) an existing brick and concrete powerhouse approximately 40 feet by 80 feet containing two turbine/generator units having a total installed capacity of 480 kW operating at 8 feet of hydraulic head; and (4) appurtenant facilities. The existing facilities would be rehabilitated and placed back into service. The Applicant estimates that the average annual energy generation would be 800,000 kWh. The project dam is owned by the City of Mauston.

k. Purpose of Project: The Applicant intends to sell the power generated at the proposed facility to the Wisconsin Power and Light Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C & D2.

m. Proposed Scope of Studies Under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $15,000.

2 a. Type of Application: Preliminary Permit.

b. Project No.: 9782-000.

c. Date Filed: December 30, 1985.

d. Applicant: North American Hydro, Inc. and Renaissance Hydro Associates.

e. Name of Project: Eau Galle Dam Project.

f. Location: On the Eau Galle River in the town of Eau Galle, Dunn County, Wisconsin.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Charles Alsberg, North American Hydro, Inc., P.O. Box 167, Neshkoro, WI 54960, (414) 293-4628.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would consist of: (1) The existing concrete Eau Galle Dam approximately 150 feet long and 30 feet high; (2) an existing 351-acre reservoir having a storage capacity of 2,073 acre-feet; (3) an existing concrete, brick and stone powerhouse 30 feet by 40 feet containing two turbine/generator units having a total installed capacity of 560 kW operating at 28 feet of hydraulic head; and (4) appurtenant facilities. The existing facilities would be rehabilitated and placed back into service. An existing 12.7-kV transmission line is available at the site. The Applicant estimates that the average annual energy generation would be 1,000 MWh. The project dam is owned by Dunn County, Wisconsin.

k. Purpose of Project: The Applicant intends to sell the power generated at the proposed facilities to the Northern States Power Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $15,000.

3 a. Type of Application: Preliminary Permit.

b. Project No.: 9780-000.

c. Date Filed: December 30, 1985.

d. Applicant: North American Hydro, Inc. and Renaissance Hydro Associates.

e. Name of Project: Big Falls Dam Project.

f. Location: On the Little Wolf River in the Village of Big Falls, Waupaca County, Wisconsin.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Charles Alsberg, North American Hydro, Inc., P.O. Box 167, Neshkoro, WI 54960, (414) 293-4628.

i. Comment Date: May 12, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing concrete dam approximately 76 feet long and 16 feet high; (2) an existing 22-acre reservoir having a storage capacity of 80 acre-feet; (3) an existing penstock 175 feet long and 6.5 feet in diameter; (4) an existing concrete and brick poweshouse approximately 24 feet by 38 feet containing a single turbine/generator unit with a capacity of 350 kW operating at 32 feet of hydraulic head; and (5) appurtenant facilities. An existing 12.7-kV transmission line is available at the site. The existing facilities would be rehabilitated and put back into service. The Applicant estimates that the average annual energy generation would be 1,800 MWh. The project dam is owned by the Village of Big Falls.

k. Purpose of Project: The Applicant intends to sell the power generated at the proposed facilities to the Wisconsin Power and Light Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $15,000.

4 a. Type of Application: Preliminary Permit.

b. Project No: 9766-000.

c. Date Filed: December 30, 1985.

d. Applicant: Old Mill Power Company, Inc.

e. Name of Project: Old Mill.

f. Location: Bearcamp River in Carroll County, New Hampshire.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. William J. Spalke, Old Mill Power Company, Inc., P.O. Box 863, 31 Elm Street, Nashua, NH 03061, (603) 883-5571.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would consist of: (1) repair to the existing 20-foot-high, 231-foot-long dam owned by Saunders Bros. with a crest elevation of 538 feet msl; (2) an existing reservoir with a surface area of 4 acres and a gross storage capacity of 40 acre-feet; (3) a proposed powerhouse at the dam containing a generating unit with a rated capacity of 220 kW; and (4) a proposed 100-foot-long transmission line tying into the existing Public Service Company of New Hampshire system. The Applicant estimates a 1,500,000 kWh average annual energy production.

k. Proposed Scope of Studies Under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $10,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

5 a. Type of Application: Minor License.

b. Project No.: 9668-000.

c. Date Filed: December 16, 1985.

d. Applicant: Chocorua Forestlands Limted Partnership.

e. Name of Project: Weed Brook/Halfway Brook.

f. Location: Weed and Halfway Brooks, Carroll County, New Hampshire.

g. Filed Pursuant to: Federal Power Act, 16, U.S.C. 791(a)-825(r).

h. Contact Person: Mr. George K. Lagassa, Mainstream Associates, 86 Lafayette Road, P.O. Box 947, North Hampton, NH 03862, (603) 964-7113.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would be built at two sites. At the Weed Brook site, the project would consist of: (1) A proposed concrete intake structure 12 feet long, 6 feet wide, and 4 feet deep at an elevation of 1400 feet NGVD; (2) a proposed concrete diversion wall 8 feet long and 2 feet high; (3) a proposed 10-inch-diameter plastic penstock 5300 feet long; (4) a proposed concrete powerhouse 10 feet long and 10 feet wide housing a proposed turbine/generator of 57 kW capacity at a net hydraulic head of 440 feet; (5) a proposed 480 volt transmission line 200 feet long and a proposed 7.2 kV transmission line 50 feet long, and (6) appurtenant facilities.

k. At the Halfway Brook site, the project would consist of: (1) A proposed concrete intake structure 12 feet long, 6 feet wide, and 4 feet deep at an elevation of 1320 feet NGVD; (2) a proposed concrete diversion wall 18 feet long and 2 feet high; (3) a proposed 13-inch-diameter plastic penstock 2600 feet long; (4) a proposed concrete powerhouse 10 feet long and 10 feet wide housing a proposed turbine/generator of 25 kW capacity at a net hydraulic head of 230 feet; (5) a proposed 480 volt transmission line 100 feet long and a proposed 7.2 kW transmission line 75 feet long, and (6) appurtenant facilities. No significant

VOL 51
ISS 51
MR 17
1986
UMI

impoundment would be created at either site. The estimated annual power generation is 300,000 kWh.

l. Purpose of Project: Project power would be sold to Public Service Company of New Hampshire.

m. This notice also consists of the following standard paragraphs: A3, A9, B, C and D1.

6 a. Type of Application: Minor License.

b. Project No.: 9667-000.

c. Datae Filed: December 16, 1985.

d. Applicant: Chocorua Forestlands Limited Partnership.

e. Name of Project: Lovell River/White Brook.

f. Location: Lovell River and White Brook, Carroll County, New Hamsphire.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. George K. Lagassa, Mainstream Associates, 86 Lafayette Road, P.O. Box 947, North Hampton, NH 03862, (603) 964–7113.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would be built at two sites. At the Lovell River site, the project would consist of: (1) A proposed concrete intake structure 10 feet long, 6 feet wide and 4 feet deep at an elevation of 1360 NGVD; (2) a proposed concrete diversion wall 16 feet long and 3 feet high; (3) a proposed 16-inch-diameter plastic penstock 3700 feet long; (4) a proposed concrete powerhouse 10 feet long and 10 feet wide housing a proposed turbine/generator of 76 kW capacity at a net hydraulic head of 163 feet; (5) a proposed 7.2 kV transmission line 1.3 miles long; and (6) appurtenant facilities.

At the White Brook site, the project would consist of (1) a proposed concrete intake structure 10 feet long, 6 feet wide, and 4 feet deep at an elevation of 1265 NGVD; (2) a proposed concrete diversion wall 6 feet long and 3 feet high; (3) a proposed 12-inch-diameter plastic penstock 4500 feet long; (4) a proposed concrete powerhouse 10 feet long and 10 feet wide housing a proposed turbine-generator of 50 kW capacity at a net hydraulic head of 244 feet; (5) a proposed 480 volt transmission line 75 feet long; and (6) appurtenant facilities. No signficant impoundment would be created at either site. The estimated annual power generation is 430,000 kWh.

k. Purpose of Project: Project power would be sold to Public Service Company of New Hampshire.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C and D1.

7 a. Type of Application: Preliminary Permit.

b. Project No: 9615-000.

c. Date Filed: November 13, 1985.

d. Applicant: Swift River/Hafslund Company.

e. Name of Project: Three Rivers Dam.

f. Location: Chicopee River in Hampden County, Massachusetts.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Peter B. Clark, Chief Executive Officer, Swift River/Hafslund Company, 10 Harbor Street, Danvers, MA 01923, (617) 777–7040.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would consist of: (1) an existing 32-foot-high, 250-foot-long concrete dam owned by the Town of Palmer with a crest elevation of 302 feet msl; (2) an existing reservoir with a surface area of 55 acres and a storage capacity of 600 acre-feet; (3) a proposed powerhouse at the base of the dam containing a generating unit with a rated capacity of 2,360 kW; and (4) a proposed 350-foot-long transmission line tying into the existing New England Electric Company system. The Applicant estimates a 13.5 GWh average annual energy production.

k. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $125,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

8 a. Type of Application: Preliminary Permit.

b. Project No.: 9612-000.

c. Date Filed: November 4, 1985.

d. Applicant: Cedar Creek Limited Partnership.

e. Name of Project: Cedar Creek.

f. Location: On Cedar Creek and an unnamed tributary of Cedar Creek in Madison County, Montana near the town of Ennis. T6S R1E Sections 25, 26, 23, 14, 22, 15, 16, 21, 20, and 19 T6S R1W Sections 24 and 23.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Rhett Hurless, Water Engineering Inc., P.O. Box 3474, Bozeman, MT 59772, (406) 586–7017.

i. Comment Date: March 12, 1986.

j. Description of Project: The proposed project would consist of: (1) A 3-foot-high, 20-foot-wide concrete diversion dam at elevation 7,000 feet on Cedar Creek; (2) a 14-inch-diameter, 16,500-foot-long pvc and steel buried penstock extending to the powerhouse; (3) a 3-foot-high, 8-foot-wide concrete diversion dam at elevation 7,200 feet on an unnamed tributary of Cedar Creek; (4) a 12-inch-diameter, 9,000-foot-long pvc and steel buried penstock also terminating at the powerhouse; (5) a powerhouse containing two generating units with a total rated capacity of 500 kW, producing an estimated average annual energy output of 2.3 million kWh; (6) a concrete tailrace discharging project flows into Cedar Creek; (7) a 3-mile-long, 12.5-kV transmission line tying into an existing Montana Power Company line.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks a permit to study the feasibility of constructing and operating the project. No new access road will be needed for the purpose of conducting these studies. The estimated cost for conducting these studies is $12,000.

k. Purpose of Project: Project power would be sold to Montana Power Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

9 a. Type of Application: Preliminary Permit.

b. Project No.: 9590-000.

c. Date Filed: November 1, 1985.

d. Applicant: Patterson Creek Partners.

e. Name of Project: Patterson Creek.

f. Location: In Challis National Forest, on Patterson Creek in Lemhi County, Idaho. Township 14N, Range 23E.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Louis Rosenman, Suite 1100, 1333 New Hampshire Avenue NW., Washington, DC 20036, (202) 783–2100.

i. Comment Date: April 21, 1986.

j. Competing Application: Project No. 9587, Date Filed: 11/1/85 Due Date: 4/7/85.

k. Description of Project: The proposed project would consist of: (1) a 6-foot-high diversion dam at elevation 6,800 feet; (2) a 13,000-foot-long, 42-inch-diameter penstock; (3) a powerhouse containing one generating unit with a capacity of 3,000 kW and an average annual generation of 15.0 GWh; and (4) a 150-foot-long transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 36 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $145,000.

No new roads would be constructed or drilling conducted during the feasibility study.

l. Purpose of Project: Project power would be sold.

m. This notice also consists of the following standard paragraphs: A8, B, C, and D2.

10 a. Type of Application: Preliminary Permit.

b. Project No: 9565-000.

c. Date Filed: October 30, 1985.

d. Applicant: Raymondville Hydro Corporation.

e. Name of Project: West Raymondville.

f. Location: Raquette River, St. Lawrence County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Paul J. Elston, 420 Lexington Avenue, Suite 440, New York, New York 10170, (212) 986–0440.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would develop the unutilized capacity at the licensed Raquette River Project No. 2330, which includes (1) an existing concrete gravity dam 293 feet long and 17 feet high, a section of which is to be demolished; and (2) an existing impoundment 50 acres in surfact area with a storage capacity of 440 acre-feet at a normal maximum surface elevation of 212 feet mean sea level. The proposed project would consist of (1) a proposed reinforced concrete intake/powerhouse structure 110 feet long and 70 feet wide; (2) an excavated intake channel 180 feet long, 80 feet wide, and 40 feet deep; (3) two proposed turbine/generator units of 2.3 MW capacity each; (4) a proposed 115 kV transmission line 800 feet long; and (5) appurtenant facilities.

The estimated annual energy production is 7,000,000 kWh. The net hydraulic head is 22 feet. Project power would be sold to Niagara Mohawk Power Corporation. The dam owner is Niagara Mohawk Power Corporation.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C and D2.

l. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $160,000.

11 a. Type of Application: Preliminary Permit.

b. Project No: 9853-000.

c. Date Filed: January 2, 1986.

d, Applicant: Arktech, Inc.

e. Name of Project: George #2.

f. Location: In Targhee National Forest, on Henrys Fork in Fremont County, Idaho, Township 11N and Range 42E, 43E.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Michael Arkoosh, P.O. Box 93, Gooding, ID 83330, (208) 934–8464.

i. Comment Date: May 12, 1986.

j. Description of Project: The proposed project would consist of: (1) A headgate on the river bank at elevation 6,000 feet; (2) a 1.25-mile-long canal; (3) a 300-foot-long, 96-inch-diameter penstock; (4) a powerhouse containing a generating unit with a capacity of 3,098 kW and an average annual generation of 18,484 MWh; and (5) a 0.5-mile-long transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 36 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $96,000. No new roads would be constructed or drilling conducted during the feasibility study.

k. Purpose of Project: Project power would be sold.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C and D2.

12 a. Type of Application: Preliminary Permit.

b. Project No.: 9836-000.

c. Date Filed: December 31, 1985.

d. Applicant: West Slope Power Company.

e. Name of Project: Sand Creek Project.

f. Location: On Sand Creek, in Madera County, California; Sections 7, 18, 19, and 30, T.7S., R.23E., and Sections 25 and 26, T.7S., R.22E., MDB&M.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Ms. Shirley Kimmel, P.O. Box 254800, Sacramento, CA 95865, (916) 924–3885.

i. Comment Date: May 12, 1986.

j. Description of Project: The proposed project would consist of: (1) A 6-foot-high, 7.5-foot-long, diversion dam located at elevation 5,080 feet msl; (2) a 30-inch-diameter, 13,500-foot-long penstock; (3) a powerhouse with a total installed capacity of 4,750 kW; and (4) a 69-kV, 13,200-foot-long transmission line interconnecting the project to an existing utility distribution line. The estimated 13.9 GWh generated annually would be sold to the local utility company. The proposed project would be located within the Sierra National Forest.

k. A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $75,000.

1. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

13 a. Type of Application: Preliminary Permit.

b. Project No.: 9831-000.

c. Date Filed: December 31, 1985.

d. Applicant: West Slope Power Company.

e. Name of Project: Whisky Creek No. 3 Project.

f. Location: On Whisky Creek in Madera County, California; Sections 9, 16, 17, 18 and 20, T.9S., R.23E., MDB&M.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Ms. Shirley Kimmel, P.O. Box 254800, Sacramento, CA 95865, (916) 924–3885.

i. Comment Date: May 12, 1986.

j. Description of Project: The proposed project would consist of: (1) A 6-foot-high, 50-foot-long diversion dam located at elevation 2,080 feet msl; (2) a 36-inch-diameter, 8,500-foot-long penstock; (3) a powerhouse with a total installed capacity of 3,800 kW; and (4) a 13,200-foot-long, 69-kV transmission line interconnecting the project to an existing utility distribution line. The estimated 10.2 GWh generated annually would be sold to a local utility. The proposed project would be located within the Sierra National Forest.

A preliminary permit, if issued, does not authorize construction. Applicant seeks to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $75,000.

14 a. Type of Application: Preliminary Permit.

b. Project No.: 9765–000.

c. Date Filed: December 30, 1985.

d. Applicant: Ramah Energy, Inc.

e. Name of Project: Big Sand Wash Hydro Project.

f. Location: On Big Sand Wash, a tributary of Dry Gulch Creek, a tributary of the Duchesne River, in Duchesne County, Utah.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C 791(a)–825(r).

h. Contact Person: James F. Smith, President, Ramah Energy, Inc., 291 East 200 North, Roosevelt, UT 84066.

i. Comment Date: May 12, 1986.

j. Description of Project: The proposed project would utilize the Big Sand Wash Dam and Reservoir, owned by the Utah Board of Water Resources and operated and maintained by the Moon Lake Water Users Association, and would consist of: (1) The existing earthfill dam, 112 feet high and 795 feet long, with a top elevation at 5,892 feet m.s.l.; (2) a reservoir having a capacity of 12,050 acre-feet at spillway elevation of 5,885 feet m.s.l; (3) a new penstock utilizing the existing 40-inch diameter outlet works conduit; (4) a new powerhouse with an installed capacity of 750 kW operating under a maximum head of 100 feet; (5) a tailrace returning flow to the stream a short distance downstream from the dam; (6) a new 13.8 kV transmission line, about one half mile long; and (7) appurtenant facilities. The Applicant estimates that the average annual energy output would be 2,211,149 kWh.

k. Purpose of Project: Project energy would be sold to the Utah Power & Light Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $20,000.

15 a. Type of Application: Preliminary Permit.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing 1,925-foot-long, 166-foot-high rolled earth George B. Stevenson Dam; (2) an impoundment having a surface area of 142 acres, a storage capacity of 2,000 acre-feet, and a normal water surface elevation of 920 feet msl; (3) a proposed intake; (4) a proposed powerhouse containing four generating units with a total installed capacity of 920 kW; (4) a proposed tailrace; (5) a proposed 13-mile-long, 46-kV transmission line; and (6) appurtenant facilities The Applicant estimates the average annual generation would be 4,335 MWh. The existing dam and project facilities are owned by the Pennsylvania Department of Environmental Resources.

k. Purpose of Project: All project energy generated would be sold to a local utility.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time the Applicant would perform studies to determine the feasibility of the project. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates the cost of the studies under permit would be $47,000.

16 a. Type of Application: Preliminary Permit.

b. Project No.: 9742–000.

c. Date Filed: December 27, 1985.

d. Applicant: Taft Hydropower, Inc.

e. Name of Project: Diamond Hill Hydro Power Project.

f. Location: On Spruce Creek near Salisbury, Herkimer County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person:

Mr. Lawrence R. Taft, 10315 Caughdenoy Rd., Central Square, NY 13036, (315) 437–2547
Mr. Neal F. Dunlevy, % Stetson Dale Engineering PC, 185 Genesee St., Utica, NY 13501, (315) 797–5800.

i. Comment Date: May 12, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing masonary stone gravity dam approximately 80 feet long and 14 feet high; (2) an existing 92 acre reservoir with 800 acre-feet of storage at an elevation of 1,360 mls; (3) rebuilding an existing intake structure; (4) a proposed penstock four feet in diameter and 1,200 feet long; (5) a new reinforced concrete powerhouse approximately 20 feet by 20 feet housing two 700 kW generators for a total capacity of 1,400 kW; (6) a proposed tailrace 15 feet wide, 6 feet deep, and 15 feet long; (7) a proposed 13.2 kV transmission line 400 feet long connecting with a single phase powerline which will be upgraded; and (8) appurtenant facilities. The Applicant estimates that the average annual energy generation would be approximately 6.0 GWh. The project energy would be sold to Niagara Mohawk Power Corporation. The Dam is owned by the City of Little Falls, New York.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

l. Proposed Scope of Studies under this Permit: A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $40,000.

17 a. Type of Application: Conduit Exemption.

b. Project No.: 9735–000.

c. Date Filed: December 27, 1985.

d. Applicant: City of Fullerton, California.

e. Name of Project: MWD Service Connection F–8.

f. Location: On the city of La Habra's Metropolitan Water District (MWD) Service Connection F–8, that obtains its water from the Colorado River, just south of the intersection of Lambert Road and Euclid Avenue, in the city of La Habra, in Orange County, California (Section 8 of T3S, R10W, S.B.M.&B.).

g. Filed Pursuant to: Section 30 of the Federal Power Act, 16 U.S.C. 823(a).

h. Contact Person:

Mr. Hugh L. Berry, Assistant City Manager, City of Fullerton, 303 West Commonwealth Avenue, Fullerton, CA 92632, (714) 738–6845.
Mr. David C. Auslam, Jr., Auslam & Associates, Inc., 4125 Temescal Street, Suite D, Fair Oaks, CA 95628, (916) 961–8579.

i. Comment Date: April 18, 1986.

j. Description of Project: The proposed project would consist of a 20-foot-wide, 30-foot-long underground concrete vault (located beneath Euclid Avenue, adjacent to La Habra's pressure reducing and water distribution vault) containing all associated switchgear and two turbine-generator units with a combined rated capacity of 574 kW and operting under a head of 260 feet. A 60-kV, 50-foot-long transmission line would interconnect the project to an existing Southern California Edison Company line. The project's estimated average annual generation of 1.2 GWh would be sold to Southern California Edison Company.

k. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D3b.

18 a. Type of Application: Preliminary Permit.

b. Project No.: 9695–000.

c. Date Filed: December 19, 1985.

d. Applicant: American Hydro Power Company.

e. Name of Project: Little Pine Creek Dam Project.

f. Location: On the Little Pine Creek in Cummings and Pine Townships, Lycoming and Clinton Counties, Pennsylvania.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Peter A. McGrath, American Hydro Power Company, 33 Rock Hill Road, Bala Cynwoyd, PA 19004–2010, (215) 668–8143.

i. Comment Date: May 12, 1986.

j. Description of Project: The proposed project would consist bf: (1) An existing 1,479-foot-long, 113-foot-high earth and rock filled Little Pine Creek Dam; (2) an impoundment with a surface area of 93.7 acres, a storage capacity of 1,100 acre-feet, and normal water surface elevation of 713 feet msl; (3) the existing 618-foot-long, 8.5-foot-diameter steel conduit; (4) a proposed powerhouse containing five generating units with a total installed capacity of 960 kW; (5) an existing tailrace; (6) a proposed 1.34-mile-long, 12.47-kV transmission line; and (7) appurtenant facilities. The Applicant estimates the Average annual generation would be 3,999 MWh. The existing dam and project facilities area owned by the Pennsylvania Department of Environmental Resources.

k. Purpose of Project: All project energy generated would be sold to a local utility.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope of Studies Under Permit: A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time the Applicant would perform studies to determine the feasibility of the project. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates the cost of the studies under permit would be $47,000.

19 a. Type of Application: Preliminary Permit.

b. Project No: 9566–000.

c. Date Filed: October 30, 1985.

d. Applicant: East Norfolk Hydro Corporation.

e. Name of Project: South Norfolk.

f. Location: Raquette River, St. Lawrence County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Paul J. Elston, 420 Lexington Avenue, Suite 440, New York, New York 10170, (212) 986–0440.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would develop the unutilized capacity at the licensed Raquette River Project No. 2330, which includes (1) an existing concrete gravity dam 245 feet long and 16 feet high; and (2) an existing impoundment 135 acres in surface area with a storage capacity of 1100 acre-feet at a normal maximum surface elevation of 288 feet mean sea level. The proposed project would consist of (1) a proposed reinforced concrete intake/powerhouse structure 110 feet long and 35 feet wide; (2) a proposed excavated intake channel 140 feet long, 35 feet wide, and 30 feet deep; (3) a proposed turbine/generator unit of 3.5 MW capacity; (4) a proposed 23 kV transmission line 1800 feet long; and (5) appurtenant facilities.

The estimated annual energy production is 4,000,000 kWh. The net hydraulic head is 15 feet. Project power would be sold to Niagara Mohawk Power Corporation. The dam owner is Niagara Mohawk Power Corporation.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C and D2.

l. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $160,000.

20 a. Type of Application: Preliminary Permit.

b. Project No: 9563–000.

c. Date Filed: October 30, 1985.

d. Applicant: Herrings Hydro Corporation.

e. Name of Project: North Herrings.

f. Location: Black River, Jefferson County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Paul J. Elston, 420 Lexington Avenue, Suite 440, New York, NY 10170, (212) 986–0440.

i. Comment Date: May 12, 1986.

j. Description of Project: The proposed project would develop the unutilized capacity at the licensed Black River Project No. 2569, which includes: (1) An existing concrete gravity dam 512 feet long and 25 feet high; and (2) an existing impoundment 140 acres in surface area with a storage capacity of 1800 acre-feet at a normal maximum surface elevation of 680 feet mean sea level. The proposed project would consist of: (1) A proposed reinforced concrete intake/powerhouse structure 100 feet long and 120 feet wide; (2) a proposed excavated intake channel 250 feet long, 120 feet wide, and 20 feet deep; (3) three proposed turbine/generators of 3.24 MW capacity each; (4) a proposed 23 kV transmission line 200 feet long; and (5) appurtenant facilities.

The estimated annual energy production is 11,000,000 kWh. The net hydraulic head is 19 feet. Project Power would be sold to Niagara Mohawk Power Corporation. The dam is owned by Niagara Mohawk Power Corporation.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

l. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies and the preparation of an application for license to construct and operate the project.

i. Comment Date: April 21, 1986.

j. Description of Project: The proposed amendment would consist of: (1) The installation of an additional generating unit with a capacity of 770 kW connecting to an existing penstock in the existing powerhouse, and (2) lengthening the existing powerhouse 18 feet to accommodate the additional unit. The estimated average annual energy output due to this addition would be 10,751 MWh.

k. Purpose of Project: The additional generating unit is being added to take advantage of additional return irrigation flows.

l. This notice also consists of the following standard paragraphs: B and C.

Standard Paragraphs

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted in response to this notice.

A4. Development Application—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, any competing development applications or notices of intent to file competing development applications, must be filed in response to and in compliance with the public notice of the intial development application. No competing applications or notices of intent may be filed in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36 (1985)). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application.

A competing preliminary permit application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application.

A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A8. Preliminary Permit—Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit and development applications or notices of intent. Any competing preliminary permit or development application, or notice of intent to file a competing preliminary permit or development application, must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice.

A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

B. *Comments, Protests, or Motions to Intervene.*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203-RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. *Agency Comments*—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. 88-29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be set to the Applicant's representatives.

D2. *Agency Comments*—Federal, State and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in section 408 of the Energy Security Act of 1980, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in section 30 of the Federal Power Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: March 12, 1986.

Kenneth F. Plumb,

Secretary.

[Docket Nos. CP86-341-000 et al.]

Natural Gas Certificate Filings; Algonquin Gas Transmission Co. et al.

Take notice that the following filings have been made with the Commission:

1. Algonquin Gas Transmission Company

[Docket No. CP86-341-000]

March 10, 1986.

Take notice that on February 21, 1986, Algonquin Gas Transmission Company (Applicant), 1284 Soldiers Field Road, Boston, Massachusetts 02135, filed in Docket No. CP86-341-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon approximately 22,957 feet of 6-inch mainline pipe and 660 feet of 10-inch casing pipe on Applicant's existing G-8 pipeline system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authority to (1) abandon in place a portion of its existing G-8 pipeline system consisting of approximately 21,457 feet of 6-inch pipeline and 586 feet of 10-inch casing pipe and any related appurtenances and (2) remove and salvage a portion of its existing G-8 pipeline system consisting of approximately 1,500 feet of 6-inch pipeline and 74 feet of 10-inch casing pipe and any related appurtenances. Such facilities are said to be part of Applicant's original G-8 pipeline system authorized in Docket No. G-1319 and are located in the towns of Rochester, Wareham, Carver and Plymouth, Massachusetts.

Applicant states that the proposed abandonment of facilities would facilitate the installation of a 20-inch pipeline loop previously authorized by the Commission in Docket No. CP84-429-000, *et al.* Applicant avers that installation of the authorized 20-inch pipeline loop effectively eliminates the need for the existing 6-inch pipeline and associated facilities proposed to be abandoned. In addition, Applicant states that the proposed abandonment would allow Applicant to reduce its right-of-way rquirements for the installation and operation of the authorized 20-inch pipeline loop adjacent to the facilities proposed to be abandoned, resulting in less damage and construction costs for the new 20-inch pipeline loop. Applicant alleges that the proposed abandonment of these facilities would not entail any abandonment of service, affect significantly Applicant's net plant, nor impair its ability to meet its existing contract commitments to its existing customers.

Comment date: March 31, 1986, in accordance with Standard Paragraph F at the end of this notice.

2. Arkla Energy Resources, a Division of Arkla, Inc.

Docket No. CP86-338-000

March 12, 1986.

Take notice that on February 20, 1986, Arkla Energy Resources, (AER), a division of Arkla, Inc., P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP86-338-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate sales taps and related jurisdictional facilities necessary to enable Arkla to deliver gas from several of its jurisdictional pipelines to consumers served by Arkansas Louisiana Gas Company (ALG), a division of Arkla, Inc., under the certificate issued in Docket Nos. CP82-384-000 and CP82-382-001 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

It is stated that AER proposes to construct and operate (1) a sales tap on its Line 6R2 in Sedgwick County, Kansas, to deliver gas to ALG for service to residential customer, Mrs. Judith L. Sawyer, who would use approximately 200 Mcf per year for residental purposes; (2) a sales tap on its Line BT-2A in Johnson County, Arkansas, to deliver gas to ALG for service to a retail customer, Mr. C.O. Blackard, who would use approximately 600 Mcf per year in connection with the operation of his chicken farm; (3) a sales tap on its Line BM-21 in Faulkner County, Arkansas, to deliver gas to ALG's Rural Extension No. 1171 for several retail customers to be served by ALG in the vicinity, who it is estimated would use an aggregate volume of about 2,000 Mcf per year; (4) a sales tap on its Line A in Hot Spring County, Arkansas, to deliver gas to ALG's Rural Extension No. 1175 for several retail customers to be served by ALG in the vicinity, who would use approximately 10,750 Mcf per year; (5) a sales tap on its Line LM-2 in Hot Spring County, Arkansas, to deliver gas to Mid-State Construction Co., which would use approximately 35,000 Mcf per year in an asphalt plant; (6) a sales tap on its Line J in White County, Arkansas, to deliver gas to ALG's Rural Extension No. 1163 for distribution to an anticipate 72 residential customers and 1 small industrial customer, who would use an aggregate volume estimated at about 280,400 Mcf per year; (7) a sales tap on its Line BM-24 in Yell County, Arkansas, to deliver gas to ALG for service to a retail customer, Mr. Floyd Avery, who would use approximately 925 Mcf per year for a chicken brooder house; (8) a sales tap on its Line AM-187 in Jefferson County, Arkansas, to deliver gas to ALG for service to Ms. Kathy Oliver and othes in the vicinity, who would use an aggregate volume estimated at about 212 Mcf per year for residential purposes; (9) a sales tap on its Line JM-12 to establish an additional town border delivery point as a needed supplemental feed into ALG's Truman, Arkansas, distribution system, it being estimated that about 20,000 Mcf per year would be deliverd through the proposed facilities; (10) a sales tap on its Line 638 to establish an additional town border delivery point to help relieve pressure problems on the east side of ALG's distribution system in Ada, Oklahoma, it being estimated that about 40,000 Mcf per year would be delivered through the proposed facilities.

The total estimated cost of facilities is $182,645.000.

AER states that the gas would be delivered from its general system supply, which it is stated is adequate to provide the service.

Comment date: April 28, 1986, in accordance with Standard Paragraph G at the end of this notice.

3. Midwestern Gas Transmission Company

[Docket No. CP82-74-003]

March 10, 1986.

Take notice that on February 20, 1986, Northern States Power Company (Minnesota) and Northern States Power Company (Wisconsin) (NSP), 414 Nicollet Mall, Minneapolis, Minnesota 55401, filed in Docket No. CP82-74-003 a petition to amend the order of June 1, 1984, in Docket No. RP83-73-000, *et al.*, issuing a certificate of public convenience and necessity pursuant to section 7(c) of the Natural Gas Act to Midwestern Gas Transmission Company (Midwestern) so as to authorize Midwestern to transport natural gas purchased by NSP from any third party supplier, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

NSP states that the order approved a stipulation and agreement jointly submitted by Midwestern and Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), and granted Midwestern a certificate of public convenience and necessity authorizing Midwestern to provide gas transportation service for NSP under the Rate Schedule T-9 transportation contract between Midwestern and NSP. NSP further states that the stipulation and contract allow Midwestern to transport gas purchased by NSP from any third party supplier. Ordering paragraph (D) of the order authorizes Midwestern to transport gas sold to NSP by Northern. NSP requests that the Commission amend the order to authorize Midwestern to transport gas purchased by NSP from any third party supplier. NSP alleges that amending the order will reflect the intent and expectations of the parties under the stipulation and the contract and will not affect the rights and obligations of NSP, Northern and Midwestern under the contract and NSP's service agreement with Northern. NSP states that neither Midewestern nor Northern objects to NSP's filing of the instant petition.

Comment date: March 31, 1986, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

4. Northern Natural Gas Company, Division of InterNorth, Inc.

[Docket No. CP86-325-000]

March 12, 1986.

Take notice that on February 13, 1986, Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP86-325-000, an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon and remove one 347 horsepower compressor unit (Unit #2) located in Hutchinson County, Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northern states that due to declining volume production, the compresser unit is no longer needed at the Hutchinson County gathering station. It is explained that the present production can be gathered and compressed by the remaining 468 horsepower compressor unit (Unit #1) at the Hutchinson County gathering station.

Northern proposes to utilize said compressor elsewhere on its system or sell it to a potential buyer. The estimated cost to remove the compressor is $24,000 and its salvage value is estimated to be $17,350.

Comment date: April 2, 1986, in accordance with Standard Pargraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required to intervene herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on it own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA86-3-33-000-001]

El Paso Natural Gas Co.; Proposed Change in Rates Pursuant To Purchased Gas Cost Adjustment

March 10, 1986.

Take notice that on February 20, 1986, El Paso Natural Gas Company ("El Paso") tendered for filing a notice of change in rates for jurisdictional gas service rendered to customers served by its interstate gas transmission system under rate schedules affected by and subject to section 19, Purchased Gas Cost Adjustment Provision ("PGA"), contained in the General Terms and Conditions of El Paso's FERC Gas Tariff, First Revised Volume No. 1, which section 19 also applies to certain special rate schedules contained in El Paso's FERC Gas Tariff, Third Revised Volume No. 2 and Original Volume No. 2A.

The filing reflects a decrease in the purchased gas cost of $0.3282 per dth and a decrease of $0.0594 per dth in the surcharge rate for a total downward adjustment in El Paso's currently effective sales rates of $0.3876 per dth attributable to the PGA.

To implement the instant notice of change in rates, El Paso tendered for filing the following revised tariff sheets to its FERC Gas Tariff:

Tariff Volume and Tariff Sheet

First Revised Volume No. 1—Eighth Revised Sheet No. 190 Sixth Revised Sheet No. 540
Third Revised Volume No. 2—Thirty-third Revised Sheet No. 1-D
Original Volume No. 2A—Thirty-fifth Revised Sheet No. 1-C

El Paso requests that the Federal Energy Regulatory Commission ("Commission") grant waiver of its applicable rules, regulations and orders as may be necessary to permit the tendered revised tariff sheets to become effective on April 1, 1986.

El Paso further states that in compliance with ordering paragraph D of the Commission's order issued February 19, 1986, at Docket No. TA86-1-33-004, El Paso is tendering Second Revised Sheet Nos. 355 and 359 to its FERC Gas Tariff, First Revised Volume No. 1 to be effective April 1, 1986 modifying its PGA provision (Section 19.7) to include language to reflect the treatment of exchange imbalances in the

VOL 51
ISS 51
MR 17
1986
UMI

calculation of the monthly Account 191 balances.

El Paso also states that is is tendering Third Revised Sheet No. 24 to its FERC Gas Tariff, Original Volume No. 1–A to be effective April 1, 1986 in order to reflect the rate of $2.1686 per dth to be utilized to determine the fuel reimbursement charge payable under Sections 6 of Rate Schedule T–1 or T–2 of said Tariff by shippers electing to reimburse El Paso for fuel usage in monthly payments rather than in-kind .

On January 31, 1986 at Docket No. RP86–45–000, El Paso filed with the Commission to establish rates, terms and conditions governing transportation service pursuant to Order Nos. 436 and 436–A, to become effective March 1, 1986. If said filing at Docket No. RP86–45–000 is approved and is acceptable to El Paso, Ninth Revised Sheet No. 100 and First Revised Sheet No. 100–A to El Paso's First Revised Volume No. 1 Tariff and Fourth Revised Sheet No. 24 to El Paso's Original Volume No. 1–A Tariff are proposed to be made effective April 1, 1986 in lieu of the counterpart revised tariff sheets.

El Paso also requests waiver of § 282.602(d)(2)(i) of the Commission's Regulations Under the NGPA. Preparation, duplication and service of the supplemental analysis required by § 282.602(d)(2)(i) necessitates a review of purchases from over 12,000 separate contract sellers, creating an extreme administrative burden. El Paso understands that the detail is for informational purposes, and is unnecessary for a thorough review of the rate change occasioned by this filing. Consequently, El Paso requests waiver of the need to file and serve the supplemental information on the condition that the data will be maintained and made available for inspection at El Paso's offices.

El Paso states the the filing has been served upon all interstate pipeline system customers of El Paso, all interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC, 20426, in accordance with § 385.214 and 385.211 of the Chapter. All such motions or protests should be filed on or before March 17, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CI79–499–001 and CI86–230–000]

Marathon Oil Co.; Application for Limited-Term Partial Abandonment and Certificate of Public Convenience and Necessity

March 12, 1986.

Take notice that on February 27, 1986, Marathon Oil Company (Applicant) P.O. Box 3128, Houston, Texas 77056, pursuant to Sections 4 and 7 of the Natural Gas Act and Parts 154 and 157 of the Commission's Regulations, filed an application for limited term partial abandonment for a period of two years and for a certificate of public convenience and necessity to make limited-term sales for resale of this gas with pre-granted abandonment. Applicant makes sales to Transcontinental Gas Pipe Line Corporation (Transco) from the West Cameron Area Block 619 (Block 619) Offshore Louisiana, under a contract dated June 5, 1979, certificated in Docket No. CI79–499–000 pursuant to Applicant's FERC Gas Rate Schedule 164. Applicant states that the subject gas is not being purchased by Transco due to lack of demand on its system, and that in Docket No. CI85–651–000. Applicant further states that on July 18, 1985, Transco and Applicant executed a limited release agreement covering Block 619 permitting Applicant to sell excess guantities of NGPA section 102(d) gas to Transco Energy Marketing Company (TEMCO) under Applicant's LTA authorization. This LTA authority expires on March 31, 1986. Applicant states that to ensure that it is able to market the released gas after March 31, 1986, it is essential that it receive both limited-term partial abandonment and a limited-term certificate with pre-granted abandonment permitting such released volumes to be sold to TEMCO. In further support of expeditous consideration of its requests, Applicant states that production from Block 619 is from a distress well and recoverable reserves are dependent upon the rate of production from 36,400 Mcf/d in January 1984 to 10,400 Mcf/d in January 1986 and with this curtailment the natural water drive has encroached to reduce recoverable reserves. Applicant states that, in accordance with the July 18, 1985, release agreement, Transco will receive take-or-pay credit under the original June 5, 1979, contract, to the extent gas quantities are released from such contract. Such release agreement, as amended by letter agreement dated December 12, 1985, covers up to a maximum 12,000 MMBtu/d quantity for sales by Applicant to TEMCO. Applicant states the rate for the proposed sale of NGPA section 102(d) gas to TEMCO will be the market price determined by TEMCO, presently $1.895/MMBtu for 70% of the volumes and $1.845/MMBtu for the remaining 30%. Finally, Applicant states that to the extent a permanent certificate cannot be issued prior to March 31, 1986, Applicant also requests a temporary certificate to continue sales to TEMCO.

Any person desiring to be heard or to make any protest with reference to said application should, on or before March 27, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–5819 Filed 3–14–86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CI85–29–006]

Odeco Oil & Gas Co.; Application for Amendment and Extension of Certificate of Public Convenience and Necessity

March 12, 1986.

Take notice that on March 5, 1986, Odeco Oil & Gas Company (Odeco), of P.O. Box 61780, New Orleans, Louisiana 70161, filed an application pursuant to the provisions of the Natural Gas Act and Commission's rules and regulations thereunder, for amendment and extension of its certificate of public convenience and necessity to permit continuation of existing sales and allow blanket sales authority after March 31, 1986.

Odeco is not currently making sales pursuant to the authority granted due to the lack of transportation authority, but is concerned in light of Order 436 issued December 12, 1985 in Docket No. RM85–1–000 applicant must be in position to be able to make such sales after March 31, 1986 as it could be faced with large volumes of gas shut in due to expiration of its limited certificate and abandonment authority. Odeco does not believe that the Commission's proposed rules issued in Docket No. RM85–1–000 will provide the necessary authority to continue existing sales or permit new sales from its reserves. Loss of such authority could be detrimental not only to Odeco, but to the markets currently being served as well as those pipelines providing transportation service. Accordingly, Odeco is requesting extension of its certificate and associated limited term abandonment authority to January 1, 1990.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than normal for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protests with reference to said application should on or before March 24, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

BILLING CODE 6717-01-M

[Docket No. CI86–33–001]

Sun Exploration and Production Co.; Application

March 12, 1986.

Take notice that on March 5, 1986, Sun Exploration and Production Company (Sun), P.O. Box 2880, Dallas, Texas 75221, filed an application pursuant to sections 4 and 7 of the Natural Gas Act and Part 157 of the Federal Energy Regulatory Commission's (Commission) regulations under the Natural Gas Act requesting modification of the Commission's December 5, 1985 Order Permitting And Approving Limited-Term Abandonment And Granting Certificates by substituting March 31, 1987 for March 1, 1986 therein. The certificate would (1) continue to authorize the sale of natural gas by Sun and its working interest owners for resale in interstate commerce; (2) permit temporary partial abandonment of certain natural gas sales; (3) and confer pre-granted abandonment authorization for sales; (3) and confer pre-granted abandonment authorization for sales of natural gas made pursuant to the requested certificate.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than normal for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protests with reference to said application should on or before March 24, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing

BILLING CODE 6717-01-M

[Docket No. TA86–3–18–003, 004]

Texas Gas Transmission Corp.; Filing of Revised Tariff Sheets

March 10, 1986.

Take notice that on March 6, 1986, Texas Gas Transmission Corporation (Texas Gas) tendered for filing First Revised Sheet Nos. 113 and 115 to its FERC Gas Tariff, Original Volume No. 1.

The revised tariff sheets are being filed pursuant to Ordering Paragraph (E) of the Commission's Order issued January 31, 1986, in Docket Nos. TA86–3–18–000 and TA86–3–18–001. Ordering Paragraph (E) requires Texas Gas to revise its tariff language to implement the "industry method" of accounting for concurrent exchange imbalances in the computation of Account No. 191 balances.

Copies of the revised tariff sheets are being mailed to Texas Gas's jurisdictional customers, interested state commissions, and parties of record in this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before March 17, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

Western Area Power Administration

Final Supplemental Environmental Impact Statement Availability; Blue River-Gore Pass Portion of the Hayden-Blue River Transmission Line Project, CO

AGENCY: Western Area Power Administration, Energy.

ACTION: Notice of availability for final supplemental environmental impact statement.

SUMMARY: Notice is hereby given that the U.S. Department of Energy (DOE), Western Area Power Administration (Western) has issued a final supplemental environmental impact statement (EIS) for the proposed Blue River-Gore Pass Portion of the Hayden-Blue River Transmission Line Project, Colorado, DOE/EIS 0116–FS. The final supplemental EIS was prepared pursuant to the National Environmental Policy Act of 1969 (NEPA); Council on Environmental Quality regulations, 40 CFR 1500–1508; and DOE guidelines for compliance with NEPA, 45 FR 20694, and as amended. The final supplemental

VOL 51
ISS 51
MR 17
1986
UMI

EIS must be used in conjunction with the draft supplemental EIS.

DATE: A decision on the proposal will not be made until after April 14, 1986.

FOR FURTHER INFORMATION CONTACT: For copies of the Final Supplemental EIS, contact:

Mr. William C. Melander, Loveland Area Office, Western Area Power Administration, P.O. Box 3700, Loveland, CO 80539, (303) 224–7231.

Mr. Gary W. Frey, Director of Environmental Affairs, Western Area Power Administration, P.O. Box 3402, Golden, CO 80401, (303) 231–1527.

Ms. Lida Whitaker, Office of Environmental Guidance, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–4610.

SUPPLEMENTARY INFORMATION:

Background Information

Western, in cooperation with the Forest Service, Bureau of Land Management, Rural Electrification Administration (REA), has developed a supplemental EIS to assess the environmental effects of constructing, operating, and maintaining approximately 30 miles of 230/345-kV transmission line between the existing Gore Pass Substation northwest of Kremmling, Colorado, and a proposed new substation (not part of this action) near the Ute Pass Road. As part of the proposal, Western would construct and provide access to an alternate hang-gliding launch area.

The project is part of the Hayden-Blue River 345–kV Transmission Line Project, the subject of a final EIS issued by the U.S. Department of Agriculture, REA, in July 1982. The action includes minor work at the Gore Pass Substation and at two taps, and also the removal of two existing transmission lines: A 69–kV line between Gore Pass Substation and Green Mountain Powerplant and a 115–kV line between Green Mountain Powerplant and Blue River Tap. The purpose of the project is to provide additonal transmission capacity into the areas of Gore Pass, Granby, Green Mountain, Dillon, Climax, Oak Creek, and Keystone, Colorado; and between the generation plants in western Colorado and the major load areas in eastern Colorado. Alternatives assessed include routing and design alternatives plus the alternatives addressed in the Hayden-Blue River final EIS, issued by the REA.

Copies of the final supplemental EIS are being provided to public and private agencies, organizations, and individuals who received the draft supplemental EIS. Copies of the draft and final supplemental EIS and the final EIS for the Hayden-Blue River Transmission Line Project are also available for public inspection at Western's Loveland Area Office, 5555 East County Road 26, Loveland, Colorado; Western's Headquarters Office, Room 304, 1627 Cole Boulevard, Golden, Colorado; the DOE Reading Room, 1000 Independence Avenue, SW., Washington, DC; the Bureau of Land Management's Kremmling Resource Area Office, 1116 Park Avenue, Kremmling, Colorado; and the Forest Service's Dillon District Ranger's Office, 135 Colorado Highway 9, Silverthorne, Colorado.

The final supplemental EIS must be used in conjunction with the draft supplemental EIS. The final supplemental EIS contains only changes and additons to the draft, comments on the draft, and responses to these comments. A limited number of draft supplemental EIS's are available for distribution at the addresses given above.

Correspondence on the Final Supplemental EIS should be sent to:

Mr. Mark N. Silverman, Area Manager, Loveland Area Office, Western Area Power Administration, P.O. Box 3700, Loveland, CO 80539.

Issued at Golden, Colorado, March 6, 1986.

William H. Clagett,

Administrator.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[A–1–FRL–2983–3]

Prevention of Significant Deterioration of Air Quality (PSD); Determination of Exemption; Dartmouth College, Hanover, NH

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Notice of final determination of exemption.

SUMMARY: The purpose of this notice is to announce that on January 6, 1986, John H. Sununu, Governor of New Hampshire, issued a final determination that the Dartmouth College Multi-Fuel Boiler Project, Phase I (the Project), located at Dartmouth College in Hanover, New Hampshire, is exempt from EPA's PSD review requirements (40 CFR 52.21(j)–(r)). This determination was made under the March 18, 1982 PSD delegation of authority agreement between Region I and the state of New Hampshire. The determination was issued because the institutional arrangement involving Dartmouth is such as to render the college a "nonprofit health or education" institution pursuant to section 169(1) of the Clean Air Act. 42 U.S.C. 7479(1), and 40 CFR 52.21(i)(4)(vi). Accordingly, the installation and operation of the multi-fuel boiler filed with #6 fuel oil (2.0% sulfur, maximum) at the Dartmouth College Heating Plant will not be subject to these PSD review requirements.

DATE: The determination was effective January 6, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. John J. Courcier, State Air Programs Branch, U.S. Environmental Protection Agency, Region I, John F. Kennedy Federal Building, Room 2311, Boston, Massachusetts 02203, (617/223–4876) or Mr. James W. Marston, New Hampshire Air Resources Agency, Health & Human Services Building, Hazen Drive, Concord, New Hampshire 03301, (603/271–4576).

SUPPLEMENTARY INFORMATION: This final determination of exemption was made in response to a request, dated July 8, 1985, by John G. Skewes, Director of Business Affairs, Dartmouth College.

Copies of this Final Determination and all infomation used in making the determination are available for public inspection at the New Hampshire Air Resources Agency, Health & Human Services Building, Hazen Drive, Concord, New Hampshire 03301. Copies of the determination are also available for public inspection at the U.S. Environmental Protection Agency, Region I, John F. Kennedy Federal Building, Room 2311, Boston, Massachusetts 02203 and at the Howe Library, Reference Department, 13 East South Street, Hanover, New Hampshire 03755.

The determination is a final action under the Clean Air Act. Under Section 307(b)(1) of the Act, judicial review of this determination is available only by the filing of a petition for review in the United States Court of Appeals for the First Circuit within 60 days from the date of publication in the **Federal Register**. Under section 307(b)(2) of the Clean Air Act, this final determination shall not be subject to later judicial review in civil or criminal proceedings for enforcement.

Dated: February 14, 1986.

Paul Keough,

Acting Regional Administrator, U.S. Environmental Protection Agency, Region I.

[OPTS–59210B; FRL–2985–9]

Toxic and Hazardous Substances Control; Certain Chemicals; Approval of Test Marketing Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for testing marketing exemption (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA), TME–86–11. The test marketing conditions are described below.

EFFECTIVE DATE: March 6, 1986.

FOR FURTHER INFORMATION CONTACT: Eileen Gibson, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Environmental Protection Agency, RM. E–609, 401 M Street, SW., Washington, DC 20460, (202–382–3394).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby approves TME–86–11. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time periods and restrictions (if any) specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, use, and number of customers must not exceed those specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME–86–11. A bill of lading accompanying each shipment must state that the use of the substance is restricted to those approved in the TME. In addition, the Company shall maintain the following records until five years after the dates they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA.

1. The applicant must maintain records of the quantity of the TME substance produced.

2. The applicant must maintain records of the dates of shipment to each customer and the quantities supplied in each shipment.

3. The applicant must maintain copies of the bill of lading that accompanies each shipment of the TME substance.

T–86–11

Date of Receipt: January 23, 1986.

Notice of Receipt: January 31, 1986 (51 FR 4029).

Applicant: Confidential.

Chemical: (G) Modified, maleated metal resinate.

Use: Publication gravure printing inks.

Production Volume: Confidential.

Number of Customers: Confidential.

Worker Exposure: Confidential.

Test Marketing Period: Six months.

Commencing on: March 6, 1986.

Risk Assessment: EPA identified no significant health or environmental concerns. Therefore, the test market substance will not present any unreasonable risk of injury to health or the environment.

Public Comments: None.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its findings that the test marketing activites will not present any unreasonable risk of injury to health or the environment.

Dated: March 6, 1986.

Don R. Clay,

Director, Office of Toxic Substances.

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The following ICRs are available for review and comment.

FOR FURTHER INFORMATION CONTACT: Nanette Liepman, (202) 382–2740 or FTS 382–2740.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: Development of New Source Performance Standards (NSPS) for Small Boilers (EPA ICR #1293). (This is a request for a new collection.)

Abstract: The purpose of this ICR is to gather data on small industrial-commercial-institutional boilers with heat input capacities of 100 Million Btu/hour or less. These data will be used in connection with regulatory development to analyze and evaluate various control technologies, regulatory options, costs, and economic, energy, and environmental impacts.

Respondents: Owners/operators of small industrial-commercial-institutional steam generating units.

Office of Administration and Resources Management

Title: Application for Federal Assistance—Short Form (EPA ICR #0873). (This is a reinstatement of a previously approved ICR; no changes are proposed).

Abstract: States submit EPA Form 5700–31 to apply for financial assistance under EPA's State Management Assistance Grant Program. The Agency uses the information to determine if the State-proposed work program is consistent with EPA requirements and the recipients' needs.

Respondents: States, local governments, and federally recognized Indian Tribal governments.

[EN-FRL-2986-3]

Fuel and Fuel Additives; American Methyl Corp.: Reconsideration of Waiver Granted

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the reconsideration of a waiver application submitted under section 211(f) of the Clean Air Act by American Methyl Corporation (American Methyl) for a proprietary fuel known as "Petrocoal." This action is being taken pursuant to a court order vacating the waiver and remanding the matter to the Environmental Protection Agency (EPA). This notice also announces EPA's policy for dealing wth existing stocks of Petrocoal.

DATE: The reconsideration process will begin immediately and EPA's policy on existing stocks of Petrocoal takes effect immediately and will last until April 16, 1986.

FOR FURTHER INFORMATION CONTACT: Sylvia I. Correa, Attorney/Advisor, Fuels Section, Field Operations and Support Division (EN-497F), Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382-2635.

SUPPLEMENTARY INFORMATION: Section 211(f)(1) of the Clean Air Act (Act), 42 U.S.C. 7545(f)(1), states that effective upon March 31, 1977 it shall be unlawful for any manufacturer of any fuel or fuel additive to first introduce into commerce, or to increase the concentration in use of, any fuel or fuel additive for general use in light duty motor vehicles manufactured after model year 1974 which is not substantially similar to any fuel or fuel additive utilized in the certification of any model year 1975, or subsequent model year, vehicle or engine under section 206 of the Act. Section 211(f)(4) of the Act, 42 U.S.C. 7545(f)(4), provides that the Administrator of the EPA, upon application of any manufacturer of any fuel or fuel additive, may waive the prohibitions established under 211(f)(1), if the Administrator determines that the applicant has established that such fuel or fuel additive or a specified concentration thereof, or the emission products of such fuel or additive or specified concentration thereof, will not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to section 206 of the Act.

American Methyl [1] submitted an application for a waiver for methanol-gasoline blend called "Petrocoal" on February 20, 1981. The 180-day review period provided by section 211(f)(4) was extended until September 28, 1981, by mutual consent.

On September 28, 1981, the EPA granted a waiver to American Methyl for a Petrocoal, which consisted of up to 12 percent by volume methanol, up to six percent by volume cosolvents (certain four-carbon alcohols), in the presence of a proprietary inhibitor in unleaded gasoline. See 46 FR 48975 (October 5, 1981).

On December 4, 1981 the Motor Vehicle Manufacturers Association (MVMA) filed both a petition for administrative reconsideration of the waiver and a petition for judicial review of the waiver in the U.S. Court of Appeals for the District of Columbia Circuit (MVMA v. EPA, No. 81-2276). On February 22, 1983, MVMA submitted to EPA a supplemental petition for reconsideration referencing new data on the effects of methanol in gasoline on automotive evaporative emissions. In addition, information subsequently obtained by the Agency indicated that the fuel tested by American Methyl may not have been the fuel described in the waiver request.

On May 2, 1983, 48 FR 19789, EPA stated that it was considering administrative action to modify or revoke the waiver under section 211(f) of the Act, or to control or prohibit the sale of Petrocoal under section 211(c) of the Act. On March 28, 1984, 49 FR 11879, the Agency granted MVMA's petition for reconsideration and proposed to revoke the waiver under section 211(f). Shortly thereafter, the Court of Appeals granted a stay of proceedings in the MVMA case pending a final administrative decision by EPA.

On May 25, 1984, however, American Methyl petitioned the same Court of Appeals for review of the proposed revocation on the ground that section 211(f) did not authorize such action by the Agency. That Court subsequently held that EPA was not authorized to evoke the waiver under 211(f), although it might control or prohibit marketing of the product pursuant to section 211(c). See *American Methyl Corp. EPA,* 749 F.2d 826 (October 31, 1984).

Subsequently, the MVMA lawsuit was reactivated and on July 26, 1985, the Court of Appeals vacated the Administrator's decision granting the waiver for Petrocoal and remanded the matter to the Agency to make a new determination as to whether to grant such waiver on the basis of the record existing at the time of the original waiver decision 768 F.2d 385. The issuance of the mandate was stayed, however, pending American Methyl's unsuccessful request for consideration by the Court of Appeals and its subsequent petition for certiorari to the Supreme Court. That petition was denied on January 21, 1986 (*American Methyl Corp.* v. *MVMA,* No. 85-718). On February 5, 1986, Court of Appeals issued its mandate in the MVMA case.

Today's Action

As required by the Court of Appeals, the EPA will consider the original waiver application for Petrocoal submitted by American Methyl de novo, based on the record existing prior to September 28, 1981. No new comments or other information will be considered since the Court mandated that the decision be made only upon the existing record. EPA will complete its reconsideration as expeditiously as possible.

As of February 5, 1986, pursuant to the Court's order vacating the Administrator's decision, and under section 211(f)(1) of the Act, it is illegal to sell Petrocoal or to introduce that product into commerce. However, the Agency is aware that this product has been sold for five years and that some inventories or Petrocoal exist. In order to allow those who in good faith purchased Petrocoal during the time the waiver was in force to deplete their stocks, the Agency will not pursue any enforcement action concerning any sales made by April 16, 1986, of existing inventories of Petrocoal. This policy is applicable only to already existing finished inventories and does not apply to fuel produced after issuance of the mandate.

Dated: March 11, 1986.

J. Craig Potter,

Assistant Administrator for Air and Radiation.

FEDERAL COMMUNICATIONS COMMISSION

Advisory Committee for the ITU World Administrative Radio Conference on the Use of the Geostationary Satellite Orbit and the Planning of the Space Services Utilizing it (Space WARC Advisory Committee); Main Committee Meeting

March 12, 1986.

The Space WARC Advisory Committee will convene its next meeting on April 22, 1986. The Committee will be reviewing the work of the working groups and will be considering recommendations and advice to the Commission concerning U.S. participation within the intersessional work program of the International Telecommunication Union in preparations for the second session in 1988. Details regarding the date, place and agenda of the meeting are provided below.

Chairman: Ronald F. Stowe.

Vice Chairman: Stephen E. Doyle.

Date: Tuesday, April 22, 1986.

Time: 9:30 A.M.-1:00 P.M.

Location: Federal Communications Commission, 1919 M Street, NW., Room 856, Washington, DC 20554

Designated Federal Employee: Thomas S. Tycz.

Agenda: (1) Adoption of Agenda, (2) Status of ITU Preparatory Activities, (3) Working Group Reports, (4) Date of Next Meeting, (5) Other Business, and (6) Adjournment.

For additional information, please contact Thomas S. Tycz, (202) 632-3214.

Federal Communications Commission.

Seventh and Eighth Meetings of the Land Mobile Radio/UHF Television Technical Advisory Committee

The seventh meeting of the Land Mobile Radio/UHF Television Technical Advisory Committee will be held on April 4, 1986, in Room 856 (the Commission Meeting Room), 1919 M Street, NW., Washington, DC. The meeting will start at 10:00 A.M.

The eighth meeting of the Land Mobile Radio/UHF Television Technical Advisory Committee will be held on April 28, 1986, in Room 856 (the Commission Meeting Room), 1919 M Street, NW., Washington, DC. The meeting will start at 10:00 A.M.

All interested parties are invited to attend these meetings. Since this is a technical advisory committee, attendees should be prepared for technical discussions.

The agenda for these meetings will consist of:

1. Approval of minutes of last meeting;
2. Status report from working group co-convenors;
3. Discussion of new business for the Committee;
4. Discussion of appropriate date and tentative agenda for next meeting.

Any questions regarding these meetings should be directed to Mr. Kenneth Nichols at (301) 725-1585.

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6718-02-M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, D.C. Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC. 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202-010465-014.

Title: United States Atlantic & Gulf Ports/Italy, France and Spain Freight Conference.

Parties:

Compania Trasatlantica Espanola, S.A.
Costa Line
Farrell Lines, Inc.
Lykes Bros. Steamship Corp.
Med-America Express Service
Sea-Land Service, Inc.
Zim Israel Navigation Co., Ltd.

Synopsis: The proposed amendment would reduce the scope of the conference to cargo discharged at ports in Italy, Spain and Mediterranean Ports of France and cargo destined for points in those countries to the extent it is moved through the above named ports. It would also exclude bulk cargo not carried in containers from the scope of the conference. The parties have requested a shortened review period.

Agreement No.: 217-010698.

Title: Lykes Bros. Steamship Co., Inc./Union International de Vapores, S.A. Space Charter Agreement.

Parties:

Lykes Bros. Steamship Co., Inc. (Lykes)
Union International de Vapores, S.A. (Univsa)

Synopsis: This agreement between Lykes and Univsa permits Univsa to charter container space on Lykes' vessels for carriage of cargo between foreign ports in the Far East, Asia, Mediterranean, Europe, United Kingdom and Central America, direct or via inland points/ports in the United States.

Agreement No.: 023-010699.

Title: Matson Terminals Maintenance and Repair Agreement

Parties:

Matson Terminals, Inc. (Matson)
HT&T Company, Inc. (HT&T)

Synopsis: The proposed agreement provides for HT&T to perform maintenance, repair and other miscellaneous services on the Island of Hawaii with respect to containers and related equipment owned and/or operated by Matson or Matson Navigation Company, Inc. which Matson has the obligation to maintain and repair.

Dated: March 12, 1986.

By Order of the Federal Maritime Commission.

John Robert Ewers,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Ameritrust Corp., et al.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies; and Acquisitions of Nonbanking Companies

The companies listed in this notice have applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed companies have also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The applications are available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 4, 1986.

A. **Federal Reserve Bank of Cleveland** (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *AmeriTrust Corporation*, Cleveland, Ohio; to acquire 100 percent of the voting shares of First United Bancorp, Franklin, Indiana, thereby indirectly acquiring Franklin Bank and Trust Company, Franklin, Indiana.

Applicant has also applied to acquire Franklin Financial Corporation, Indianapolis, Indiana, and thereby arrange commercial and residential real estate loans and commercial lines of credit. Applicant also proposes to package and service mortgage loans and to engage in the leasing of personal property.

Applicant has also applied to acquire Franklin Mortgage Corporation, Indianapolis, Indiana, and thereby engage in making and servicing mortgage loans and other extensions of credit.

2. *First National Cincinnati Corporation*, Cincinnati, Ohio; to merge with Peoples National Bancorp of America, Lawrenceburg, Indiana, thereby indirectly acquiring The Peoples National Bank of Lawrenceburg, Lawrenceburg, Indiana.

Applicant has also applied to acquire P.N.B. Insurance Agency, Inc., Lawrenceburg, Indiana and First-In-Leasing, Inc., Lawrenceburg, Indiana, and thereby engage in the underwriting of credit life, accident and health insurance related to extensions of credit by the bank holding company system, pursuant to § 225.25(b)(9) of Regulation Y; and leasing of personal activity, pursuant to § 225.25(b)(5) of Regulation Y.

Board of Governors of the Federal Reserve System, March 12, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6820-96-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Collection of Fees for Proficiency Testing of Private Clinical Laboratories

AGENCY: Centers for Disease Control, Public Health Service, HHS.

VOL 51
ISS 51
MR 17
1986
UMI

ACTION: Notice of Collection of Fees.

SUMMARY: The Public Health Service is initiating fees for proficiency testing of certain clinical laboratories participating in the program directly operated by the Centers for Disease Control (CDC). The purpose of these charges is to recover full costs of operating the program.

EFFECTIVE DATE: Fees for the period May 1–September 30, 1986, wil be due not later than April 15, 1986.

FOR FURTHER INFORMATION CONTACT: Harold W. Mair, Assistant Chief, Performance Evaluation Branch, Laboratory Program Office, Centers for Disease Control, Atlanta, Georgia 30333, (404) 329–2131 or FTS 236–2131.

SUPPLEMENTARY INFORMATION:

Purpose and Background

The purpose of this announcement is to specify administrative policies for charges for participation in the proficiency testing operated directly by CDC.

The Appropriations Act for the Department of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1986 (Pub. L. 99–178) contains a provision for collecting of fees, for the full cost of proficiency testing of private clinical laboratories to be credited to the appropriation.

The Centers for Disease Control (CDC) operates a proficiency program (PTP) for laboratories licensed under the Clinical Laboratories Improvement Act of 1967 (Section 353 of PHS Act, 42 U.S.C. 263a), and for laboratories participating on a voluntary basis. Regulations for the licensing program appear at 42 CFR Part 74.

Applicability

The fees are applicable to the private clinical laboratory participants who are enrolled to meet federal regulatory requirements or who are participating on a voluntary basis. The fees are not applicable to laboratories serving as reference laboratories for the PTP or to State or local public health laboratories.

Proposed Fees

For clinical laboratories enrolled in the CDC Proficiency Testing Program, the actual costs for each survey are determined by taking into account salaries, benefits, supplies, contract services, printing, postage and shipping, average equipment and instrument requirements, and appropriate overhead assessments. The costs per survey are divided by the number of enrollees (including nonlicensed laboratories) to arrive at a per laboratory per survey annual cost.

Fees will be levied against approximately 1,700 clinical laboratories. The estimated charge for the first full year during which fees for proficiency testing are assessed, is $3,185 for a clinical laboratory enrolled in *all of the surveys* offered by the CDC, or $1,593 for one-half year. Few laboratories are enrolled in all surveys.

The estimated costs for full year and for one-half year, for individual surveys, are shown below:

Survey	Number of shipments per year	Cost per year	Cost per one-half year
Bacteriology	4	$222	$111.00
Mycology	4	231	115.50
Parasitology	4	167	83.50
N. gonorrhoeae	2	131	65.50
HTLV	4	288	144.00
Public Health	1	64	32.00
Hepatitis	2	101	50.50
Chemistry Profile	4	251	125.50
TDM	4	380	190.00
Neonatal Screening	4	467	258.50
Blood Lead	4	294	147.00
Hematology Profile	4	184	92.00
Immunohematology	4	201	100.50
Hemoglobinopathy	4	127	63.50
Platelet Count	4	160	80.00

Since user fees initially will be charged for one-half year only, participants will be provided by mail. April 1, 1986, a fee schedule and instructions for submitting appropriate fees. The fees will be due at the address specified in the mailing, not later than April 15, 1986.

Dated: March 12, 1986.

William E. Muldoon,

Director, Office of Program Support Centers for Disease Control.

[FR Doc. 86–5863 Filed 3–14–86; 8:45 am]

BILLING CODE 4160–18–M

Food and Drug Administration

Advisory Committee; Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

Meeting: The following advisory committee meeting is announced:

Vaccines and Related Biological Products Advisory Committee

Date, time, and place. April 3, 9 a.m., Bldg. 1, Wilson Hall, Third Floor, NIH, 9000 Rockville Pike; April 4, 8:30 a.m., Bldg. 29, Rm. 121, 8800 Rockville Pike, Bethesda, MD. Please note that times for opening and closing sessions of the meeting are approximate.

Contact person. Jack Gertzog, Center for Drugs and Biologics (HFN–31), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–5455.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of vaccines and related biological products intended for use in the diagnosis, prevention, or treatment of human diseases. The committee also reviews and evaluates the quality and relevance of FDA's reseach program which provides scientific support for the regulation of these products.

Agenda—Open public hearing. April 3, 9 a.m. to 10 a.m., unless public participation does not last that long. Interested persons requesting to present data, information, or views, orally or in writing, on issues pending before the committee should communicate with the committee contact person.

Closed committee deliberations. April 3, 10 a.m. to 4:30 p.m. The committee will review trade secret or confidential commercial information relevant to a pending license application. The portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Open committee discussion. April 4, 8:30 to 9:30 a.m.; 11 a.m. to 12 m. The committee will review parts of the intramural research program in the Office of Biologics Research and Review (OBRR). Included for review are: (1) The Molecular Immunology Program of the Division of Biochemistry and Biophysics, and (2) the Pediatric, Enteric, and Neurologic Diseases Program of the Division of Virology. The research that is being conducted in each of these two programs will be discussed during the two open committee discussion times set forth above; FDA has not yet determined the order of discussion of the two programs. A number of individual projects under each of these programs will be reviewed.

Closed committee deliberations. April 4, 9:30 a.m. to 11 a.m., 12 m. to 1 p.m. Each of the two closed sessions involves a continuation of the review of the OBRR research program discussed in the preceding section. These closed sessions involve discussions of personal information concerning the scientific competence of individuals associated with these intramural research programs. Disclosure of this information would constitute a clearly unwarranted invasion of personal privacy (5 U.S.C. 552(c)(6)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (Subpart C of 21 CFR Part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR Part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested form the Dockets Management Branch (HFA–305), Rm. 4–62, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA), as amended by the Government in the Sunshine Act (Pub. L. 94–409), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably deliberative sessions to formulate advice and recommendations to the agency on matters that do not independently justify closing.

This notice is issued under section 10(a)(1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)), and FDA's regulations (21 CFR Part 14) on advisory committees.

Dated: March 10, 1986.

Joseph P. Hile,

Acting Commissioner of Food and Drugs.

BILLING CODE 4160–01–M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Privacy Act of 1974, Revision of Notice of System of Records

Pursuant to the provisions of the Privacy Act of 1974, as amended (5 U.S.C. 552a) notice is hereby given that the Department of the Interior proposes to revise a notice describing a system of records maintained by the Minerals Management Service. The notice is titled "Mineral Lease and Royalty Accounting Files—Interior, MMS–1" (formerly EMM–1). Except as noted below, all changes being published are editorial in nature, and reflect organization changes and other updating administrative revisions which have occurred since the publication of the material in the **Federal Register** on June 2, 1983 (48 FR 24791). The revised notice is published in its entirety below.

The sections of the notice describing categories of individuals covered by, and records contained in the system are being revised to expand and clarify the descriptions of information and scope of the records. In accordance with the provisions of the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701, et. seq.), the routine uses section of the notice is expanded to describe additional access to information by States and Indian tribes. Also, the existing routine disclosure statement for litigation purposes is revised to incorporate the clarification on such disclosures prescribed by the Office of Management and Budget

VOL 51
ISS 51
MR 17
1986
UMI

(OMB) in its supplementary guidelines dated May 24, 1985, for implementing the Privacy Act. A routine disclosure to consumer reporting agencies pursuant to the provisions of 5 U.S.C. 552a(b)(12) also is added.

As required by section 3 of the Privacy Act of 1974, as amended (5 U.S.C. 552a(o)), the Office of Management and Budget, the President of the Senate, and the Speaker of the House of Representatives have been notified of this action.

5 U.S.C. 552a(e)(11) requires that the public be provided a 30-day period in which to comment. The Office of Management and Budget requires a 60-day period to review such proposals pursuant to its Circular No. A–130. Therefore, written comments on these proposed changes can be addressed to the Department Privacy Act Officer, Office of the Secretary (PIR), Room 7357, Main Interior Building, U.S. Department of the Interior, Washington, DC 20240. Comments received on or before May 16, 1986, will be considered. The notice shall be effective as proposed without further notice at the end of the comment period, unless comments are received which would require a contrary determination.

Dated: March 6, 1986.

Oscar W. Mueller, Jr.,

Director, Office of Information Resources Management.

INTERIOR/MMS–1

SYSTEM NAME:

Mineral Lease and Royalty Accounting Files—Interior, MMS–1.

SYSTEM LOCATION:

Department of the Interior, Minerals Management Service, Royalty Management Program, Denver Federal Center, Building 85, Denver, Colorado 80225.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Lease or permit holders, royalty payors and reporters and individuals who have reported rents, royalties, and bonuses from oil or other minerals or gas from producing or nonproducing Federal or Indian leases. Only the records reflecting information about individuals are subject to the Privacy Act. The system also contains records concerning corporations and other business entities that are not subject to the Privacy Act.

CATEGORIES OF RECORDS IN THE SYSTEM:

Lease numbers; dates due; debtors; billee; payor; lessee; permittee; lessor (Federal, Indian tribe, or allottee); names and addresses; ID numbers; products produced; production volume; sales value; royalty amounts; dates due; and related information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The principal statutory authorities under which this system is maintained include the Federal Oil and Gas Royalty Management Act (FOGRMA) of 1982 (30 U.S.C. 1701 et seq.); The Act of February 25, 1920 (30 U.S.C. 181 et seq.); The Act of March 3, 1909 (25 U.S.C. 396 et seq.); and, The Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary uses of the records are to: (1) Collect royalties and rents; (2) control revenues; (3) distribute funds collected; (4) keep records of royalty accounts, including rents, bonuses, royalties and associated sales and production information; (5) provide data to facilitate comparative auditing of mineral production, royalties due, revenues collected, and funds distributed; (6) gather statistics for managing the mineral leasing program; and (7) provide informational access to external users including States, Indian tribes or agencies, and Federal agencies.

Disclosures outside the Department of the Interior may be made: (1) To the U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department, or, when represented by the Government, an employee of the Department is a party to litigation or anticipated litigation or has an interest in such litigation; and (b) the Department of the Interior determines that the disclosure is relevant or necessary to the litigation and is compatible with the purpose for which the records are compiled; (2) of information indicating a violation or potential violation of a statute, regulation, rule, order, or license to appropriate Federal, State, local, or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order, or license; (3) to a congressional office from the record of an individual in response to an inquiry the individual has made to the congressional office; (4) to a Federal agency which has requested information relevant or necessary to its hiring or retention of an employee or issuance of a security clearance, license, contract, grant or other benefit; (5) to Federal, State, or local agencies where necessary to obtain information relevant to the hiring or retention of an employee, or issuance of a security clearance, license, contract, grant or other benefit; and (6) to a State or Indian tribe which has entered into a cooperative agreement pursuant to section 202 of FOGRMA (30 U.S.C. 1732) for sharing of oil and gas royalty information or for carrying out enforcement or other activities.

DISCLOSURES TO CONSUMER REPORTING AGENCIES:

Pursuant to the provision of 5 U.S.C. 552a(b)(12), disclosures may be made from this system to consumer reporting agencies, as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)), or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in manual form (i.e. in file folders) as well as machine readable (i.e. magnetic tapes, disks, diskettes and microforms).

RETRIEVABILITY:

Indexed by: Lease or contract number; lessee and/or payor; purchasers of royalty oil; permittee; billee; production reporter; and/or commodity. The information is also retrievable by location, and by whether the lease is an Indian lease or a Federal onshore or offshore lease.

SAFEGUARDS:

Maintained with safeguards meeting the requirements of 43 CFR 2.51 for computerized and manual records.

RETENTION AND DISPOSAL:

Determination of the disposition of the records is pending approval of the Archivist.

SYSTEM MANAGER AND ADDRESS:

Associate Director for Royalty Management, Department of the Interior, Minerals Management Service, Royalty Management Program, P.O. Box 25165, Denver, Colorado 80225.

NOTIFICATION PROCEDURES:

Inquiries regarding the existence of a record should be addressed to the System Manager. A written, signed request stating that the individual seeks information concerning his/her records is required (43 CFR 2.60).

RECORD ACCESS PROCEDURES:

Requests for access shall be addressed to the System Manager,

signed by the requester and meet the content requirements of 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment shall be addressed to the System Manager and meet the requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Lessees, permittees, and individuals on whom records are maintained.

Bureau of Mines

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

A request extending the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made within 30 days directly to the Bureau clearance officer and to the Office of Management and Budget Interior Department Desk Officer, Washington, DC 20503, telephone 202–395–7313.

Title: 30 CFR 601—Helium Purchase Contract Application.

Abstract: This application is a form which requires the company name, address, and amount of original volume of helium desired on initial order with amount of cash advance required. Part 601 of 30 CFR gives information in regard to address and telephone number for securing the forms.

Bureau Form Number: 6–1584–X.

Frequency: Occasional.

Description of Respondents: Purchasers of Government Helium.

Annual Responses: 10.

Annual Burden Hours: 5.

Bureau clearance officer: James T. Hereford 202–634–1125.

Robert C. Horton,

Director, Bureau of Mines.

Title: Gas Well Data—Survey of Helium-Bearing Natural Gas.

Abstract: Respondents supply information which will be used by the Bureau of Mines Division of Helium Field Operations, to evaluate the helium resources of the United States. This evaluation helps assure a continued supply of the valuable natural resource to meet essential Government needs. Results of the gas analyses, along with the data supplied, are published to provide valuable information to industry and to the public when those data are released by the supplier.

Bureau Form Number: 6–1579–A.

Frequency: Annually.

Description of Respondents: Owners and operators of helium-bearing natural gas wells and transmission lines.

Annual Responses: 200.

Annual Burden Hours: 80.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 30774]

Illinois Central Gulf Railroad Co.; Acquisition and Operation Exemption

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Under 49 U.S.C. 10505, The Commission exempts Illinois Central Gulf Railroad Company from regulation under 49 U.S.C. 11343–46 to acquire and operate certain rail lines owned and operated by Missouri Pacific Railroad Company in Natchez, MS, subject to standard employee protection conditions.

DATES: Exemption is effective on April 14, 1986. Petitions to stay are due on March 24, 1986. Petitions for reconsideration are due on April 3, 1986.

ADDRESSES: Send pleadings referring to Finance Docket No. 30774 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423
(2) Petitioner's representative: Howard D. Koontz, 233 North Michigan Ave., Chicag6, IL 60601.

FOR FURTHER INFORMATION CONTRACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289–4357 (DC Metropolitan area) or toll free (800) 424–5403.

Decided: March 7, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

BILLING CODE 7035-01-M

[Docket No. AB–6 (Sub-No. 270)]

Burlington Northern Railroad Company—Abandonment—in Henry and Mercer Counties, IL

The Commission has found that the public convenience and necessity permit Burlington Northern Railroad Company to abandon its 20.88-mile line of railroad between Alpha (milepost 18.52) and Aledo, IL (milepost 39.40) in Henry and Mercer Counties, IL.

A certificate will be issued authorizing abandonment unless within 15 days after this publication the Commission also finds that: (1) A financially responsible person has offered assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this Notice. The following notation must be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB–OFA." Any offer previously made must be remade within this 10 days period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

DEPARTMENT OF JUSTICE

Attorney General's Commission on Pornography; Open Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the Department of Justice announces the following meetings of the Attorney General's Commission on Pornography.

Meeting

Date and Time: April 29, 1986, 9:00 a.m.–11:00 p.m.

Place: Room 801, Homeowners Loan Corporation Building, 320 First Street, NW., Washington, DC 20530.

Status: Open to the public.

Matters to be considered at meeting: Discussion of (1) Issues and methodology to be utilized, (2) Previous hearings and evidence received, (3) Review of alleged obscene and pornographic material, and (4) Any other relevant matters.

Meeting

Date and Time: April 30, 1986, 9:00 a.m.–11:00 p.m.

Place: Room 801, Homeowners Loan Corporation Building, 320 First Street, NW., Washington, DC 20530.

Status: Open to the public.

Matters to be considered at meeting: Discussion of (1) Issues and methodology to be utilized, (2) Previous hearings and evidence received, (3) Review of alleged obscene and pornographic material, and (4) Any other relevant matters.

Meeting

Date and Time: May 1, 1986, 9:00 a.m.–11:00 p.m.

Place: Room 801, Homeowners Loan Corporation Building, 320 First Street, NW., Washington, DC 20530.

Status: Open to the public.

Matters to be considered at meeting: Discussion of (1) Issues and methodology to be utilized, (2) Previous hearings and evidence received, (3) Review of alleged obscene and pornographic material, and (4) Any other relevant matters.

Meeting

Date and Time: May 2, 1986, 9:00 a.m.–11:00 p.m.

Place: Room 801, Homeowners Loan Corporation Building, 320 First Street, NW., Washington, DC 20530.

Status: Open to the public.

Matters to be considered at meeting: Discussion of (1) Issues and methodology to be utilized, (2) Previous hearings and evidence received, (3) Review of alleged obscene and pornographic material; and (4) Any other relevant matters.

The meetings will be open to the public. Written comments may be submitted regarding relevant issues. Approximately 20 seats will be available at the meeting on a first-come, first-served basis.

Copies of minutes will be available upon request, at the actual cost of duplication, 60 days after the final meeting on May 2, 1986.

Contact person for more information or to submit written comments: Alan E. Sears, Executive Director; Attorney General's Commission on Pornography, Department of Justice, Room 1016, HOLC Building, 320 First Street, NW., Washington, DC 20530, (202) 724–7837.

BILLING CODE 4410-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Combined Subcommittee on Emergency Core Cooling Systems and Decay Heat Removal Systems; Meeting

The ACRS Subcommittee meeting on Emergency Core Cooling Systems scheduled for March 26, 1986 previously published in the Federal Register (51 FR 8580, Mar. 12, 1986) has been changed to a *combined* Subcommittee meeting with the Decay Heat Removal Systems Subcommittee. All other items regarding this meeting remain the same as previously published.

To the extent practical the meeting will be open to public attendance. However, portions of the meeting may be closed to discuss proprietary information related to Westinghouse ECCS codes.

The agenda for the subject meeting shall be as follows:

The Subcommittee will: (1) Continue review of the Duke Power Company's request to delete use of the ECCS UHI system at McGuire and (2) discuss the proposed NRR resolution position for Generic Issue 124, Auxiliary Feedwater System Reliability.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Paul Boehnert (telephone 202–634–3267), between 8:15 A.M. and 5:00 P.M. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: March 12, 1986.

Morton W. Libarkin,

Assistant, Executive Director for Project Review.

BILLING CODE 7590-01-M

[Docket No. STN 50–529]

Arizona Public Service Co. et al., Palo Verde Nuclear Generating Station, Unit 2; Correction

On March 12, 1986, a notice was published in the Federal Register (51 FR 8594 entitled "Bi-Weekly Notice, Applications and Amendments to Operating Licenses Involving No Significant Hazards Consideration." On page 8587 of that notice, in column 1, the following replaces the first paragraph of Description of Amendment Request in the section entitled "Arizona Public Service Company, et al., Docket No. STN 50-529, Palo Verde Nuclear Generating Station, Unit 2, Maricopa County, Arizona,":

VOL
51
ISS
51
MR
17
1986
UMI

The proposed amendment would reflect Commission approval, if granted, allowing: (i) Co-owner Public Service Company of New Mexico (PNM) to transfer a portion of its fee interest in PVNGS Unit 2 to equity investors and (ii) the simultaneous transfer by the equity investors back to PNM of a long-term (approximatley 29½ years) possessory leasehold interest of this share under the terms described in this application. It is contemplated that the equity investors will be third parties not affiliated with PNM. These equity investors might include electric utilities, or affiliates or subsidiaries thereof, in which case antitrust consideration may be present. Under the proposed transaction, it is represented that PNM will remain in possession of its present interests in PVNGS Unit 2 under leasehold rather than by virtue of ownership.

The comment period for this one section of the above notice is hereby extended to April 16, 1986, to allow the full 30 days comment period.

Dated at Bethesda, Maryland, this 10th day of March, 1986.

For the Nuclear Regulatory Commission.

George W. Knighton,

Director, PWR Project Directorate No. 7, Division of PWR Licensing-B.

The U.S. Nuclear Regulatory Commission (the Commission) is issuing exemptions from certain requirements of Appendix J to 10 CFR Part 50 Public Service Electric and Gas Company (the applicant) for the Hope Creek Generating Station located in Salem County, New Jersey.

Environmental Assessment

A. Containment Airlock Surveillance

Identification of Proposed Action: The exemption would eliminate the air lock full pressure test required by Paragraph III.D.2(b)(ii) of Appendix J each time the air lock is opened during periods when containment integrity is not required. In lieu of the above Appendix J requirement, the applicant will perform an overall air lock integrity test when maintenance has been performed on the air lock that could effect the air lock sealing capability. If maintenance has not been performed on the air lock, the applicant intends to test the bulkhead door seal leakage.

Need for Proposed Action: The exemption is required to provide the applicant with greater plant availability over the lifetime of the plant.

Environmental Impact of Proposed Action: The exemption would allow the substitution of an air lock seal test for an air lock pressure test while the reactor is in a shutdown or refueling mode. With respect to this exemption from Appendix J, the increment of environmental impact is related solely to the potential increased probability and the magnitude of containment leakage during an accident which would lead to potentially greater offsite radiological consequences. However, the potential increase due to this exemption is small and would result from the potential leakage path through the door mechanism which will not be measured by this modified test. The six month test requirement of paragraph III.D.2(b)(i) of Appendix J, the three day test requirement of paragraph III.D.2(b)(iii) of Appendix J, and the testing requirements when maintenance is performed on the air lock, will measure the leakage through the door mechanism and provide assurance that the air lock will not leak excessively.

Alternative to Proposed Action: Because the staff has concluded that there is no measurable environmental impact associated with the exemption, any alternative to the exemption will have either no environmental impact or greater environmental impact.

The principal alternative would be to deny the requested exemption. This would not reduce the environmental impacts of plant operations and would result in reduced operational flexibility and unwarranted delays in power ascension.

B. Leak Rate Testing of Main Steam Isolation Valves (MSIVs)

Identification of Proposed Action: The exemption would exclude the measured leakage for the MSIVs from the combined leak rate for the local leak rate test. The exemption would also allow the leak test for the MSIVs to be performed at reduced pressures. This is an exemption from the testing requirement of Paragraph III.C.2(b) of Appendix J which requires valves, which are sealed with fluid from a seal system, to be pressurized with that fluid to a pressure not less than 1.10Pa.

Need for Proposed Action: The exemption is needed because the design of the MSIVs is such that testing in the reverse direction tends to unseat the valve. Testing of the inboard and outboard MSIVs or outboard MSIV and main steam stop valve simultaneously by pressurizing between the valves at a design pressure of 52.9 psig (1.10 Pa) would lift the disc of the inboard valve, resulting in a meaningless test.

Environmental Impact of Proposed Action: The proposed exemption would exclude the measured leakage through the MSIVs from the combined local leak rate test results. The MSIV leakage control system at Hope Creek is designed to control and minimize the release of fission products that could leak through the closed MSIVs after onset of a loss of coolant accident (LOCA) by maintaining a positive pressure between the MSIVs in each steam line. A radiological analysis including this potential source of containment atmosphere leakage was performed, and the MSIVs will be periodically leak rate tested to verify that the leakage assumed in the radiological analysis is not exceeded.

Alternative to Proposed Action: The proposed Technical Specification requirements for the Hope Creek Generating Station will provide reasonable assurance that no material increase in the probability or extent of MSIV leakage is to be expected. Therefore, there is no significant increase in the probability of higher post-accident offsite or onsite doses related to the proposed exemption and no significant increase in environmental impact beyond that experienced with no exemption.

The principal alternative would be to deny the requested exemption. This would provide no greater assurance that offsite or onsite doses, in the event of an accident that resulted in fission product release, would be any less.

C. Traversing Incore Probe

Identification of Proposed Action: Paragraph III.D.3 of Appendix J states that Type C testing on valves shall be performed during each reactor shutdown for refueling but in no case at intervals greater than two years. The proposed exemption would eliminate the requirement of Type C testing of the Traversing Incore Probe (TIP) Systems shear valves. The TIP system is equipped with two isolation valves outside the containment, one is a solenoid-operated ball valve and the other is an explosive shear valve. Since the shear valve requires testing to destruction, the applicant has requested an exemption from Type C testing of the shear valve.

Need for Proposed Action: The exemption is required in order for the applicant to avoid continuously destroying TIP system shear valves.

Environmental Impact of Proposed Action: The exemption would allow the

applicant to implement a surveillance and replacement program on the shear valves as an alternative to Type C testing to ensure that the shear valves function. The staff concludes that exempting the shear valves from Type C testing will not increase radioactive leakage from the penetration because the valve is the second isolation valve and its closure is required only in emergencies. The staff finds that the functional capability of the shear valves is addressed by the applicant's maintenance program and in the Technical Specifications.

Alternative to Proposed Action: Because the staff has concluded that there is no measurable environmental impact associated with the exemption, any alternative to the exemption will have either no environmental impact or greater environmental impact.

The principal alternative would be to deny the requested exemption. This would not reduce the environmental impacts of plant operation.

D. Instrument Lines

Identification of Proposed Action: The exemption from Paragraph III. C.2(a) of Appendix J would allow exemption from the Type C testing requirements for instrument lines, including suppression pool level and pressure instrumentation, drywell pressure instrumentation and those lines containing excess flow check valves.

Need for Proposed Action: The exemption is needed because the above instrumentation is not capable of being Type C tested. Furthermore, the leak tightness for the above instrumentation is verified during the Integrated (Type A) Leak Rate Test.

Environmental Impact of Proposed Action: These instrument lines consist of small diameter piping located outside the containment connected to a sealed instrument transducer, and are passive systems. They are designed to withstand the pressure and temperature conditions following the onset of a LOCA. Additionally, the leak tightness for the instrument lines is verified during the Integrated (Type A) Leak Rate Test. With respect to this exemption from Appendix J, the increment of environmental impact is related soley to the potential increased probability and the magnitude of containment leakage during an accident which would lead to potentially greater offsite radiological consequences. However, the potential increase due to this exemption is small and would result from leakage through these instrument lines. Based on the applicant's proposed alternative for testing leakage and the design of these instrument lines, it has been determined that the environmental impact would be negligible.

Alternative to Proposed Action: Because the staff has concluded that there is no measurable environmental impact associated with the exemption, any alternative to the exemption will have either no environmental impact or greater environmental impact.

The principal alternative would be to deny the requested exemption. This would not reduce the environmental impacts of plant operations and would result in unwarranted delays in power ascension.

E. Thermal Relief Valves (TRVs)

Identification of Proposed Action: The exemption from Paragraph III.C.2(a) of Appendix J would allow the applicant to be exempted from the Type C test requirement for the thermal relief valves (TRVs).

Need for Proposed Action: The exemption is needed because the above instrumentation is not capable of being Type C tested without adding a valve to form the test boundary. To add another valve on the TRV discharge piping would defeat the purpose for which the relief valves were installed, and also decrease the probability that the TRVs would function properly when required.

Environmental Impact of Proposed Action: The TRVs, in the Residual Heat Removal (RHR) System and Core Spray (CS), System, are of safety grade design with the containment isolation function in the reverse flow direction. Additionally, the pressure setpoint for the valves to open is much higher than the containment design pressure. These features will prevent an outward leakage path through the TRVs. Although the applicant is requesting an exemption to Type C testing, the integrity of the TRVs is being verified during the Type A test. With respect to this exemption from Appendix J, the increment of environmental impact is related solely to the potential increased probability and the magnitude of containment leakage during an accident which would lead to potentially greater offsite rediological consequences. However, the potential increase due to this exemption is small and would result from leakage through the TRVs. Based on the applicant's proposed alternative for testing leakage and the design of these instrument lines, it has been determined that the environmental impact would be negligible.

Alternative to the Proposed Action: Because the staff has concluded that there is no measurable environmental impact associated with the exemption, any alternative to the exemption will have either no envrionmental impact or greater environmental impact.

The principal alternative would be to deny the requested exemption. This would not reduce the environmental impacts of plant operations but would result in unwarranted delays in power ascension.

Alternative Use of Resources: These actions in the granting of exemptions A through E above do not involve the use of resources not previously considered in connection with the "Final Environmental Statement Related to the Operation of the Hope Creek Generating Station," dated December 1984.

Agencies and Persons Consulted: The NRC staff reviewed the licensee's requests that support the requested exemptions A through E above. The NRC staff did not consult other agencies or persons.

Finding of No Significant Impact

Based upon the foregoing environmental assessment, we conclude that the proposed exemptions will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the requested exemptions.

For further details with respect to this action, see the request for the exemptions as listed herein, in the applicant's December 12, 1985, submittal, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555 and at the Pennsville Public Library, 190 South Broadway, Pennsville, New Jersey 08070.

Dated at Bethesda, Maryland, this 10th day of March 1986.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

Director, BWR Project Directorate No. 3, Division of BWR Licensing.

UMI

Name of Affected Post Office: Palo Verde, Arizona 85343

Name(s) of Petitioner(s): Mrs. Eliza W. Narramore

Type of Determination: Consolidation

Date of Filing of Initial Appeal Papers: March 6, 1986

Categories of Issues Apparently Raised:

1. Effect on postal services. [39 U.S.C. 404(b)(2)(C)].

Other legal issues may be disclosed by the record when it is filed; or conversely, the determination made by the Postal Service may be found to dispose of one or more of these issues.

In the interest of expedition within the 120-day decision schedule [39 U.S.C. 404(b)(5)] the Commission reserves the right to request of the Postal Service memoranda of law on any appropriate issue. If requested, such memoranda will be due 20 days from the issuance of the request: a copy shall be served on the Petitioner. In a brief or motion to dismiss or affirm, the Postal Service may incorporate by reference any such memorandum previously filed.

The Commission orders:

(A) The record in this appeal shall be filed on or before March 21, 1986.

(B) The Secretary shall publish this Notice and Order and Procedural Schedule in the Federal Register.

By the Commission.

Charles L. Clapp,

Secretary.

BILLING CODE 7715-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC-14971; File No. 812-6166]

American Capital Government Securities, Inc.; Application

March 7, 1986.

Notice is hereby given that American Capital Government Securities, Inc. ("Applicant"), 2800 Post Oak Boulevard, Houston, Texas 77056, filed an application on July 31, 1985, and an amendment thereto on December 18, 1985, for an order, pursuant to section 6(c) of the Investment Company Act of 1940 ("Act"), exempting it from the provisions of section 19(b) of the Act and Rule 19b–1 thereunder, to permit Applicant to distribute long-term capital gains from certain options and futures transactions more frequently than once a year. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of the pertinent statutory provisions.

According to the application, Applicant is designed for investors who seek a high current return with frequent distributions. It seeks high current return from interest, premiums from writing covered call options and secured put options, any gains from sales of portfolio securities (whether upon the exercise of options or otherwise) and profits from closing transactions with respect to options and futures contracts. Applicant generally invests all of its assets in debt obligations issued or quaranteed by the U.S. Government, its agencies or instrumentalities, options on such U.S. Government securities, interest rate futures contracts, options on such contracts and repurchase agreements fully collateralized by U.S. Government securities. Dividends from net investment income are declared and paid monthly to shareholders. Applicant distributes quarterly, or on such other basis as may be determined from time to time by its board of directors, any net realized short-term capital gains, including those derived from expired options it has written, from closing purchase transactions and from securities sold upon the exercise of options or otherwise. Distributions of any net long-term capital gains realized during a fiscal year have been made once a year.

Applicant states that the Tax Reform Act of 1984 amended section 1256 of the Internal Revenue Code and significantly altered the tax treatment of capital gains from options on U.S. Government securities held or written by the Applicant, all of which have become section 1256 contracts. Prior to the 1984 amendments to section 1256, gain or loss recognized with respect to options on U.S. Government securities was treated as short-term capital gain or loss. Under the 1984 amendments to the tax law, 60% of the gain or loss recognized by the Applicant with respect to options on U.S. Government securities is treated as long-term capital gain or loss, and the remaining 40% is treated as short-term capital gain or loss. The 1984 amendments also resolved the issue of the tax treatment of options on interest rate futures by designating such options as section 1256 contracts. Regulated futures contracts, which were made subject to section 1256 by the Economic Recovery Act of 1981, were also designated as section 1256 contracts by the 1984 amendments. Thus, 60% of all gains and losses recognized by Applicant with respect to options and futures contracts are treated as long-term capital gain or loss and 40% as short-term capital gain or loss.

According to Applicant, the purpose of this change in the tax law with respect to options on U.S. Government securities was to eliminate certain tax abuses relating to the realization of short-term capital losses from options transactions. There is no evidence that Congress intended the amendment of section 1256 to limit the frequency with which registered investment companies may distribute capital gains from options transactions. Nevertheless, the new characterization of 60% of the gain from options transactions as long-term capital gain triggers section 19(b) of the Act and Rule 19b–1 thereunder.

Applicant asserts that none of the purposes of section 19(b) of the Act and Rule 19b–1 thereunder would be served by a strict application of these provisions to 60% of the capital gains generated by options and futures transactions. It is submitted that characterization of these gains as long-term capital gains should not make Applicant's shareholders more likely to confuse them with dividends paid from net interest income, since shareholders receive distributions of short-term capital gains more frequently than once a year. Furthermore, Applicant will continue clearly to distinguish any distribution of capital gains from distributions out of net interest income in accordance with section 19(a) of the Act.

Applicant believes that designating an appropriate part of each distribution of gains from options and futures transactions as long-term capital gain is

in the best interest of its shareholders since it will spread the benefit of the lower capital gains tax rate to persons who are shareholders at various points during the year. Alternativley, Applicant would designate its final distribution of gains with respect to a fiscal year as being the distribution of long-term capital gains. It is submitted that this approach could be disadvantageous to Applicant's shareholders because they might not receive the full tax benefit that section 1256 provides because a portion of the long-term capital gain realized on options and futures transactions may not be designated as such if the portion exceeds the amount of the final distribution.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or low that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Mangement, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. IC-14981 (File No. 812-6185)]

IDS Certificate Co., Inc.; Notice of Application

March 11, 1986.

Notice is hereby given that IDS Certificate Company, Inc. ("Applicant"), IDS Tower, Minneapolis, Minnesota 55474, registered under the Investment Company Act of 1940 ("Act") as a face-amount certificate company, filed an application on August 19, 1985, for an order of the Commission pursuant to section 6(c) of the Act exempting Applicant from certain provisions of Sections 28(a) and 28(i) of the Act, in order to permit Applicant to use an alternative method of calculating its reserves. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act thereunder for the text of the applicable provisions thereof.

Applicant, a wholly-owned subsidiary of IDS Financial Services Inc., a registered investment adviser and broker-dealer has issued face-amount certificates since 1941 and currently has 41 series of face-amount certificates outstanding. Applicant states that face-amount certificate companies are required by section 28(a)(2) of the Act to maintain, at all times, minimum certificate reserves on all outstanding face-amount certificates. A primary concern of Congress when the Act was adopted, Applicant asserts, was the adequacy and security of face-amount certificate company reserves, and so a uniform system of calculating reserves was imposed and minimum levels of reserves required, and the reserves of face-amount certificates companies could be invested only in certain types of "qualified assets."

Sections 28 and 28(i) of the Act specify the amount of reserves required to be maintained on fully paid and installment certificates. An interest rate of 3½% is used to calculate those reserves. The application states that reserve payments must be made in the same frequency as payments are made by the certificate holder and must be sufficient in amount, when accumulated at 3½% per annum compounded annually, to provide the minimum maturity or face-amount of the certificate when due. The 3½% per annum rate is also important to Applicant because it constitutes the maximum interest rate it can guarantee in advance on its certificate products. All other interest must be declared as additional interest or additional credits. According to Applicant, this concept is extremely confusing for certificate holders and potential customers who find it difficult to understand why the interest rates on certificate products must be split into guaranteed minimum interest (the 3½%) and additional interest or additional credits.

According to the application, when the Act's provisions were adopted, the 3½% rate of interest was a generous market rate of interest. The fixed 3½% interest rate now used in reserve calculations does not work well, according to the Applicant, in a rapidly changing financial environment and prevents it from offering its customers more modern products. Applicant asserts that these products are difficult if not impossible to offer with the current reserve calculations because depositing the customer's initial investment in Applicant's reserves would not be sufficient.

Applicant seeks an order pursuant to section 6(c) of the Act exempting it from the provisions of sections 28(a) and 28(i) as they relate to the 3½% reserve calculation. Applicant proposes that it be permitted to calculate its statutory reserves using a floating interest rate analogous to that now used by the insurance industry. On a date certain each year (such as April 1), Applicant would use the average of the Moody's Corporate Bond Yield Average-Monthly Average Corporates ("Moody's Index") for the preceding twelve months to determine the maximum interest rate which it could use to calculate its reserves for all certificates issued during the following 12-month period. Applicant could use a lower rate if it so desired. Once the average Moody's Index was determined, Applicant would weight the index by multiplying it by 80%. Applicant concedes that some weighting is appropriate to assure that a relatively conservative interest rate figure is used. The application uses the example that, if on April 1, 1986, the average Moody's Index for the preceding 12 months was 10.5%, Applicant would calculate the necessary reserves for all certificate products issued for the 12 months beginning May 1, 1986 based on a rate not in excess of 10.5% times 80%, or 8.4%. This process would continue each year.

Applicant believes the exemption requested is appropriate in the public interest and consistent with the protection of investors. By having a floating rate, Applicant's reserves would be aligned more closely with the prevailing economic conditions rather than being tied to an outmoded and arbitrary fixed interest rate. Applicant also submits that its proposal is appropriate in the public interest for the additional reasons mentioned above, such as the public demand for new products bearing higher interest rates. Insofar as investor protection is concerned, Applicant notes several conditions, which exist including the fact that the floating rate of interest to be used on Applicant's reserves will be a 12-month average to avoid unusual, temporary fluctuations. Furthermore, Applicant must also maintain a capital stock "cushion" of $250,000 pursuant to section 28(a)(1) of the Act. Beyond the $250,000 cushion, Applicant agreed in an earlier no-action letter request to the Commission (Investors Syndicate of America, Inc., March 22, 1974), to maintain an amount of unappropriated earned surplus and capital equal to at least 5% of net certificate reserves.

VOL 51
ISS 51
MR 17
1986
UMI

Finally, with respect to the Applicant's being consistent with the purposes fairly intended by Section 28 the application submits that the Applicant will continue to be bound by the statutory provisions of qualified assets that restricts Applicant's "qualified assets" to those allowed to District of Columbia life insurance companies.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than April 3, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-22987; File No. SR-CSE-86-1]

Self-Regulatory Organizations; Proposed Rule Change by the Cincinnati Stock Exchange Relating To Small Order Execution Guarantee

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 6, 1986, The Cincinnati Stock Exchange ("CSE") filed with the Securities and Exchange Commission the Proposed Rule Change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the Proposed Rule Change from interested persons.

I. The Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change.

The Proposed Rule Change increases from 1099 to 2099 the number of shares of a public agency market order which is guaranteed an automatic execution at the best available price represented by all Intermarket Trading System participants.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the Propose Rule Change is to improve the competitive position of the CSE in the national market system.

The Proposed Rule Change is consistent with section 6(b)(5) of the Securities Exchange Act of 1934 (the "Act") in that it is designed to perfect the mechanism of a free and open market and a national market system. The Proposed Rule Change is also consistent with section 11A(a)(1) of the Act because it assures economically efficient executions of securities transactions, thereby benefiting the investing public.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the Proposed Rule Change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others.

The Exchange has neither solicited nor received comments on the Proposed Rule Change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such Proposed Rule Change, or

(B) Institute proceedings to determine whether the Proposed Rule Change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC., 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the Propsosed Rule Change that are filed with the Commission, and all written communications relating to the Proposed Rule Change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 7, 1986.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 7, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

[CM-8/952]

Study Groups A and B of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that Study Groups A and B of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on April 3, 1986 at 9:30 a.m. in Room 1107, Department of State, 2201 C Street, NW., Washington, DC.

Study Group A deals with international telecommunications policy and services; Study Group B deals with preparations for the PC/WATTC Study Group meeting.

Study Group A will review matters relating to the January 1986 Working Party meetings.

Study Group B will review results and requirements for future activities following the recent preparatory committee meeting on PC-WATTC.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the

Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Prior to the meeting, persons who plan to attend should so advise the office of Mr. Earl Barbely, State Department, Washington, DC; telephone (202) 647-6700. All attendees must use the C Street entrance to the building.

Dated: March 7, 1986.

Domenick Iacovo,

Acting Director, Office of Technical Standards and Development.

BILLING CODE 4710-07-M

[CM-8/950]

Study Group D of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that Study Group D of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on April 16, 1986 in Room 1205, Department of State, 2201 C Street, NW., Washington, DC. The meeting will begin at 9:30 a.m.

The agenda for the meeting is as follows:

1. Consideration of contributions for U.S. CCITT Study Group XVII, (Geneva, April 21-25);
2. Any other business.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Prior to the meeting, persons who plan to attend should so advise the office of Mr. Earl Barbely, State Department, Washington, DC; telephone (202) 647-6700. All attendees must use the C Street entrance to the building.

Dated: March 6, 1986.

Domenick Iacovo,

Acting Director, Office of Technical Standards and Development.

BILLING CODE 4710-07-M

[CM-8/951]

Integrated Services Digital Network (ISDN) Joint Working Party and Study Group C of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that the ISDN Joint Working Party and Study Group C of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on April 15, 1986 in Room 1205, Department of State, 2201 C Street, NW., Washington, DC. The meeting will begin at 9:30 a.m.

The agenda for the meeting is as follows:

1. Report on Study Group XI and Study Group XVIII Reapporteur Meetings;
2. Consideration of contributions to Study Group XI Working Parties meeting (Geneva, April 30);
3. Consideration of contributions to Study Group XVIII (Geneva, June 30-July 18);
4. Any other business.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Prior to the meeting, persons who plan to attend should so advise the office of Mr. Earl Barbely, State Department, Washington, DC; telephone (202) 647-6700. All attendees must use the C Street entrance to the building.

Dated: March 6, 1986.

Domenick Iacovo,

Acting Director, Office of Technical Standards and Development.

BILLING CODE 4710-07-M

TENNESSEE VALLEY AUTHORITY

Paperwork Reduction Act of 1980, Forms Under Review by the Office of Management and Budget

AGENCY: Tennessee Valley Authority.

ACTION: Forms under review by the Office of Management and Budget.

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

Requests for information, including copies of the forms proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be directed to the Agency Clearance Officer and also to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; Attention: Desk Office for Tennessee Valley Authority, 395-7313.

Agency Clearance Officer: Mark R. Winter, Tennessee Valley Authority, 100 Lupton Building, Chattanooga, TN 37401; (615) 751-2524, FTS 858-2524.

Type of Request: Regular Submission
Title of Information Collection: Rebate Processing Form/Sales Data Form
Frequency of Use: On Occasion
Type of Affected Public: Individuals and small business
Small Business or Organizations Affected: Yes
Federal Budget Functional Category Code: 271
Estimated Number of Annual Responses: 1,200
Estimated Total Annual Burden Hours: 265

Need For and Use of Information: Increasing use of high-efficiency air conditioners (HEAC) in the Tennessee Valley must be encouraged to mitigate the costliness of high load growth on TVA's power system. TVA is encouraging consumer purchase of HEAC's through a rebate offering. These forms allow TVA to provide, monitor, and evaluate the rebate program.

Dated: March 10, 1986.

John W. Thompson,

Manager of Corporate Services, Senior Agency Official.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD3 86-06]

New York Harbor Traffic Management Advisory Committee; Meeting

AGENCY: Coast Guard, DOT..

ACTION: Notice of meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 USC App. I), notice is hereby given of a meeting of the New York Harbor Traffic Management Advisory Committee to be held on April 9, 1986, in the Conference Room, second floor, U.S. Coast Guard Marine Inspection Office, Battery Park, New York, beginning at 9:30 a.m.

The agenda for this meeting of the New York Harbor Traffic Management Advisory Committee is as follows:

1. Introduction of Vice Admiral P. A. Yost, Commander, Third Coast Guard District and Committee Sponsor.

2. Introduction of Committee members and Coast Guard officers.

3. Discussion of charter and purpose of the Committee by Captain L. N. Hein, Executive Director of Committee.

4. Short discussion on per-diem/travel entitlements for committee members and procedures for publishing of minutes by Captain R. J. Heym, Executive Secretary.

5. Election by popular vote of Committee Chairperson.

6. Report on USCG perception of Vessel Traffic Serivce (VTS) participation. The Coast Guard is particularly interested in obtaining views and recommendations on improving service, improving level of participation, and shortening the needed radio communications.

7. Establishment of rules for public participation in New York Harbor Traffic Management Advisory Committee meetings.

8. Discussion of items for next meeting by Committee Chairperson.

9. Discussion of dates and places of future meetings.

The New York Harbor Traffic Management Advisory Committee has been established by Commander, Third Coast Guard District to provide information, consultation, and advice with regard to port development, maritime trade, port traffic, and other maritime interests in the harbor. Members of the Committee serve voluntarily without compensation from the Federal Government.

Attendance is open to the interested public. With advance notice to the Chairperson, members of the public may make oral statements at the meeting. Persons wishing to present oral statements should so notify the Executive Director no later than the day before the meeting. Any member of the public may present a written statement to the Committee at any time.

FOR FURTHER INFORMATION CONTACT: Captain R. J. Heym, USCG, Executive Secretary, NY Harbor Traffic Management Advisory Committee, New York Vessel Traffic Service, Governors Island, New York, NY 10004; or by calling (212) 668-7954.

P.A. Yost,
Vice Admiral, United States Coast Guard Commander, Third Coast Guard District.

BILLING CODE 4910-14-M

Federal Aviation Administration

Noise Exposure Map; Receipt of Noise Compatibility Program and Request for Review

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noice exposure maps submitted by City of Lebanon, New Hampshire, for Lebanon Municipal Airport under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) and 14 CFR Part 150 are in compliance with applicable requirements. The FAA also announces that it is reviewing a proposed noise compatibility program that was submitted for Lebanon Municipal Airport under Part 150 in conjunction with the noise exposure map, and that this program will be approved or disapproved on or before September 3, 1986.

EFFECTIVE DATE: The effective date of the FAA's determination on the noise exposure maps and of the start of its review of the associated noise compatibility program is March 7, 1986. The public comment period ends May 6, 1986.

FOR FURTHER INFORMATION CONTACT: M. Ashraf Jan, Federal Aviation Administration, New England Region, Airports Division, ANE-610, 12 New England Executive Park, Burlington, MA 01803.

Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the noise exposure maps submitted for Lebanon Municipal Airport are in compliance with applicable requirements of Part 150, effective March 7, 1986. Further, FAA is reviewing a proposed noise compatibility program for that airport which will be approved or disapproved on or before September 3, 1986. This notice also announces the availability of this program for public review and comment.

Under section 103 of Title I of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator may submit to the FAA noise exposure maps which meet applicable regulations and which depict noncompatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. The Act requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies and persons using the airport.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations, Part 150, promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken, or proposes, for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The City of Lebanon, New Hampshire submitted to the FAA on February 28, 1986, noise exposure maps, descriptions and other documentation which were produced during Airport Noise Compatibility Planning (Part 150) Study at Lebanon Municipal Airport from October 1984 to November 1985. It was requested that the FAA review this material as the noise exposure maps, as described in section 103(a)(1) of the Act, and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under section 104 (b) of the Act.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by City of Lebanon. The specific maps under consideration are Figure 4-2 and Figure 4-3 along with the supporting documentation in the final report of the

VOL 51
ISS 51
MR 17
1986
UMI

Part 150 Study. The FAA has determined that these maps for Lebanon Municipal Airport are in compliance with applicable requirements. This determination is effective on March 7, 1986. FAA's determination on an airport operator's noise exposure maps is limited to a finding that the maps were developed in accordance with the procedures contained in appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of section 107 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under section 103 of the Act. The FAA has relied on the certification by the airport operator, under § 150.21 of FAR Part 150, that the statutorily required consultation has been accomplished.

The FAA has formally received the noise compatibility program for Lebanon Municipal Airport, also effective on March 7, 1986. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before September 3, 1986.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the noise exposure maps, the FAA's evaluation of the maps, and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, 800 Independence Avenue, SW., Room 617, Washington, DC

Federal Aviation Administration, 12 New England Executive Park, Airports Division, ANE–610, 12 New England Executive Park, Burlington, MA 01803

Mr. Marcel J. Theberge, Airport Manager, Lebanon Municipal Airport, Lebanon, N.H. 03784

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT.**

Issued in Burlington, Massachusetts, on March 7, 1986.

BILLING CODE 4910-81-M

[Docket S–796]

American Shipping, Inc.; Application for Permission To Operate in the Domestic Alaskan Oil Trade

Notice is hereby given that American Shipping, Inc. owner of the BEAVER STATE by application dated March 12, 1986, has applied for written permission under sections 805(a) and 506 of the Merchant Marine Act, 1936, as amended (Act), for its 91,849 DWT tanker SS BEAVER STATE to operate in the domestic Alaskan oil trade for two months. Four consecutive voyages from Valdez to the West Coast would carry crude oil commencing about March 20–23, 1986. The vessel will be operated pursuant to consecutive voyage charters with SPC Shipping Corp., a subsidiary of SOHIO.

The applicants submitted a letter from SOHIO dated March 12, 1986, requesting the owners of the BEAVER STATE to apply for a month waiver. By letter dated March 12, 1986, to the Maritime Administration, SOHIO also stated that delays due to bad weather and ship repairs have now resulted in an urgent need for additional tonnage in the short term as evidenced by the recent reduction in throughput of the Trans Alaska Pipeline. SOHIO has canvassed all available tonnage and asserts that no suitable vessel would be available to load March 20–23, 1986.

The BEAVER STATE was built with construction-differential subsidy and is operating under a long-term operating-differential subsidy contract. Written permission pursuant to section 805(a) of the Act is required for the proposed Alaskan service notwithstanding the fact that the vessel would not be eligible for operating-differential subsidy for the period. Payback of construction-differential subsidy will be required pursuant to section 506 of the Act.

It will also be necessary to extend the section 805(a) written permission granted to American to its related companies which are holders of long-term operating-differential subsidy contracts. These companies are Atlas Marine Company and Aquarius Marine Company.

Although publication of a Notice with respect to American's request for permission under section 506 is not required, the Maritime Administration believes that it is appropriate to provide an opportunity for interested parties to comment on American's application.

Any person, firm, or corporation having any interest in the application for sections 805(a) and 506 permission and desiring to submit comments concerning the application must file written comments in triplicate, to the Secretary, Maritime Administration, Room 7300, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590, by the close of business on March 20, 1986. If such comments deal with section 805(a) issues, they should be accompanied by a petition for leave to intervene. The petition shall state clearly and concisely

the grounds of interest and the alleged facts relied on for relief.

If no petitions for leave to intervene on section 805(a) issues are received within the specified time, or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held, the purpose of which will be to receive evidence under section 805(a) relative to whether the proposed operations (a) could result in unfair competition to any person, firm or corporation operating exclusively in the coastwise or intercoastal service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

(Catalog of Federal Domestic Assistance Program Nos. 20.804 Operating-Differential Subsidies (ODS) and 20.800 Construction-Differential Subsidies (CDS))

By Order of the Maritime Administrator.

Dated: March 13, 1986.

Georgia P. Stamas,

Secretary.

Veterans' Advisory Committee on Rehabilitation; Meeting

The Veterans Administration gives notice that a meeting of the Veterans' Advisory Committee on Rehabilitation, authorized by 38 U.S.C. 1521, will be held in Room 1010 of the Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, DC 20420, April 8 and 9, 1986. The sessions will begin at 9 a.m. The purpose of the meeting will be to review the administration of veterans' rehabilitation programs and provide recommendations to the Administrator.

The meeting will be open to the public up to the seating capacity of the conference room. Because of the limited seating capacity, it will be necessary for those wishing to attend to contact Dr. Carole J. Westerman, Executive Secretary, Veterans' Advisory Committee on Rehabilitation (phone 202–389–2886) prior to March 28, 1986.

Interested persons may attend, appear before, or file statements with the Committee. Statements, if in written form, may be filed before or within 10 days after meeting. Oral statements will be heard at 11:30 a.m. on April 9, 1986.

Dated: March 7, 1986.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

March 1, 1986.

This report is submitted in fulfillment of the requirements of section 1014(e) of the Impoundment Control Act of 1974 (Pub. L. 93–344). Section 1014(e) provides for a monthly report listing all budget authority for this fiscal year for which, as of the first day of the month, a special message has been transmitted to the Congress.

This report gives the status as of March 1, 1986, of 77 rescission proposals and 58 deferrals contained in the first three special messages of FY 1986. These messages were transmitted to the Congress on October 1 and November 25, 1985, and February 5, 1986.

Rescissions (Table A and Attachment A)

As of March 1, 1986, there were rescission proposals totaling $9,945.7 million pending before the Congress.

Deferrals (Table B and Attachment B)

As of March 1, 1986, $15,309.1 million in 1986 budget authority was being deferred from obligation and $105.2 million in 1986 outlays was being deferred from expenditure. Attachment B shows the history and status of each deferral reported during FY 1986.

Information From Special Messages

The special message containing information on the deferrals covered by this cumulative report is printed in the Federal Register listed below:

Vol. 50, FR p. 41100, Tuesday, October 8, 1985

Vol. 50, FR p. 49496, Monday, December 2, 1985

Vol. 51, FR p. 5830, Tuesday, February 18, 1986.

James C. Miller III,
Director.

BILLING CODE 4710-01-M

TABLE A

STATUS OF 1986 RESCISSIONS

	Amount (In millions of dollars)
Rescissions proposed by the President..............................	$9,945.7
Accepted by the Congress..	0
Rejected by the Congress..	0
Pending before the Congress..	$9,945.7

****

TABLE B

STATUS OF 1986 DEFERRALS

	Amount (In millions of dollars)
Deferrals proposed by the President.............................	$23,388.6
Routine Executive releases through March 1, 1986............. (OMB/Agency releases of $7,758.9 million and cumulative adjustments of $8.2 million)	-7,750.7
Overturned by the Congress...	-223.6
Currently before the Congress......................................	$15,414.3 a/

---

a/ This amount includes $105.2 million in outlays for a Department of the Treasury deferral (D86-30A).

OFFICE OF MANAGEMENT AND BUDGET

Budget Rescissions and Deferrals

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report three new rescission proposals totaling $61,377,000, six new deferrals of budget authority totaling $1,209,629,624, and five revised deferrals of budget authority totaling $394,054,125.

The rescissions affect programs in the Department of Energy.

The deferrals affect programs in the Departments of Agriculture, Energy, Interior, and Treasury, and Funds Appropriated to the President.

The details of these rescission proposals and deferrals are contained in the attached report.

Ronald Reagan

The White House,
March 12, 1986.

DEPARTMENT OF ENERGY

Energy Programs

Energy supply, research and development activities

Of the funds made available under this head in Public Law 99-190, $38,489,000 are rescinded.

Rescission Proposal No: R86-8

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

AGENCY: Department of Energy	New budget authority..... $1,772,271,000 (P.L. 99-141)
Bureau: Energy Programs	Other budgetary resources 553,357,559
Appropriation title and symbol: Energy supply, research and development 89X0224	Total budgetary resources 2,325,628,559 Amount proposed for rescission $ 38,489,000
OMB identification code: 89-0224-0-1-271 Grant program: ☐ Yes ☒ No	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other________
Type of account or fund: ☐ Annual ☐ Multiple-year ________ (expiration date) ☒ No-Year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other________

Justification: The purpose of Energy supply, research and development activities is to: (1) support long-term research and development on a mix of technologies that have the potential to provide adequate supplies of energy at reasonable cost, and (2) fund other research programs which provide significant benefits to the Government and the public. The proposed rescission consists of university construction projects which include: the Center for Science and Technology, Advanced Science Center, Energy and Mineral Research Center, Center for Energy and Biomedical Technology, Demonstration Center for Information Technologies, and the National Center for Chemical Research. A reassessment of current budgetary constraints and concern over the deficit leads to the conclusion that Federal funding for these projects should be terminated, especially since these projects are not in direct support of the Department's basic energy sciences research and development program. The President's Budget assumed these funds would be used for other purposes in 1987. The Department of Energy will identify other unobligated balances in order to maintain the 1987 program at the program levels estimated in the President's 1987 Budget.

Estimated Program Effect: None

Rescission Proposal No: R86-77

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

AGENCY:
Department of Energy

Bureau:
Energy Programs

Appropriation title and symbol:

Energy conservation 1/

89X0215

OMB identification code:

89-0215-0-1-999

Grant program: ☐ Yes ☒ No

Type of account or fund:

☐ Annual

☐ Multiple-year ______ (expiration date)

☒ No-Year

New budget authority..... $ 446,721,492
(P.L. 99-190)

Other budgetary resources 23,059,807

Total budgetary resources 469,781,299

Amount proposed for rescission $ 9,816,000

Legal authority (in addition to sec. 1012):

☐ Antideficiency Act

☐ Other ______

Type of budget authority:

☒ Appropriation

☐ Contract authority

☐ Other ______

Justification: This account funds a variety of energy conservation research and development activities including buildings and community systems, industry, transportation, and multi-sector research. It also funds assistance to State and local governments for the weatherization of schools, hospitals, and low-income dwellings. The rescission consists of previously deferred construction funds that were added by the Congress. The addition of construction projects through legislative action bypasses the normal, and important, peer-review process for such funding. It also is not part of the research program to which the funds were added. As non-priority activities, these projects are also inconsistent with the Administration's effort to reduce the Federal deficit pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985. The President's Budget assumed these funds would be used for other purposes in 1987. The Department of Energy will identify other unobligated balances in order to maintain the 1987 program at the program levels estimated in the President's 1987 Budget.

Estimated Program Effect: None

Outlay Effect (in thousands of dollars):

1/ This account is also the subject of a deferral in 1986 (D86-9A) and was the subject of a deferral in 1985 (D85-30B) and a rescission proposal in 1985 (R85-87).

D86-80

DEPARTMENT OF ENERGY

Energy Programs

Fossil energy research and development

Of the funds made available under this head in P.L. 99-190, $13,072,000 are rescinded.

Rescission Proposal No: R86-80

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

AGENCY: Department of Energy	P.L. 99-190 310,970,912 **New budget authority.....** $ 15,000,000 (P.L. 98-146)
Bureau: Energy Programs	**Other budgetary resources** 42,235,103
Appropriation title and symbol: Fossil energy research and development 1/ 89X0213	**Total budgetary resources** 368,206,015 **Amount proposed for rescission** $ 13,072,000
OMB identification code: 89-0213-0-1-271 **Grant program:** ☐ Yes ☒ No	**Legal authority (in addition to sec. 1012):** ☐ Antideficiency Act ☐ Other__________
Type of account or fund: ☐ Annual ☐ Multiple-year __________ (expiration date) ☒ No-Year	**Type of budget authority:** ☒ Appropriation ☐ Contract authority ☐ Other__________

Justification: This account funds research and development activities in coal, petroleum and unconventional gas. The amount proposed for rescission consists of previously deferred funds for two projects: operation and testing of gas stream clean-up equipment at the Waltz Mill coal gasification test facility, and research and development of 7.5 Mw phosphoric acid fuel cells employing air-cooled technology. These projects support the development of new fossil energy technologies beyond the proof-of-concept stage. The Administration believes that further development of these technologies should be the responsibility of the private sector. The Department of Energy will identify other unobligated balances in order to maintain the 1987 program at the program levels estimated in the President's 1987 Budget.

Estimated Program Effect: None

The International disaster assistance account allows the President to respond to humanitarian disaster relief efforts throughout the world. The African Famine Relief Supplemental, P.L. 99-10, makes available funds for disaster assistance activities provided that a comprehensive country-by-country plan is established to ensure effective use of funds. As plans are developed, funds will be made available for African relief and other disaster assistance obligations. To date, $31.6 million of the $35 million has been made available for recovery aid to famine victims in Africa. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

Type of account or fund:
☐ Annual
☐ Multiple-year ______ (expiration date)
☒ No-Year

New budget authority..... $2,197,923,000
(P.L. 99-190)

Other budgetary resources ______

Total budgetary resources 2,197,923,000

Amount to be deferred:
Part of year $______
Entire year 700,000,000

Legal authority (in addition to sec. 1013):
☐ Antideficiency Act
☐ Other______

Type of budget authority:
☐ Appropriation
☐ Contract authority
☒ Other Permanent indefinite authority to borrow

Justification: This fund was established in 1965 (Public Law 89-117) pursuant to Section 517 of Title V of the Housing Act of 1949, as amended. This fund may be used to insure or guarantee rural housing loans for single family homes, rental and cooperative housing, farm labor housing, rural housing sites, and to make rental assistance payments authorized by Section 521(a). Loan programs are limited to rural areas that include towns, villages, and other places that are not part of an urban area and have a population not in excess of 2,500 inhabitants, or is in excess of 2,500 but not in excess of 10,000 if rural in character, or has a population in excess of 10,000 but not more than 20,000 and is not within a standard metropolitan statistical area and has a serious lack of mortgage credit for low- and moderate-income borrowers.

The deferral is part of the administration's efforts to reduce the size and scope of Federal credit programs and their adverse impact on the management of future fiscal policy. The $29 billion portfolio of direct and insured loans has an average effective interest rate of only five percent and represents a subsidy by the Government of over $2.6 billion during 1986. Large future year outlay savings can be achieved by reducing the direct and insured loan authorization levels in the Rural Housing Insurance Fund as proposed in the 1987 Budget for 1986 and 1987. This deferral action is taken pending Congressional action on supplemental language proposed in the 1987 Budget to reduce the direct lending program.

Estimated Program Effect: The proposal would reduce borrowing requirements.

Total budgetary resources 147,167,125*

Amount to be deferred:
Part of year $______
Entire year 108,806,125*

Legal authority (in addition to sec. 1013):

☒ Antideficiency Act

☐ Other______

Type of budget authority:

☒ Appropriation

☐ Contract authority

☐ Other______

Justification: *Purchasers of National Forest timber are required to deposit the estimated cost to the Forest Service for disposing of brush and other debris resulting from timber cutting operations pursuant to 16 U.S.C. 490. The deposits becoming available in the current year are estimated and the related disposal operations are planned for the following year. Efficient program planning and accomplishment is facilitated by operating a stable program well within the funds available in any one year for this purpose. Much of the brush disposal work for which fees are collected cannot be done in the same year because of weather conditions or because harvesting is not completed. The Forest Service is planning for a stable year-to-year program which will require $48.0 million in 1986. The current fiscal year reserve of $108.8 million is established pursuant to the provisions of the Antideficiency Act (31 U.S.C. 1512) as a reserve for contingencies.

Estimated Program Effect: None

Outlay Effect: None

---

* Revised from previous report.

1/ This account was the subject of a similar deferral in 1985 (D85-5 and D85-5A).

D86-2A

Supplementary Report

Report Pursuant to Section 1014(c) of Public Law 93-344

This report updates Deferral No. D86-2 transmitted to Congress on October 1, 1985.

This increases by $30,893,347 the previous deferral of $77,912,778 in the Forest Service's Expenses, brush disposal account, resulting in a total deferral of $108,806,125. The additional funds can be deferred because more unobligated funds and recoveries were made available than previously anticipated.

Type of budget authority:
☒ Appropriation
☐ Contract authority
☐ Other ______

Justification: Funds are received from States, counties, timber sale operators, individuals, associations, and others. These funds are expended by the Forest Service as authorized by law and the terms of the applicable trust agreements. The work consists of protection and improvement of the National Forest System and it benefits the national forest users, research investigations, reforestation, and administration of private forest lands. Much of the work for which deposits have been made cannot be done, or is not planned to be done, during the same year that the collections are being realized. Examples include areas where the timber operators have not completed all of the contract obligations during the year funds are deposited. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

D86-9A

Supplementary Report

Report Pursuant to Section 1014(c) of Public Law 93-344

This report updates Deferral No. D85-9 transmitted to Congress on October 1, 1985.

This revision to a deferral of the Department of Energy's Energy conservation account increases the amount previously reported as deferred from $9,880,000 to $36,782,000. This net increase of $26,902,000 is attributed to funding for low priority projects included in the 1986 appropriation, $9,816,000 of which is now being withheld pending rescission.

Justification: *This account funds a variety of energy research and development activities including buildings and community systems, industry, transportation, and multi-sector research. It also funds assistance to State and local governments for the weatherization of schools, hospitals, and low-income dwellings. The deferred funds consist of (1) $6,556,000 from recoveries of prior year obligations for projects and activities which were completed or terminated, and (2) $30,226,000 for various research and development activities which are inconsistent with the Administration's policies, programs, and priorities, particularly in a period of fiscal constraint. The President's 1987 Budget proposes to utilize these funds to offset 1987 appropriation requirements. A portion of these funds ($9,816,000) is now being withheld pending rescission, but no adjustment is necessary to the 1987 Budget.

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

AGENCY: Department of Energy	New budget authority..... $ 3,281,000 (P.L. 99-141)
Bureau: Power Marketing Administration	Other budgetary resources 864,197
Appropriation title and symbol: Alaska Power Administration, Operation and maintenance 89X0304	Total budgetary resources 4,145,197
	Amount to be deferred: Part of year $ ____ Entire year 400,000
OMB identification code: 89-0304-0-1-871	**Legal authority** (in addition to sec. 1013): ☒ Antideficiency Act ☐ Other ____
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year ____ (expiration date) ☒ No-Year	**Type of budget authority:** ☒ Appropriation ☐ Contract authority ☐ Other ____

Justification: This account funds the activities of the Alaska Power Administration (APA), an agency which operates and sells power from two hydroelectric projects located in Alaska. In 1985, $400,000 of appropriated funds were not used for procurements because contract costs were lower than anticipated. Consequently, the level of unobligated funds carried into 1986 was $400,000 higher than previously planned. There currently is no plan to use these funds in 1986, although the funds will be released later this year if a critical need arises. If a critical need does not arise, however, the funds will be deferred until 1987. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

Estimated Program Effect: None

	Amount to be deferred: Part of year $________ Entire year 43,466,000*
OMB identification code: 89-5068-0-2-271	**Legal authority** (in addition to sec. 1013): ☒ Antideficiency Act ☐ Other________
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year ________ (expiration date) ☒ No-Year	**Type of budget authority:** ☒ Appropriation ☐ Contract authority ☐ Other________

Justification: *This account funds the activities of the Western Area Power Administration (WAPA), which markets power in 15 western States from power generating projects principally operated by the Bureau of Reclamation and the Corps of Engineers. WAPA activities also include the construction, operation, and maintenance of approximately 16,000 miles of power transmission lines. Funds are available for deferral for the following reasons:

- Almost $21 million became available as a result of a change in plans for power exchanges with Pacific Gas and Electric Company.
- Over $6 million became available because contract awards for construction of power transmission facilities were lower than budgeted.
- Over $16 million became available because less money was required to purchase power.

There is currently no plan to use any of these funds in 1986, although the funds will be released later this year if a critical need arises. If a critical need does not arise, however, the funds will be deferred until 1987. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

Deferral No: D86-63

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

AGENCY: Department of Energy	**New budget authority.....** $ 410,366,000 (P.L. 99-141)
Bureau: Departmental Administration	**Other budgetary resources** 29,443,467
Appropriation title and symbol:	**Total budgetary resources** 439,809,467
Departmental administration 1/ 89X0228	**Amount to be deferred:** **Part of year** $ ______ **Entire year** 393,000
OMB identification code: 89-0228-0-1-276 **Grant program:** ☐ Yes ☒ No	**Legal authority (in addition to sec. 1013):** ☒ Antideficiency Act ☐ Other______
Type of account or fund: ☐ Annual ☐ Multiple-year ______ (expiration date) ☒ No-Year	**Type of budget authority:** ☒ Appropriation ☐ Contract authority ☐ Other______

Justification: Appropriations for Departmental Administration fund several policy development and program support functions necessary to ensure effective operation of the Department of Energy. The obligation of funds for the Office of Minority Economic Impact, an activity generally responsible for encouraging minority participation in Department of Energy programs, will be delayed until 1987 because of the lead time required to plan and implement the Minority Educational Institutions Program. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

Estimated Program Effect: None

Outlay Effect: None

1/ This account was the subject of an earlier deferral in 1986 (D86-15) and a similar deferral (D85-43) and a rescission proposal in 1985 (R85-98).

Deferral No: D86-64

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

AGENCY: Department of the Interior	**New budget authority.....** $ 98,400,000 (P.L. 99-190)
Bureau: National Park Service	**Other budgetary resources** 184,754,161
Appropriation title and symbol:	**Total budgetary resources** 283,154,161
Land acquisition and State assistance 14X5035	**Amount to be deferred:** **Part of year** $ ______ **Entire year** 1,893,000
OMB identification code: 14-5035-0-2-303 **Grant program:** ☒ Yes ☐ No	**Legal authority (in addition to sec. 1013):** ☒ Antideficiency Act ☐ Other______
Type of account or fund: ☐ Annual ☐ Multiple-year ______ (expiration date) ☒ No-Year	**Type of budget authority:** ☒ Appropriation ☒ Contract authority ☐ Other______

Justification: This appropriation provides (1) funds to acquire land for inclusion in the National Park System, and (2) grants to others for outdoor recreation purposes. The 1987 Budget proposes to pay administrative expenses for prior-year grants to States and administrative expenses for land acquisition from unobligated prior-year balances. Accordingly, $893,000 of the Secretary's contingency fund for grants and $1,000,000 of administrative expense funds are being deferred to cover estimated administrative costs in 1987. These funds are not needed to meet anticipated requirements in 1986. Appropriation language is proposed to make contingency grant funds available for administrative expenses. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

Estimated Program Effect: Funding availability for outdoor recreation grants from the Secretary's contingency fund will be reduced by $893,000. No significant program impacts are anticipated. The $1,000,000 for administrative expense funding can be deferred without reducing the 1986 operating level by using unobligated balances of prior-year administrative expense funds.

D86-30B

Supplementary Report

Report Pursuant to Section 1014(c) of Public Law 93-344

This report updates Deferral No. D86-30A transmitted to Congress on February 5, 1986.

This increases by $19,774,149 the previous deferral of $105,225,851 in the Department of the Treasury's Local government fiscal assistance trust fund account, resulting in a total deferral of $125,000,000. The funds are payments withheld from various local governments due to annexations or disincorporations, or for non-compliance with General Revenue Sharing requirements.

Deferral No: D86-30B

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of the Treasury	New budget authority..... $4,185,000,000* (P.L. 99-160)
Bureau: Office of Revenue Sharing	Other budgetary resources -125,606,000*
Appropriation title and symbol: Local government fiscal assistance trust fund 1/ 20X8111	Total budgetary resources 4,059,394,000*
	Amount to be deferred: Part of year $________* Entire year 125,000,000* 2/
OMB identification code: 20-8111-0-7-851	**Legal authority (in addition to sec. 1013):** ☒ Antideficiency Act ☒ Other 31 U.S.C. 6701-6724, particularly 31 U.S.C. 6704(c)
Grant program: ☒ Yes ☐ No	
Type of account or fund: ☐ Annual ☐ Multiple-year ______ (expiration date) ☒ No-Year	**Type of budget authority:** ☒ Appropriation ☐ Contract authority ☐ Other ______

Justification: *The Local government fiscal assistance trust fund is the vehicle for disbursement of General Revenue Sharing funds. This deferral represents payments withheld from various governments involved in annexations or disincorporations and for reasons of non-compliance with the requirements of the Local Government Fiscal Assistance Amendments of 1983. The release of these funds is contingent upon adherence by the various governments to the compliance regulations, and determinations as to which higher level of government is eligible to receive those funds withheld because of annexations and disincorporations.

Estimated Program Effect: None

Outlay Effect: None

---

* Revised from previous report.

1/ This account is subject to another deferral (D86-31A) and was the subject of a similar deferral in 1985 (D85-12).

2/ Deferral of outlays only.

D86-31A

Supplementary Report

Report Pursuant to Section 1014(c) of Public Law 93-344

This report updates Deferral No. D86-31 transmitted to Congress on November 25, 1985.

This increases by $25,650,791 the previous deferral of $54,349,209 in the Department of the Treasury's Local government fiscal assistance trust fund account, resulting in a total deferral of $80,000,000. The funds are held in reserve to permit the Secretary of the Treasury to satisfy legitimate claims that past revenue sharing payments have been too small without recurring recomputations of the entitlements of the over 39,000 governments.

Deferral No: D86-31A

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

AGENCY: Department of the Treasury	**New budget authority**..... $4,185,000,000* (P.L. 99-160)
Bureau: Office of Revenue Sharing	**Other budgetary resources** -125,606,000*
Appropriation title and symbol: Local government fiscal assistance trust fund 1/ 20X8111	**Total budgetary resources** 4,059,394,000*
	Amount to be deferred: Part of year $______* Entire year 80,000,000*
OMB identification code: 20-8111-0-7-851	**Legal authority** (in addition to sec. 1013): ☒ Antideficiency Act ☒ Other 31 U.S.C. 6701-6724, particularly 31 U.S.C. 6702(d)
Grant program: ☒ Yes ☐ No	
Type of account or fund: ☐ Annual ☐ Multiple-year ______ (expiration date) ☒ No-Year	**Type of budget authority:** ☒ Appropriation ☐ Contract authority ☐ Other______

Justification: *The Secretary of the Treasury must hold in reserve an amount sufficient enough to meet valid claims from local governments that past revenue sharing payments have been too small. Because the total amount appropriated for all governments is fixed, the alternative to such a reserve is recurring recomputations of the entitlements of the over 39,000 governments for prior entitlement periods. This cumulative unobligated reserve from entitlement periods 1-17 is available to the Secretary of the Treasury to satisfy legitimate claims against the Trust Fund for any prior entitlement periods. After adjusting for such releases from the reserve, the deferred amount projected to carry over into FY 1986 is $80.0 million. This unobligated amount will be further reduced whenever the Secretary determines the amount is adequate to meet forseeable liabilities against the Trust Fund and will be paid to recipients as part of the regular distribution.

MR 17
1986
UMI

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily Federal Register as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

Title	Price	Revision Date
1, 2 (2 Reserved)	$5.50	Jan. 1, 1986
3 (1984 Compilation and Parts 100 and 101)	7.50	Jan. 1, 1985

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Presidential Documents

Title 3—

The President

Proclamation 5447 of March 14, 1986

Freedom of Information Day, 1986

By the President of the United States of America

A Proclamation

A fundamental principle of our Government is that a well-informed citizenry can take part in the important decisions that set the present and future course of the Nation. Our Founding Fathers provided in the Constitution and in the Bill of Rights freedoms for all Americans, many of which are promoted by open access to information. Numerous Acts of Congress, including the Freedom of Information Act, are intended to further this principle. Most Americans, having never known any other way of life, take for granted open access to information about their Federal, State, and local governments. They also understand that some secrecy is necessary to protect both national security and the right to privacy.

March 16 is the anniversary of the birth of James Madison, our fourth President and one of the principal figures in the Constitutional Convention. Madison eloquently expressed the guarantees in the Bill of Rights, in particular in the freedoms of religion, speech, and of the press protected by the First Amendment. He understood the value of information in a democratic society, as well as the importance of its free and open dissemination. He believed that through the interaction of the Government and its citizens, facilitated by a free press and open access to information, the Government could be most responsive to the people it serves. Surely the American experience has proved him right.

This year marks the twentieth anniversary of the enactment by the Federal government of the Freedom of Information Act. On President Madison's birthday, it is particularly fitting that we recognize the value of reasonable access to information in our political process.

The Congress, by House Joint Resolution 371, has designated March 16, 1986, as "Freedom of Information Day" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim March 16, 1986, as Freedom of Information Day, and I call upon the people of the United States and all Federal, State, and local government officials to observe this week with appropriate programs and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this fourteenth day of March, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 51, No. 52
Tuesday, March 18, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

FEDERAL LABOR RELATIONS AUTHORITY

5 CFR Ch. XIV

Office Addresses and Geographic Jurisdictions; Cleveland Sub-Regional Office; Address Change

AGENCY: Federal Labor Relations Authority (including the General Counsel of the Federal Labor Relations Authority) and Federal Service Impasses Panel.

ACTION: Amendment of rules and regulations.

SUMMARY: This document amends Appendix A, paragraph (d)(5)(a) (48 FR 45373) of the rules and regulations of the Federal Labor Relations Authority (Authority), General Counsel of the Federal Labor Relations Authority (General Counsel), and Federal Service Impasses Panel (Panel), published at 5 CFR Part 2400 *et seq.*, (1985) to establish a new location and mailing address for the Authority's Cleveland, Ohio Sub-Regional Office within the Authority's Chicago, Illinois Regional Office. The Cleveland, Ohio Sub-Regional Office telephone numbers have not been changed.

EFFECTIVE DATE: March 12, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald J. Watkins, Deputy to the General Counsel and the Associate General Counsel (202) 382-0744.

SUPPLEMENTARY INFORMATION: Effective January 28, 1980, the Authority, General Counsel and Panel published at 45 FR 3482, January 17, 1980, final rules and regulations to govern the processing of cases by the Authority, General Counsel and Panel under Chapter 71 of Title 5 of the United States Code (5 CFR Part 2400 *et seq.* (1985)). These rules and regulations are required by Title VII of the Civil Service Reform Act of 1978 and are set forth in 5 CFR Part 2400 *et seq.* (1985). Appendix A, paragraph (d) of the foregoing rules and regulations sets forth office addresses and telephone numbers of the Regional Directors of the Authority. This amendment sets forth the new location and mailing address of the Cleveland, Ohio Sub-Regional Office of the Authority. The Cleveland, Ohio Sub-Regional Office telephone numbers have not been changed. Accordingly, in Appendix A to Chapter XIV, paragraph (d)(5)(a) of the Authority, General Counsel, and Panel rules and regulations (5 CFR Part 2400 *et seq.* (1985)) is revised to read as follows:

Appendix A to 5 CFR Ch. XIV—Current Addresses and Geographic Jurisdictions

* * * * *

(d) The Office addresses of Regional Directors of the Authority are as follows:

* * * * *

(5) * * *

* * * * *

(a) *Cleveland, Ohio Sub-Regional Office:* Suite 850, 1 Cleveland Center, 1375 East 9th Street, Cleveland, Ohio 44114. Telephone: FTS-942-2114, Commercial-(216) 522-2114.

(5 U.S.C. 7134)

Dated: March 12, 1986.

John C. Miller,
General Counsel, Federal Labor Relations Authority.

BILLING CODE 6727-01-M

DEPARTMENT OF AGRICULTURE

Commodity Credit Corpation

7 CFR Part 1468

Payment Program for Mohair (1982-1985)

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to adopt as a final rule without change an interim rule which was published in the Federal Register on November 14, 1985 (50 FR 47031). The interim rule amended the regulations at 7 CFR Part 1468 which set forth the requirements governing the Commodity Credit Corporation's (CCC) price support program for mohair. The interim rule amended the program with respect to: (1) Marketings of shorn mohair eligible for price support payments; (2) definitions which are applicable to the program; (3) producer eligibility for price support payments; (4) contents of sales documents which are submitted in support of price support payment applications; and (5) the deletion of certain obsolete references.

EFFECTIVE DATE: Effective March 18, 1986.

FOR FURTHER INFORMATION CONTACT: Jerry W. Newcomb, Director, Emergency Operations and Livestock Programs Division, Agricultural Stabilization and Conservation Service, United States Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. Telephone (202) 447-5621.

SUPPLEMENTARY INFORMATION: Information collection requirements contained in this regulation (7 CFR Part 1468) have been approved by the Office of Management and Budget in accordance with the provisions of 44 U.S.C. Chapter 35 and OMB Number 0560-0023 has been assigned.

This final rule has been reviewed under USDA procedures implementing Executive Order 12291 and Departmental Regulation No. 1512-1 and has been classified as "not major." It has been determined that these program provisions will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State, or local governments agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal assistance program to which this notice applies are: Commodity Loans and Purchases; 10.051; as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this final rule since CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

It has been determined by an environmental evaluation that this action will have no significant impact on

VOL 51
ISS 52
MR 18
1986
UMI

the quality of human environment. Therefore, neither an environmental assessment nor an Environmental Impact Statement is needed.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

Interim Rule

An interim rule amending the Commodity Credit Corporation's (CCC) price support program for mohair was published in the **Federal Register** on November 14, 1985 (50 FR 47031). This interim rule provided for a 60-day comment period. No comments were received.

The interim rule made several amendments with respect to the terms and conditions of the 1985 price support program for mohair. Most of the changes which were included in the interim rule were the result of a review conducted by the Office of the Deputy Administrator, State and County Operations (DASCO) of the Agricultural Stabilization and Conservation Service (ASCS) of a select number of 1983 shorn wool applications for payment and supporting documentation which revealed marketing practices which defeat the purpose of the program. Since the mohair program is similar to the wool program, ASCS is concerned that mohair producers may adopt marketing practices similar to those which have been adopted by some wool producers and use these practices to defeat the purpose of the mohair price support program. The remaining changes involved the deletion of certain obsolete references.

The interim rule amended the regulations at 7 CFR Part 1468 by: (1) Adding the definitions of "Deputy Administrator", "grease mohair", "mohair incentive payment rate", "shorn mohair", and "family member" and amending the definition of "sales document"; (2) providing that the price support payment rate for shorn mohair shall be determined and announced by the Executive Vice President, CCC, or a designee, at the end of each specified marketing year; (3) clarifying that shorn mohair which has been processed in any manner into a mohair product, as determined by DASCO, shall not be eligible for price support payments; (4) providing that, in order to be considered a bona fide marketing, the mohair must be sold to a person or business engaged in the business of buying and selling grease basis mohair and the sale of the mohair must be based upon a reasonably appraised price of mohair; (5) providing that the sale of mohair by a producer to a family member or to a business in which the producer has more than a 20 percent interest is not considered a bona fide marketing; and (6) providing that any sales documents which are prepared by the purchaser of mohair must have the original signature of the purchaser or authorized representative. The interim rule also deleted obsolete regulations which were applicable to the mohair program for the 1974–1977 marketing years.

No comments were received by the Department with respect to the interim rule. Therefore, after reviewing the provisions of the interim rule, it has been determined that the interim rule should be adopted as a final rule without change.

List of Subjects in 7 CFR Part 1468

Price support programs, Mohair.

Final Rule

Accordingly, the interim rule published at 50 FR 47031, which amended 7 CFR 1468, is hereby adopted as a final rule without change.

Signed at Washington, D.C., on March 11, 1986.

Milt J. Hertz,

Acting Executive Vice President, Commodity Credit Corporation.

Servicing of Real Estate Security

Correction

In FR Doc. 86-2029 beginning on page 4132 in the issue of Monday, February 3, 1986, make the following corrections:

1. On page 4132, first column, in the "SUMMARY," fourth line, insert "secured" between "loans" and "by".

2. On page 4136, first column, in the section heading following amendatory instruction 28, "§ 1943.135" should read "§ 1945.135".

BILLING CODE 1505-01-M

---

7 CFR Part 1955

Property Management; Homestead Protection; Food Security Act of 1985

AGENCY: Farmers Home Administration, USDA.

ACTION: Interim rule with request for comments.

SUMMARY: The Farmers Home Administration amends its regulations to provide for a dwelling retention program for leasing with the right of first refusal, for CONACT residential property with a dwelling to a farmer program borrower. This action is necessary to implement the applicable part of Section 1321 of the "Food Security Act of 1985" (Pub. L. 99-198). The major effect will be to assist certain borrowers that have lost or are losing their farms and have an immediate need for housing with their transition from farming to other occupations.

DATES: Interim rule effective March 18, 1986. Comments must be submitted on or before April 17, 1986.

ADDRESSES: Submit written comments, in duplicate, to the Office of the Chief, Directives Management Branch, Farmers Home Administration, USDA, Room 6348, South Agriculture Building, 14th and Independence Avenue, SW., Washington, DC 20250. All written comments made pursuant to this date will be available for public inspection during regular working hours at the above address.

FOR FURTHER INFORMATION CONTACT: William Krause, Director, Emergency Loan Division, Farmers Home Administration, USDA, Room 5420, Washington, DC 20250, Telephone: (202) 382-1632.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512-1, which implements Executive Order 12291, and has been determined to be nonmajor because their will not be an annual effect on the economy of $100 million or more; a major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions, or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Intergovernmental Consultation

1. For the reasons set forth in the final rule related to Notice 7 CFR Part 3015, Subpart V (48 FR 29115, June 24, 1983) and FmHA Instruction 1940-J, "Intergovernmental Review of Farmers Home Administration Programs and Activities" (December 23, 1983), Emergency Loans, Farm Operating Loans, and Farm Ownership Loans are excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

2. The Soil and Water Loans Program is subject to the provisions of Executive Order 12372 and FmHA Instruction 1940-J.

Programs Affected

These changes affect the following FmHA programs as listed in the Catalog of Federal Domestic Assistance:

10.404—Emergency Loans
10.406—Farm Operating Loans
10.407—Farm Ownership Loans
10.416—Soil and Water Loans

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91-190, an Environmental Impact Statement is not required.

Discussion of Interim Rule

FmHA is implementing this interim rule immediately with a 30 day comment period. It is the policy of this Department that rules relating to public property, loans, grants, benefits or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. The "Food Security Act of 1985," Pub. L. 99-198 provided for dwelling retention. It is essential that this provision of the "act" be implemented at once to provide immediate housing assistance for financially stressed farmers who have lost or will lose their farms, and will lose their permanent residential dwelling through foreclosure, voluntary conveyance, or bankruptcy proceeding. Field offices are already receiving requests for this provision. The Agency must provide immediate guidance by revising the regulations. It is urgent that these regulations become effective on publication so these farmers and their families can make plans for the transition to other occupations and have a place to live in the interim period and assist in removing some of the emotional stress involved in such a drastic change in lifestyle. The Government has a social responsibility to immediately assist farmers that have gone broke and would otherwise be forced out of their homes. This provision in the regulations will only provide assistance to those farmers that do not own other suitable housing. Further, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this interim rule action are impractical, and good cause is found for making this interim rule effective less than 30 days after publication in the **Federal Register.**

Highlights

The Farmers Home Administration amends its farmer program insured loan servicing regulations to implement the applicable provisions of Section 1321 of the "Food Security Act of 1985" (Pub. L. 99-198) to provide a farmer program dwelling reacquisition program. This program applies to CONACT inventory property that was or will be acquired as a result of FmHA foreclosure, voluntary conveyance or voluntary conveyance from a trustee in bankruptcy, with the borrower still in possession of the residence. A farmer program borrower meeting the eligibility requirements may apply to lease, with an option to purchase, the residence and a reasonable amount of adjoining land:

The applicant must have had gross annual farm sales of at least $40,000 in at least 2 calendar years during the 5 year period January 1, 1981, through December 31, 1985.

The applicant and spouse must have received at least 60% of their gross annual income from the farming operation during at least 2 years of the 5 year period.

The applicant must have possessed and occupied the dwelling and engaged in farming or ranching operations during the 5 year period.

The applicant must personally occupy the dwelling as his/her principal residence and must not own other suitable housing. Other eligibility requirements are set out in the regulation.

List of Subjects in 7 CFR Part 1955

Foreclosure, Government acquired property, Government property management, Sale of government acquired property, Surplus government property.

Accordingly, Chapter XVIII, Title 7, Code of Federal Regulations is amended as follows:

PART 1955—PROPERTY MANAGEMENT

1. The authority citation for Part 1955 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Liquidation of Loans Secured by Real Estate and Acquisition of Real and Chattel Property

2. § 1955.18 is amended by adding paragraph (h) to read as follows:

§ 1955.18 Actions required after acquisition of property.

* * * * *

(h) *Dwelling retention.* All those who were personally liable for a Farmer Program loan will be sent a letter similar to Exhibit G of this Subpart (available in any FmHA office), certified mail, return receipt requested, when CONACT real property with a dwelling is acquired as a result of foreclosure by FmHA, voluntary conveyance, or conveyance by a trustee in bankruptcy. This applies to dwellings located on or off the farm, so long as the dwelling(s) was occupied by those personally liable for the debt during the period from January 1, 1981, through December 31, 1985, and continues to be occupied by them.

Subpart B—Management of Property

3. § 1955.66 is amended by revising paragraph (a)(2)(iii) to read as follows:

§ 1955.66 Lease of real property.

* * * * *

(a) * * *

(2) * * *

(iii) *Farm property.* Any CONACT property with a dwelling (whether located on or off the farm) that is possessed and occupied as a principal residence by one who is personally liable for a Farmer Program loan must be considered for dwelling retention under § 1955.73 of this subpart prior to lease under this section. The County Supervisor may approve the lease of farm property. Special Stipulations will be made a part of farm leases to provide that the Government may terminate the lease in order to sell the farm, but in that event the lesses will retain the right to harvest growing crops. Rental payments will be prorated between the Government and the purchaser of the property. The County Supervisor shall report all leases of farms to the local Agricultural and Stabilization and Conservation Service (ASCS) office and all subsequent changes in leases or sale of the property. Leases for mineral exploration and/or development will be on a form approved by OGC. In approval of a lease for mineral purposes, consideration will be given to impact on the environment, preservation of land for agricultural purposes as

VOL 51

1986
UMI

required by Subpart G of Part 1940 of this chapter, as well as effect on sale of the property. The Administrator may issue directives (available in any affected FmHA office) restricting the leasing of property which could be used to produce agricultural products determined to be in surplus supply. Chattel property will not normally be leased unless it is attached to the real estate as a fixture or would normally pass with the land.

* * * * *

4. § 1955.73 is added to read as follows:

§ 1955.73 Farmer Program dwelling retention.

CONACT property that is presently in inventory and available for lease and that was acquired as a result of a foreclosure by FmHA, a voluntary conveyance, or a conveyance to the Government by a Trustee in bankruptcy and is still occupied by the borrower, may be considered for dwelling retention under this section.

(a) *Eligibility.* The County Supervisor will determine that the following eligibility requirements are met:

(1) The applicant must have responded to Exhibit G of Subpart A of this part during the 3-year period commencing on December 22, 1985, and ending at the close of business on December 22, 1988.

(2) The applicant must provide evidence of gross annual farm or ranch sales of at least $40,000 in at least 2 calendar years during the 5-year period beginning on January 1, 1981, and ending December 31, 1985, (or the equivalent crop or fiscal years).

(3) The applicant and any spouse must have received from the farming or ranching operation at least 60 percent of gross annual income during at least 2 years of the 5-year period set forth in § 1955.73(a)(2).

(4) The applicant must have possessed and occupied the dwelling and engaged in farming or ranching operations on adjoining land, or other land controlled by the borrower during the 5-year period set forth in § 1955.73(a)(2), and remain in possession.

(5) The applicant must have sufficient income to make rental payments, maintain the property in good condition and agree to all terms and conditions as set forth in this section and in "Lease of Real Property," Form FmHA 1955-20.

(6) The applicant must be an individual who was personally liable for a Farmer Program loan. The Farmer Program loan could have been made to an individual or an entity, so long as the applicant was personally liable for the debt.

(7) The applicant will personally occupy the dwelling as his/her personal residence and must not own other suitable housing.

(8) The borrower must have exhausted all remedies for restructuring the FmHA loans.

(9) When more than one member of an entity each possessed and occupied a separate dwelling, each may apply for the dwelling retention of their individual dwellings.

(10) The applicant must have been released from liability or have debt settled the FmHA debts or the debts must have been discharged in bankruptcy.

(b) *Appeal rights.* If the County Supervisor determines that the applicant is not eligible for dwelling retention, the County Supervisor will notify, in writing, the applicant of the decision and give the applicant the opportunity to appeal in accordance with Subpart B of Part 1900 of this chapter. The property will not be leased or sold until any appeal is concluded.

(c) *Property requirements.* (1) The lease may cover only the dwelling and a reasonable amount of land that is necessary for family maintenance. Not more than 5 acres of land will be leased with a dwelling unless additional land is needed for access to the property, local codes require a larger size lot, or additional land is needed to assure a source of water or provide for sanitation facilities. Sources of water, power lines, utility lines, sanitation facilities and/or access to the property may be located outside the land to be included with the dwelling provided appropriate rights or easements are obtained. Appropriate arrangements will be made for continued use of water sources, utilities, and sanitation facilities that will be jointly used. A right of entry and egress to a public way must exist or be provided.

(2) No lease will be approved if, upon exercise of the option, the remaining inventory property is not provided with entry and egress to a public way.

(3) A survey and legal description of the property to be leased and/or purchased will be obtained by FmHA. The cost of the survey will be charged to the inventory property account for the entire farm.

(d) *Appraisal.* The market value of the property, as improved, will be determined by an independent appraisal made within 6 months after the borrower responds to Exhibit G of Subpart A of this part. The cost of the appraisal will be charged to the inventory property account for the entire farm.

(e) *Rates and terms.* The lease will be offered with an option to purchase and will be for a period of not less than 3 years or more than 5 years. A lease of less than 5 years may be renewed, but not beyond 5 years from the date of the original lease. This requirement will be added as a stipulation to the lease.

(1) The amount of the lease will be based upon equivalent rents charged for similar residential properties in the area in which the dwelling is located. The County Supervisor will document in the case file a sufficient number of equivalent rents charged in the area for such properties to support the lease amount.

(2) Lease payments will be retained by the Government and remitted according to FmHA Instruction 1951-B (available in any FmHA office).

(3) Failure to make lease payments as scheduled or to maintain the property in good condition shall constitute cause for the termination of all rights of the lessee to possession and occupancy of the dwelling and property under this section.

(4) Any interference by the lessee with the Government's efforts to lease or sell the remainder of the farm property shall constitute cause for the termination of all rights of the lessee to possession and occupancy of the dwelling and property under this section. This stipulation will be added to the lease.

(f) *Exercising the option.* (1) The lessee may exercise the option in writing at any time prior to the expiration date of the lease. Failure to exercise the option within the lease period will terminate the lessee's rights to purchase the property.

(2) The option price to the lessee will be the appraised market value of the dwelling as established by the independent appraisal as set forth in paragraph (d) of this section.

(3) The sale will be handled as a credit sale of surplus CONACT property on ineligible terms under Subpart C of this part.

Subpart C—Disposal of Inventory Property

5. § 1955.105 is revised to read as follows:

§ 1955.105 Real property affected (CONACT).

Sections 1955.106–1955.108 of this subpart prescribe procedures for the sale of inventory real property which secured any of the following type of loans (referred to as CONACT property in this subpart): Farm Ownership (FO); Recreation (RL); Soil and Water (SW);

Operating (OL); Emergency (EM); Economic Opportunity (EO); Economic Emergency (EE); CF; WWD; RC&D; WS; Association Recreation; EOC; Rural Renewal; Water Facility; B&I; Irrigation and Drainage; Shift-in-land Use (Grazing Association); and loans to Indian Tribes and Tribal Corporations. Before property can be sold, § 1955.73 of Subpart B of this part concerning dwelling retention must be followed, if applicable.

6. § 1955.107 is amended by revising the introductory text of the paragraph and revising paragraph (a) to read as follows:

§ 1955.107 Sale of surplus property (CONACT).

Except where a lessee is exercising the option to purchase under § 1955.73 of Subpart B of this part, concerning dwelling retention, surplus property will be offered for public sale by sealed bid or auction in accordance with § 1955.147 or § 1955.148 of this subpart as soon as possible after it has been declared surplus and made available for sale. Suitable property which has been in inventory for 3 years must be offered for sale as surplus; however, if the buyer is eligible for FmHA assistance, any surplus property which is actually suitable will be reclassified to suitable by the authorized official and sold on eligible terms. The basis for this redetermination must be documented in the running record.

(a) *Rates and terms.* Terms for a dwelling retention property where the lessee is exercising the option to purchase under § 1955.73 of Subpart B of this part will not exceed 35 years with equal amortized monthly installments. No down payment will be required. In all other cases, surplus property will be offered for cash or on ineligible terms of not less than a ten percent (10%) down payment with the remaining balance amortized over a period not to exceed 25 years. The interest rate for business and industrial property will be the established insured B&I rate for profit corporations plus ½ percent; for community programs property the interest rate will be the market rate for Community Programs. The interest rate for dwelling retention will be as set forth in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office). The interest rate for all other surplus property will be the current Farmer Program ineligible interest rate set forth in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office). Loans made on ineligible terms will be closed at the interest rate in effect at the time the loan was approved. The State Director will determine the loan terms for surplus property within these limitations. After extensive sales efforts where no acceptable offering has been received, the State Director may request the Administrator to permit offer surplus property for sale on more favorable rates and terms; however, a down payment of not less than ten percent (10%) must be required and the terms may not be more favorable than those legally permissible for eligible borrowers. Surplus property will be offered for sale for cash or terms that will provide the best net return to the Government. The term of any financing extended may not be longer than the period for which the property will serve as adequate security. All credit sales on ineligible terms will be identified as NP loans.

BILLING CODE 3410-07-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 545

[No. 86-227]

Powers and Duties of Federal Association as Trustee

Date: March 12, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board ("Board") is revising 12 CFR 545.102 to clarify and expand the limited authority of federally chartered savings and loan associations and savings banks ("Federal associations") to offer self-directed Individual Retirement Accounts ("IRA") and Keogh Plan accounts, to act as trustees of passive trusts, and to invest the funds of such accounts or trusts in assets other than their own accounts, deposits, obligations, or securities without obtaining prior Board approval pursuant to 12 CFR Part 550.

EFFECTIVE DATE: March 18, 1986.

FOR FURTHER INFORMATION CONTACT: Christina M. Gattuso, Attorney, Regulations and Legislation Division, Office of General Counsel, (202) 377-6649, Federal Home Loan Bank Board, 1700 G Street, NW., Washington DC 20552.

SUPPLEMENTARY INFORMATION: Section 545.102 of the Board's regulations authorizes a Federal association to act as a trustee or custodian, without Board approval under 12 CFR Part 550, for IRAs and Keogh Plan accounts, provided that the funds of the trust or account are invested only in the Federal association's savings accounts, deposits, obligations, or securities. Subject to the same proviso, § 545.102 also permits a Federal association to act as a trustee with no active fiduciary duties if state law authorizes a financial institution to act in such capacity. The provison arguably precludes Federal associations not exercising trust powers under Part 550 from acting as trustees or custodians of IRAs and Keogh Plan accounts in which the holder directs investments to be made in assets other than the savings accounts, deposits, obligations, or securities of the custodial institution (collectively, "self-directed retirement accounts").

The Board has recently been asked to amend section 545.102 to permit Federal associations to offer self-directed retirement accounts without obtaining prior Board approval pursuant to Part 550. Federal associations offering such accounts would perform only custodial or ministerial duties without exercising investment discretion, and a variety of other financial institutions not exercising trust powers, including nationally chartered banks, nonmember banks insured by the Federal Deposit Insurance Corporation ("FDIC") and federal credit unions, may offer self-directed retirement accounts. If Federal associations did not possess similar authority, they would be at a competitive disadvantage.

In responding to inquiries from Federal associations as to whether they may offer self-directed retirement accounts without applying for expanded trust powers under Part 550, the Office of General Counsel has taken the position that a Federal association may act as a trustee with no active fiduciary duties for self-directed retirement accounts pursuant to its authority under 12 CFR 545.102 and its implied powers. It is the Board's view that Federal associations are authorized to perform this function pursuant to the authority implicit in the express powers of Federal associations, consistent with the broadening of Federal association powers by the Garn-St Germain Depository Institutions Act of 1982 to include "the deposit or investment of funds" as well as "the extension of credit for homes and other goods and services." 12 U.S.C. 1464(a).

VOL 51
ISS 52
MR 18
1986
UMI

Accordingly, the Board is revising § 545.102 to codify explicity the authority of Federal associations to act as trustees or custodians for self-directed retirement accounts without obtaining prior Board approval.[1] The Board wishes to emphasize that Federal associations may neither exercise investment discretion nor provide investment advice, either directly or indirectly, in connection with such accounts. Specifically, a Federal association's involvement in offering such accounts is limited to accepting IRAs or Keogh Plan funds as time deposits or savings accounts, serving as custodian of the IRAs or Keogh Plan accounts, preparing records and reports, and acting as the agent of IRAs or Keogh Plan customers to transmit customer funds pursuant to the customer's instructions. Additionally, the various agreements between the Federal association, the IRA or Keogh Plan customer, and the broker-dealer may not provide the Federal association with discretionary authority to act in any manner for any purpose or to offer investment advice in any fashion.

The Board notes that a Federal association, in offering self-directed retirement accounts, may utilize the services of either an affiliated[2] or unaffiliated broker-dealer. In the event a Federal association wishes to perform the brokerage function in connection with the offering of self-directed retirement accounts, an appropriate service corporation application and approval by the Board would be required.[3] Additionally, the Board notes that Federal Savings and Loan Insurance Corporation ("FSLIC") insurance coverage is limited to funds invested in accounts of insured institutions.[4] As revised, § 545.102 requires Federal associations to make appropriate written disclosures to ensure that accountholders understands this fact.

The Board wishes to note that a Federal association offering self-directed retirement accounts must operate in accordance with applicable laws and regulations governing IRAs and Keogh Plan accounts. Additionally, Federal associations offering such accounts must operate in a manner consistent with principles of sound trust (custodial) administration, including the segregation and/or adequate identification of corresponding assets of IRAs and Keogh Plan accounts, whether held by the Federal association or, under a contractual safekeeping arrangement, by a third party.

Finally, § 545.102 currently permits a Federal association to serve as the trustee of a passive trust only if the funds of the trust are invested solely in the accounts, deposits, obligations, or securities of the association. The Board is further amending § 545.102 to permit Federal associations to serve as trustees of passive trusts the funds of which are invested in assets other than those of the custodial association, subject to all the requirements of revised § 545.102. This amendment conforms the treatment of self-directed retirement accounts and passive trusts.

Pursuant to 12 CFR 508.11 and 508.14, the Board finds that because the amendment codifies an interpretive clarification of Federal association authority and furthermore relieves a restriction of that authority, notice and public procedure are unnecessary, as is the 30-day delay of the effective date.

List of Subjects in 12 CFR Part 545

Accounting, Consumer protection, Credit, Electronic funds transfer, Investments, Manufactured homes, Mortgages, Reporting and recordkeeping requirements, Savings and loan associations.

Accordingly, the Board hereby amends Part 545, Subchapter C, Chapter V, Title 12, *Code of Federal Regulations*, as set forth below.

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 545—OPERATIONS

1. The authority citation for Part 545 is revised to read as follows:

Authority: Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); Reorg. Plan No. 3 of 1947, 3 CFR, 1943–1948 Comp., p. 1071, unless otherwise noted.

2. Section 545.102 is revised to read as follows:

§ 545.102 Trustee.

(a) A Federal association may act as trustee of any trust created or organized in the United States and forming part of a stock bonus, pension, or profit-sharing plan qualifying for specific tax treatment under section 401(d) of the Internal Revenue Code of 1954; as trustee or custodian of an Individual Retirement Account within the meaning of section 408(a) of the Internal Revenue Code; or as trustee with no active fiduciary duties if state law authorizes a financial institution to act in such capacity: *Provided*, that the association shall invest the funds of the trust or account only in the association's own accounts, deposits, obligations, or securities or, upon the condition that the association does not exercise any investment discretion or directly or indirectly provide any investment advice with respect to the trust or account assets, in such other assets as the customer may direct. The association shall observe principles of sound trust administration, including those relating to recordkeeping and segregation of assets, and may receive reasonable compensation for acting in any trust capacity authorized by this section.

(b) A Federal association acting as trustee or custodian pursuant to paragraph (a) shall include in bold type on the first page of any contract documents the following language:

"Funds invested pursuant to this agreement are not insured by the Federal Savings and Loan Insurance Corporation ("FSLIC") merely because the trustee or custodian is an institution the accounts of which are covered by such insurance. Only investments *in the accounts* of such an institution are insured by the FSLIC, subject to its rules and regulations."

---

[1] The Board notes that Federal associations also may act as trustees or custodians for qualified corporate plans under section 401(a) of the Internal Revenue Code of 1954. 26 U.S.C. 401(a).

[2] The Board notes, however, that utilizing the services of an affiliate may create a potential conflict of interest, and the Federal association should be aware of the Board's policy statement regarding conflicts of interest. *See* 12 CFR 571.7. Additionally, the Board wishes to stress that Federal associations may not directly or indirectly offer or suggest to their IRA or Keogh Plan customers options for investing in persons or concerns affiliated with the Federal association. The Federal association also should take appropriate measures to ensure that the use of an affiliate in offering self-directed retirement accounts is not in violation of the Employees Retirement Income Security Act. *See* 29 U.S.C. 1106(b)(2) and 29 CFR 2550.408b–2; *see also* Prohibited Transaction Exemption 79–1, 44 FR 5963 (Jan. 30, 1079).

[3] The Board wishes to note that if a Federal association becomes involved in the brokerage-related securities activities conducted by a service corportion subsidiary, registration of the association itself as a broker-dealer may be required under Securities and Exchange Commission ("SEC") regulations and Federal securities laws. The SEC does not consider Federal associations to be "banks," and, therefore, Federal associations cannot rely on the bank exclusion from broker-dealer registration under 17 CFR 240.3b–9. *See* Securities Exchange Act Release No. 22205, 50 FR 28385, 28389 n.34 (July 12, 1985). SEC Rule 3b–9 illustrates that if the Federal association actively solicits customers to participate in self-directed retirement accounts and receives transaction-related compensation in connection with any trades, the association may be regarded as a broker-dealer and therefore the required to register with the SEC. *Id.* at 28388.

[4] Also, insurance coverage of such accounts is subject to the basic limit of $100,000 per customer and to the requirements of 12 CFR Parts 561 and 564.

By the Federal Home Loan Bank Board.

Jeff Sconyers,
Secretary.

BILLING CODE 6720-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 2, 157, and 284

[Docket No. RM83–31–000; Order No. 449]

Emergency Natural Gas Sale, Transportation and Exchange Transactions

Issued: March 12, 1986.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is revising its regulations relating to emergency natural gas transactions that are exempt from the certification requirements of section 7(c) of the Natural Gas Act (NGA), 15 U.S.C. 717f(c). The final rule eliminates unnecessary regulations and consolidates in a new Subpart I of Part 284 revised regulations that provide self-implementing authority for eligible participants, which include interstate pipelines, intrastate pipelines, and local distribution companies, to sell and/or transport natural gas to other eligible participants in emergency situations, as defined in new § 284.262(a).

The final rule generally retains the rate conditions currently applicable to suppliers that provide emergency transportation and sales services. An interstate pipeline's emergency transportation services will be subject, however, to the volumetric rate conditions of § 284.7 of Order No. 436, 33 FERC ¶ 61,007 (1985), 50 FR 41408 (October 18, 1985), if the pipeline is also providing other transportation that is subject to those rate conditions under Order No. 436. The final rule clarifies that, with this exception, transporters will not become subject to the conditions of Order No. 436, including the non-discriminatory access and contract demand reduction/conversion conditions, by reason of qualifying emergency transportation under the revised emergency regulations.

EFFECTIVE DATE: June 2, 1986.

FOR FURTHER INFORMATION CONTACT: Jack O. Kendall, Office of hte General Counsel, 825 North Capitol Street, NW., Washington, D.C. 20426, (202) 357–8565.

SUPPLEMENTARY INFORMATION:

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

The Federal Energy Regulatory Commission (Commission) is revising its regulations (18 CFR Parts 2, 157, and 284) relating to emergency transactions that are exempt from the certification requirements of section 7(c) of the Natural Gas Act (NGA).[1] The final rule eliminates outdated or unnecessary regulations and consolidates in a new Subpart I of Part 284 the Commission's regulations that provide self-implementing emergency authority to interstate pipelines, intrastate pipelines, and local distribution companies.

The final rule retains the current rate conditions applicable to suppliers providing emergency transportation services, with the exception that an interstate pipeline will be subject to certain of the rate conditions of § 248.7 of Order No. 436,[2] if the pipeline becomes subject to § 284.7 by electing to participate in the new blanket certificate program or to commence or continue after June 30, 1986, any NGPA § 311 transportation arrangements begun after October 9, 1985. Finally, the final rule clarifies that an interstate pipeline, intrastate pipeline, or local distribution company will not become subject to the other conditions of Order No. 436, including the nondiscriminatory access and contract demand reduction/conversion conditions, by reason of qualifying emergency transportation under the revised emergency regulations.

I. Background

A. Natural Gas Act

Section 7(c) of the NGA provides that every jurisdictional natural gas company must obtain a certificate of public convenience and necessity before transporting or selling gas, or constructing or operating facilities for those purposes. However, NGA section 7(c)(1)(B) provides two exceptions to this certificate requirement:[3] one authorizing the issuance of a temporary certificate during emergencies pending a determination of a regular application, and one exempting from certificate requirements "temporary acts or operations for which the issuance of a certificate will not be required in the public interest." The latter exception is the subject of this rulemaking.

Prior to the enactment of the Natural Gas Policy Act of 1978,[4] NGA section 7(c)(1)(B) was the only authority for the sale for resale of surplus intrastate gas into the interstate market without jurisdictional consequences to the seller. Over time, the Commission has used this authority under NGA section 7(c)(1)(B) to promulgate various implementing regulations (§§ 2.68, 157.22, and 157.29). These regulations set forth the Commission's policy of encouraging non-jurisdictional local distribution companies, intrastate pipelines and Hinshaw pipelines[5] to provide temporary emergency gas service in interstate commerce for up to 60 days.[6] They also authorized for 60 days the construction and operation of facilities or the sale or transportation of natural gas without a certificate in certain circumstances of emergency or other special need. The regulations required reports to be filed with the Commission describing the emergency and the transaction involved.[7]

B. The Natural Gas Policy Act

The NGPA had several impacts on the Commission's authority to provide for emergency transactions. Most significantly, sections 311 and 312 of the NGPA[8] provide an alternative to section 7(c)(1)(B) of the NGA for the following transactions in interstate commerce: Sales, assignments, and/or transportation of intrastate natural gas by intrastate pipelines on behalf of interstate pipelines and local distribution companies served by

interstate pipelines and transportation by interstate pipelines on behalf of intrastate pipelines and local distribution companies. Therefore, as a result of the NGPA, these transactions have been authorized to proceed, subject to certain limitations, for longer periods than would be appropriate or permissible under NGA section 7(c)(1)(B).[9]

The Commission's interim regulations [10] implementing the NGPA effected several relevant changes to the emergency regulations. First, the interim regulations phased out the NGA emergency program covered by §§ 2.68, 157.22 and 157.29; these three sections were preserved only to the extent that they applied to then-existing contracts for emergency transactions.

Second, the interim NGPA regulations established new rules for emergency transactions that were designed to be transitional provisions until the Commission gained greater experience with the NGPA regulatory structure. The interim NGPA regulations established new rules implementing the authority provided by NGPA sections 311 and 312 for interstate and intrastate pipelines to provide services on behalf of each other and on behalf of local distribution companies. These regulations, set forth in Subparts B and C [11] of Part 284, have helped interstate pipelines and intrastate pipelines, respectively, to address natural gas emergencies, since they permit service to commence under certain circumstances without prior notice or application to the Commission. The self-implementing authority provided by these Part 284 regulations is not limited to emergency transactions, however.

The interim regulations also defined other emergency transactions that could not be provided under NGPA sections 311 and 312 but which could be authorized to commence on a self-implementing basis pursuant to NGA section 7(c)(1)(B). These are the regulations set forth in Subpart C of Part 157, which are limited to emergency situations.[12]

C. Order No. 436

On October 9, 1985, the Commission issued Order No. 436, a final rule pursuant to the NGA and the NGPA, which establishes a transportation program, including both blanket certificates under section 7 of the NGA and self-implementing transportation under section 311 of the NGPA. Interstate pipelines, intrastate pipelines, and local distribution companies transporting under the revised Order No. 436 self-implementing programs must provide nondiscriminatory access to all shippers. (*See* §§ 284.8, 284.9, and 284.224(e), respectively.) Interstate pipelines that accept blanket certificates or initiate new NGPA section 311 transportation under Order No. 436 are subject to additional conditions. Under § 284.7, rates for transportation service by an interstate pipeline must be volumetric, downwardly flexible, cost-of-service rates. Under § 284.10, an interstate pipeline must offer its firm sales customers an opportunity to reduce their firm sales entitlements and to convert firm sales to firm transportation service.

II. Discussion

A. Overview

On August 30, 1984, the Commission issued a Notice of Proposed Rulemaking (NOPR) in this docket. 49 FR 35135 (Sept. 6, 1984) [FERC Statutes and Regulations ¶ 32385].

The Commission proposed to update, consolidate, and clarify the existing regulations applicable to the movement of natural gas for emergency purposes based on the Commission's experience with its emergency transaction regulations since passage of the NGPA. The NOPR proposed to eliminate unnecessary regulations and consolidate all of the emergency regulations in a new Subpart I of Part 284 of the regulations. Also, the NOPR proposed to add new regulations to new Subpart I. The NOPR was designed so that: (1) Companies engaged in non-certificated transactions would benefit from having to consult only one unified portion of the Commission's regulations; (2) litigation time and expense would be reduced for pipelines and their customers because the consolidation and clarification of the emergency transaction regulations would reduce uncertainty and ambiguity; and (3) the unified regulations would simplify the Commission's administrative responsibilities and reduce the need to expend agency resources on litigation over the application of the emergency transaction rules.

In response to the NOPR, the Commission received 19 comments.[13] Generally, the commenters favored updating and consolidating the regulations but opposed the proposed substantive changes. The Commission is persuaded by the arguments raised by the majority of the commenters and has not adopted many of the substantive proposals in the NOPR. The final regulations adopt the organizational framework of the proposed regulations and some of the proposed language. Where appropriate, in response to the commenters, the final regulations either use the language of the current regulations or modify the language of the proposed regulations.

Furthermore, because the Commission's self-implementing and blanket certificate transportation programs were revised by Order No. 436, the final rule also makes several technical revisions to the proposed emergency transaction regulations and makes certain of the rate conditions of § 284.7 of Order No. 436 applicable to interstate pipelines that transport under both the new Subpart I emergency regulations and Subpart B of Part 284.

The following detailed discussion explains the changes made to the proposal in light of the concerns raised by the commenters and the issuance of Order No. 436 and clarifies that implementation of the revised emergency regulations, as proposed, will remove qualifying emergency transactions conducted under new Subpart I from the scope of Order No. 436.

B. Elimination of Outdated Regulations

The Commission proposed to eliminate §§ 2.68, 157.22, and 157.29. These provisions apply to contracts for emergency transactions under the NGA that were executed either before November 9, 1978, in the case of a first sale of gas, or before December 1, 1978, for all other emergency sales. These provisions governing NGA transactions were essentially superseded by passage of the NGPA, and are no longer in use because no pre-NGPA emergency transactions are taking place. Therefore, the provisions pertaining to them are being deleted from the regulations.

The Commission further proposed to eliminate §§ 157.45–157.52 from Subpart C of Part 157 and to replace them with a new Subpart I in Part 284, entitled "Emergency Natural Gas Sale, Transportation, and Exchange Transactions." The commenters raised issues relevant only to a limited number of these new provisions. The new Subpart I of Part 284 revises and updates the existing provisions [14] in Subpart C of Part 157 relating to emergency transactions that involve the construction and operation of facilities, the sale or transportation of natural gas in interstate commerce, or the exchange of gas for emergency purposes.

C. New Subpart I

1. Definition of the Term "Emergency"

The current regulations in Subpart C of Part 157 address emergencies on the systems of interstate pipelines, intrastate pipelines, and local distribution companies. However, the transportation authority provided in Subpart C of Part 157 is limited to transportation by an interstate pipeline of emergency gas supplies to its direct sale customers, its local distribution company customers, and other interstate pipelines. Subpart C of Part 157 explicitly recognizes that an interstate pipeline may need to transport or sell supplies on behalf of an intrastate pipeline or local distributor that is not the interstate pipeline's customer, and that transportation by an intrastate pipeline or local distributor may be necessary to address emergencies as defined in § 157.40(a)(1) of Subpart C. However, the current regulations provide for emergency service in such situations under current Part 284 self-implementing authority (by interstate pipelines under § 284.102 of Subpart B and § 284.222 (previous § 284.221) of Subpart G; intrastate pipelines under § 284.122 of Subpart C; and local distribution companies and Hinshaw pipelines under § 284.224 (previous § 284.222) of Subpart G.

The Commission proposed that in an "emergency" such transportation could be commenced under the new Subpart I. To effect this change, the proposed regulations include additional "covered transactions" (*see* proposed § 284.263(b) and new § 284.263) and add a new definition of qualifying "participants," which includes interstate pipelines, intrastate pipelines, and local distribution companies and Hinshaw pipelines (see proposed § 284.262(e) and new § 284.262(f)).

The Commission also proposed to define more narrowly the types of "emergencies" that would trigger an exemption from certificate requirements, stating that the definition under current § 157.46(a) was too broad and was potentially subject to abuse. Under current §157.46(a) an emergency exists when the gas supply that is available or expected to be available would require an affected entity to curtail gas deliveries on its system; when there is a sudden, unanticipated loss of gas supply or increase in demand; or when a qualified purchaser, in good faith, needs gas immediately for the protection of life or health, or the maintenance of physical property.

Under proposed § 284.262, there would have been two categories of emergencies: "pipeline emergency" and "curtailment emergency." A "pipeline emergency" would have been limited to a "sudden, unanticipated loss of a recipient's gas supply" or an "unanticipated situation" in which a participant determines, in good faith, that immediate action is necessary to protect life or health, to maintain physical property, or to maintain scheduled levels of storage inventories. A "curtailment emergency" would have been limited to situations in which a pipeline or distributor would experience actual or imminent curtailment of high priority end users and situations in which the operations of persons unable to use alternative fuels would be impaired without purchase of emergency gas. Emergencies of a purely economic nature, the status of which has been unclear under the current definition, would not have been recognized under the proposed definition.

Many commenters objected to the proposed definition, arguing that it was too restictive. Many urged the Commission to retain the existing definition in § 157.46(a), which they viewed as being more flexible, or to broaden the proposed definition.

With regard to the proposed definition of "curtailment emergency," many commenters objected to the Commission's use of proposed § 284.262(a)(2)(iv) to preclude end users with alternative fuel capabilities from purchasing emergency gas. These commenters maintained that such an "alternative fuel test" would make unavailable, to a wide range of both high and low priority users, emergency gas otherwise currently available under short-term sales and transportation transactions.

Several commenters also asserted that pipelines and distributors would be burdened with compiling inventories of end users with alternative fuel capacity and availability. They further asserted that the benefits of the alternative fuel test did not justify its ultimate cost, because end users with alternative fuel capability benefit all customers on a pipeline's or local distributor's system by typically absorbing a major share of the system's fixed costs. Reducing or disrupting gas service to such "switchable" customers would hurt the remaining system customers by increasing their share of fixed system costs, and hurt the gas supplier by reducing its revenues. One commenter questioned whether some customers would rather opt for an alternative fuel supply simply because of the threat of not being able to obtain gas during an emergency.

One commenter stated that the proposed distinction between curtailments which threaten "life, health and physical property" in a pipeline emergency, versus curtailments of high priority end users in a curtailment emergency, is ambiguous because, under the proposed definition, high priority curtailment entitlements are essentially limited to end users whose curtailment would pose a threat to life, health or physical property.

Finally, another commenter pointed out that the proposed definition of "curtailment emergency" did not conform to the actual priority of end-uses under many curtailment plans. Therefore, the commenter asserted, the proposed definition would needlessly conflict with curtailment plans because

---

[9] The establishment of a 60-day authorization period in the emergency regulations in Subpart C of Part 157 reflects the holding in *Consumers Federation of America* v. *F.P.C.*, 515 F.2d 347, 352–353 (D.C. Cir. 1975). In that case, the court, stating that section 7(c)(1)(B) allows only a narrow exception to the NGA section 7(c) certificate requirement to deal with temporary emergencies, prohibited, as too long, a 180-day certificate exemption period.

[10] 47 FR 56448 (Dec. 1, 1978) (Docket No. RM79-3-000).

[11] Approximately three months after issuing the interim regulations, the Commission promulgated Subpart D (now Subpart E) of Part 284 which sets forth self-executing regulations providing for intrastate pipeline sales of gas. *See* 44 FR 12406 (Mar. 7, 1979) (Docket No. RM79-20).

[12] 18 CFR 157.40(a) (1983) defines an "emergency" as:

(1) A situation where the gas supply either available or expected to be available would require the interstate pipeline company, distribution company, or person described in section 1(c) of the Natural Gas Act to impose curtailment on its system (including a situation where additional supplies are necessary to maintain deliverability from storage or to replenish storage volumes in order to avoid or alleviate curtailment on its system);

(2) A sudden unanticipated (i) loss of natual gas supply or (ii) increase in demand; or

(3) A situation in which the qualified purchaser, in good faith, determines that immediate action is required or is reasonably anticipated to be required for protection of life or health or for maintenance of physical property.

[13] Timely comments were filed by the American Gas Association, Associated Gas Distributors; Columbia Gas Transmission Corporation; Consolidated Edison Company of New York, Inc.; Equitable Gas Company; Mountain Fuel Resources, Inc.; Montana-Dakota Utilities Company; Northern Illinois Gas Company; Northern Indiana Public Service Company; Pacific Gas and Electric Company; Public Service Electric and Gas Company; Tennessee Gas Pipeline Company, a Division of Tenneco Inc.; United Distribution Companies; and United Gas Pipe Line Company. Panhandle Eastern Pipeline Company and Trunkline Gas Company jointly filed a timely comment. Untimely comments were filed by Monterey Pipeline Company, Natural Gas Pipeline Company of America, Northern Natural Gas Company, and Petrochemical Energy Group.

[14] The Commission's existing regulations are prefaced with the designation "current." Regulations that were proposed in the NOPR are prefaced with the designation "proposed." Regulations that are being implemented by this final rule are prefaced with the designation "new."

VOL 51 ISS 52 MR 18 1986 UMI

curtailment plans differ in their definitions of high-priority of uses.

The Commission agrees with the commenters' assertion that the proposed definition of "emergency" would unnecessarily restrict the types of end users on whose behalf pipelines and distributors engage in emergency natural gas transactions. Under the proposed bifurcated definition, during a curtailment emergency all low priority end users would be excluded from receiving emergency gas. Further, emergency transactions could be conducted on behalf of high priority end users only if they had not installed alternative fuel facilities or, if they had, did not have access to adequate supplies of alternative fuels.

The Commission also is persuaded that the proposed differentiation between a "pipeline emergency" and a "curtailment emergency" might have an adverse effect on gas suppliers and their customers, since each pipeline's curtailment plan in its FERC gas tariff was designed to fit the particular circumstances of that pipeline during periods of curtailment, but the proposed definition provided no guidance as to its effect on these plans. Furthermore, pipelines' curtailment plans differ in their definition of high priority uses.

In response to the comments, the Commission is not adopting the proposed distinction between "pipeline emergency" and "curtailment emergency." The final rule adopted herein retains, with certain modifications, the single definition of "emergency" in § 157.46(a) of the current rule, redesignated as § 284.262(a)(1). In so doing, the Commission is resolving some of the specific concerns expressed by the commenters, as discussed below.

By retaining the existing definition of "emergency", the Commission is eliminating the proposed restrictions on emergency transactions for certain classes of end users. However, the Commission has modified the current definition of emergency to clarify in new § 284.262(a)(1)(i) that emergency transactions under Subpart I are to be used only in those instances where they are necessary to maintain projected levels of service to particular customers, unless additional supplies are needed because of "a sudden unanticipated loss of natural gas supply or a sudden unanticipated increase in demand" (*see* new § 284.262(a)(1)(ii)) or the participant, in good faith, determines that additional supplies are required "for protection of life or health or for maintenance of physical property" (*see* new § 284.262(a)(1)(iii)). A company's total projected level of service for all of its customers is reported in its FERC Form No. 16. The company can determine its projected level of service for each customer from the information it uses to compile its total amount reported. Emergency transactions may be used to respond to weather-induced increases in requirements but may not be used to increase service levels to existing customers for any other reason. Further, while the definition adopted herein in § 284.262(a)(1) is broad enough to provide for emergency transactions on behalf of end users with alternative fuel capacity, sales and deliveries of emergency gas still must fall within planned service levels for those customers. This limitation also will avoid the problems inherent in ascertaining alternative fuel capacity and availability.

The revised definition will also accommodate those commenters that believe that the definition of "emergency" should include distribution companies that experience sudden and unanticipated losses of supply due to failure of facilities, so that they may secure emergency supplies for end users, including those users with alternative fuel capacity. The definition of emergency is also responsive to the request by another commenter that the definition include emergency shortages incurred by suppliers other than pipelines. Specifically, the final rule's definition of "emergency" in new § 284.262(a)(1), which is adapted from the current definition of emergency in § 157.46(a)(1), provides that shortages incurred by distribution companies or Hinshaw pipelines may also qualify as emergencies for purposes of the revised regulations.

The definition of emergency, however, does not include economic emergencies, contrary to the request of one commenter. That commenter stated that petrochemical companies are captive customers unable to use alternative fuels because they need the gas for feedstock or process fuel uses. The commenter is concerned that, if confronted with a sharp rise in other suppliers' gas prices, the proposed rule would prevent eligible participants from engaging in short-term emergency transactions on these customers' behalf while the customers negotiate acceptable long-term arrangements with existing or other suppliers.

The Commission has determined that the definition of "emergency" should not encompass "economic" emergencies. Rather, the Commission believes the emergency regulations of Subpart I of Part 284 should facilitate immediate responses to physical shortages of gas, but not situations in which gas is physically available but not at the desired price. In such situations, gas users should seek to obtain less expensive replacement supplies through transporters who either operate under the self-implementing provisions of Subparts B and C of Part 284, hold blanket certificates, or are willing to seek specific authorization under the Natural Gas Act.

Another commenter urged expansion of the definition of emergency to include a loss of a recipient's gas supply caused by other factors beyond pipelines' and distributors' control, such as the implementation by sellers or transporters of *force majeure* clauses, or the shutting-in of wells due either to disputes or low well pressure. The Commission declined to expand the definition in that manner as it would be vague and overly broad. A definition of *force majeure* in a private contract, and a seller's or transporter's unilateral interpretation of such a contractual provision when asserting it, could go well beyond the intended scope of the concept of an "emergency" as contemplated in the rule. Similarly, "disputes" could arise for many reasons, not all of which encompass the situations that the rule is designed to cure.

One commenter objected to the narrowing of the definition of emergency in the proposed rule unless Subparts B and C of Part 284 were concurrently amended to authorize self-implementing transportation directly to specific end users or classes of end users. The commenter's concern has been eliminated by retention of the existing definition of emergency and by providing emergency transportation authority independent of Subparts B and C of Part 284.[15]

Finally, one of the commenters that requested expansion of the term "pipeline emergency" also urged the Commission to distinguish an emergency which, under the proposed regulations, would be exempt from certification from an emergency which forms one aspect of the Commission's consideration of a request for a temporary certificate. As stated in the notice of proposed rulemaking, this proceeding does not relate to the issuance of a temporary certificate during an emergency pending consideration of an application for certificate authority under § 157.17.[16]

2. Clarification of Gas Storage Policy

Current § 157. 46(a)(1) permits emergency transactions to be used to maintain deliverability from storage or to replenish storage volumes. However, proposed § 284.262(a)(1)(ii) would permit only those emergency transactions necessary to maintain scheduled levels of gas inventory and thereby ensure maintenance of projected service levels, taking into account peak-day and seasonal requirements.

Many commenters expressed concern that they would not be able to maintain scheduled levels of gas inventory without maintaining deliverability and replenishing storage volumes. These commenters contended that replenishing storage volumes should be allowed in an amount at least up to the scheduled inventory level. These points are well taken. The proposed language was ambiguous and contradictory.

The Commission intended to revise § 157.46(a)(1) to permit an "emergency transaction" to maintain levels of storage inventory sufficient to ensure a pipeline's planned level of service, including deliverability needed to meet weather-induced demand, but not to increase the level of service to add new customers or for any other reason except abnormal weather conditions. Certificate authority, rather than emergency authority, should be used to supply gas if market expansion or special sales are being implemented through the use of storage.

In response to the comments, and to implement the Commission's original intent, the phrase "to maintain deliverability from storage or to replenish storage volumes in order to avoid or alleviate curtailment on its system" in proposed § 284.262(a)(1)(ii) has been revised so that new § 284.262(a)(1)(i) reads "to maintain levels of natural gas storage inventories sufficient to ensure a pipeline's projected level of service." Further, "projected level of service." is defined in § 284.262(b) to mean "the level of service projected by the company for each customer which the company uses to compile the total projected level of service that it reports in its FERC Form No. 16 plus any additional supplies needed by a customer due solely to a weather-induced increase in requirements."

3. Simultaneous Sale and Purchase of Emergency Gas

Both the current and proposed rule provide that participants should make every reasonable attempt to minimize or, if possible, to avoid reliance on emergency natural gas transactions. In the NOPR, the Commission proposed adding three clarifying provisions, §§ 284.264(a)(1)–(3), which were adapted from current § 157.48(a). Proposed subparagraph (4) of § 284.264(a) would have prohibited a participant from selling emergency gas under this subpart if the participant was simultaneously purchasing emergency gas.[17]

Several commenters pointed out that a participant serving a large geographic area might simultaneously need to make an emergency sale at one point on its system (to alleviate someone else's emergency) while making an emergency purchase elsewhere on its system (to avoid disruption or diminution of service at another point on its own system). That is, because of the configuration of the pipeline, it could not use its system supplies to alleviate the emergency in one part of its system, but it could use those supplies to assist someone elsewhere on its system.

The Commission is persuaded that these special circumstances outlined by the commenters could justify a simultaneous purchase and sale of emergency gas on a participant's system. Because the Commission would expect that, in any extended curtailment situation, other sources of supply would be actively pursued, the general prohibition described in subparagraph (4) has been retained in the final rule. However, in order to alleviate the potential problem of a need for emergency gas in one segment of a pipeline's system that cannot be met by moving gas from another part of its system, § 284.264(a)(4) in the final rule has been revised by adding the phrase "except when gas is being purchased to relieve an emergency on another, separate segment of the participant's system."

4. Rates and Costs Treatment

The current regulation, § 157.48(d), authorizes interstate pipelines to purchase emergency gas for system supply, and also authorizes direct assignment of emergency gas volumes and costs to particular customers who need the gas. Proposed § 284.265 provided that an interstate pipeline that puchased emergency gas for a pipeline emergency could roll the costs of that gas into its general system supply. However, during a curtailment emergency, an interstate pipeline would generally not have been allowed to roll the cost of emergency gas into the rates paid by all on-line customers, with the exception of minimal amounts of gas which had been inadvertently purchased in excess of the volumes needed to address the curtailment emergency. Similar to the current regulation, the proposed rule allowed a purchasing interstate pipeline to either directly assign specific emergency gas costs to particular emergency gas customers or to aggregate emergency gas costs and allocate the costs on a weighted-average or "rolled-in" costs basis among all of its emergency gas customers.[18]

Proposed § 284.266, which prescribed the allowable rates and charges for emergency transactions, paralleled current §§ 157.49 and 157.50. However, when possible, the Commission proposed to adopt the same methodology for determining rates and charges for emergency transactions that was applied under the self-implementing procedures of old Subparts B and C and current Subpart D of Part 284. Thus, the Commission proposed that, for the transportation of emergency gas, an interstate pipeline would apply the rate and revenue provisions in then effective § 284.103. An intrastate pipeline, local distribution company, or Hinshaw pipeline would apply the transportation rate and revenue provisions in then effective § 284.123. Accordingly, if one of these nonjursidictional firms had an appropriate existing rate on file with an appropriate state regulatory agency for city-gate services, it would use that rate, unless it filed a new rate for Commission approval. A local

---

[15] The Commisson notes that Subparts B and C of Part 284 were amended by Order No. 436 to permit transportation directly to end users, eliminating the condition that gas transported under Subpart B or C of Part 284 must be received into system supply. Transportation under Subparts B and C is still subject to the condition that the transportation, if performed by an interstate pipeline, must be on behalf of an intrastate pipeline or local distribution company, or, if provided by an intrastate pipeline, on behalf of an interstate pipeline or one of its distributor customers.

[16] *See* 49 FR at 33005

[17] Proposed subparagraph (3) of § 284.284(a) prohibited a participant from engaging in an emergency transaction if this participation would render the participant unable to provide adequate service to its existing customers. This subparagraph has been adopted in the final rule without change. Proposed subparagraph (5) outlined the Commission's general enforcement procedures under proposed Subpart I. This subparagraph has been deleted from the final rule as it stated only the Commission's enforcement position which is applicable to all of the Commission's regulations.

[18] Under a "rolled-in" rate making approach, the costs of all of a pipeline's facilities or gas supplies are aggregated, and are then allocated among the pipeline's various services and customers. This method is generally used where the pipeline's incurrence of the costs under review can reasonably be determined to be the responsibility of and provide benefits for all of the pipeline's customers and services. Under a "direct assignment" approach, the costs of particular facilities or gas supplies are directly assigned to specific services or customers. This latter method is generally used only where a direct cost-causal relationship exists between specific costs incurred by the pipeline and specific beneficiaries of the service which engendered those costs.

UMI

distribution company or Hinshaw Pipeline that did not have such a rate on file would apply the transportation rate provisions of then effective § 284.222(e)(2)(ii) (current § 284.224(e)(2)(ii)). Interstate pipelines would have based their rates for sales of emergency gas on applicable or comparable tariff rates. If there was no applicable or comparable tariff rates on file, interstate pipelines would base their sales rates on the methodology used in designing their effective sales rates, including their current purchased gas cost. This was similar to the current methodolgy. (Proposed § 284.264(a)(7), new § 284.264(a)(5), retains the prohibition against an interstate pipeline's receiving compensation for acting as a broker or agent in an emergency transaction.)

Finally, intrastate pipelines, local distribution companies, and Hinshaw pipelines would have set sales rates according to the provisions in current § 284.144 (the self-implementing provisions for gas sales by intrastate pipelines).

Many commenters opposed the direct assignment of costs of emergency purchases to remedy a curtailment emergency. Several contended that the proposed rate treatment of emergency gas purchases during curtailment emergencies contravened the Commission's traditional policy of allocating gas costs among all of a pipeline's customers through use of the rolled-in method. One commenter stated that in light of the differing curtailment plans established based on the differing circumstances of interstate pipelines, the requirement for direct assignment of costs may not be appropriate.

Several commenters added that the direct assignment of costs of emergency purchases should not be automatically required in curtailment emergencies if a pipeline makes such purchases for general system supply to remedy acute curtailment of high-priority end users. One of these commenters stated that this rate treatment would result in the inability of unwillingness of interstate pipelines to purchase emergency gas.

In the NOPR, the Commission stated that the purpose of prohibiting a pipeline from rolling the cost of emergency gas into the rates of all on-line customers was to permit normal "market signals" to flow from the incremental gas customers, who would otherwise face curtailments, to their supplies of emergency gas.[19] One commenter contended that such market signals would not exist where certain interstate pipelines have thousands of end users dependent upon those pipelines' quick responses to emergency shortfalls of gas supplies. This commenter also pointed out that "pipeline" or *force majeure* emergencies are more likely to affect a discrete portion of a pipeline's system than curtailment emergencies. This commenter concluded that the costs associated with all emergency purchases should be permitted to be rolled into the costs of system supplies.

One commenter, however, suggested that in the case of a curtailment emergency, particular recipients should be required either to pay the direct costs related to the discrete emergency gas supply that they receive or to pay the pipeline's weighted average cost of providing service to all customers which received emergency gas.

As noted above, the final rule eliminates the distinction between "pipeline" and "curtailment" emergencies by retaining the current definition of emergency. Under this format, it might be more difficult to determine where the benefits of emergency gas purchases will accrue. Thus, use of the rolled-in method on a systemwide basis would be more practical. Accordingly, with the exception noted below, § 284.265(b) of the final rule provides for rolled-in treatment of emergency gas purchase costs.

The Commission agrees with the commenters that some inequities might result during selected emergencies from allowing only the rolled-in cost allocation method. Further, the Commission also has determined that it would be inappropriate and unnecessarily complicated for an interstate pipeline to aggregate its gas costs in all emergency transactions in a separate account and allocate those costs on a weighted-average basis among customers in different emergency transactions. Accordingly, § 284.265 of the final rule provides that an interstate pipeline, when able to determine that the benefits of a particular purchase of emergency gas accrue only to particular customers, must directly assign the purchase costs of the emergency gas to those customers. Section 285.265 further provides, if the interstate pipeline is unable to determine that an emergency gas purchase benefits only particular customers, that the interstate pipeline must roll the emergency gas costs into general system supply costs.[20]

The proposed rate and revenue conditions applicable to participants that provide emergency transportation or make emergency sales are unchanged, with three exceptions. First, the language of proposed § 284.266(b) has been revised to provide that interstate pipelines that do not have comparable sales rates on file shall determine their emergency sales rates according to the methodology used in designing their currently effective sales rates, including their current purchased gas cost. This revision was made because the proposed language, while it would be substantively the same in most instances, would not be applicable to all interstate pipelines since it provided for every interstate pipeline to design its rates according to "the methodology used in designing rates to recover its transmission and storage costs and its current purchased gas cost."

Second, interstate pipelines that file § 284.7 rates shall be required, after such filings become effective, to apply to any emergency transportation service a volumetric rate based upon the full costs properly allocable to that transportation service. The provisions of § 284.7(b)(5) that provide for rate flexibility will not apply to emergency transactions, since those provisions are intended to permit pipelines to meet competitive pressures. In view of the Commission's determination that qualification as an emergency should not depend on economic considerations, an interstate pipeline should not be allowed to charge a rate less than its properly allocable costs of service. Further, it would not be appropriate for an interstate pipeline to withhold service from a customer experiencing an emergency until the customer agrees to pay a rate higher than the properly allocable costs of service. Moreover, it does not appear appropriate to establish a separate projected level of emergency transportation in order to develop transportation rates. Therefore, an interstate pipeline must charge a volumetric and fully allocated-cost rate, as described in § 284.7(d)(1), adjusted only for time and distance as provided in § 284.7(d)(3). Moreover, since the proposal would have made interstate pipelines' emergency transportation rates subject to § 284.103 by reference, and Order No. 436 deleted § 284.103 from the Commission's regulations, it is necessary in this final rule to include, with certain modifications, the provisions of former § 284.103 in the new Subpart I emergency regulations in § 284.266. The emergency transportation and sales rate conditions applicable to intrastate pipelines and local distributors will be implemented, as proposed, by reference to § 284.123 of Subpart C, § 284.144 of Subpart D, and § 284.224(e)(2)(ii) (previously § 284.222(e)(2)(ii)) of Part 284.

Finally, in recognition that interstate pipelines will generally not include revenues from their emergency gas sales in their Purchased Gas Adjustments, the Commission has added a provision to new § 284.266(c) which clarifies that in such cases interstate pipelines are only required to credit to Account No. 191 those revenues in excess of the sum of their cost of purchased emergency gas and one cent per MMBtu. In addition, since the tariff of a pipeline that provides only transportation service may not provide for Purchased Gas Rate Adjustments, a new paragraph (iii) has been added to § 284.266(c)(1) to require that such pipelines credit emergency transportation revenues in excess of one cent per MMBtu to current bills in order to ensure that such revenues are flowed back to the interstate pipeline's customers.

5. Reporting Requirements

Current § 157.51 requires an interstate pipeline, within 48 hours after commencement of deliveries of emergency natural gas, to notify the Commission in writing of the sale, stating the specific nature and duration of the emergency, the amount of emergency natural gas to be purchased or transported on a daily basis, the name of the seller, the transporter, and any person to whom the emergency natural gas is to be assigned, and the price.

Proposed § 284.267 would have required a telegraphic report, rather than a written report, within 48 hours after deliveries commence under emergency gas sales, transportation, or exchanges by the purchasing participant, the recipient, or the initial recipient, respectively. Much of the same data about each transaction that were required under the proposed rule are currently required under § 157.51. These data include the specific nature and anticipated duration of the emergency, the amount of gas to be purchased or transported on a daily basis, the names of the sellers, the transporters, and any assignee, and the price. The proposed rule also would require the following additional data for each type of transaction. A statement that the report is made under § 284.267 (§ 284.270 in the final rule), the date the transaction began, the total amount of emergency gas expected to be moved in the transaction, and the identity of all participants involved. Proposed § 284.267(a)(3) would require similar data pertaining to exchanges except that instead of reporting the price for the gas, the proposed rule required data on whether the exchange is concurrent or nonconcurrent. The rule also required a statement of the redelivery schedule and any imbalances in the volumes, whether the exchange is on a thermal or volumetric basis, and the rates or charges for the exchange service.

Proposed § 284.267(b) contained a new requirement for a termination report.[21] Three sworn copies of the termination report were required to be filed 30 days after the emergency transaction ends. The report would include the following information: (1) A description of the emergency transaction; (2) the date it began and ended; (3) the date of the 48-hour report; (4) the way the emergency was resolved; (5) any corrections to the initial telegraphic report or a statement that it is correct; (6) the volumes delivered and compensation received for the emergency gas; (7) how the compensation was determined; (8) the volumes of natural gas that were assigned; (9) the total volume in system supply; (10) any information supplied to other participants that an emergency existed or was imminent so as to qualify as an emergency transaction; and (11) that the emergency was carried out under Subpart I. Like the 48-hour report, the 30-day termination report required data that would be readily available to a participant, because it was essentially a final version of the data previously sent in the 48-hour report. The Commission proposed the termination report to assist its effective administration of Part 284 in light of incidents where emergency transactions may have been used improperly to circumvent NGA certificate requirements.

One commenter argued that because telegraph facilities are not always available, the participate be given the option of making a report by telephone, followed by a written report. Another commenter suggested that the method of reporting not be restricted to a telegram, but rather, that any reasonable method of communication that complies with the 48-hour requirement be permitted.

The Commission's intent was to clarify the reporting requirements without increasing the reporting burden. In this context, the Commission believed that it would be less burdensome for a participant to send a telegram than to prepare and send a written report. However, a documented record of some sort is needed—either a written report or a telegram. Forty-eight hour reporting has been a requirement of emergency transactions for many years. The Commission needs such information to keep itself informed of emergency situations as they occur, in order to carry out its regulatory responsibility to ensure reliable service. Nevertheless, in response to the comments, the final rule has been modified in new § 284.270(a) to permit written reports in lieu of telegraphic reports; thus, for the 48-hour report, the reporting participant can send either a written report or a telegram.

One commenter stated that it may not be possible for the reporting participant to specify the actual total amount or average daily amount of emergency natural gas in the 48-hour report. Though the NOPR specified the amount of gas to be purchased or transported on a daily basis, it was not the Commission's intent to require actual volumes in these reports. Therefore, the final rule has been modified in § 284.270(a)(4) of the final rule to include the term "estimated" in the context of total and average daily volumes reported in 48-hour reports.

The Commission also agrees with the commenter's statement that inclusion of a redelivery schedule of the volumes in an exchange transaction is unnecessary and possibly burdensome. This commenter rightly pointed out that the requirement to correct any imbalance in volumes within 180 days was retained in the proposed regulations. This requirement is sufficient to achieve the Commission's objective. Therefore, the redelivery schedule reporting requirement is not included in the final rule.

One commenter suggested that for all parties to an emergency transaction to be kept fully informed, the reporting participant should be further required to serve copies on the other participants. While the Commission agrees that it would be good business practice for the reporting participants to provide copies of the reports to the other parties, and encourages them to do so, it does not wish to codify that practice as a legal requirement.

Finally, the reporting requirements have been revised to clarify that, when required to describe the specific nature of an emergency situation (*see* §§ 284.270 (a)(3), (b)(3), (c)(3), and (d)(1) of the final rule), the respondent should include sufficient information to demonstrate how the situation qualifies

---

[20] Of course, the appropriateness and prudence of any purchases for emergency sales will be subject to scrutiny in the purchasing pipeline's appropriate PGA or general rate change filings.

[21] The quarterly report prescribed under current § 157.51(b) is required to be filed only at the end of each calendar quarter in 1979. This report was retained in the proposed rule.

as an emergency under § 284.262 and under the conditions of § 284.264.

6. Relationship Between Emergency Transaction Regulations and Order No. 436

The amended emergency regulations promulgated in this order partially overlap the regulations for the transportation programs in Subparts B, C, G and H of Part 284. To prevent any ambiguity, the Commission clarifies here that the non-discriminatory access, customer contract demand reduction/conversion, and other conditions of Order No. 436 do not apply to emergency transportation performed under Subpart I. (The one exception, as discussed above, is that certain of the rate conditions of § 284.7 will apply to interstate pipelines that also transport under Order No. 436.)

On the other hand, the Commission wishes to clarify that the emergency regulations are not intended as a substitute for transportation authority available through the provisions of Order No. 436. Thus, an interruption of transportation resulting from a pipeline's decision not to participate in the self-implementing transportation provisions of Order No. 436, or not to seek specific authority for transportation or sales under section 7 of the Natural Gas Act, would not of itself constitute an emergency under new § 284.262. Such an interruption, for instance, would not constitute "a sudden unanticipated loss of natural gas supply," a curtailment of deliveries, or a situation requiring protection of life or health or the maintenance of physical property, within the meaning of that section.

III. Regulatory Flexibility Act Statement

The Regulatory Flexibility Act (RFA), section 3, 5 U.S.C. 601–612 (1982), requires agencies to prepare certain statements, descriptions, and analyses of rules that, if promulgated, of small entities." The Commission is not required to make such analyses if a rule would not have such an impact.

Most of the pipeline companies affected by this rule do not fall within the RFA's definition of small entity.[22] Some local distribution companies may meet the small entity definition. However, the accounting, filing, and reporting burdens on all of the entities affected by the rule would either remain about the same or would be increased by a very small degree. The associated costs that would be incurred by participants to emergency transactions are likely to be insignificant. Conversely, the reporting requirements should be easier to understand and complete. The Commission is revising these reporting requirements only where its administrative and enforcement experience has shown a need to do so. In addition, any increased compliance burden should be offset by the clarifications and consolidations made in this rule. For example, a participant's election to file a telegraphic report rather than a more burdensome written report will probably reduce the overall time and resources that must be spent by transaction participants.

For these reasons, the Commission does not believe that the impact of this rule will be economically "significant," at least within the meaning of the RFA. Pursuant to section 605(b) of the RFA, therefore, the Commission certifies that this rule will not have a "significant economic impact on a substantial number of small entities."

IV. Paperwork Reduction Act Statement

The information collection provisions in this final rule are being submitted to the Office of Management and Budget (OMB) for its approval under the Paperwork Reduction Act [23] and OMB's regulations.[24] Interested persons can obtain information on the information collection provisions by contacting the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 (Attention: Talib Shahid, (202) 357–8593). Comments on the information collection provisions can be sent to the Office of Information and Regulatory Affairs of OMB, New Executive Office Building, Washington, D.C. 20503. (Attention: Desk Officer for the Federal Energy Regulatory Commission.)

V. Effective Date

The amendments made by this final rule will be effective on June 2, 1986. If OMB's approval and control number have not been received by this effective date, the Commission will issue a notice temporarily suspending the effective date.

In consideration of the foregoing, the Commission amends Part 2, Part 157, and Part 284, Title 18, Chapter I, Code of Federal Regulations, as set forth below.

List of Subjects

18 CFR Part 2

Administrative practice and procedure, Electric power, Environmental impact statements, Natural gas, Pipelines, Reporting and recordkeeping requirements.

18 CFR Part 157

Administrative practice and procedure, Natural gas, Reporting and recordkeeping requirements.

18 CFR Part 284

Continental shelf, Natural gas, Reporting and recordkeeping requirements.

By the Commission.

Kenneth F. Plumb,
Secretary.

PART 2—[AMENDED]

1. The authority citation for Part 2 is revised to read as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); Executive Order No. 12.009, 3 CFR 142 (1978); Federal Power Act, 16 U.S.C. 792–825r (1982); Natural Gas Act, 15 U.S.C. 717–717w (1982); Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432 (1982); Public Utility Regulatory Policies Act of 1978, 16 U.S.C. 2601–2645 (1982); and the National Environmental Policy Act, 16 U.S.C. 4321–4361 (1976), unless otherwise indicated.

§ 2.68 [Removed]

2. Part 2 is amended by removing § 2.68.

PART 157—[AMENDED]

3. The authority citation for Part 157 is revised to read as follows:

Authority: Natural Gas Act, 15 U.S.C. 717–717w (1982), as amended; Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432 (1982); Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); Executive Order No. 12009, 3 CFR 142 (1978).

§§ 157.22 and 157.29 [Removed]

4. Sections 157.22 and 157.29 are removed.

5. The table of contents for Part 157 is amended by removing the title of Subpart C and the section numbers and headings thereunder.

Subpart C (§§ 157.45–157.52)—[Removed]

6. In Part 157, Subpart C (§§ 157.45 through 157.52) is removed in its entirety.

PART 284—[AMENDED]

7. The authority citation for Part 284 is revised to read as follows:

Authority: Natural Gas Act, 15 U.S.C. 717–717w (1982), as amended; Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432 (1982); Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); Executive Order No. 12,009, 3 CFR 142 (1978).

8. The table of contents of Part 284 is amended by adding a new Subpart I to read as follows:

PART 284—CERTAIN SALES AND TRANSPORTATION OF NATURAL GAS UNDER THE NATURAL GAS POLICY ACT OF 1978 AND RELATED AUTHORITIES

* * * * *

Subpart I—Emergency Natural Gas Sale, Transportation, and Exchange Transactions

Sec.

284.261 Purpose.
284.262 Definitions.
284.263 Exemption from section 7 of Natural Gas Act and certain regulatory conditions.
284.264 Terms and conditions.
284.265 Cost recovery by interstate pipeline.
284.266 Rates and charges for Interstate Pipelines.
284.267 Intrastate pipeline emergency transportation rates.
284.268 Local distribution company emergency transportation rates.
284.269 Intrastate pipeline and local distribution company emergency sales rates.
284.270 Reporting requirements.
284.271 Waiver.

9. In Part 284, a new Subpart I is added to read as follows:

Subpart I—Emergency Natural Gas Sale, Transportation, and Exchange Transactions

§ 284.261 Purpose.

This subpart exempts a person who engages in an emergency natural gas transaction, as defined for purposes of this subpart, in interstate commerce from the certificate requirements of section 7 of the Natural Gas Act and from the conditions of § 284.7, except as provided in § 284.266, and §§ 284.8–284.13 of Subpart A of this Chapter.

§ 284.262 Definitions.

For purposes of this subpart:

(a)(1) "Emergency" means, except as provided in paragraph (a)(2):

(i) Any situation in which an actual or expected shortage of gas supply would require an interstate pipeline company, intrastate pipeline, local distribution company, or Hinshaw pipeline to curtail deliveries of gas or provide less than the projected level of service to any customer, including any situation in which additional supplies are necessary to maintain levels of natural gas storage inventories sufficient to ensure a pipeline's projected level of service to any customer, but not including any situation in which additional supplies are needed to increase the projected level of service to an existing customer or to provide service to new customers; or

(ii) A sudden unanticipated loss of natural gas supply or a sudden unanticipated increase in demand; or

(iii) Any situation in which the participant, in good faith, determines that immediate action is required or is reasonably anticipated to be required for protection of life or health or for maintenance of physical property.

(2) "Emergency" does not mean any situation under paragraph (a)(1) resulting solely from a failure by any person to transport natural gas under Subpart B, C, G, or H of this part.

(b) "Projected level of service" means the level of service projected level by the company for each customer which the company uses to compile the total projected level of service that it reports in its FERC Form No. 16 and additional supplies needed by a customer due solely to a weather-inducted increase in requirements.

(c) "Emergency natural gas" means natural gas sold, transported, or exchanged in an emergency natural gas transaction.

(d) "Emergency natural gas transaction" means the sale, transportation, or exchange of natural gas (including the construction and operation of necessary facilities) conducted pursuant to this subpart that is:

(1) Necessary to alleviate an emergency; and

(2) Not anticipated to extend for more than 60 days in duration.

(e) "Emergency costs" means the amount paid by a recipient of emergency natural gas and all associated costs, including all transportation costs.

(f) "Participant" means any first seller, interstate pipeline, intrastate pipeline, local distribution company or Hinshaw pipeline that participates in an emergency natural gas transaction under this subpart.

(g) "Recipient" means:

(1) In the case of the sale of emergency natural gas, the purchaser of such gas; or

(2) In the case of a transportation or exchange of emergency natural gas when there is no sale of emergency natural gas under this subpart, the participant who receives the gas.

(h) "Hinshaw pipeline" means a pipeline that is exempt from the Natural Gas Act jurisdiction of the Commission by reason of section 1(c) of the Natural Gas Act.

§ 284.263 Exemption from section 7 of Natural Gas Act and certain regulatory conditions.

Any participant that engages in an emergency natural gas transaction conducted in accordance with this subpart is exempt from the requirements of section 7 of the Natural Gas Act and the conditions of § 284.7, except as provided in § 284.266, and from the requirements of §§ 284.8–284.13 of Subpart A of this part. Participation in any emergency natural gas transaction will not subject any participant to the jurisdiction of the Commission under section 7 of the Natural Gas Act except to the extent such transaction is provided for in this subpart.

§ 284.264 Terms and conditions.

(a) *General conditions.* (1) A participant must make every reasonable attempt to minimize use of emergency natural gas transactions.

(2) Before deliveries of emergency natural gas commence, a responsible official of the recipient must provide any participants in the emergency natural gas transaction sufficient information to enable the participants to form a good faith belief that an emergency exists or is imminent.

(3) No participant may engage in an emergency natural gas transaction if its participation will adversely affect service to its existing customers.

(4) A participant may not sell emergency natural gas if, during the term of the sale, it is also purchasing emergency natural gas under this subpart, except when natural gas is being sold to relieve an emergency on another, separate segment of the participant's system.

(5) An interstate pipeline, acting in an emergency gas transaction as a broker or agent on behalf of another participant or any other person, may not receive compensation for such brokerage or agency service.

(6) A recipient of emergency natural gas that directly benefits from the service must:

(i) Provide line loss and the fuel volumes required to transport the emergency natural gas; and

(ii) Pay for the facilities required to be constructed to conduct the emergency natural gas transaction.

(b) *Duration.—(1) Emergency sale or transportation.* An emergency natural gas transaction is limited to 60 consecutive calender days, except that such transaction may be continued for an additional 60 consecutive days if:

(i) Fifteen days prior to the end of the initial 60-day period, the recipient of

emergency natural gas files a petition that:

(A) Describes fully the continued emergency,

(B) Requests a waiver of the intitial 60-day limitation and permission for an extension of the transaction for an additional 60 days; and

(ii) Within the 15-day period, the Commission does not, by order, prohibit continuation of the emergency natural gas transaction for the additional 60-day period.

(2) *Redelivery in emergency exchange.* The redelivery of emergency natural gas received under an exchange arrangement must occur within 180 consecutive days following the termination of deliveries of the emergency natural gas.

§ 284.265 Cost recovery by interstate pipeline.

(a) Except as provided in paragraph (b), an interstate pipeine that provides emergency natural gas, whether from its system supply or by special purchase, must directly assign the emergency gas costs to the recipient.

(b) If an interstate pipeline cannot identify individual recipients, the interstate pipeline must roll the emergency gas costs into its general system supply costs.

§ 284.266 Rates and charges for interstate Pipelines.

(a) *Transportation rates.*—(1) *Rate on file.* If an interstate pipeline has on file with the Commission an effective transportation rate schedule that conforms to § 284.7, it must use volumetric rates based upon fully-allocated costs and adjusted only for time and distance.

(2) *Rate not on file.* If an interstate pipeline does not have on file with the Commission a transportation rate schedule that conforms to § 284.7, it may:

(i) Base its rates upon the methodology used in designing rates to recover the transmission and related storage costs included in one of its then-effective sales rates schedules; or

(ii) Use the rates contained in one of its transportation rate schedules on file with the Commission which the interstate pipeline determines covers service comparable to transportation service authorized under this subpart.

(b) *Sales rates.*—(1) *Rate on file.* An interstate pipeline must determine its rates for sales of emergency natural gas under this subpart according to a rate schedule applicable or comparable to this type of service.

(2) *Rate not on file.* If no applicable or comparable rate schedule is on file for this type of service, the interstate pipeline must determine its rates according to the methodology used in designing its then effective sales rates, including its current purchased gas cost.

(c) *Treatment of revenues.* (1) Except as provided in paragraph (c)(2),

(i) All revenues received by an interstate pipeline for transportation or, if the interstate pipeline includes the cost of emergency natural gas in its Purchase Gas Adjustment, for sales authorized under this subpart in excess of an allowance of one cent per MMBtu must be credited to Account No. 191 and flowed back to the interstate pipeline's customers.

(ii) All revenues received by the interstate pipeline for transportation or, if the interstate pipeline does not include the cost of emergency natural gas in its Purchased Gas Adjustment, for sales authorized under this subpart in excess of the sum of (A) the cost of purchased gas plus (B) an allowance of one cent per MMBtu must be credited to Account No. 191 and flowed back to the interstate pipeline's customers.

(iii) If an interstate pipeline's tariff does not provide for Purchased Gas Rate Adjustments, all revenues received by the interstate pipeline for transportation authorized under this subpart in excess of one cent per MMBtu must be flowed back to the interstate pipeline's customers by credits to current bills.

(2) An interstate pipeline is not required to credit revenues received for transportation or sales authorized under this subpart:

(i) If representative levels of revenues attributable to transportation or sales, as applicable, under authority of this subpart have been credited in arriving at a test period cost-of-service; or

(ii) If representative levels of volumes transported or sold, as applicable, under authority of this subpart have been included in billing determinants for the purpose of establishing rates; or

(iii) which, upon application, the Commission finds to have been demonstrated as representing the out-of-pocket expenses of the interstate pipeline in connection with a transaction authorized under this subpart.

(d) *Interstate pipeline costs excluded from rate base.* An interstate pipeline may not include in its jurisdictional rate base any cost associated with facilities installed and operated in connection with an emergency natural gas transaction unless a certificate of public convenience and necessity has been issued authorizing the costs. Absent a certificate, such facilities may only be used to conduct emergency natural gas transactions or transactions authorized under section 311 of the NGPA.

§ 284.267 Intrastate pipeline emergency transportation rates.

General rule. Rates and charges for transportation of emergency gas by intrastate pipelines authorized under this subpart must be determined in accordance with § 284.123 of this chapter.

§ 284.268 Local distribution company emergency transportation rates.

(a) *Rate on file.* A local distribution company that has a rate on file with an appropriate state regulatory agency for city-gate transportation services must determine its rates and charges for transportation of emergency natural gas in accordance with § 284.123 of this chapter.

(b) *Rate not on file.* A local distribution company that does not have a rate on file with an appropriate state regulatory agency for city-gate transportation services must determine its rates and charges for transportation of emergency natural gas (per unit volume of emergency natural gas transported) in accordance with § 284.224(e)(2)(ii) of this chapter.

§ 284.269 Intrastate pipeline and local distribution company emergency sales rates.

An intrastate pipeline or local distribution company must determine its rates for sales of emergency natural gas under this subpart in accordance with § 284.144.

§ 284.270 Reporting requirements.

(a) *Forty-eight hour report for sales transactions.* Within 48 hours after deliveries of emergency natural gas commence, the purchasing participant must notify the Commission by telegraph or other written report of the sale, stating, in the following sequences:

(1) That the report is submitted pursuant to § 284.270 for an emergency natural gas transaction;

(2) The date deliveries commenced;

(3) The specific nature of the situation, explained in sufficient detail to demonstrate how the situation qualifies as an emergency under § 284.262 and under the conditions of § 284.264, and anticipated duration of the emergency;

(4) The estimated total amount and average daily amount of emergency natural gas to be purchased during the term of the transaction;

(5) The purchase price of the emergency natural gas;

(6) The transportation rate; and

(7) The identity of all participants involved in the transaction, including any customers to whom the emergency natural gas is to be assigned.

(b) *Forty-eight hour report for transportation (excluding exchanges).* Within 48 hours after deliveries commence in an emergency natural gas transaction which does not involve the sale of emergency natural gas, the recipient of emergency natural gas shall notify the Commission by telegram or other written report of the transportation, stating, in the following sequence:

(1) That the report is submitted pursuant to § 284.270 for an emergency transaction;

(2) The date deliveries commenced;

(3) The specific nature of the situation, explained in sufficient detail to demonstrate how the situation qualifies as an emergency under § 284.262 and under the conditions of § 284.264, and anticipated duration of the emergency;

(4) The estimated total amount and average daily amount of emergency natural gas to be transported during the term of the transaction;

(5) The transportation rate; and

(6) The identity of all the participants involved in the transaction.

(c) *Forty-eight hour report for Exchanges.* Within 48 hours after an exchange transaction for emergency natural gas commences, the initial recipient of the exchange volumes must notify the Commission by telegram or other written report of the exchange, stating, in the following sequence:

(1) That the report is for and submitted pursuant to § 284.270 for an emergency transaction;

(2) The date the exchange commenced;

(3) The specific nature of the situation, explained in sufficient detail to clearly demonstrate how the situation qualifies as an emergency under § 284.262 and under the conditions of § 284.264, and anticipated duration of the emergency;

(4) The estimated total amount and average daily amount of emergency natural gas to be exchanged during the term of the transaction;

(5) The identity of all participants involved in the transaction;

(6) Whether the exchange is simultaneous or deferred, or any imbalances in the volumes;

(7) Whether the exchange is on a thermal or volumetric basis; and

(8) The rates or charges, if any, for the exchange service.

(d) *Termination report.* Within thirty days after the emergency natural gas transaction ends, the participant that received the emergency natural gas shall file with the Commission a sworn statement and two conformed copies thereof, which must include the following information in the following sequence:

(1) A description of the emergency natural gas transaction, including sufficient information to clearly demonstrate how the situation qualifies as an emergency under § 284.262 and under the conditions of § 284.264; the commencement and termination dates; the date of the 48-hour report, and the method of resolving the emergency;

(2) Any corrections to the 48-hour report information supplied to the Commission under paragraphs (a) through (c) of this section or a statement that the information was correct;

(3) The volumes of the emergency natural gas delivered during the transaction;

(4) The total compensation received by the seller for the emergency sale;

(5) The total compensation paid for the emergency natural gas transportation or exchange service, if any;

(6) The methods by which such compensation was derived;

(7) The total volumes of natural gas whose cost was assigned to specific customers, and the total volumes whose cost was included in system supply;

(8) The information supplied to any other participant pursuant to § 284.264(a)(2); and

(9) A statement that the emergency natural gas transaction was carried out in accordance with this subpart, and that identifies the circumstances demonstrating an emergency existed or was imminent so as to require an emergency natural gas transaction.

§ 284.271 Waiver.

The Commission may, by order, waive the requirements of this subpart in connection with any emergency natural gas transaction to the extent required by the public interest.

BILLING CODE 6717-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Apramycin

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Elanco Products Co. The NADA provides for the safe and effective use of an apramycin sulfate Type A medicated article to make a finished Type C swine feed used for control of porcine colibacillosis (weanling pig scours) caused by susceptible strains of *Escherichia coli.*

EFFECTIVE DATES: This rule is effective March 18, 1986, except that the amendment to § 558.4(d) is effective May 2, 1986.

FOR FURTHER INFORMATION CONTACT: Charles E. Haines, Center for Veterinary Medicine (HFV-133), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3410.

SUPPLEMENTARY INFORMATION: Elanco Products Co., a Division of Eli Lilly & Co., 740 South Alabama St., P.O. Box 1750, Indianapolis, IN 46285, filed NADA 128-050. The NADA provides for use of Apralan® 75, an apramycin sulfate Type A medicated article containing 75 grams of apramycin per pound, to make a Type C swine feed used for control of porcine colibacillosis (weanling pig scours) caused by susceptible strains of *E. coli.* Apramycin is currently approved for use in the drinking water of swine. The NADA is approved and the regulations are amended accordingly. The basis of approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. FDA's regulations implementing the National Environmental Policy Act (21 CFR Part 25) have been replaced by a rule published in the **Federal Register** of April 26, 1985 (50 FR 16636, effective July 25, 1985). Under the new rule, an action of this type would require an

environmental assessment under 21 CFR 25.31a(a).

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR Part 558 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

2. Section 558.4 *Medicated feed applications* is amended in paragraph (d) in the table entitled "Category II" by adding a new entry alphabetically to read as follows:

§ 558.4 Medicated feed applications.

* * * * *

(d) * * *

CATEGORY II

Drug	Assay limits: Type A, percent [1]	Type B maximum (100x)	Assay limits (% of labeled amount) type B/C [2]
*	*	*	*
Apramycin	88–112	7.5 g/lb (1.65%).	80–120
*	*	*	*

* * * * *

3. A new § 558.59 is added to read as follows:

§ 558.59 Apramycin.

(a) *Approvals.* Type A articles to sponsors identified in § 510.600(c) of this chapter as follows:

(1) 000986 for 75 grams apramycin (as apramycin sulfate) per pound for use as in paragraph (d)(1) of this section.

(2) [Reserved]

(b) [Reserved]

(c) *Related tolerances.* See § 556.52 of this chapter.

(d) *Conditions of use—(1) Swine—*(i) *Amount.* 150 grams per ton.

(ii) *Indications for use.* For control of porcine colibacillosis (weanling pig scours) caused by susceptible strains of *Escherichia coli.*

(iii) *Limitations.* Use for 14 days. Withdraw 28 days before slaughter.

(2) [Reserved]

Dated: March 12, 1986.

Gerald B. Guest,

Acting Director, Center for Veterinary Medicine.

Correction

In FR Doc. 86–4369 beginning on page 7666 in the issue of Wednesday, March 5, 1986, make the following corrections:

1. On page 7680, in the first column, in § 25.81(b)(2), in the sixth line, "wall" should read "all".
2. On page 7683, in the second column, in § 25.122, in the second line, "or ATF" should read "on ATF".
3. Also on page 7683, in the third column, in § 25.125, in the second line, "of IRS" should read "on IRS".
4. On page 7691, in the first column, in § 25.221(b), in the last line, "his" should read "this".
5. On page 7695, in the third column, in § 25.286(a), in the sixteenth line, "whey" should read "why".
6. On page 7696, in the third column, in § 25.292(b)(5), in the second line, "removed" should read "removal".
7. On page 7700, in the first column, in the heading for § 252.150, "Changes" should read "Charges".

BILLING CODE 1505-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 60 and 61

[A-7-FRL-2986-5]

Standards for Performance for New Stationary Sources (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS); Delegation of Authority to the State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of delegation of authority.

SUMMARY: This notice announces an extension of previously issued delegations of authority for the implementation and enforcement of the federal Standards of Performance for New Stationary Source (NSPS), 40 CFR Part 60, and the federal National Emission Standards for Hazardous Air Pollutants (NESHAPS), 40 CFR Part 61. The action which involved EPA and the State of Missouri added eight (8) NSPS and three (3) NESHAPS categories to the delegations of authority. The delegations now include all categories for which federal standards have been promulgated by the agency through July 1, 1984.

EFFECTIVE DATE: March 18, 1986.

ADDRESSES: All requests, reports, applications, submittals and such other communications which are required to be submitted under 40 CFR Part 60 or Part 61 (including the notifications required to be submitted under Subpart A of the regulations) for affected facilities or activities in Missouri should be sent to the Missouri Department of Natural Resources (MDNR), P.O. Box 1368, Jefferson City, Missouri 65101. A copy of all Subpart A related notifications must also be sent to the attention of the Director, Air and Toxics Division, U.S. EPA, Region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101.

FOR FURTHER INFORMATION CONTACT: Charles W. Whitmore, Chief, Air Compliance Section, Air Branch, U.S. EPA, Region VII, at the above address (913/236–2896 or FTS: 757–2896).

SUPPLEMENTARY INFORMATION: Sections 111(c) and 112(d) of the Clean Air Act, respectively, allow the Administrator of the Environmental Protection Agency (i.e., EPA or the agency) to delegate to any state government authority to implement and enforce the standards promulgated by the agency under 40 CFR Part 60 and 40 CFR Part 61. When a delegation is issued, the agency retains concurrent authority to implement and enforce the delegated standards. The delegation basically shifts the primary responsibility for implementation and enforcement of the standards for the agency to the state government.

On October 29, 1984, the agency and the State of Missouri entered into a delegation of authority agreement whereby Missouri will automatically receive authority to implement and enforce federal NSPS and NESHAPS standards upon the adoption of the standards by the state government (see 50 FR 933).

Prior to October 29, 1984, Missouri was delegated authority to implement and enforce the standards for numerous categories in various delegation and extension of authority actions. These previous delegation and extension of

authority actions were not affected by the action described below.

Missouri has updated its rules to incorporate, by reference, the provisions of 40 CFR Part 60 and Part 61 as in effect on July 1, 1984. The updating actions, in effect, incorporated the standards for eight (8) additional NSPS and three (3) additional NESHAPS regulations promulgated by the agency. The effective date of the updating actions were August 26, 1985 (NSPS) and October 26, 1985 (NESHAPS). The MDNR informed the agency of the adoption actions in a letter dated January 21, 1986.

The agency subsequently acknowledged the adoption actions and the corresponding delegations of authority in a letter to MDNR on February 19, 1986. The delegations occurred under the terms of the above mentioned October 29, 1984, automatic delegation of authority agreement.

Interested individuals are informed that, as of August 26, 1985, (NSPS) and October 26, 1985 (NESHAPS), the State of Missouri has EPA's authorization to implement and enforce the federally established standards for the following additional categories:

NSPS:
- Subpart LL—Metallic Mineral Processing Plants;
- Subpart RR—Pressure Sensitive Tape and Label Surface Coating Operations;
- Subpart VV—Equipment Leaks of VOC in the Synthetic Organic Chemicals Manufacturing Industry;
- Subpart WW—Beverage Can Surface Coating Industry;
- Subpart XX—Bulk Gasoline Terminals;
- Subpart FFF—Flexible Vinyl and Urethane Coating and Printing;
- Subpart GGG—Equipment Leaks of VOC in Petroleum Refineries; and,
- Subpart HHH—Synthetic Fiber Production Facilities.

NESHAPS:
- Subpart M—Asbestos;
- Subpart J—Equipment Leaks (Fugitive Emissions Sources) of Benzene; and,
- Subpart V—Equipment Leaks (Fugitive Emission Sources).

Effective immediately, all reports, correspondence, and such other communications that are required to be submitted under the NSPS or NESHAPS regulation for facilities or activities in Missouri affected by the amended delegations of authority should be sent to the Missouri Department of Natural Resources at the above address rather than to the EPA Region VII office, *except* as noted below.

A copy of each notification required to be submitted under Subpart A of 40 CFR Part 60 or Part 61, must *also* be sent to the attention of the Director, Air and Toxics Division, U.S. EPA Region VII, at the above address.

Each document and letter mentioned in this notice is available for public inspection at the EPA regional office.

This notice is issued under the authority of sections 111 and 112 of the Clean Air Act, as amended (42 U.S.C. 7411 and 7412).

Dated: March 6, 1986.

William Rice,

Acting Regional Administrator.

Final Flood Elevation Determinations; California et al.

Correction

In FR Doc. 86–2413 beginning on page 4347, in the issue of Tuesday, February 4, 1986, make the following correction:

On page 4347, beginning in the second column, the flood elevations in the table are final, and the table heading should be removed.

BILLING CODE 1505-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

45 CFR Parts 201, 205, 206, 225, 232, 233, 234, 235, 237

Aid to Families With Dependent Children Adult Assistance Programs

AGENCY: Social Security Administration, HHS.

ACTION: Final rule.

SUMMARY: This final rule amends regulations relating to the Aid to Families with Dependent Children (AFDC) program under title IV–A and the adult categories under titles I, X, XIV, or XVI (AABD) of the Social Security Act to promote fiscal savings, reduce the paperwork burden and increase State flexibility in the administration of these programs. Specifically, regulations at 45 CFR Parts 201, 205, 206, 225, 232, 233, 234, 235, and 237 are amended.

EFFECTIVE DATE: These final regulations are effective March 18, 1986.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara Levering, Office of Family Assistance, Social Security Administration, Transpoint Building, 2100 Second Street, SW., Washington, DC 20201, telephone (202) 245–2637.

SUPPLEMENTARY INFORMATION: The Social Security Administration (SSA) published a Notice of Proposed Rulemaking on November 16, 1984 (49 FR 45558–45570) proposing regulatory changes that would result in savings to State and Federal governments, provide States greater flexibility, and/or relieve the burden of paperwork on State agencies.

These final regulations are applicable to both the AFDC and adult assistance programs unless otherwise specified. Additionally, some of the changes clarify policy areas as a result of implementation of the Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35 (hereinafter referred to as OBRA). Unless otherwise noted, the estimated savings are Federal dollars only. This final rule is made effective upon publication in order to achieve the estimated fiscal savings already incorporated in the Federal budgets for AFDC and the Adult Assistance programs, and because many of these changes also allow States greater flexibility in their administration of these programs.

These final regulations: (1) Provide increased State flexibility by permitting:
—Telephone hearings in addition to face-to-face hearings;
—Recipients the option to refuse continued assistance pending a hearing decision;
—Different time frames for frequencies of eligibility redeterminations.

(2) Provide for more efficient program administration by clarifying:
—The amounts of income States may allocate and the individuals for whom such amounts may be allocated;
—How States are to treat windfalls and income tax refunds;
—What States may exclude as casual and inconsequential income and specifying a dollar limit per recipient, per quarter on such income of $30;
—The definition of stepparent marriage.

In addition, States can now assure the welfare of dependent children in instances of mismanagement of the AFDC grant, by making it easier in certain cases to make a direct payment of the shelter portion of the grant to the landlord.

Regulatory Procedures

Executive Order 12291

These final regulations have been reviewed under Executive Order 12291 and do not meet any of the criteria for a major regulation. Therefore, a regulatory impact analysis is not required because these regulations will not:

(1) Have an annual effect on the economy of $100 million or more. Federal annual savings of these regulatory provisions are estimated to be up to $37 million.

(2) Impose a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or

(3) Result in significant adverse effects on competition, employment, investment, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

Pursuant to the provisions of the Paperwork Reduction Act of 1980, Pub. L. 96–511, the Department has determined that this rulemaking will not impose any new recordkeeping, information collection, or reporting requirement requiring OMB approval.

Regulatory Flexibility Act

The Regulatory Flexibility Act (Pub. L. 96–354) requires the Federal government to anticipate and reduce the impact of regulations and paperwork requirements on small businesses. For each particular regulation with a "significant impact on a substantial number of small entities" (e.g., small businesses) we must publish an initial analysis describing the regulation's impact on them. This analysis is to indicate the purpose and reason for the regulation and the number of small businesses to which it would apply, to anticipate reporting and recordkeeping requirements, to identify possible overlap and conflict with other Federal regulations and to describe possible alternative means of accomplishing the stated objectives which would minimize the impact on small businesses.

We certify that these regulations will not have any significant economic impact on a substantial number of small entities becasue the primary impact of these regulations is on State governments and individuals. We do not believe that any provision will have direct impact on small businesses or other small entities within the intent of the Regulatory Flexibility Act and therefore, a regulatory flexibility analysis is not required.

Discussion of Major Provisions and Responses to Comments

We received approximately 200 comments from the following sources: Forty-five public interest groups; forty-eight various State agencies; seventy-two private citizens; seven landlords and landlord associations; sixteen tenants associations; thirty-eight lawyers and legal aid groups; and seventeen State and local housing authorities. The majority of these comments were related to the provision on the criteria for use of restricted payments. As a result of our review of these comments, the restricted payments regulation has been substantially amended.

Following is a discussion of the comments and our responses and the rationale for any significant changes from the proposed rulemaking. Based on our own further review, we have also made some minor and technical changes in the final rule.

Optional Telephone Hearings (Section 205.10(a)(2) of the Final Regulations

Current regulations require that each State provide applicants and recipients an opportunity for a hearing where the agency proposes to discontinue, terminate, suspend or reduce assistance or to change the manner or form of payments to a protective, vendor, or two-party payment. We have amended the regulations at § 205.10(a) to specify that States have the option of offering a telephone hearing when mutually agreed upon by the applicant or recipient and the State agency, as an alternative to face-to-face hearings.

One State, New Mexico, operated a demonstration project to study the effects of telephone conferencing as a substitute for in-person hearings under the AFDC program. The experiment was designed based on the following research questions: (1) Are hearings conducted over the telephone perceived to meet due process standards as specified by the courts for administrative hearings? (2) is the quality of the hearing changed by the introduction of telephone conferencing? and (3) are telephone hearings cost-effective?

The results of this study were favorable in response to all three of the research questions and conclusively demonstrated that telephone hearings can generate savings in both hearing officer productivity and travel expenses.

The comments uniformly expressed by both recipients and caseworkers were that fair and impartial hearings were still conducted and that recipients had full opportunity to present testimony. There were no significant differences in outcome results. A higher percentage ended in the recipient's favor and the time frame for handing down the hearing decision was shortened.

During a telephone hearing, for example, the hearing officer can remain at his/her place of employment, while all other pertinent parties can gather at the State agency. Should the recipient for whatever reason be unable to attend at the last moment, the hearing officer has not lost time in travel and is able to continue with routine work. Telephone hearings also make the hearing system more accessible to applicants and recipients. Additionally, the waiting period for a hearing and the hearing decision may also be shortened and thus benefit applicants and recipients.

Under the final regulations, if a recipient chooses a telephone hearing rather than a face-to-face hearing, the State must still assure that all applicable provisons of the hearing process are met. Any request for a telephone hearing must be knowing and voluntary. In addition, the recipient must be given adequate opportunity to be represented, examine and cross-examine witnesses, and examine the contents of the case file, and the hearing must be conducted at a reasonable time and date.

If all States were to allow telephone hearings, savings are estimated to be up to $2 million annually, based on approximately 59 percent of all hearings being conducted by telephone.

Comment: One commenter recommended that "conferencing" or informal procedures be used routinely to resolve general disputes between recipients and State agencies and that telephone, or face-to-face hearings be used only as a last resort.

Response: States currently have the discretion to use informal procedures to resolve general disputes prior to a fair hearing.

Comment: Several commenters expressed concern that the regulation was unclear as to whether a State was required to offer telephone hearings or whether telephone hearings were optional at State discretion. The commenters suggested, therefore, that the regulation be made more explicit to address this issue.

Response: We agree with this recommendation. Accordingly, the language of the regulation at § 205.10(a)(2) has been changed to add the words "at State option" to make clear that telephone hearings are not required. Where the State elects the option, the applicant or recipient must also agree to a telephone hearing.

Comment: One commenter stated that the country was not specifically mentioned as being a party to the agreement to conduct a telephone hearing and expressed opposition to a fair hearing process in which the county's ability to participate would be excluded.

Response: It is the responsibility of States to define the scope of participation by their local agencies in conducting a telephone or fact-to face hearing. States, however, should obviously encourage input and participation from the local level in the development of agency procedures for telephone hearings.

Comment: One commenter questioned the need for a specific regulation on telephone hearings, since current regulations do not explicitly prohibit this form of hearing.

Response: The amendment to current regulations makes it explicit that telephone hearings are a State option.

Aid Paid Pending the Hearing Decision (Section 205.10(a)(4)(i)(B) and (6)(i) and (7) of the Final Regulations)

Current regulations at § 205.10(a)(6)(i) specify, in pertinent part, that if a recipient requests a hearing within the timely notice period, assistance shall not be suspended, reduced, discontinued or terminated until a decision is rendered after a hearing. The regulations do, however, specify two exceptions to the continuation of assistance: (1) A determination made at the hearing that the sole issue is one of State or Federal law or policy, or a change in State or Federal law and not one of incorrect grant computation; and (2) a change affecting the recipient's grant occurs while the hearing decision is pending and the recipient fails to request a hearing after the notice of change. It is further provided in this regulation that if the agency's action is sustained at the hearing the aid pending the hearing is subject to recovery by the agency.

Many States have interpreted the current regulation very narrowly. Aside from the specific exceptions specified in the regulation, States believe they must continue the assistance in all cases, even where the recipient does not want aid paid pending the hearing.

Prior to OBRA, recovery of overpayments was optional under the AFDC program. As such, when an Agency's action was upheld, most States did not recover benefits paid during the period between the hearing request and the decision. However, OBRA now mandates the recovery of such AFDC payments, if the State's proposed action is upheld. Recovery of benefits remains optional for the adult assistance programs.

Because of this, some recipients and States are concerned over requiring the grant to be continued pending a hearing in all instances and then being confronted with recovery of this money when the State's action is upheld. Based on current available data, 58% of the hearing decisions rendered (January-March 1981) upheld the States' proposed actions.

We believe the recipient should be afforded a clear choice to refuse or to receive assistance pending a hearing. The regulations were not intended to preclude such action if requested by the recipient. Aid must be continued where the recipient requests this and it is not otherwise precluded under the regulations. Safeguards should be established in the State to ensure the recipient's decision is informed and not made under duress. Likewise, in the event the hearing decision is favorable to the recipient and he/she has elected not to receive aid paid pending, the State must retroactively pay him/her in accordance with § 205.10(a)(18).

We therefore, are amending the regulations to explicitly allow States to provide the recipient the opportunity to decline receipt of continued assistance, if the hearing is requested within the timely notice period.

This change provides consistency with current policy of two other Federal programs—Food Stamp and SSI. In many instances, the same individuals are receiving benefits from more than one of these programs. This change will clarify that States can coordinate this aspect of the AFDC and adult assistance programs with the Food Stamp and SSI programs.

In addition, we are amending § 205.10(a)(4)(i)(B) to provide where applicable, that the adequate notice inform an AFDC recipient that the assistance must be repaid if the agency action is upheld. Under the adult assistance programs, such notice will be provided where the State has elected to recover when an agency action is upheld.

These clarifications in the final regulations also apply to the adult assistance programs.

We estimate savings of up to $1 million annually.

Comment: One commenter expressed the opinion that by giving recipients the option of declining aid paid pending a hearing decision, they in effect waive their constitutional rights to a fair hearing.

Response: Under this provision, recipients only exercise the option of declining aid paid pending a hearing decision. However, this does not in any way affect the right to seek a fair hearing. The prior policy may have inadvertently prevented those who feared having to repay assistance paid while the hearing was pending from filing for a hearing in the first place.

Comment: Several commenters recommended that, with implementation of this provision, any resulting retroactive AFDC payments payable to such recipients should be exempt from consideration under the lump sum income rule.

Response: Under existing Federal regulations at § 233.20(a)(13)(ii), such retroactive AFDC payments are not considered as income or resources in the month of receipt or the following month. Any amount remaining in subsequent months is regarded as a resource to the AFDC assistance unit.

Comment: One commenter recommended that recipients be required to submit in writing any request that aid not be paid pending hearing decisions in order to ensure a recipient's "knowing and voluntary" declination of such aid.

Response: While a State may decide to require a written statement, the specific methods for ensuring that a decision is "knowing and voluntary" should be based on State law and practice.

Procedures for Issuance of Replacement Checks (Section 205.32 of the Final Regulations)

In a statement before a Congressional subcommittee hearing on fraud and abuse involving several Federal programs in 1981, the Associate Commissioner for the Office of Family Assistance described several initiatives under review including possible rulemaking changes to reduce the incidence of duplicate check issuance as a result of AFDC checks being lost or stolen. Preliminary findings from a study undertaken to gather statistical data on the incidence of duplicate checks showed that, in the 32 States responding, duplicate checks constituted 7.1 percent of all AFDC checks issued in 1979. They are costly, both administratively and from the standpoint of potential fraud.

We have, therefore, amended the regulations to prescribe procedures governing the issuance of duplicate (hereinafter referred to as replacement) checks under the AFDC program.

First, we have established procedures under which a State must, prior to the issuance of a replacement check: (1) Initiate, when appropriate, an immediate stop payment order on the original

VOL 51
ISS 52
MR 18
1986
UMI

check through appropriate banking procedures (such action would not be applicable when the original check is returned by the recipient and a replacement check is issued because of a name change or there is a change in the grantee, etc.); and (2) where the original check is not returned, secure a signed statement from the recipient attesting to the non-receipt, loss or theft of the original check. In this way, an adequate audit trail is established for documenting potential fraud.

We further amended the regulations to provide that States may, at their option, require recipients to report lost or stolen checks to the police or other appropriate authorities. Such investigations would assist in resolving many reports of lost or stolen checks. More importantly, it may deter incidents of fraud. Early investigation of stolen check cases should lead to quicker apprehension and be a significant factor in crime prevention. A State may make filing such a report a prerequisite for issuance of a replacement check in cases of lost or stolen checks. A State may also establish procedures for the verification of such reports. For example, the State may require that the recipient provide a copy of the report made to the police or to other appropriate authorities. In establishing procedures for issuance of replacement checks, States must ensure that no undue delay occurs in issuing a new payment.

Annual savings are estimated at up to $1 million in Federal funds, and up to $5 million in State funds, based on State data relating to the number of replacement checks issued.

Comment: One State agency advocated the availability of Federal matching funds for both the original and replacement checks issued to a recipient which represent the same payment for the same month.

Response: Section 403(a)(1) of the Social Security Act authorizes Federal financial participation (FFP) for an amount expended for the AFDC program under the approved State plan. Whenever an assistance check is cashed by someone other than an authorized person, it is not an amount expended under the approved State plan, and therefore is not eligible for FFP under the provision of section 403(a)(1). Accordingly, only the check which was properly cashed by the authorized person is entitled to Federal matching.

Comment: Several commenters advocated that we require specific time frames ranging from 3 to 30 days, to be imposed on States for issuing replacement checks.

Response: We believe replacing the "undue delay" concept with specific time frames as suggested would remove the necessary flexibility States need in order to successfully implement these basic procedures. Due to operational differences among States, the States can best determine when it becomes necessary to issue a replacement check. Therefore, we have not changed this requirement.

Comment: One State asked whether these procedures are applicable to other types of payments which could be lost or stolen, e.g. the Office of Child Support Enforcement (OCSE) $50 "pass through" payment.

Response: Yes. The rules shall apply to all payments issued by the public assistance State agencies to eligible recipients under title IV–A of the Social Security Act. Since the IV–A agency is responsible for the issuance of OCSE "pass through" payments to ADFC recipients, these procedures also apply to such payments.

Comment: A legal services association and an advocacy group suggested that we drop the optional State provision requiring recipients who request replacement checks to report the theft or lost check to the local authorities. One reason cited is that if a recipient is fraudulently requesting a replacement check, sanctions for making such a false report already exist. Another reason noted was that local police, especially in metropolitan areas, will be inundated with reports of lost and stolen checks.

Response: This procedure is an optional measure because States can best determine whether the incidence of lost and stolen checks warrants exercising this option as a deterrent against fraudulent requests for replacement checks. Although this policy option was not explicitly mentioned in regulations, several State agencies already have this requirement and have not experienced these difficulties.

Comment: One State commented that these procedures should not apply because its State Treasury issues the assistance payments checks and has its own internal audit and fraud investigative procedures.

Response: A recipient requesting a replacement check because of a lost or stolen assistance check makes such a request to the State or local IV–A agency. Any actions taken by the IV–A agency may eventually be coordinated with the State Treasury for the issuance of a replacement check; however, the primary responsibility for authorizing payment lies with the State or local IV–A agency. Therefore, a State Treasury's internal audit and fraud investigative procedure cannot be solely relied upon in lieu of these procedures.

Redeterminations (Section 206.10 (a)(9) and (b)(4) of the Final Regulations)

Current regulations at § 206.10(a)(9) require that AFDC eligibility be redetermined at least every six months. We have amended the regulations to provide that it may take place less frequently than every 6 months but in no case less frequently than every 12 months for those recipients who must report monthly, or where the State has an approved alternative redetermination plan based on an error-prone profiling system under which the State varies redetermination frequencies (i.e., more or less frequent than every six months). In addition, we are requiring that at least one AFDC redetermination in each case each year must be face to face.

The final regulation permits States to schedule their AFDC redeterminations as infrequently as every 12 months, under certain circumstances, for several reasons. First, legislation enacted by OBRA and modified by the Deficit Reduction Act of 1984 provides that States require certain categories of recipients to submit monthly reporting forms. For those cases that must report monthly, whether as a Federal requirement or at State option, the State is reviewing very similar information to that which is secured when the State redetermines eligibility.

Prior to the monthly reporting requirement, States were only required to redetermine eligibility at least every 6 months to assure that no changes in family circumstances had occurred which would affect eligibility and the amount of payment. With monthly reporting, there is sufficient and timely contact with the case situation so that redeterminations may be scheduled less often than every 6 months, at the State's option.

Secondly, we believe cost savings can be maximized by concentrating and directing State efforts to cases which are most likely to have errors. Also, for those cases which are identified as low error-prone based on an approved State error-prone profiling system, the intervals between redeterminations may be as much as 12 months. The savings generated from reviewing less error-prone cases as infrequently as every 12 months will permit States to concentrate on high error-prone cases that are subject to frequent changes in eligibility status or have high average dollar errors per case. Thus, under this final rule, intervals between redeterminations in low error-prone cases could be once a year, while high error-prone

redeterminations could be monthly, but more typically, could occur three or four times a year.

The experience of the Supplemental Security Income (SSI) program with error-prone profiles and the results of AFDC demonstration projects in Texas, New Hampshire, South Carolina and West Virginia have shown considerable administrative cost savings can be achieved by concentrating and directing State efforts to cases which are most likely to have errors and, therefore, need more frequent redeterminations. Thus, earlier identification of changes can be made and costly long-term errors can be prevented.

We have also added a requirement that all cases be redetermined face to face at least once every 12 months in order to verify all eligibility factors and to ensure personal contact between the agency and the individual(s). However, if the State redetermines a case more frequently, the additional redeterminations are not required to be face to face. Yearly face-to-face redeterminations are most effective in identifying inconsistencies in the information provided in the monthly reports or in answers provided by the recipient during the interview. Face-to-face contact gives caseworkers an opportunity to restate agency requirements for receipt of AFDC and gives recipients time in which to ask questions and have policies clarified. We believe face-to-face redeterminations are cost effective because increases in administrative costs will be offset by the reduction in erroneous payments. This change also makes the AFDC program consistent with recertification requirements in the Food Stamp Program.

Since we published the proposed rule, we realized that the proposed definition of redetermination could cause confusion and conflict with other sections dealing with redeterminations. Currently, § 206.10(a)(9) requires that eligibility be "reconsidered or redetermined" in the following instances: (1) "when required on the basis of information the agency has obtained previously about anticipated changes . . . (2) promptly, after a report is obtained which indicates changes in the individual's circumstances . . . and (3) periodically, within agnecy-established time standards . . .".

As indicated by the regulations, the term "redetermination" has included both the scheduled re-examination of the case that takes place according to the agency established timetable and the spontaneous review that occurs when the agency discovers new and material information regarding the circumstances of the assistance unit.

In our proposed rule, however, we defined a redetermination as a "periodic, scheduled case folder review of all factors affecting AFDC eligibility and payment amount", thus inadvertently removing the actions termed "redeterminations" which are discussed in the current § 206.10(a)(9) (i) and (ii). Since it was never our intention to limit the definition of redetermination in this way, we have restored this original meaning by deleting the words "periodic" and "scheduled" from the definition. For further clarity, we have also removed the definition of redetermination from the body of the text at § 206.10(a)(9) and placed it with the other definitions at § 206.10(b)(4).

We have also clarified the action a State must take when it receives child support collection reports from the IV–D agency. Under § 232.20(b)(1), the amount of child support must be used to redetermine eligibility for an assistance payment under § 206.10(a)(9). We are concerned that some States may incorrectly believe that the proper action to take with each monthly report of child support collection is to contact the assistance unit and verify all other factors of eligibility such as deprivation, resources, family composition, etc., while other States may believe that the mere receipt of the child support collection report and the recomputation of assistance payments may, in and of itself, constitute a redetermination (thus making other, periodic redeterminations unnecessary).

To remove any doubt concerning the necessary and appropriate action that States must take upon receipt of the child support collection report from the IV–D agency, we have revised the language of § 232.20(b)(1) and deleted the reference to § 206.10(a)(9). This makes clear that we do not expect the State to perform a complete and comprehesive review of all factors of eligibility each month, but rather to review eligibility in light of any change in the single factor of child support. Moreover, the revision makes clear that we do not consider this mere review of child support income to be a redetermination. States may not use the child support review in lieu of the periodic, comprehensive redeterminations required by these regulations.

These final changes only apply to AFDC and not to the adult assistance programs. We estimate savings up to $15 million annually.

Comment: One commenter asked whether the proposed requirement for a face-to-face interview applies to foster care recipients.

Response: The face-to-face redetermination is required only for recipients under the title IV–A program. The administrative requirements for the Foster Care Program under title IV–E are issued by the Office of Human Development Services.

Allocation of Income (Section 233.20(a)(3)(ii)(C) of the Final Regulations)

Current regulations at § 233.20(a)(3)(ii)(C) provide that States may have a policy to allocate a portion of an individual's income to support his or her non-assistance dependents, before counting the remaining income available to the assistance unit. Dependents are not defined by regulation. States define the dependents for whom their allocation policy applies.

We have amended the regulations to address three specific concerns.

A. Some States have been interpreting the provisions to mean that income may be allocated only to an individual's dependents and not to the individual him/herself when such individual is not applying for assistance. The final regulation clarifies that, for purposes of allocating income, a dependent may include the individual, as well as his or her non-assistance dependents if they are not required to be in the assistance unit under section 402(a)(38). States that allocate income to meet the individual's own needs must check the allocation box on the State Plan Preprint.

B. Some States have been permitting income to be allocated to support individuals whose needs have been removed from the grant under the child support enforcement sanction provisions of §§ 232.11(a)(2) and 232.12(d) or because of a sanction for failing to meet the requirements of the WIN, Employment Search or Community Work Experience Programs provisions at §§ 224.51, 238.22 and 240.22. Permitting income to be allocated to the support of a sanctioned individual before counting the remaining income available to the assistance unit has the effect of circumventing the intent of the sanction provisions, i.e., that assistance will be determined without regard to the needs of the sanctioned person. Therefore, to remedy this, the final regulation provides that States may not allocate income to meet the needs of a sanctioned individual. We have also

VOL 51
ISS 52
MR 18
1986
UMI

amended the regulations to prohibit States from allocating income to individuals who are required to be included in the assistance unit but who have failed to cooperate in meeting a condition of eligibility.

C. States have been permitting income to be allocated to meet the need of a wide variety of persons. As a result, in some cases income has been used to support other individuals rather than the individual's own children who are receiving AFDC. In order to assure that an individual's income is used primarily to support the members of his or her own family who are in the assistance unit, we have revised the existing provisions on the amounts of income that may be allocated and the persons for whom income may be allocated. The final regulation restricts the income allocation provision to permit allocation only for the individual's own needs (when he or she is not applying for, required to apply for, or receiving assistance), the needs of others who are or could be claimed as dependents for determining Federal personal income tax liability, or those whom the individual is legally obligated to support. Within this limitation, (and the one set forth in item B above), States may elect which dependents to include for coverage. The amounts which may be allocated and the individuals for whom income may be allocated are consistent with similar provisions regarding the income of stepparents and parents of minor parents (sections 233.20(a)(3) (xiv) and (xviii) and alien sponsors (section 233.51(b)(1))). In specifying the amount of income which would be considered available to an assistance unit, Congress included provisions to assure that these individuals would retain sufficient income to meet their own needs and the needs of their dependents. These amounts reflect the amount that States have determined are necessary to meet current living expenses as well as those amounts that are actually paid to support other individuals and therefore are not available to meet the needs of the assistance unit. Since these are amounts that Congress has determined are reasonable, we have adopted them as the maximum amounts that may be allocated in other similar cicumstances.

We estimate savings of up to $1 million annually.

Comment: One commenter suggested deleting the reference in § 233.20(a)(3)(ii)(C) to "those who are or could be claimed by the individual as dependents for determining Federal personal income tax liability", arguing that this language would require training staff concerning income tax policies which have no other application to the program.

Response: The referenced language does not introduce a new concept to the program. It is the same language used in determining the countable income of stepparents and parents of minor parents (at §§ 233.20(a)(3) (xiv) and (xviii)) and alien sponsors (at § 233.51(b)(1)). Since the preposed language is consistent with these regulatory references, we have not made the suggested change.

Comment: One commenter suggested that we allow the full $75 work expense disregard in allocating the earned income of excluded individuals whether they are employed full-time or part-time before counting the remaining income available to the assistance unit. The commenter also recommended that the $75 be applicable to employed individuals whether sanctioned or not.

Response: While the statute does not specifically address allocation of income, the allocation situation is comparable to that of determining the countable income of stepparents and parents of minor parents who are living in the home with the AFDC family but are not part of the AFDC unit. Therefore, for ease of administration, the work expense disregard at § 233.20(a)(3)(xiv)(A), applicable to stepparents and parents of minor parents, is adopted as the applicable disregard for the allocation policy. For sanctioned individuals, to provide any disregard at all to such an individual, would defeat the purpose of the sanction.

Comment: One commenter suggested changing the stepparent disregard provision at § 233.20(a)(3)(xiv)(B) to provide that the needs of sanctioned individuals cannot be deducted from the stepparents' income in computing the amount of countable income to be consistent with the allocation policy. Otherwise, the commenter argued, in States where the payment standard is less than the need standard, simultaneously deducting their need standard from the stepparents' income results in a grant increase.

Response: We agree with the recommendation and have amended the regulation at § 233.20(a)(3)(xiv)(B) to clarify that the needs of sanctioned individuals and individuals who are required to be in the assistance unit and who have failed to cooperate cannot be deducted from the stepparents' income in computing countable income to the assistance unit.

Counting Windfalls as Income (Section 233.20(a)(3)(ii)(F) of the Final Regulations)

Counting Income Tax Refunds as Resources (Section 233.20(a)(3)(iv)(E) of the Final Regulations)

The general rule in assistance programs is that all earned and unearned funds received by an assistance unit must be counted as income for the month of receipt except funds that are expressly disregarded as income in a Federal statute. However, under longstanding Federal policy for the AFDC and adult assistance programs, a State agency has had the option to treat non-recurring payments which are in the nature of a windfall as resources instead of as income. A windfall is a sum that is not earned, does not occur on a regular basis, and does not represent acuomulated monthly income received in a single sum. A windfall might come from an inheritance, lottery winnings, personal injury awards or an income tax refund, but not title II Social Security or VA benefits. Social Security or VA benefits covering more than one month's benefits are instead examples of accumulated monthly income received in a single lump sum.

In reviewing the legislative history of OBRA, we believe that the Congress intended all lump sum payments (including windfalls) to be treated as income under the AFDC program. The Senate Finance Committee Report, No. 97–139, dated November 17, 1981 (on page 505) indicates that lump sum income should be "considered available to meet the ongoing needs of an AFDC family . . .". Given the intent of the lump sum provision to assure use of available funds in future months, we believe that windfall payments should be considered lump sum income. In the absence of the change, the very type of payments Congress intended to be counted and used to meet the family's future needs may not be budgeted for meeting future needs, if treated initially as a resource and not retained. Accordingly, for AFDC, we have classified payments in the nature of a windfall (with the sole exception of income tax refunds) as unearned income from a non-recurring source and treat them as a lump sum in accordance with § 233.20(a)(3)(ii)(F) unless otherwise disregarded, e.g., under the casual and inconsequential income policy at § 233.20(a)(3)(iv).

With respect to income tax refunds, except for an Earned Income Credit payment, a tax refund recognizes that there was an overwithholding of taxes

during the year. Under the AFDC program, since the $75 standard work expense disregard applies to gross income and represents all work expenses excluding child care, the actual amount of tax withheld has no bearing on the income counted or the amount of actual assistance payable to a recipient. Thus, since some portion of the income tax withholding may have exceeded, in combination with other work expenses, the $75 standard disregard, and therefore may have already been counted as income, it should not again be counted as income when it is returned to the recipient.

Therefore, for the AFDC program we are making an exception in the case of income tax refunds and require States to treat these refunds only as resources (liquid assets). However, any portion of a tax refund which represents an earned income credit (EIC) payment would still be considered as earned income in accordance with § 233.20(a)(6)(ix)(C). The EIC portion of any tax refund (or any EIC payments for that matter) must be treated as earned income because the statute specifically requires that such payments be considered as earned income (section 402(d) of the Social Security Act). When EIC payments are made in a single lump sum they are paid through the income tax collection system. Thus, in those cases, the payments would come in the form of a tax refund.

Neither the lump sum income change nor the $75 standard work expense change applies to the adult assistance programs. Therefore, we are not changing the policy in effect for these programs. At State option, these payments may be considered either as income or as a resource.

We estimate savings of up to $1 million annually.

Comment: Twenty four commenters expressed concern about this provision suggesting that flexibility remain with the States to determine whether to count payments in the nature of a windfall as income or resources. The commenters argue that: (1) There is no inferred or expressed Congressional intent in OBRA's legislative history that HHS should change its longstanding policy of permitting States to count payments in the nature of a windfall as income or resources, i.e., by the OBRA amendments, Congress meant to change the methodology applicable to lump sum income but not the definition of lump sum income; (2) there is logic to treating retroactive benefits in this manner because they are linked to ongoing benefits which can be used to meet future needs, while this is not so with nonrecurring windfall type benefits; (3) the statute provides a $1,000 resource limit and individuals who do not have the maximum resource limit when they come on the rolls but subsequently receive a windfall payment should be allowed to build up their resource limit from nonrecurring lump sum payments; and (4) individuals should be able to set aside the money from windfall payments for items not covered by the AFDC grant or Medicaid such as treatment, special education, special equipment, etc., or simply to build up a cushion for future emergencies.

Response: We have carefully considered the comments received and continue to believe that the provision is not only supportable under the statute but consistent with recent legislative history that large nonrecurring payments be considered available to meet the ongoing needs of an AFDC family. There is no logical basis for distinguishing between one type of large nonrecurring payment and another in determining whether it is income or resources and whether to apply the lump sum rule. From one standpoint, the legislative history expresses concern that considering such payments, prior to OBRA, as income in the month received and a resource thereafter had the perverse effect of encouraging the family to spend the income as quickly as possible in order retain AFDC eligibility. Since some States have always considered such payments as income, there was no specific definition of lump sum income that existed that can be argued that the Congress intended to maintain. Given the Congress' clear intent to have lump sums be used to meet future needs, States should not be allowed to exclude them by calling them resources.

States must disregard from the lump sum payment any amount that is earmarked and used for the purpose for which it is paid, i.e., monies paid for back medical bills resulting from accidents or injury, funeral and burial costs, replacement or repair or resources, etc.

Finally, section 402(a)(17) of the Act, as amended by the Deficit Reduction Act of 1984 (Pub. L. 98–369), permits States to consider hardship situations and recalculate, under certain specified circumstances, the period of ineligibility determined under the lump sum rule.

Comment: There were several comments specifically in relation to personal injury awards and worker compensation payments. One commenter suggested that, because personal injury awards have been the subject of court challenge, we specify in the regulation how personal injury awards are to be treated. This would clarify the policy and avoid future misunderstanding as to their treatment. Several commenters suggested expanding the definition of funds treated as resources to specifically include worker's compensation payments and personal injury settlement payments. One commenter noted that Federal income taxes do not have to be paid on personal injury awards, yet for AFDC purposes such payments are counted as income.

Response: We agree that specifying in regulations how personal injury awards and workers' compensation payments are to be treated is necessary. We, therefore, have amended the regulation to clarify that personal injury awards and worker compensation must be treated as lump sum income. We believe it is consistent with Congressional intent that nonrecurring lump sum payments be used to meet current as well as future needs and that personal injury and worker compensation awards are encompassed by the lump sum rule. States are required to exclude from consideration, in determining the amount of the lump sum, that portion of the money that is earmarked and used for the purpose for which paid.

Casual and Inconsequential Income (Section 233.20(a)(3)(iv) of the Final Regulations)

Until 1975, Federal regulations at § 233.20(a)(3)(ii)(c) provided that "only such net income as is actually available for current use on a regular basis will be considered. . ." Even though the regulations were changed in 1975 to require that income available for current use be counted, States were still permitted to exclude income considered "casual and inconsequential." One major reason was to help States avoid administrative complexities associated with budgeting unpredictable income under the prospective budgeting system. This problem has now been eliminated under mandatory retrospective budgeting and monthly reporting in the AFDC program. The provisions for retrospective budgeting and monthly reporting make accurate income information available for determining the benefit amount.

Another consideration behind this policy was to allow some latitude in disregarding small gifts, which do not realistically represent income available to meet the family's living expenses, e.g., Christmas, graduation and birthday gifts, and which are difficult to administratively track. However, there is currently considerable variation in the amounts and types of income that States define as casual and inconsequential,

VOL 51
ISS 52
MR 18
1986
UMI

and exceptionally large non-recurring sums have been disregarded under both the AFDC and adult assistance programs. Currently, 19 States have imposed dollar amounts to be disregarded as casual and inconsequential income.

These amounts include: $60 a quarter, $40 a month, $30 a quarter, or $10 a month. Therefore, we have amended the regulations at section 233.20(a)(3)(iv) to provide that States can optionally exclude gifts which represent reasonable nominal amounts not to exceed $30 for any recipient for any quarter. We selected $30 because it falls within the average range of the dollar amount currently used by States, and because it is the level used in the Food Stamp Program.

We estimate savings of up to $1 million annually.

Comment: Several commenters requested that the definition of casual and inconsequential income be revised to include small loans, earnings from odd jobs and interest on small savings accounts on the basis that this income is unpredictable and the amount is small.

Response: Existing regulations sufficiently address the disregard of loans and earnings. For example, the regulation at § 233.20(a)(3)(iv)(B) provides that loans obtained and used under conditions that preclude their use for current living costs are not counted as available income. Similarly, the regulations at § 233.20(a)(11) provide several earned income disregards. For example, $75 must be disregarded from gross earnings each month in lieu of actual work expenses. When total earnings received during the month do not exceed $75, the income is totally disregarded. Interest on savings accounts is not unpredictable and can be handled easily under the retrospective budgeting system when it is credited. Therefore, interest on savings accounts is treated as unearned income.

Comment: One commenter questioned whether casual and inconsequential income is to be budgeted prospectively or retrospectively.

Response: Casual and inconsequential income, as defined in these regulations, may be disregarded at State option. Other income is budgeted consistent with the prospective/retrospective budgeting rules.

Comment: Seven commenters expressed concern that applying the disregard on a quarterly basis rather than on a monthly basis would be very error prone because the income must be tracked.

Response: The quarterly maximum allows a recipient to receive a larger disregard for one month than would be allowed under a monthly maximum. However, States have the flexibility to establish monthly amounts which in total do not exceed the quarterly maximum, for example $10 per month.

Comment: Some commenters recommended that the regulation be clarified to show that the disregard is applied to each person's income individually.

Response: The regulations already provide that the disregard is for gifts that do not exceed a total of $30 per recipient per quarter.

Comment: Four States suggested that the regulations be revised to clarify whether the definition of "quarter" is calendar quarter, any three month period beginning with the first month in which the recipient receives a gift, or whether States can determine which period to use.

Response: For consistency with the Food Stamps exclusion, States can determine which period they wish to use.

Comment: Several commenters were opposed to limiting the amount of the disregard to $30 per recipient. The commenters would prefer to retain the current flexibility for States to set an amount they believe appropriate for their geographic area. If this isn't possible, they suggest that $50–60 per recipient is more realistic in relation to the cost of buying a gift.

Response: We consider $30 per recipient per quarter to be reasonable because it represents the average amount currently defined by States as casual and inconsequential income, and is consistent with the amount defined as irregular/infrequent income in the Food Stamp Program.

Definition of Stepparent (Section 233.20(a)(3)(xiv)); Section 233.90(a)(1); Section 237.50(b)(3)(ii); and Section 237.50(b)(4)(ii) of the Final Regulations)

Several States have questioned whether the AFDC provision at § 233.90, which specifies that a stepparent must be "ceremonially" married, includes common law marriage in States that recognize a common law marriage as valid under the laws of the State.

We have amended the regulation at § 233.90(a)(1) to remove the word "ceremonially" and clarify that in determining whether a child has been deprived of parental support, the marriage must only be one that is recognized as a valid marriage under the laws of the State. This includes common law marriages. The reason we included the word "ceremonially" was to deter States from counting the income of a "man in the house" as available to the assistance unit. We never intended to exclude the income of a person who was legally and validly married to the parent of an AFDC child under State law. Therefore, we are clarifying the regulations to reflect this intent.

The final regulation at § 233.20(a)(3)(xiv) is amended to clarify that a stepparent is one who is married to the child's parent under State law. We estimate savings up to $1 million annually.

We are also removing the word "ceremonially" from the provisions at § 237.50(b) (3)(ii) and (4)(ii) to conform with these changes.

Comment: Several commenters asked that we set some standards and protections to guide State agencies in establishing the existence of common-law marriages.

Response: Each State has the authority under State law to determine what constitutes a valid and legal marriage. Because States have this responsibility, we cannot establish guidelines in this particular area.

Comment: Several commenters believe that by deleting the term "ceremonially" we weaken the protections provided recipients by Supreme Court decisions such as *King* v. *Smith* against the "substitute parent" and "the man-in-the house" rules.

Response: We disagree. This change in no way provides States authority to consider a person in the home as a "substitute parent" for purposes of AFDC. The deletion of the term "ceremonially" simply means that if under State law a common law marriage is recognized as legal and valid by the State, the spouse of the parent of the AFDC child would be considered a stepparent. The obligation of the stepparent to support the AFDC child would exist only if the family resides in a State which has a law of general applicability. Only then would the stepparent be required to support the child to the same extent as a natural or adoptive parent.

Disregard of Income From VISTA Payments (Section 233.20(a)(4)(ii)(h) of the Final Regulations)

In accordance with section 404(g) of Pub. L. 93–113, the Domestic Volunteer Service Act of 1973, payments received by applicants and recipients participating in the Volunteers in Service to America (VISTA) Program have been disregarded, regardless of the amount of such payments.

On December 13, 1979, Congress enacted Pub. L. 96–143, the Domestic Volunteer Service Act of 1979, which included a provision limiting this

disregard. Section 9 of Pub. L. 96–143 provides that the disregard "shall not apply in case of such payments when the Director determines that the value of all such payments, adjusted to reflect the number of hours such volunteers are serving, is equivalent to or greater than the minimum wage then in effect under the Fair Labor Standards Act of 1938, . . . or the minimum wage, under the laws of the State where such volunteers are serving, whichever is the greater." Since Federal regulations were not revised at that time, we are amending them now to accurately reflect section 9 of Pub. L. 96–143.

Comment: One commenter asked whether the Director of ACTION will notify the States that the value of VISTA payments is equivalent to or greater than the minimum wage.

Response: The ACTION agency has advised that it has no established method for notifying the welfare agency of payments made to VISTA volunteers. Therefore, since it is the responsibility of the ACTION agency to determine whether the VISTA payments equal or exceed the minimum wage, based on the number of hours served, the State agency must request that information directly from the ACTION agency. However, to date, no VISTA payments to volunteers have been determined by the Director of ACTION to equal or exceed the applicable minimum wage.

Criteria for Use of Restricted Payments (Section 234.60(a)(1), (a)(6) of the Final Regulations)

The November 16, 1984, Notice of Proposed Rulemaking proposed several changes in the procedures governing use of restricted payments (use of a protective payee, vendor payments, or two-party checks) in situations where the caretaker relative has demonstrated an inability to manage funds, thereby imperiling the child's welfare. In response to State requests for more flexibility in this area, the NPRM removed specific criteria under which a determination of mismanagement is made and allowed States to establish the criteria for such a determination (with one exception). If States elect to use restricted payments, the NPRM proposed that mismanagement shall be presumed after nonpayment of rent equivalent to two months of rent. This minimum criterion was proposed because the non-payment of rent is a very serious problem as it may place the AFDC recipient family in jeopardy of eviction. We also noted that this new provision may help alleviate the shortage of housing available to AFDC families based on current unwillingness of landlords, in New York City for example, to rent to low income families based on concerns about possible nonpayment of rent.

Several related changes were also proposed, including added State flexibility regarding requirements for social services referrals and the methodology and timing of fair hearings regarding use of restricted payments.

We received numerous comments on these provisions. Some commenters supported the changes and noted the potentially beneficial effect on the availability of affordable housing for AFDC families.

Some commenters believed that waiting for two months nonpayment of rent is not strict enough, and suggested a shorter time period of nonpayment before mismanagement is presumed. Additionally, many of the commenters opposed the mandatory provision for determininig mismanagement, citing among other reasons, the possible increase in administrative costs which could result. Further, although some States provide for shelter costs separate from other needs, many States include shelter costs within a consolidated needs standard or payment standard. Thus, these latter States commented on possible administrative difficulties that may be encountered in determining the amount of the AFDC grant which is devoted to shelter costs and would be subject to the restricted payment rule as proposed.

In response to these comments, as well as our own further review, we have modified the provision for determining mismanagement and instituting vendor or two-party payments. Under the final rule, we have not only removed the specific criteria under which a determination of mismanagement is made, but in addition, have decided not to impose the mandatory minimum criterion of presuming mismanagement after two months nonpayment of rent. These changes, we believe, will provide States maximum flexibility to establish criteria for such a determination based on the circumstances in the individual States. We continue to believe, however, that the nonpayment of rent is a very serious problem because as a consequence, it may place the AFDC recipient family in jeopardy of eviction. Thus, for example, a State could, within the boundary of the final rule, establish as a minimum criterion, the presumption of mismanagement based on the recipient's nonpayment of rent. As is true for all other restricted payments, the institution of such payments in these circumstances will be subject to the normal AFDC administrative costs for which 50% Federal financing is available.

In the NPRM, we also proposed a change in the methodology and timing of fair hearings when mismanagement was presumed after two months nonpayment of rent. In light of our reconsideration of this issue, and of our efforts to increase State flexibility where possible, we have determined that such a change in fair hearings should still be available to States. Therefore, where a State's restricted payments program presumes mismanagement based on nonpayment of rent, such State may, under these limited circumstances, have the option to provide an opportunity for a hearing, where an individual wishes to appeal, either in advance of the State's intended action, or after the action has taken place.

Under previous policy, States were required to make referrals for social services when problems and needs for services and care for the recipients were beyond the ability of the protective payee to handle. The final regulations delete this automatic requirement for social services referral. States will be given flexibility so that they need not refer recipients to social services when they are unnecessary or unwanted. Counseling services, for example, are of little value when the recipient does not seek them.

We estimate savings of up to $1 million annually.

Due to the volume of comments received regarding the restricted payments provision, it is not feasible to respond to each one in the preamble. We have, however, included a discussion of several that are representative of many of the comments received.

Comment: One commenter recommended that the regulation be amended to mandate voluntary vendor payments in all States.

Response: The existing regulatory provision which allows a recipient, at State option, to voluntarily request a restricted payment is statutorily based and is permitted only in States that have elected the vendor payment option under section 406 of the Act. A legislative amendment would be necessary to impose this regulatory mandate on States.

Comment: Several public housing authorities recommended that the regulation be changed to provide that the amount of the AFDC recipient's grant that is designated for housing, be forwarded directly to the public housing authority rather than first requiring a determination of mismanagement by the State agency.

Response: A basic principle of the AFDC program since its inception is that the assistance grant is an unrestricted money payment and that the caretaker relative has the responsibility to manage the funds. The statute has established limited circumstances in which this principle is not applied: when the State determines that the caretaker relative is not managing the funds in the best interest of the child(ren), the grant may be vendored in order to protect the children; and when the recipient voluntarily requests a restricted payment and the State provides for this option. In all other circumstances, however, the basic principle of unrestricted payments still prevails. Therefore, we are not able to accept this recommendation.

Comment: Many commenters were opposed to a finding of automatic mismanagement after two consecutive months of nonpayment of rent without prior rights to a hearing arguing that such action violates the principles of due process enunciated in the Supreme Court case of *Goldberg* v. *Kelly*. 397 US 254 (1970).

Response: The Supreme Court held in *Goldberg* v. *Kelly*, that public assistance may not be terminated without affording the recipient an opportunity for a prior hearing. Since this situation does not involve termination of the grant, but rather diversion of a portion of the grant, *Goldberg* v. *Kelly* need not be viewed as applying to this situation. Given the need for some States to act quickly in order to prevent evictions and the resulting family disruption, the final rule permits states that include a presumption of mismanagement based on nonpayment of rent, under their restricted payments program, the option to provide an opportunity for a hearing either in advance of or after the State's action. The option is limited to those cases involving the application of the presumption of mismanagement based on nonpayment of rent. In all other cases involving mismanagement, the State must continue to provide the opportunity for a fair hearing in advance of any change in the manner or form of payment. We have not extended the option for post hearings to other cases of mismanagement because, as a general rule, we do not believe that the risk of harm to the child or family in these other cases outweight the need for fairness that is afforded by the opportunity for a prior hearing as it does when needy families are evicted and have no place to live.

Comment: Many commenters opposed mandating the automatic mismanagement provision for all States, citing administrative difficulties, increased costs and the nonexistence of serious problems regarding the nonpayment of rent by AFDC recipients.

Response: We are persuaded that mandating the provision would not further the objectives of increasing State flexibility nor of limiting administrative and fiscal burdens on all States. Therefore, we have revised the final rule by deleting any specific criteria for making determinations of mismanagement. This will ensure maximum flexibility to States to establish criteria to tailor their restricted payments programs to the existing conditions and resources in the individual State.

Review of Restricted Payment Cases (Section 234.60(a)(9) of the Final Regulations

Currently, States are required to review restricted payment cases as frequently as indicated by the individual's circumstances and at least every 6 months in the AFDC program. The specified time frame for review was changed in 1980 from 3 months to 6 months to coincide with the time frame for periodic eligibility redeterminations. It was done in response to comments received in relation to the restricted payment NPRM to provide administrative ease in case management.

In light of our decision to not impose, in this final rule, the mandatory automatic mismanagement provision based on two months nonpayment of rent (see discussion governing Criteria for Use of Restricted Payment, § 234.60(a)(2)(ii) and 234.60(a)(6) of this final rule) we have also deleted the companion provision that review of such cases take place not more than once every 12 months. We are, however, retaining the revision which specifies that review of vendor, two-party and protective payments will be made as frequently as indicated by the individual's circumstances, but at least once every 12 months.

This change will enable States to continue to coincide, in the absence of changes in the individual's circumstances, the restricted payment review with the regularly scheduled eligibility redetermination. It will also minimize the number of times the recipient is required to report similar information and permit the State to avoid repetitions and unnecessary reviews.

We estimate saving of up to $1 million annually.

Technical Amendments

A. OBRA extensively revised the title IV–A statute. Because of the major work effort involved in developing regulations and providing guidance to States for implementation of these new provisions, several technical changes to the regulations were inadvertently not made. We have amended these regulations to reflect those technical changes to the Social Security Act.

1. Section 2181 of OBRA repealed section 403(g) of the Social Security Act. The latter section had established a penalty to reduce by 1 percent the quarterly amount payable to a State under title IV–A for failure to inform of and provide and arrange for early and periodic screening, diagnosis and treatment (EPSDT) under title XIX for children receiving assistance under AFDC. The regulations at §§ 201.14(a)(3) and 205.146(c) are removed to reflect this amendment to the Social Security Act.

2. Section 2319 of OBRA repealed section 403(a)(3)(A) of the Act which authorized 75% matching for training, and as a result, we consider training to be an administrative expense under section 403(a)(3)(C) which provides for 50% matching. The regulations at § 205.45 (b) and (c) are amended to reflect this change. This change does not apply to the adult assistance programs.

3. Section 2353(b) of OBRA repealed section 402(a)(5) of the Social Security Act, as in effect with respect to Puerto Rico, Guam, and the Virgin Islands. This provision had related to the establishment and maintenance of personnel standards on a merit basis, and for the training and effective use of paid subprofessional staff. The regulations at 45 CFR Part 225 are now currently applicable only to the adult assistance programs, and have been revised to delete the reference to the AFDC program.

4. Section 2605(f) of OBRA prohibits counting Low Income Home Energy Assistance Program (LIHEAP) benefits as either income or resources for any purpose under any Federal or State law relating to taxation, food stamps, public assistance, or welfare programs.

Although the statute is very clear and leaves no discretion to the Secretary, an amendment is needed to update the list of disregard requirements currently included in the regulations, and to distinguish the permanent and mandatory exclusion of LIHEAP benefits from the temporary and optional exclusion of certain other home energy assistance under sections 233.20(a)(3)(xvi) and 233.53. Therefore, the regulations at section 233.20(a)(4)(ii) are amended to exclude from income and resources, benefits provided under the Low Income Home Energy Assistance Program.

Additionally, we are making the following changes to conform regulatory policy to existing legislation.

1. Prior to the implementation of the Food Stamp Act of 1977, States could deduct the food stamp purchase price from a recipient's assistance payment, and regulations at section 234.11(b) were promulgated so that the deducted sum could be considered an AFDC payment for purposes of Federal financial participation.

The Food Stamp Act of 1977 eliminated the food stamp purchase requirement effective January 1, 1979. Therefore, the provision at section 234.11(b) is removed as it is now obsolete.

2. Pub. L. 97–34, The Economic Recovery Tax Act of 1981, terminated the separate WIN and Welfare Tax Credits, for providing employment to AFDC recipients, and effective January 1, 1982, added these two groups to the groups provided for in the Targeted Jobs Tax Credit program, i.e., recipents of AFDC for at least 90 days and WIN/WIN Demonstration participants.

Pub. L. 97–34 also provided that certification of AFDC recipient status is now a function of a designated local agency. Under Federal Department of Labor policy, the State Employment Security Agency (SESA) or qualified schools operating qualified cooperative education programs are the only agencies that may issue certifications. The State and local IV–A agency function will be limited to providing verification to the certifying agency that the individual being hired has been an AFDC recipient for at least 90 days or is a participant in the WIN or WIN Demonstration program.

The regulations at 45 CFR 235.40, relating to the certification of AFDC recipients for employment incentive tax credit, are removed as no longer applicable to the title IV–A agency.

The regulations at § 205.50(a)(1)(i)(D) have been revised to provide for the release of information to verify that an individual has been a recipient of AFDC for at least 90 days or is a WIN/WIN Demonstraton participant.

Comment: Concern was raised by a commenter regarding the certification of employees for Targeted Job Tax Credit (TJTC) by State and local agencies. When an employer requested certification for employees who were believed eligible for TJTC, the various State and local agencies were reluctant to provide the data. It was felt that without the necessary interchange between employers and public agencies, the intended results of the WIN program would not be achieved.

Response: The actual certification of employees for TJTC may only be done by the SESA or qualified schools operating a qualified cooperative education program. There is no provision in the IV–A statute to release information on AFDC applicant/recipients to other than the certifying agency (e.g., SESA). The policy which governs the disclosure of AFDC client information (section 402(a)(9) of the Social Security Act and regulations at 45 CFR 205.50), provides protection for the AFDC applicant's/recipient's right to privacy; and as such, States must exercise caution in responding to requests for the release of AFDC identifying information.

3. Pub. L. 92–603, October 30, 1972, provided the Secretary authority to assure that social security account numbers be assigned to, among others, any applicant for or recipient of benefits under federally funded programs. Subsequently, section 7 of Pub. L. 93–579, The Privacy Act of 1974, made it unlawful for any Federal, State, or local government agency to deny any right, benefit or privilege because of an individual's refusal to disclose his social security number, unless such disclosure is required by Federal statute, or the disclosure of the social security number is to a Federal, State, or local agency which maintained a system of records in existence and operating before January 1, 1975, if such disclosure was required by statute or regulation adopted prior to such date to verify the identity of the individual.

As a result of these statutory provisions, Federal regulations were developed (45 CFR 206.10 (b) and (c)); (section 206.10 was completely renumbered under TEFRA implementing regulations). They provide that the State IV–A agency could impose the disclosure as a condition of eligibility for AFDC only if the State had in effect prior to January 1975, a system of welfare or Medicaid records for which disclosure of the SSN was required by statute or regulations, in order to verify the identity of the individual. However, in 1975, Pub. L. 93–647 mandated that as a condition of eligibility for AFDC, all applicants and recipients must furnish the IV–A agency a social security number. Regulations implementing this statutory provision are codified at 45 CFR 232.10. This change in Federal statute and the regulations at 45 CFR 232.10 have rendered obsolete those provisions in 45 CFR 206.10, and they are accordingly removed.

4. Section 101(a) of Pub. L. 96–272 repealed section 408 of the Social Security Act, and established a new Part E under title IV of the Act. The State agency responsible for administering the program authorized by Part B of title IV is to administer or supervise administration of this new Part E, *Federal Payments for Foster Care and Adoption Assistance.* This repeal is effective at the time the State plan under IV–E becomes effective, but not later than September 30.1982. The regulations at 45 CFR 233.110 are revised to reflect this amendment to the Social Security Act. Other references to AFDC Foster Care at 45 CFR 233.90(c), 45 CFR 233.10(b), and 45 CFR 232.10(c) are deleted as well.

5. Section 507 of Pub. L. 94–566 amended section 407 of the Social Security Act to provide for a reduction in the AFDC payment by the amount of unemployment compensation a child's unemployed parent receives and that the family is ineligible if the parent refuses to apply for or accept unemployment compensation. Although the pertinent program policy was amended to reflect this change, the parallel FFP provision was not. The regulation now at § 233.100(c)(1)(v) is amended, therefore, to reflect this change in statute.

Comment: One commenter noted that the proposed change to § 233.100(c)(1)(v) incorrectly omits the parts of Pub. L. 94–566 which provides for the denial of aid when the unemployed parent qualifies for unemployment compensation but refuses to apply for or accept it.

Response: In the publication of the NPRM, language was inadvertently omitted from the proposed regulation which would bring it into conformity with the legislation. This final regulation at § 233.100(c)(1)(v) therefore is amended to conform to Pub. L. 94–566.

6. Section 407(c)(A)(i) of the Social Security Act provides that FFP is not available in any payment of aid made to an unemployed principal earner during the first 30 days of unemployment. The implementing regulation however provides that if the principal earner is "not unemployed" during the 30-day period, there is no FFP. This is a difficult grammatical construction to understand and might be read to mean that if the principal earner is "unemployed" during the 30-day period, FFP is available. Because this would contravene the statute, the regulation now at § 233.100(c)(2)(i) is amended to clarify that FFP is not available for payments that cover the first 30 days of unemployment.

Additionally, these regulatory provisions that still reference the word "father" are amended to substitute the word "parent" as required to eliminate, where possible, gender discrimination.

We have also corrected as a result of our own review, general references and citations. We have deleted some obsolete material from § 205.40(d) and § 233.27(b)(2) and corrected references in § 205.50(a) and § 205.50(a)(2)(i)(A).

These regulations are issued under the authority of section 1102 of the Social Security Act as amended, 49 Stat. 647, as amended, 42 U.S.C. 1302.

PART 201—[AMENDED]

Part 201 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

1. The authority citation for Part 201 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act, (42 U.S.C. 1302).

§ 201.14 [Amended]

2. Section 201.14 is amended by removing and reserving paragraph(a)(3).

PART 205—[AMENDED]

Part 205 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

1. The authority citation for Part 205 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act, (42 U.S.C. 1302).

2. The Table of Contents in Part 205 is amended by adding § 205.32 to read as follows:

PART 205—GENERAL ADMINISTRATION—PUBLIC ASSISTANCE PROGRAMS

* * * * *

Sec.
205.32 Procedures for issuance of replacement checks.

* * * * *

3. Section 205.10 is amended by revising paragraph (a)(2) to read as follows:

§ 205.10 Hearings.

(a) * * *

(1) * * *

(2) Hearing procedures shall be issued and publicized by the State agency. Such procedures shall provide for a face-to-face hearing or, at State option, a hearing by telephone when the applicant or recipient also agrees. Under this provision, the State shall assure that the applicant or recipient is afforded all rights as specified in this section, whether the hearing is face-to-face or by telephone;

* * * * *

4. Section 205.10 is further amended by revising paragraph (a)(4)(i)(B) to read as follows:

§ 205.10 Hearings.

(a) * * *

(4) * * *

(i) * * *

(B) "Adequate" means a written notice that includes a statement of what action the agency intends to take, the reasons for the intended agency action, the specific regulations supporting such action, explanation of the individual's right to request an evidentiary hearing (if provided) and a State agency hearing, the circumstances under which assistance is continued if a hearing is requested, and if the agency action is upheld, that such assistance must be repaid under title IV–A, and must also be repaid under titles I, X, XIV or XVI (AABD) if the State plan provides for recovery of such payments.

* * * * *

5. Section 205.10 is further amended by adding a new paragraph (a)(4)(ii)(J) as follows:

§ 205.10 Hearings.

(a) * * *

(4) * * *

(ii) * * *

(J) The agency has made a presumption of mismanagement as a result of a recipient's nonpayment of rent and provides for post hearings in such circumstances;

* * * * *

6. Section 205.10 is further amended by revising paragraphs (a)(6)(i) (A) and (B), and by adding new paragraphs (a)(6)(i)(C) & (a)(6)(i)(D) to read as follows: The introductory text of paragraph (a)(6)(i) is shown for the convenience of the reader.

§ 205.10 Hearings.

(a) * * *

(6) * * *

(i) Assistance shall not be suspended, reduced, discontinued or terminated (but is subject to recovery by the agency if its action is sustained), until a decision is rendered after a hearing, unless:

(A) A determination is made at the hearing that the sole issue is one of State or Federal law or policy, or change in State or Federal law and not one of incorrect grant computation;

(B) A change affecting the recipient's grant occurs while the hearing decision is pending and the recipient fails to request a hearing after notice of the change;

(C) The recipient specifically requests that he or she not receive continued assistance pending a hearing decision; or

(D) The agency has made a presumption of mismanagement as a result of a recipient's nonpayment of rent and provides for the opportunity for a hearing after the manner or form of payment has been changed for such cases in accordance with §§ 234.60 (a)(2) and (a)(11).

* * * * *

7. Section 205.10 is amended by revising paragraph (a)(7) to read as follows:

§ 205.10 Hearings.

(a) * * *

(7) A State may provide that a hearing request made after the date of action (but during a period not in excess of 10 days following such date) shall result in reinstatement of assistance to be continued until the hearing decision, unless (i) the recipient specifically requests that continued assistance not be paid pending the hearing decision; or (ii) at the hearing it is determined that the sole issue is one of State or Federal law or policy. In any case where action was taken without timely notice, if the recipient requests a hearing within 10 days of the mailing of the notice of the action, and the agency determines that the action resulted from other than the application of State or Federal law or policy or a change in State or Federal law, assistance shall be reinstated and continued until a decision is rendered after the hearing, unless the recipient specifically requests that continued assistance not be paid pending the hearing decision.

* * * * *

8. Part 205 is amended to add a new § 205.32 to read as follows:

§ 205.32 Procedures for issuance of replacement checks.

(a) *State plan requirements.* A State plan under title IV–A of the Social Security Act shall provide that (1) procedures are in effect to ensure that no undue delays occur in issuing a replacement check; and (2) when applicable, prior to the issuance of a replacement check, the State agency must:

(i) Issue a stop payment order on the original AFDC check through appropriate banking procedures; and

(ii) Require recipients to execute a signed statement attesting to the nonreceipt, loss, or theft of the original FDC check. However, if obtaining such a statement from the recipient will cause the issuance of the check to be unduly delayed, the statement may be obtained within a reasonable time after the check is issued.

(b) *State option.* A State plan may provide that as a condition for issuance of a replacement check, a recipient is required to report a lost or stolen AFDC check to the police or other appropriate authorities. Under this provision, the State agency may require that the recipient verify that a report was made to the police or other appropriate authorities and, if so, the agency will establish procedures for such verification.

9. Section 205.40 is amended by removing and reserving paragraph (d) as follows:

10. Section 205.45 is amended by revising paragraphs (b) and (c) to read as follows:

§ 205.45 Federal financial participation in relation to State emergency welfare preparedness.

* * * * *

(b) Federal financial participation is available at 50 percent under title IV–A for providing training in emergency welfare preparedness for all staff and for volunteers.

(c) In Guam, Puerto Rico, and the Virgin Islands, Federal financial participation is available at the rate of 75 percent in expenditures for emergency welfare preparedness under titles I, X, XIV, XVI (AABD) of the Social Security Act.

* * * * *

11. Section 205.50 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 205.50 Safeguarding information for the financial assistance programs.

(a) State plan requirements. A State plan for financial assistance under title IV–A of the Social Security Act, must provide that:

* * * * *

12. Section 205.50 is further amended to revise paragraph (a)(1)(i)(D) to read as follows:

§ 205.50 Safeguarding information for the financial assistance programs.

(a) * * *

(1) * * *

(i) * * *

(D) The verification to the Employment Security Agency, or other certifying agency that an individual has been an AFDC recipient for at least 90 days or is a WIN or WIN Demonstration participant pursuant to Pub. L. 97–34, the Economic Recovery Tax Act of 1981.

* * * * *

(13.) Section 205.50 is further amended by revising paragraph (a)(2)(i)(A) to read as follows:

§ 205.50 Safeguarding information for the financial assistance programs.

(a) * * *

(2) * * *

(i) * * *

(A) The names and addresses of applicants and recipients and amounts of assistance provided (unless excepted under paragraph (a)(1)(iv) of this section);

* * * * *

§ 205.146 [Amended]

(14.) Section 205.146 is amended by removing and reserving paragraph (c) as follows:

PART 206—[AMENDED]

Part 206 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

1. The authority citation for Part 206 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

2. Section 206.10 is amended by removing and reserving paragraphs (a)(1)(iv) and (a)(1)(v) as follows:

§ 206.10 Application, determination of eligibility and furnishing of assistance.

(a) * * *

(1) * * *

(iv)–(v) [Reserved]

* * * * *

3. Section 206.10 is amended by revising paragraph (a)(9)(iii) and adding (a)(9)(iv) to read as follows. The introductory text of paragraph (a)(9) is shown for the convenience of the reader.

§ 206.10 Application, determination of eligibility and furnishing of assistance.

(a) * * *

(9) Where an individual has been determined to be eligible, eligibility will be reconsidered or redetermined:

(i) * * *

(ii) * * *

(iii) Periodically, within agency established time standards, but not less frequently than every 12 months in OAA, AB, APTD, and AABD, on eligibility factors subject to change. For recipients of AFDC, all factors of eligibility will be redetermined at least every 6 months except in the case of monthly reporting cases or cases covered by an approved error-prone profiling system as specified in paragraph (a)(9)(iv) of this section. Under the AFDC program, at least one face-to-face redetermination must be conducted in each case once in every 12 months.

(iv) In accordance with paragraph (a)(9)(iii) of this section, under an

BEST COPY AVAILABLE

VOL
51

1986
UMI

alternative redetermination plan based on error-prone profiling, which has been approved by the Secretary, and includes:

(A) a description of the statistical methodology used to develop the error-prone profile system upon which the redetermination schedule is based;

(B) the criteria to be used to vary the scope of review and to assign different types of cases; and

(C) a detailed outline of the evaluation system, including provisions for necessary changes in the error-prone output, such as types of cases, types of errors, frequencies of redeterminations and corrective action.

* * * * *

4. Section 206.10 is amended by adding a new paragraph (b)(4) to read as follows:

§ 206.10 Application, determination of eligibility and furnishing of assistance.

* * * * *

(b) * * *

(4) *Redetermination* is a review of factors affecting AFDC eligibility and payment amount; e.g. continued absence, income (including child and spousal support), etc.

PART 225—[AMENDED]

Part 225 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

1. The authority citation for Part 225 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

2. Section 225.2 is amended by revising the introductory paragraph and by revising paragraph (a)(1) to read as follows:

§ 225.2 State plan requirements.

The State plan for financial assistance programs under titles I, X, XIV, or XVI (AABD) of the Social Security Act for Guam, Puerto Rico and the Virgin Islands or for child welfare services under title IV–B of the Act must:

(a) * * *

(1) Such methods of recruitment and selection as will offer opportunity for full-time or part-time employment of persons of low income and little or no formal education, including employment of young and middle aged adults, older persons, and the physically and mentally disabled, and in the case of a State plan for financial assistance under title I, X, XIV, or XVI (AABD), of recipients: and will provide that such subprofessional positions are subject to merit system requirements, except where special exemption is approved on the basis of a State alternative plan for recruitment and selection among the disadvantaged of persons who have the potential ability for training and job performance to help assure achievement of program objectives:

* * * * *

3. Section 225.3 is revised to read as follows:

§ 225.3 Federal financial participation.

Under the State plan for financial assistance programs under titles I, X, XIV, XVI (AABD) or for child welfare services under title IV–B of the Act, Federal financial participation in expenditures for the recruitment, selection, training, and employment and other use of subprofessional staff and volunteers is available at the rates and under related conditions established for training, services, and other administrative costs under the respective titles.

PART 232—[AMENDED]

Part 232 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

1. The authority citation for Part 232 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

2. Section 232.20 is amended by revising paragraph (b)(1) to read as follows:

§ 232.20 Treatment of child support collections made in the Child Support Enforcement Program as income and resources in the Title IV–A Program.

* * * * *

(b) * * *

(1) Upon notification by the IV–D agency of the amount of a support collection, the IV–A agency will use such amount to review eligibility of the assistance unit under section 206.10(a)(9)(ii). This use of these amounts so collected shall not be later than the second month after the month in which the IV–A agency received a report of the monthly collections from the IV–D agency. In determining whether a support collection made by the State's IV–D agency, which represents support amounts for a month as determined pursuant to § 302.51(a) of this title, is sufficient to make the family ineligible for an assistance payment for the month to which the redetermination applies, the State will determine if such collection, when treated as if it were income, makes the family ineligible for an assistance payment. If such treatment makes the family ineligible, the IV–A agency will notify the family and the IV–D agency of the effective date of the family's ineligibility. The IV–D agency will treat the support collection that caused ineligibility in accordance with § 302.32. If such treatment does not make the family ineligible for an assistance payment, the assistance payment will be calculated without regard to such collection.

* * * * *

PART 233—[AMENDED]

Part 233 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

1. The authority citation for Part 233 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act. (42 U.S.C. 1302)

2. The Table of Contents in Part 233 is amended by revising the section heading for § 233.110 to read as follows:

PART 233—COVERAGE AND CONDITIONS OF ELIGIBILITY IN FINANCIAL ASSISTANCE PROGRAMS

* * * * *

Sec.
233.110 Foster care maintenance and adoption assistance.

* * * * *

3. Section 233.10 is amended by revising paragraphs (b)(2)(ii)(*a*) (*2*) and (*3*) to read as follows:

§ 233.10 General provisions regarding coverage and eligibility.

* * * * *

(b) * * *

(ii) * * *

(*a*) * * *

(*2*) Deprived of parental support or care by reason of the death, continued absence from the home, or physical or mental incapacity of a parent, or unemployment of a principal earner, and

(*3*) Living in the home of a parent or of certain relatives specified in the Act.

* * * * *

4. Section 233.20 is amended by revising paragraph (a)(3)(ii)(C) to read as follows:

§ 233.20 Need and amount of assistance.

(a) * * *

(3) * * *

(ii) * * *

(C) States may have policies which provide for allocating an individual's income for his or her own support if the individual is not applying for or receiving assistance; for the support of other individuals living in the same household but not receiving assistance; and for the support of other individuals living in another household. Such other individuals are those who are or could be claimed by the individual as dependents for determining Federal

personal income tax liability, or those he or she is legally obligated to support. No income may be allocated to meet the needs of an individual who has been sanctioned under sections 224.51, 232.11(a)(2), 232.12(d), 238.22 or 240.22 or who is required to be included in the assistance unit and has failed to cooperate. The amount allocated for the individual and the other individuals who are living in the home must not exceed the State's need standard amount for a family group of the same composition. The amount allocated for individuals not living in the home must not exceed the amount actually paid.

* * * * *

5. Section 233.20 is amended by revising the first sentence of paragraph (a)(3)(ii)(F) to read as follows:

§ 233.20 Need and amount of assistance.

(a) * * *

(3) * * *

(ii) * * *

(F) When the AFDC assistance unit's income, after applying applicable disregards, exceeds the State need standard for the family because of receipt of nonrecurring earned or unearned lump sum income (including for AFDC, title II and other retroactive monthly benefits, and payments in the nature of a windfall, e.g., inheritances or lottery winnings, personal injury and worker compensation awards, to the extent it is not earmarked and used for the purpose for which it is paid, i.e., monies for back medical bills resulting from accidents or injury, funeral and burial costs, replacement or repair of resources, etc.), the family will be ineligible for aid for the full number of months derived by dividing the sum of the lump sum income and other income by the monthly need standard for a family of that size. Any income remaining from this calculation is income in the first month following the period of ineligibility. The period of ineligibility shall begin with the month of receipt of the nonrecurring income or, at State option, as late as the corresponding payment month.* * *

* * * * *

6. Section 233.20 is amended by revising (a)(3)(iv) to read as follows:

§ 233.20 Need and amount of assistance.

(a) * * *

(3) * * *

(iv) Provide that in determining the availability of income and resources, the following will not be included as income (A) Except for AFDC, income equal to expenses reasonably attributable to the earning of income (including earnings from public service employment); (B) loans and grants, such as scholarships, obtained and used under conditions that preclude their use for current living costs; (C) home produce of an applicant or recipient, utilized by him and his household for their own consumption; (D) for AFDC, any amounts paid by a State IV–A agency from State-only funds to meet needs of children receiving AFDC, if the payments are made under a statutorily-established State program which has been continuously in effect since before January 1, 1979; (E) for AFDC, income tax refunds (except the earned income credit (EIC) portion) but such payments shall be considered as resources; and (F) at State option, small nonrecurring gifts, such as those for Christmas, birthdays and graduations, not to exceed $30 per recipient in any quarter.

* * * * *

7. Section 233.20 is amended by revising paragraph (a)(3)(xiv) to read as follows:

§ 233.20 Need and amount of assistance.

(a) * * *

(3) * * *

(xiv) For AFDC, in States that do not have laws of general applicability holding the stepparent legally responsible to the same extent as the natural or adoptive parent, the State agency shall count as income to the assistance unit the income of the stepparent (i.e., one who is married, under State law, to the child's parent) of an AFDC child who is living in the household with the child after applying the following disregards (exception: if the stepparent is included in the assistance unit, the disregard under paragraph (a)(11) (i) and (ii) of this section apply instead:

(A) The first $75 of the gross earned income of the stepparent if he or she is employed full-time. The State agency shall have in place a procedure under which it determines and applies a disregarded amount less than $75 for stepparents who are not employed on a full-time basis or not employed throughout the month;

(B) An additional amount for the support of the stepparent and any other individuals who are living in the home, but whose needs are not taken into account in making the AFDC eligibility determinations except for sanctioned individuals or individuals who are required to be included in the assistance unit but have failed to cooperate and are or could be claimed by the stepparent as dependents for purposes of determining his or her Federal personal income tax liability. This disregarded amount shall equal the State's need standard amount for a family group of the same composition as the stepparent and those other individuals described in the preceding sentence;

(C) Amounts actually paid by the stepparent to individuals not living in the home but who are or could be claimed by him or her as dependents for purposes of determining his or her Federal personal income-tax liability; and

(D) Payments by such stepparent of alimony or child support with respect to individuals not living in the household.

* * * * *

8. Section 233.20 is amended by revising paragraph (a)(4)(ii)(*h*) to read as follows:

§ 233.20 Need and amount of assistance.

(a) * * *

(4) * * *

(ii) * * *

(*h*) Payments to applicants or recipients participating in the Volunteers in Service to America (VISTA) Program, except that this disregard will not be applied when the Director of ACTION determines that the value of all such payments, adjusted to reflect the number of hours such volunteers are serving, is equivalent to or greater than the minimum wage then in effect under the Fair Labor Standards Act of 1938, or the minimum wage under the laws of the States where the volunteers are serving, whichever is greater. (Section 404(g) of Pub. L. 93–113, as amended by section 9 of Pub. L. 98–143):

* * * * *

9. Section 233.20 is amended by adding a new paragraph (a)(4)(ii)(*l*) to read as follows:

§ 233.20 Need and amount of assistance.

(a) * * *

(4) * * *

(ii) * * *

(*l*) Benefits paid to eligible households under the Low Income Home Energy Assistance Act of 1981 pursuant to section 2605(f) of Pub. L. 97–35;

* * * * *

10. Section 233.27 is amended by revising paragraph (b)(2) to read as follows:

§ 233.27 Supplemental payments under retrospective budgeting.

* * * * *

(b) * * *

(2) The agency may include as income cash in hand or available in bank accounts. It may also include as income any cash disregarded in determining need or the amount of the assistance payment, but not cash payments that are disregarded by section 233.20(a)(4)(ii), paragraphs (c) on relocation assistance,

UMI

(d) on educational grants or loans and (g) on payments for certain services.

11. Section 233.90 is amended by revising paragraph (a)(1) to read as follows. The introductory text of paragraph (a) is shown for the convenience of the reader.

§ 233.90 Factors specific to AFDC.

(a) *State plan requirements.* A State plan under title IV–A of the Social Security Act shall provide that:

(1) The determination whether a child has been deprived of parental support or care by reason of the death, continued absence from the home, or physical or mental incapacity of a parent, or (if the State plan includes such cases) the unemployment of his or her parent who is the principal earner will be made only in relation to the child's natural or adoptive parent, or in relation to the child's stepparent who is married, under State law, to the child's natural or

* * * * *

12. Section 233.90 is amended by revising paragraphs (c)(2)(i) and (c)(2)(ii) to read as follows:

§ 233.90 Factors specific to AFDC.

* * * * *

(c) * * *

(2) Federal financial participation is available in:

(i) Initial payments made on behalf of a child who goes to live with a relative specified in section 406(a)(1) of the Social Security Act within 30 days of the receipt of the first payment, provided payments are not made for concurrent period for the same child in the home of another relative or as foster care under title IV–E;

(ii) Payments made for the entire month in the course of which a child leaves the home of a specified relative, provided payments are not made for a concurrent period for the same child in the home of another relative or as foster care under title IV–E; and

* * * * *

13. Section 233.100 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 233.100 Dependent children of unemployed parents.

(a) Requirements for State Plans. If a State wishes to provide AFDC for children of unemployed parents, the State plan under title IV–A of the Social Security Act must:

* * * * *

14. Section 233.100 is amended by removing paragraphs (a)(7) and (a)(8):

15. Section 233.100 is amended by removing and reserving paragraph (b) as set forth below:

16. Section 233.100 is amended by revising paragraphs (c)(1)(iv) and (c)(1)(v) to read as follows:

§ 233.100 Dependent children of unemployed parents.

* * * * *

(c) * * *

(1) * * *

(iv) Whose parent who is the principal earner (*a*) has six or more quarters of work (as defined in paragraph (a)(3)(iv) of this section) within any 13-calendar-quarter period ending within 1 year prior to the application for such aid, (*b*) within such 1-year period, received unemployment compensation under an unemployment compensation law of a State or of the United States, or was qualified (under the terms of paragraph (a)(3)(v) of this section) for such compensation under the State's unemployment compensation law; and

(v) Whose parent who is the principal earner (*a*) is currently registered with the WIN program unless exempt or is registered with the public employment office in the State if exempt from WIN registration under § 224.20(b)(6) or because there is no WIN program in which he can effectively participate; and (*b*) has not refused to apply for or accept unemployment compensation with respect to any week for which such child's parent qualifies for unemployment compensation under an unemployment compensation law of a State or of the United States.

* * * * *

17. Section 233.100 is amended by revising paragraph (c)(2)(i) to read as follows:

§ 233.100 Dependent children of unemployed parents.

* * * * *

(c) * * *

(2) * * *

(i) For any part of the 30-day period specified in paragraph (a)(3)(i) of this section;

* * * * *

18. Section 233.110 is revised as set forth below:

§ 233.110 Foster care maintenance and adoption assistance.

(a) *State plan requirements.* A State plan under title IV–A of the Social Security Act must provide that the State has in effect a plan approved under Part E, title IV of the Social Security Act, and operates a foster care maintenance and adoption assistance program in conformity with such a plan.

PART 234—[AMENDED]

Part 234 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

1. The authority citation for Part 234 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

2. Section 234.11 is amended by revising the section heading and by removing and reserving paragraph (b) as follows:

§ 234.11 Assistance in the form of money payments.

* * * * *

(b) [Reserved.]

3. Section 234.60 is amended to revise paragraph (a)(2)(ii) to read as follows:

§ 234.60 Protective, vendor and two-party payments for dependent children.

(a) * * *

(2) * * *

(ii) States will establish criteria to determine if mismanagement exists. Under this provision, States may elect to use as one criterion a presumption of mismanagement based on a recipient's nonpayment of rent.

* * * * *

4. Section 234.60 is amended to remove and reserve paragraph (a)(6) as follows:

§ 234.60 Protective, vendor and two-party payments for dependent children.

(a) * * *

(6) [Reserved]

* * * * *

5. Section 234.60 is amended by revising the introductory text of paragraph (a)(9) to read as follows:

§ 234.60 Protective, vendor and two-party payments for dependent children.

(a) * * *

(9) Review will be made as frequently as indicated by the individual's circumstances, and at least once every 12 months, of:

* * * * *

6. Section 234.60 is amended by revising paragraph (a)(11) to read as follows:

§ 234.60 Protective, vendor and two-party payments for dependent children.

(a) * * *

(11)(i) Opportunity for a fair hearing pursuant to section 205.10 will be given to any individual claiming assistance in relation to the determination:

(A) That a protective, vendor, and two-party payment should be made or continued.

(B) As to the payee selected.

(ii) In cases where the agency has elected the option to presume mismanagement based on a recipient's nonpayment of rent pursuant to paragraph (a)(2)(ii), the agency may also elect the option to provide the opportunity for a fair hearing pursuant to § 205.10 either before or after the manner or form of payment has been changed for these cases.

* * * * *

PART 235—[AMENDED]

Part 235 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

1. The authority citation for Part 235 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act, (42 U.S.C. 1302).

2. The Table of Contents of Part 235 is amended by removing and reserving § 235.40:

PART 235—ADMINISTRATION OF FINANCIAL ASSISTANCE PROGRAMS

3. Section 235.40 is removed and reserved as follows:

§ 235.40 [Reserved.]

PART 237—[AMENDED]

Part 237 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

1. The authority citation for Part 237 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act, (42 U.S.C. 1302).

2. Section 237.50 is amended by revising paragraph (b)(3)(ii) to read as follows:

§ 237.50 Recipient count, Federal financial participation.

* * * * *

(b) * * *

(3) * * *

(ii) As used in paragraph (b)(3)(i) of this section, the term "parent" means the natural or adoptive parent, or the stepparent who was married under State law to the child's natural or adoptive parent and is legally obligated to support the child under State law of general applicability which requires stepparents to support stepchildren to the same extent that natural or adoptive parents are required to support their children; and the term "spouse" means an individual who is the husband or wife of the child's own parent, as defined above, by reason of a legal marriage as defined under State law.

* * * * *

3. Section 237.50 is amended by revising paragraph (b)(4) to read as follows:

§ 237. Recipient count, Federal financial participation.

* * * * *

(b) * * *

(4)(i) When at least one of the children in a family is eligible due to the unemployment of his or her parent who is the principal earner in the home, the recipient count may include all eligible children, the parent who is the principal earner and spouse with whom the children are living, if the needs of such parent and spouse were included in computing the assistance payment.

(ii) For purposes of paragraph (b(4)(i) of this section, the definitions of the terms "parent" and "spouse" as specified in paragraph (b)(3)(ii) of this section are applicable.

BILLING CODE 4190-11-M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Part 221

Blanket Approval for Bareboat Charters of Recreational Vessels to Noncitizens, Sales to Noncitizens and Transfers to Foreign Registry or Flag of Vessels Under 200 Gross Tons

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Final rule.

SUMMARY: The Maritime Administration (MARAD) is issuing this final rule under section 9 of the Shipping Act (Act), 1916 (46 U.S.C. 808). That provision makes it unlawful, without the approval of the Secretary of Transportation, to transfer to a noncitizen a vessel or other interests in a vessel owned by U.S. citizens that is documented, or was last documented under U.S. laws. This final rule extends the scope of an existing regulation at 46 CFR 221.7 to grant a general approval, not to exceed six months, to bareboat charters and subcharters to noncitizens of United States vessels that are U.S.-documented to be operated only for recreation. It also grants general MARAD approval of the sale to noncitizens, as well as the transfer to foreign registry or flag, of all vessels under 200 gross tons.

EFFECTIVE DATE: This rule is effective April 17, 1986.

FOR FURTHER INFORMATION CONTACT: Mrs. Jessie Fernanders, Ship Disposals and Foreign Transfers Officer, Maritime Administration, Washington, DC 20590, Telephone (202) 426–5821.

SUPPLEMENTARY INFORMATION:

Background

On September 30, 1985, MARAD published in the **Federal Register** (50 FR 39737) a notice of proposed rulemaking (NPRM). The NPRM proposed two amendments to regulations at 46 CFR Part 221. Those regulations implement a statutory requirement, under 46 U.S.C. 808, that the Secretary of Transportation approve all vessel sales or the transfer of other interests in a vessel, owned by U.S. citizens, that is documented, or was last documented under U.S. laws. The Secretary has delegated this approval authority to MARAD.

Under the existing regulation at 46 CFR 221.7, MARAD grants a general approval, not to exceed six months, of vessel charters to noncitizens. This general approval specifically excludes bareboat charters, charters for the carriage of cargoes to Cuba and specified Communist countries in eastern Europe and southeast Asia, and charters for operation in the fisheries of the United States. A bareboat charter is one where the charterer takes possession of the vessel and exercises direct control over the actual operation of the vessel.

This rule finalizes the proposal to expand the general approval to include bareboat charters and subcharters to noncitizens of U.S. vessels that are documented for recreational purposes and that will be operated only for recreation by the bareboat charterer or subcharterer.

The other amendment proposed in the NPRM and adopted in this final rule grants approval under 46 U.S.C. 808 of the sale to noncitizens, and/or the transfer to foreign registry or flag, of all vessels under 200 gross tons. There is no existing provision in 46 U.S.C. Part 221 that grants a general approval, under 46 U.S.C. 808, of sales to noncitizens and/or the transfer to foreign registry or flag of U.S. vessels.

Bareboat Charters and Subcharters of Recreational Vessels

MARAD proposed the amendment expanding the general approval of charters to recreational vessels at the informal request of vessel owners and their representatives that are in the business of chartering for recreational operation vessels that are documented solely for such use under U.S. laws administered by the Coast Guard.

Owners and operators of recreational vessels receive many charter requests

VOL 51
ISS 52
MR 18
1986
UMI

from noncitizens. These requests for recreational vessel charters are usually for immediate use, and in many cases, for very brief periods of time. A majority of the potential charter opportunities arise on short notice. Since obtaining the prior MARAD approval required under section 9 of the Act typically takes anywhere from 30 to 90 days, the vessel owners and operators have to reject most charter requests by noncitizens. Being unable to comply with 46 U.S.C. 808, they lose chartering opportunities and suffer financial injury. The alternative to rejecting a profitable vessel chartering opportunity is to charter without prior MARAD approval. This is a violation of the Act that subjects the owner to a fine which could amount to $5,000, or to imprisonment of up to five years, or both. Violation of the Act also subjects the vessel to forfeiture to the United States. Thus, many of the recreational vessel charterers are forced to choose between loss of customers and the risk of losing the vessels which are their principal assets.

Based on conservative estimates and assumptions set forth in the NPRM, MARAD determined that its existing approval requirement for bareboat charters to noncitizens could be responsible for lost chartering opportunities representing an annual loss of income of as much as $10.1 million to recreational boat owner/operators. Further, elimination of the required filing fee could save charter boat operators as much as $22.7 million. Elimination of the application process could save MARAD up to $7.3 million, which represents the cost of reviewing 87,600 applications for charter approvals. These calculations are based on estimated maximum costs and on the assumption that for all chartering transactions involving noncitizens, applications for prior approval would be filed with MARAD.

Sales of Vessels to Noncitizens

The NPRM also proposed a new § 221.6 that would grant general approval of the sale to noncitizens, or the transfer to foreign registry or flag, of a vessel of under 200 gross tons owned by a U.S. citizen and presently documented, or last documented under U.S. laws. MARAD proposed this amendment after determining that there is insufficient benefit to MARAD, administrative or otherwise, to be derived from an approval process with estimated annual costs of over $31,000 to an estimated 176 applicants, and of $15,000 to MARAD. Also, there have been negative economic consequences, to both the buyer and seller, during the period consumed by the approval process, that has taken from a minimum of 30 days, to as many as 90 days. The economic consequences include loss of revenue and reduction in business good will.

Discussion of Comments

MARAD received comments from 55 persons, all of whom supported this rulemaking action. Four of these comments concerned the general approval of sales of vessels under 200 gross tons to noncitizens. All the comments were strongly supportive of the proposed provision for general approval of bareboat charters and subcharters of recreational vessels.

Whenever the commenters estimated the percentage of potential business lost because of the inability to quickly and freely charter to noncitizens, the typical range of their estimate was between 10 to 20 percent of all charter opportunities. One Maine commenter stated that about 10 percent of its actual charters were to noncitizens, "particularly, Canadians," and that "at times we lose sales or charters due to the time required for processing an application." Another charterer in Florida commented that her company and other chartering companies are "forced to turn down hundreds of quality foreign charter clients each year." This charterer stated that the losses of the charterers, combined with revenue lost by U.S. airlines, hotels, restaurants and shops, has had an enormous economic impact. Another Florida charterer estimated that, because of the existing charter approval requirement, the yacht chartering business has lost two weeks of charters per month for every year it has operated, which translates into a revenue loss for that business of over $218,000.

For another yacht charterer in Florida, the "red tape" involved in applying for MARAD approval of noncitizen bareboat charters, estimated at 20 percent of its charter applications, has dictated its policy of not accepting any charter requests from noncitizens. This commenter stated that "based on last year's charter revenues, this loss factor results in $30,000 worth of potential charter revenues." A U.S.-owned corporation that owns or is the agent for over 135 vessels from Caribbean and South Pacific bases, measuring from 39 to 51 feet, as well as 12 fully-crewed larger yachts, commented that it has decided to restrict all marketing efforts for bareboat charters to U.S. yachtsmen in the United States. This decision was made to protect itself and its boat owners from penalty. It estimated a loss of charter revenue for 1985 of $1 million by excluding noncitizen applicants.

One charterer estimated an annual loss in charter revenues of $50,000 at its fleet locations in Boston, Fort Lauderdale and St. Thomas, VI. A yacht charterer in Florida commented on being forced to turn down a significant number of noncitizens, particularly Canadians, representing about 10 weeks of charter business valued at $14,500. Another yacht charterer estimated that he turns away 15 to 20 percent of his total charter applicants because they are noncitizens, at a cost of $15,000 annually, further stating that this estimate of lost business does not include those who do not call because "they are aware of the law."

There were also other more specific comments. One commenter noted that MARAD's proposal to deregulate the approval process for bareboat charters to noncitizens of recreational vessels is negated by U.S. Coast Guard requirements that there be a U.S. master on board all U.S.-documented vessels at all times. (46 U.S.C. 12110). He recommended that the Coast Guard facilitate implementation of MARAD's intent administratively under its authority to compromise, modify, or remit, with or without condition, any civil penalty (46 U.S.C. 2107) until the Congress acts to change the law that the Coast Guard implements through regulation.

As stated in the NPRM, the proposed general approval amendments relate only to MARAD's responsibilities under existing law with respect to transfers of vessels and vessel interests to noncitizens. It would have no effect upon the laws and regulations governing vessel documentation and operations that are administered by any other Federal agency. This requirement is within the exclusive authority of the Coast Guard and any requests for administrative action regarding implementation of that authority should be directed to the Coast Guard.

Another commenter who is a yacht broker, as well as a charterer, criticized a "legal requirement" that, to be eligible for U.S. documentation, a vessel must be owned by U.S. citizens (46 U.S.C. 12102), since U.S. financial institutions prefer that a vessel be U.S.-documented in order to obtain preferred status for mortgage purposes. He stated that he has lost potential clients because they were unable to finance purchases of U.S. vessels that were not eligible for U.S. documentation under statutory provisions implemented by the Coast Guard.

The legal requirements for vessel documentation and the vessel financing policies of financial institutions are

subjects that are beyond the scope of this rulemaking.

An owner/operator of a bareboat charter company in St. Thomas, Virgin Islands, supported the rulemaking, but thought that any MARAD regulation on this subject should be further liberalized to: (1) Extend the period of charter approval to 12 months to save both MARAD and the chartering companies time and trouble; and (2) Make the approval applicable to the fleet operated by a charterer, rather than to individual vessels, in view of the cost of $250 per boat for approval.

MARAD does not believe that either of these proposed amendments should be adopted. Irrespective of the chartering season's length, which varies with the climate and weather conditions, it has been our experience that there is a very low incidence of applications for charters for periods in excess of six months. With respect to the fleet approval recommendation, this general approval accomplishes the objective of this commenter, i.e., since the prior approval provision of the proposed rule would apply to each vessel in the fleet, and is not limited to names of specific vessels, it is effectively a fleet approval.

A law firm commenting in behalf of several U.S.-flag charter fleet operators contended that the documentation of a vessel for recreation only should not be a condition for a general approval of a bareboat charter if the vessel is actually chartered only for recreational use. It stated that many vessels that are currently in the charter fleet have been registered, i.e., documented for commercial use in the foreign trade of the United States, in order that they may qualify for investment tax credit under section 48(a) of the Internal Revenue Code, as interpreted by regulations of the Internal Revenue Service and a memorandum decision of the Tax Court of the United States. That commenter argued that the use of the vessel during the charter should be controlling and that the proposed regulation be amended to delete the requirement that a vessel be documented recreational, and require only that the vessel be chartered "to be operated personally by the charterers for recreation only."

MARAD's principal intention in proposing the amendments with respect to bareboat charters was to eliminate an impediment to the conduct of business activities by charterers of small yachts that are primarily intended for recreational purposes, and have been documented as such. Accordingly, MARAD has not incorporated this commenter's proposed amendment in the final rule.

The four comments on the general approval of sales of vessels under 200 gross tons support that amendment. One stated that the amendment "would welcome the avoidance of the filing fee and the time delay in accomplishing the sale." A commenter cited as an example of the consequences of delay in the existing MARAD approval process its inability to draw on a $1.2 million letter of credit for two weeks. It further states that "this proposed rule will enhance our ability to export vessels and could significantly contribute to the recovery of our depressed markets." Another commenter stated that countries without a delay of the type that is inherent in MARAD's existing sales approval process for noncitizens enjoy an advantage in the export market.

Although supporting adoption of the proposed amendments, another Federal agency questioned the selection of a vessel size under 200 gross tons as qualification for a general approval of a sale. The agency argued that most vessels are under that size, under any circumstances. It also recommended that MARAD continue to collect information about the transfer of fishing vessels in order that it could monitor the extent of such activity. MARAD chose 200 gross tons as an upper limit because its experience has shown that the great majority of vessel transfers involve vessels under 200 gross tons. With respect to information collection, MARAD has balanced the need for such information against the burden imposed, and has decided not to impose such a requirement.

E.O. 12291, Statutory Requirements and DOT Procedures

MARAD has made a determination that this final rule is not a major rule under Executive Order 12291. Pursuant to Department of Transportation Regulatory Policies and Procedures (44 FR 11034, February 26, 1979), this is a nonsignificant regulation. The economic impact of this proposal has been found to be so minimal that further evaluation is unnecessary.

While this proposed amendment will have some positive impact on small businesses, MARAD anticipates that its primary impact will be on individual owners of recreational boats. Accordingly, the Maritime Administrator certifies that the rulemaking will not exert a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (Pub. L. 96-354). These amendments include amended requirements for the collection of information (Section 221.7(b)), within the scope of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.), that have been submitted to the Office of Management and Budget (OMB) for approval. This amendment will cause a large reduction of the existing reporting burden, since it will eliminate an estimated 87,600 applications annually. The basic information collection approval number is OMB Control No. 2133-0006.

List of Subjects in 46 CFR Part 221

Banks, Banking, Charter Citizenship and Naturalization, Foreign Transfer, Maritime Administration, Maritime carriers, Reporting and record keeping requirements, Uniform System of Accounts.

Accordingly, 46 CFR Part 221 is amended as follows:

PART 221—[AMENDED]

1. The authority citation for Part 221 continues to read as follows:

Authority: Secs. 9, 41 and 43, Shipping Act, 1916, as amended (46 U.S.C. 808, 839, 841(a); 49 CFR 1.66.

§ 221.7 [Amended]

2. In paragraph (a)(1) of 46 CFR 221.7, add the following parenthetical phrase before the final period: "(other than bareboat charters or bareboat subcharters of vessels documented recreational and to be operated personally by the charterer for recreation only)."

3. Revise paragraph (b) of 46 CFR 221.7 to read as follows:

* * * * *

(b) Not later twenty (20) days after the beginning of a charter period, the vessel owner or owner's representative shall file with the Maritime Administration a copy of any charter which is approved under paragraph (a) of this section (except a bareboat charter or bareboat subcharter of a vessel documented recreational to be operated personally by the charterer for recreation only). The Maritime Administration may grant a request for an extension of time to file such charter or other agreement. The vessel owner or bareboat charterer (or a representative) who charters a documented recreational vessel to a person not a citizen of the United States, which vessel is to be used personally by the charterer or subcharterer for recreation only, shall retain a copy of such charter for a period of one (1) year after the expiration date, and shall make it available for inspection upon request by the Maritime Administration or its designee.

* * * * *

1986
UMI

4. A new § 221.8 is added to read as follows:

§ 221.8 Approval of vessel sale to noncitizens; transfer to foreign registry.

(a) The Maritime Administration hereby approves under sections 9 and 41 of the Shipping Act, 1916, as amended (46 U.S.C. 808, 839), the sale to a noncitizen, and/or the transfer to foreign registry or flag, of a vessel of under 200 gross tons that is owned by a United States citizen and is either documented or was last documented under United States laws. Pursuant to 46 U.S.C. 883, 12106, the sale to a noncitizen and/or the transfer to foreign flag or registry of a vessel terminates the right of such vessel to engage thereafter in the coastwise trade.

(b) The approvals granted in paragraph (a) of this section shall not apply if the vessel's purchaser, or a person (including a corporation or other entity) with a controlling interest in the vessel's purchaser, is a national of Iran, Libya the Union of Soviet Socialist Republics, Latvia, Lithuania, Estonia, Czechoslovakia, Bulgaria, Albania, North Korea, German Democratic Republic (including East Berlin), Laos, Kampuchea, Vietnam, Outer Mongolia, or Cuba, unless such national has been lawfully admitted into, and resides in the United States; and such national does not remove the vessel from the territorial limits of the United States. Also, the approvals shall not apply if the vessel is to be transferred to or placed under the flag of any such country. This list of countries shall be subject to change periodically to conform to the laws and foreign policy of the United States.

Dated: March 13, 1986.

By Order of the Maritime Administrator.

Georgia P. Stamas,
Secretary, Maritime Administration.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 84-231; FCC 86-76]

Increasing the Availability of FM Broadcast Assignments

AGENCY: Federal Communications Commission.

ACTION: Summary of Reconsideration of Final Rule.

SUMMARY: This *Memorandum Opinion and Order* denies in part and grants in part various petitions for reconsideration of the *Second Report and Order* in MM Docket No. 84-231. In the *Second Report and Order* (50 FR 15558, April 19, 1985), the Commission added a new attribute under the comparative hearing criterion of securing the best practicable service which would enhance the integration proposal of daytime-only AM licensees applying for FM channels in the same community. The Commission affirmed its determination to award special consideration and that the weight accorded to upgraded enhancement credit should be equal to the credit given for local residence or minority ownership. In addition, the Commission retained the requirement that the credit was only available in the community of license and that the daytime-only licensee would be required to divest within three years of program test authority for the FM station. The Commission also clarified that an applicant for purposes of being granted the special consideration would be the licensee, as an entity and that the term "substantial participation" meant that members of the entity holding cognizable ownership interests spent at a minimum 20 hours per week in the management of the daytime-only station. In order to provide more certainty, the Commission determined that the applicant had to demonstrate that it had owned the daytime-only station for three continuous years prior to filing its application.

EFFECTIVE DATE: March 31, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Radio broadcasting.

Summary of Memorandum Opinion and Order

In the Matter of Implementation of BC Docket No. 80-90 to Increase the Availability of FM Broadcast Assignments; (MM Docket No. 84-231).

This is a summary of the Commission's *Memorandum Opinion and Order*, MM Docket 84-231.

Adopted February 10, 1986.
Released February 21, 1986.

The full text of Commission decisions are available for inspection and copying during normal business hours in the FCC dockets branch (room 230), 1919 M Street, Northwest, Washington, D.C. The complete test of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, Northwest, Suite 140, Washington, DC. 20037.

The Commission affirmed and clarifed its *Second Report and Order* in this proceeding, which granted special consideration to daytime-only AM licensees when applying for FM broadcast allotments in their community of license and which established the system by which we would begin to accept applications for the 689 recently allotted FM channels. The Commission also concluded that its action in this proceeding rendered moot the National Black Media Coalition's "Motion for Expedited Treatment," with respect to its Petition for Reconsideration, its "Motion for Stay" and "Motion for Expedited Treatment" of that Motion.

Specifically, the Commission determined that daytime-only broadcasters do represent a unique class of licensees. Among other things, they are the only licensees who historically have been unable to provide nighttime service to their community of license. While other licensees, such as Class IV's and other full time AM broadcasters claim that they suffer detriments as well, the Commission continues to believe, that none have been subject to the same degree of limitations on their operations as the daytime-only licensee. As a result of actions by this Commission, most Class IV AM stations were able to increase their nighttime power from 250 watts to 1000 watts. This increase in power has helped them offer effective service at night. Although a small number of other AM stations operate with a lower nighttime power (typically 250 watts) these stations have nighttime protection and thus are able to provide a reliable service. The Commission also noted that as a result of its separate action in the *Report and Order* in MM Docket No. 84-281, many daytime-only broadcasters on the foreign clear channels have been authorized to operate with some level of limited nighttime power. Where the nighttime authority utilized is less than 250 watts of power, such nighttime service is given secondary status. Operating at this level is below the normal minimum nighttime power and the operator is forced to broadcast without signal protections. In these circumstances, the Commission determined it to be in the public interest that these broadcasters continue to be treated as daytime-only licensees for these purposes and be afforded the same upgraded enhancement credit. Accordingly, the Commission concluded that any daytime-only station that, as a result of MM Docket No. 84-281, has accepted authorization to operate at less than 250 watts nighttime power will be eligible for grant of the special consideration. Licensees operating at night with 250 watts or more are full time stations entitled to full time protection and thus, will not be entitled to the credit.

With respect to the weight to be accorded the daytime-only upgraded enhancement credit, the Commission stated that it continues to believe that the correct balance was struck in determining the weight of the special consideration vis-a-vis other comparative factors. In this regard, the Commission noted that it has and continues to support minority ownership of broadcast stations. To this end the Commission awards comparative merit for minority ownership. Similarly, local residence is a comparative criterion upon which the Commission places reliance in choosing between applicants. Enhancement credit for local residence is awarded because "[p]articipation in station affairs . . . by a local resident indicates a likelihood of continuing knowledge of changing local interests and needs." The Commission also is concerned with the plight of the daytime-only broadcaster and sought means to increase its service to its community of license. Weighing these three factors, the Commission determined that the credit accorded the daytime-only licensee should equal the credit given for minority ownership or the credit for local residence.

In light of the weight accorded the upgraded enhancement factor, the Commission deemed it appropriate to establish certain prerequisites. The Commission stated it continued to believe that these conditions are necessary to assure that the benefits upon which the grant is to be based are in fact realized. The decision to grant special consideration was in large part based upon the Commission's belief that these prerequisites reasonably serve to assure the Commission that an applicant will operate the FM facility in the public interest. With respect to the requirement that the credit is only available in the daytime-only licensee/applicant's community of license, the Commission noted that while the daytime-only licensee does in fact often serve surrounding communities, it was the service to the community of license upon which the Commission had determined that the licensee deserved special consideration. Likewise, the Commission's determination to require divestiture was based on the record of this proceeding, Commission policy and

VOL 51
ISS 52
MR 18
1986
UMI

Congressional concerns about diversity. The Commission concluded that in light of its diversification policy it was appropriate that it retain the divestiture requirement where the AM daytime-only licensee wishes to receive an upgraded enhancement credit. Although petitioners suggested many alternatives to divestiture, the Commission determined that none of these would accomplish its diversity concerns as well as divestiture within the three year period.

The Commission clarified the term applicant for purposes of being granted the credit. Specifically, it determined that only the licensee, as an entity, should be eligible for grant of the special consideration. Grant of the special consideration, in situations where individual members of the entity apply, could create administrative problems and thwart our goals in awarding special consideration. In this regard, the Commission noted that if it allowed various factions from the daytime-only facility to be granted the upgraded enhancement credit, the Commission would have difficulty determining which party, in fact, deserved the special consideration. Moreover, the Commission deemed it appropriate to grant the credit solely to the licensee since it was this business enterprise that provided the service to its community of license upon which the Commission based its decision to grant special consideration.

In addition, the Commission clarified what level of participation in the daytime-only station is needed to meet the condition that the applicant have substantially participated in the operation of the daytime-only facility. In this regard the Commission stated that use of the term "substantial participation" in this context relates to the actual past participation in station operations by supervisory personnel whereas integration is based on the amount of proposed future involvement by owners in the management of the station. Upon consideration of its policy objectives, the Commission concluded that to satisfy this requirement, the applicant is not obligated to prove full time participation in the daytime-only facility. The licensee/applicant, however, is required to demonstrate that members of the entity holding cognizable ownership interests spent more than 20 hours per week (either individually or in the aggregate) participating in the management of the daytime-only facility during the three year period.

Finally, the Commission addressed Humes' suggestion that it alter the requirement that the applicant operate the daytime-only station for three continuous years prior to hearing designation for the FM allotment. Upon examination of this condition, the Commission determined that it would be more appropriate to require that the applicant have operated the daytime-only station for three continuous years prior to filing an application for the FM channel. The application stage would allow for more certainty for applicants concerned about when the Commission might designate the FM station for comparative hearing. In this regard, the Commission noted that the application deadline is less susceptible to delay caused by other interested parties. Lastly, the Commission clarified that for purposes of the "three continuous years" requirement the daytime-only licensee must have operated that station in same community as the FM for the entire three year period. Additionally, the Commission determined that NAB's request that it waive the three continuous years as a daytime-only licensee requirement, for the licensees on foreign clear channels if they experiment with nighttime power, should be denied to further the efficient use of this authorization.

Accordingly, it is ordered, That the Petitions for Reconsideration and/or Clarification filed in this docket by Committee for Community Access, WCSV, Inc., Humes Broadcasting Corporation, DAE Broadcasting Company, the National Black Media Coalition, Sarasota-Charlotte Broadcasting Corporation and Crittenden County Broadcasting Company, Inc., William O. Barry, Hancock Communications, Inc., and the National Association of Broadcasters are granted to the extent indicated herein, and in all other respects, are denied.

It is further ordered, That this action is effective March 31, 1986.

Authority for this action is contained in sections 4(i), 301, 303, 308, 309, and 405 of the Communications Act of 1934, as amended, and § 1.429 of the Commission's rules.

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 255

[Docket No. 60102-6002]

Financial Aid to Fisheries; Fisheries Obligation Guarantee Program

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues this rule revising Fisheries Obligation Guarantee Program regulations in order to comply with Office of Management and Budget (OMB) Circular No. A–70. This rule complies with A–70 by increasing the Program's income and decreasing Program risk.

EFFECTIVE DATE: March 18, 1986.

FOR FURTHER INFORMATION CONTACT: Michael L. Grable, Chief, Financial Services Division, National Marine Fisheries Service, Room 312, Page Building 2, 3300 Whitehaven St., NW., Washington, DC 20235, telephone 202–634–7496.

SUPPLEMENTARY INFORMATION: The Fisheries Obligation Guarantee Program, authorized by Title XI of the Merchant Marine Act 1936, as amended, 46 U.S.C. 1271 *et seq.* (the "Act"), authorizes a Federal guarantee of the debt portion of the cost of constructing, reconstructing, reconditioning, or (under limited circumstances) purchasing fishing vessels and fisheries shoreside facilities.

The Agency is authorized by the Act and current Program regulations, 50 CFR 255, to guarantee 100 percent of financings representing up to 87½ percent of the cost of such vessels or facilities. A–70 requires that guarantees be restricted to no more than 80 percent of such financings in those cases where authorizing legislation does not prohibit guarantees of less than 100 percent. The Commerce Department's General Counsel has determined that Title XI does not require guarantees of 100 percent. Consequently, the amount which this Program will guarantee is reduced by this rule revision from 100 percent to 80 percent of the debt involved. Thus, the amount to be guaranteed by the Federal government will be reduced to 70 percent of the cost of the vessel or facilities. All Program applications received after December 9, 1985, will be subject to the new rule in this respect.

A–70 also requires agencies to recover, from guarantee fees, administrative costs plus projected losses. This rule, consequently, raises the Program's guarantee fee for all new financings from ¾ of 1 percent to 1 percent, the maximum allowable by the Act.

A–70 also prohibits Federal financing programs from subordinating their claims on borrowers' assets to other lenders. This Program currently requires primary collateral positions on financings involving new construction, but allows secondary positions, subordinate to primary lenders, where reconstruction or reconditioning financing is involved. This rule revision requires primary collateral positions in return for all new Program financings, regardless of the nature of the project (i.e., new construction, reconstruction, reconditioning, etc.).

This rule revision makes four major changes in the Program:

(1) Program guarantees are restricted to 80 percent of the debt involved;

(2) The application-filing and commitment fee is raised to the statutory maximum of ½ of 1 percent (it presently is ⅛ of 1 percent on the first $2,000,000 of a proposed financing and ¼ of 1 percent on all amounts over $2,000,000); and

(3) The guarantee fee is raised to its statutory maximum of 1 percent (it is presently ¾ of 1 percent for normal risks); and

(4) Primary collateral positions are required in return for Program financings of all projects.

Classification

The NOAA Administrator determined that this rule revision is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. It is not major within that context because it does not significantly affect the economy, costs or prices, competition, employment, investment or productivity.

This rule revision is not required to be issued as a proposed rule subject to the notice and comment requirements of the Administrative Procedure Act (APA), 5 U.S.C. 553, because it relates to benefits or contracts. Matters "relating to . . . loans, benefits, or contracts" are excepted from the APA, 5 U.S.C. 553(a)(2). The Regulatory Flexibility Act does not apply to this rule because it is not required to be issued as a proposed rule by the APA or any other act or law.

The rule imposes no new collection of information requirement for the purposes of the Paperwork Reduction Act. It continues existing requirements which have been approved by the Office of Management and Budget under control number 0648–0012.

VOL
51
ISS
52
MR
18
1986
UMI

This action does not require an environmental impact analysis because it is categorically excluded from the requirement to prepare an environmental assessment by NOAA Directive 02-10.

The Agency determined that this rule does not directly affect the coastal zone of any state with an approved coastal zone management program.

The Catalog of Federal Domestic Assistance number is 11.410.

List of Subjects in 50 CFR Part 255

Fisheries, Fishing vessels, Fisheries shoreside facilities, Financing, Business.

Dated: March 13, 1986.

J.W. Angelovic,

Deputy Assistant Administrator for Science and Technology.

For the reasons stated in the preamble, 50 CFR Part 255 is amended as follows:

PART 255—[AMENDED]

1. The authority citation for Part 255 is revised to read as follows:

Authority: 46 U.S.C. 1271–1279.

2. Section 255.6(b) is revised to read as follows:

§ 255.6 Guarantee limits, debt maturities, and interest rates.

* * * * *

(b) *Guarantee limits.* The Program shall guarantee 80 percent of financings representing no more than 87½ percent of the actual cost or depreciated actual cost of construction, reconstruction, reconditioning, or (where eligible) purchase of fishing vessels or fisheries shoreside facilities. On a case-by-case basis for vessels or facilities previously guaranteed under the Program, the Program may guarantee 100 percent of financings representing up to 87½ percent of the cost of the vessels or facilities.

* * * * *

4. Section 255.10(a) is revised to read as follows:

§ 255.10 Collateral.

(a) *Mortgages.* The Programs will require a primary pledge, not subordinate to any other party, of the property being financed by the Program guarantee, unless such a primary pledge is available on substitute collateral of equal or greater value. Secondary pledges will be allowed, at the Program's discretion, on supplementary collateral.

* * * * *

5. In § 255.10, paragraph (c), which duplicates the provisions of § 255.7, is removed and paragraphs (d) and (e) are redesignated (c) and (d), respectively.

6. Section 255.12 is revised to read as follows:

§ 255.12 Fees.

(a) *Filing and commitment fees.* The Program's filing and commitment fee will be ½ of 1 percent of the principal amount of the Program guarantee for which application is made. The fee is due at the time an application is submitted, and no application for guarantee will be accepted unless the full filing and commitment fee accompanies it. The filing fee is 50 percent of the filing and commitment fee, and once an application for a guarantee is accepted, no portion of the filing fee will be returned for any reason. The commitment fee is the remaining 50 percent of the filing and commitment fee, and is returnable only if a refund is requested before the Program issues an Approval in Principle letter or if the application is declined.

(b) *Guarantee fee.* The Agency guarantee fee is 1 percent of the average unpaid principal balance of the debt obligation for which the guarantee is outstanding during each year of the life of the guarantee. The guarantee fee is due in advance based upon the debt obligation's amortization schedule. The first annual guarantee fee is due at closing of the guarantee. Each subsequent annual guarantee fee is due on the anniversary date of the closing of the guarantee. No refund of guarantee fees will be made regardless of the status of the financing or the guarantee during the year to which the guarantee fee relates.

(c) *Refinancing/assumption fee.* The Program's refinancing/assumption fee for financings already guaranteed under the Program (other refinancing applicants will be charged fees under paragraph (a) of this section) is ¼ of 1 percent of the principal amount of the debt obligation to be refinanced or assumed, and is due upon application for a guarantee for refinancing/assumption. The refinancing/assumption fee is nonreturnable regardless of the subsequent disposition of an application. The Chief, Financial Services Division, may however:

(1) Waive the refinancing/assumption fee where the refinancing/assumption is primarily to protect the Program's interest, or

(2) Charge an actual cost fee, where the refinancing/assumption does not substitute a wholly different obligor for the initial obligor.

(d) *Where payable.* Fees should be paid by check made payable, and mailed, to: "NMFS/FSFF", U.S. Department of Commerce, National Oceanic and Atmospheric Administration, P.O. Box 73004, Chicago, Ill. 60673.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 842 3274]

Blue Lustre Home Care Products, Inc., Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require, among other things, an Indianapolis, Ind. manufacturer and marketer of chemical products and equipment for home and car care, to cease making unsubstantiated efficacy claims for "Rinsenvac 5", a carpet cleaning fluid sold to retailers in connection with the sale of rental do-it-yourself carpet cleaning machines.

DATE: Comments will be received until May 19, 1986.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: FTC/B-407, Toby M. Levin, Washington, DC 20580. (202) 376-8648.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

Agreement Containing Consent Order to Cease and Desist

In the Matter of Blue Lustre Home Care Products, Inc., a corporation; File No. 842 3274.

The Federal Trade Commission having initiated an investigation of certain acts and practices of Blue Lustre Home Care Products, Inc., and it now appearing that Blue Lustre Home Care Products, Inc., a corporation, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated,

It is hereby agreed by and between Blue Lustre Home Care Products, Inc., its duly authorized officer, and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Blue Lustre Home Care Products, Inc. is a corporation organized, existing and doing business under and by virtue of the laws of the State of Indiana, with its office and principal place of business located at 7950 Castleway Drive, in the City of Indianapolis, State of Indiana.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusion of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the

VOL 51 ISS 52 MR 18 1986 UMI

circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent: (1) Issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is ordered that respondent Blue Lustre Home Care Products, Inc., a corporation, its successors and assigns, and respondent's officers, representatives, agents and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of any carpet cleaning product in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

A. Misrepresenting, in any manner, directly or by implication, the contents, validity, results, conclusions, or interpretations of any test or study.

B. Representing in any manner, directly or by implication, any performance characteristic, including any comparative performance of any carpet cleaning product, unless at the time of such representation respondent possesses and relies upon a reasonable basis for such representation, consisting of competent and reliable evidence which substantiates such representation; provided, however, that to the extent such evidence consists of any test, experiment, analysis, research, study or other evidence based on the expertise of any professional, such evidence shall be "competent and reliable" only if the test, experiment, analysis, research, study or other evidence is conducted and evaluated in an objective manner by a person qualified to do so, using procedures generally accepted in the profession to yield accurate and reliable results; and provided further, that for the purposes of this paragraph, testing conducted in accordance with the protocol ASTM D 3050–75 of the American Society of Testing and Materials shall not constitute competent and reliable evidence to substantiate any performance representation for any carpet cleaning product.

II

It is further ordered that for three years from the date that the representations are last disseminated, respondent shall maintain and upon request make available to the Federal Trade Commission for inspection and copying:

A. All materials relied upon to substantiate any claim or representation covered by this order; and

B. All test reports, studies, surveys or other materials in its possession or control that contradict, qualify, or call into question such representation or the basis upon which respondent relied for such representation.

III

It is further ordered that respondent shall notify the Commission at least thirty (30) days prior to any proposed change in the corporation such as a dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations under this Order.

IV

It is further ordered that the respondent shall, within sixty (60) days after service of this Order upon it and at such other times as the Commission may require, file with the Commission a written report setting forth in detail the manner and form in which it has complied or intends to comply with this Order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Blue Lustre Home Care Products, Inc. (Blue Lustre).

The proposed consent order has been placed on the public record for sixty (60) days for comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Commission's complaint in this matter charges Blue Lustre with disseminating advertisements containing false, misleading, and unsubstantiated representations concerning Blue Lustre's carpet cleaning product, Rinsenvac 5. The complaint challenges Blue Lustre's claims that Rinsenvac 5 cleans carpets better in cold water than other steam cleaners do in hot water and that it removes several times more dirt from carpets than two competitors' products. These claims are alleged to be false and unsubstantiated and therefore deceptive because: (1) The test used to substantiate the claims was based on a test protocol, American Society for Testing and Materials (ASTM) D 3050–75, that is inappropriate for those purposes; and (2) certain other carpet cleaning products had actually performed better than Rinsenvac 5 in the test. The complaint also alleges that Blue Lustre falsely represented that the test proves Rinsenvac 5 cleans better.

The consent order contains provisions prohibiting Blue Lustre from making future misrepresentations and

unsubstantiated claims about its carpet cleaning products. Part I of the order prohibits Blue Lustre from misrepresenting any study or test, and requires the company to have a reasonable basis, consisting of competent and reliable evidence, for representations of performance characteristics of any carpet cleaning product. The order specifies that ASTM D 3050–75, the test Blue Lustre used to support the claims the Commission challenges, does not constitute competent and reliable evidence to substantiate performance claims for carpet cleaning products.

Part II of the order requires Blue Lustre to maintain and upon request make available to the Commission all materials that it relied upon to substantiate any representation covered by the order, or which calls into question any such representation. Part III of the order requires Blue Lustre to notify the Commission of any proposed change in its corporate structure. Part IV requires Blue Lustre to file a compliance report within sixty (60) days after service of this Order.

The purpose of this analysis is to facilitate public comment on the proposed order and is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,

Secretary.

23 CFR Part 630

[FHWA Docket No. 86–6]

Agreement Provisions Regarding Overruns in Contract Time

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FHWA is requesting comments on proposed revisions to its regulation contained in 23 CFR Part 630 concerning the assessment of liquidated damages on projects where a contractor overruns the contract time. The revised regulations would require each State highway agency (SHA) to keep liquidated damage provisions current so that the amounts recovered through contractor assessments would at a minimum cover the SHA's average daily construction engineering (CE) cost attributable to the contract time overrun. In addition, the FHWA rate table presently in the regulation would be removed, and the provisions for the FHWA recovery of costs would be modified.

DATE: Comments must be received on or before May 2, 1986.

ADDRESS: Submit written comments, preferably in triplicate, to Federal Highway Administration, FHWA Docket No. 86–6, Room 4205, HCC–10, 400 Seventh Street, SW., Washington, D.C. 20590. All comments and suggestions received will be available for examination at the above address between 8:30 a.m. and 3:30 p.m., ET Monday through Friday. Those persons desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Bob Myers, Construction and Maintenance Division, Telephone: (202) 426–0392; or Mr. Hugh T. O'Reilly, Office of Chief Counsel, Telephone: (202) 426–0780. Office hours are from 7:45 a.m. to 4:15 p.m., ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: It is standard operating practice for an SHA to set a time period or limit in which the contractor is to complete the project work. If the contractor overruns this initial time period, and any approved extensions, liquidated damages are to be assessed to recoup the delay-related loss to the SHA.

The current regulation (23 CFR 630.305) prescribes agreement provisions regarding overruns in contract time and provides guidance on the amount of these assessments. However, this guidance has remained unchange since December 1975. At that time, the rate table included in the rule was identical to the table found in the 1972 edition of the American Association of State Highway and Transportation Officials (ASSHTO) *Guide Specifications for Highway Construction.*[1] The figures included in these 1972 tables represented an estimate of the nationwide average CE costs to the SHA. Since that time, CE costs have risen significantly; however, the FHWA rate table has not been updated to take account of the increases. The AASHTO subsequently revised its Guide Specifications in 1979, and increased the rates by an inflationary factor of 1.5. No change was made in the 1984 edition; however, further changes are being considered for future editions.

During audit reviews in several regions of the country, personnel from the Department of Transportation Office of Inspector General (OIG) found that liquidated damage provisions in use by several of the SHAs were not allowing for the full recovery of CE costs due to contractor caused overruns. In several instances, it was found that amounts being assessed were only ⅓ to ½ of the actual incurred CE costs that were attributable to a contract time overrun.

---

[1] The *Guide Specifications for Highway Construction*, 1984, is published by and available for purchase from the American Association of State Highway and Transportation Officials, Suite 225, 444 North Capitol Street, NW., Washington, D.C. 20001.

VOL
51
ISS
52
MR
18
1986
UMI

Many of the provisions were based on either the FHWA or the AASHTO rates.

The FHWA Washington Headquarters subsequently alerted its field offices of the OIG findings and requested that further discussions be held with the SHAs concerning the adequacy of these provisions. In a related informal survey of the State standard specifications, it was found that 16 SHAs still had liquidated damage contract provisions similar to the 1975 FHWA rate table.

The FHWA agrees that the current rate table found in the regulations is outdated and may not allow for full recovery of extra CE costs associated with contract time overruns. While the regulation allows the SHAs to set higher rates based upon CE costs in their States, there has been some reluctance to increase the rates significantly from the FHWA or AASHTO amounts. The FHWA is also aware that a nationwide rate table does not provide adequate guidance to the SHAs concerning liquidated damage assessments for their States. For these reasons, and because it is difficult to update and maintain an ever changing table in a regulatory format, it is being proposed to delete the table from the regulation and, in its place, require each SHA to maintain its own rate schedule(s). It is also proposed to require the rates to be reviewed periodically and updated, as appropriate. The FHWA feels that this is a SHA responsibility and would ultimately provide for better recovery of additional costs attributable to a contract time overrun.

The proposed regulation also addresses the use of liquidated damages to cover anticipated delay-related costs above and beyond those attributed to CE. Such costs to the SHA are those that could be reasonably anticipated if a delay were to occur in project completion, such as costs resulting from winter shutdown, retaining detours for an extended time, or additional demurrage. The amounts would be specified separately in the contract documents to permit a separate accounting of net CE costs to the project for Federal participation purposes.

The portion of the current regulation dealing with the FHWA recovery of the pro rata share of the assessed liquidated damages has been modified slightly in the proposed rule to address cases where assessments include more than CE expense factors. There is also a change concerning how the liquidated damages are credited to the project when the FHWA did not participate in the cost of CE. Whereas the current regulation indicates the amount of liquidated damages is to be credited to the federally participating cost of contract construction before calculating the Federal share, the proposed rule would allow the recovery of the SHA's CE costs first. This revision will correct an inequity in the present regulation.

The proposed regulation would require the SHA's liquidated damage provisions to be approved by the FHWA. By law, all specifications and special provisions have to be approved by the FHWA before use on a Federal-aid project. The only additional "burden" on the SHA will be the periodic review of their CE cost data to determine that the liquidated damage figures are adequate. The FHWA feels this is a SHA responsibility and should be a routine management task.

In addition to the regulatory changes, a definition of incentive/disincentive clauses is added to § 630.302.

The FHWA has determined that this document does not contain a major rule under Executive Order 12291 or a significant regulation under the regulatory policies and procedures of the Department of Transportation. The proposed revisions will improve the current undesirable situation that has developed and should provide for increased awareness by the SHA of the project related CE costs. Since there is no substantive change in the FHWA approach or procedures concerning liquidated damage assessments, it is anticipated that this action will not have a significant economic impact. Accordingly, for the foregoing reasons and under the criteria of the Regulatory Flexibility Act, it is certified that this action, if promulgated, will not have a significant impact on a substantial number of small entities and that the preparation of a full regulatory evaluation is not required.

In consideration of the foregoing, the FHWA proposes to amend Part 630, Subpart C of Chapter I of Title 23, Code of Federal Regulations as set forth below.

(Catalog of Federal Domestic Assistant Program Number 20.205, Highway Research, Planning, and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program)

List of Subjects in 23 CFR Part 630

Government contracts, Grant programs—Transportation, Highways and roads, Project agreement provisions.

Issued on: March 12, 1986.

R.A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

PART 630—PRECONSTRUCTION PROCEDURES

Subpart C—Project Agreements—[Amended]

The Federal Highway Administration (FHWA) proposes to amend Part 630, Subpart C of Chapter I of Title 23, Code of Federal Regulations, as follows:

1. The authority citation for Part 630 continues to read as follows:

Authority: 23 U.S.C. 101(a), 104, 109, 110, 113, 115, 120(f), 121(c), 125, 315, and 320; 23 CFR 1.32; 49 CFR 1.48(b), unless otherwise noted.

2. Section 630.302 is amended by redesignating paragraphs (h), (i), and (j) as (i), (j), and (k), respectively, and by adding a new definition "incentive/disincentive clause" as paragraph (h) as follows:

§ 630.302 Definitions.

* * * * *

(h) The term "incentive/disincentive clause," as used in this subpart, describes a contract provision which reimburses the contractor a certain amount of money for each day the work is completed ahead of schedule and makes a deduction for each day the contractor overruns the completion date. Its use is primarily intended for those projects where traffic inconvenience and delays are to be held to a minimum. The amounts are based upon estimates of such items as traffic safety and motorist delay costs.

* * * * *

3. Section 630.305 is revised to read as follows:

§ 630.305 Agreement provisions regarding overruns in contract time.

(a) Each State highway agency (SHA) will establish specific liquidated damage rates applicable to projects in that State. The rates may be project-specific or may be in the form of a table or schedule developed for a range of project costs or project types. These rates will, as a minimum, be established to cover the average daily construction engineering (CE) costs associated with the type of work encountered on the project. The amounts will be assessed by means of deductions, for each calendar day or workday overrun in contract time, from payments otherwise due to the contractor for performance in accordance with the contract terms.

(b) The rates established will be subject to FHWA approval either on a project-by-project basis, in the case of project-specific rates, or on a periodic basis after initial approval where a rate table or schedule is used. In the latter case, the SHA will periodically review its cost data to ascertain if the rate table/schedule closely approximates the average daily CE costs associated with the type and size of the projects in the State. Where rate schedules or other means are already included in the SHA specifications or standard special provisons, verification by the SHA that the amounts are adequate must be submitted to the FHWA for review and approval. After initial approval by the FHWA of the rates, the SHA will be required to review the rates no less often than every 2 years and provide updated rates, if necessary, for FHWA approval. If updated rates are not warranted, documentation of this fact is to be sent to the FHWA for review and acceptance.

(c) If the FHWA so chooses, additional amounts to cover other anticipated costs of project-related delays or inconveniences to the SHA may be included as liquidated damages in each contract. Costs resulting from winter shutdowns, retaining detours for an extended time, additional demurrage, or similar costs may be included. However, these amounts are to be shown separately from the CE amounts.

(d) In addition to the liquidated damage provisions, the SHA may also include incentive/disincentive clauses in the contract to stimulate work completion and to compensate for increased or decreased road user costs resulting from an increased or decreased contract time period. The incentive/disincentive amounts shall be shown separately from the liquidated damage amounts.

(e) When there has been an overrun in contract time, the following principles apply to determine the reduction in the amount of SHA cost of a project that is eligible for Federal-aid reimbursement:

(1) Where CE costs are claimed as a participating item based upon actual expenses incurred or where CE costs are not claimed as a participating item, and where the liquidated damage rates cover only CE expenses, the total CE costs for the project shall be reduced by the assessed liquidated damage amounts prior to figuring any Federal pro rata share payable. If the amount of liquidated damages assessed is more than the actual CE totals for the project, a proportional share of the excess is to be deducted from the federally participating contract construction cost before determining the final Federal share.

(2) Where the SHA is being reimbursed for CE costs on the basis of an approved percentage of the participating construction cost, the total contract construction amount that would be eligible for Federal participation shall be reduced by a proportion of the total liquidated damage amounts assessed on the project.

(3) Where liquidated damages inlcude extra anticipated non-CE expenses to the SHA due to contractor caused delays, the amount that is assessed is to be used to pay for the actual expenses incurred by the SHA, and if a Federal participating item(s), to reduce the Federal share payable for that item(s). If the amount assessed is more than the actual expenses incurred, a proportional share of the excess is to be credited to the federally participating contract construction cost of the project before the Federal share is figured.

(4) The proportional shares are to be figured as the ratio of final contract construction costs eligible for Federal participation to the final total contract construction costs of the project.

(f) Where incentive/disincentive clauses are used in the contract, a proportion of the increased project costs due to any incentive payments to the contractor are to be added to the federally participating contract construction cost before calculating the Federal share. Where the disincentive portion is applicable, a proportional share of the amount assessed is to be credited to the participating contract construction cost before Federal share calculation. Proportions are to be calculated in the same manner as shown in paragraph (e)(4) of this section.

BILLING CODE 4910-22-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 915

Reopening and Extension of Public Comment Period on a Proposed Amendment to the Iowa Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Reopening and extension of public comment period.

SUMMARY: By letters dated July 25 and 26, 1985, Iowa submitted proposed program amendments concerning certification and training of blasters, a penalty schedule for violation assessment, and modification of permit requirements and inspections. OSMRE published a notice in the **Federal Register** on October 25, 1985, announcing receipt of the amendment and inviting public comment on the adequacy of the proposed amendment (50 FR 43411).

Following a review of the Iowa amendments, OSMRE notified the State on January 13, 1986, of its concerns about the amendments. On February 13, 1986, the State responded by submitting a letter clarifying the amendments. On March 4, 1986, the State submitted further clarification.

Accordingly, OSMRE is reopening and extending the comment period on Iowa's July 25 and 26, 1985 amendments as modified on February 13, and March 4, 1986. This action is being taken to provide the public an opportunity to reconsider the adequacy of the proposed amendment.

DATES: Written comments, data or other relevant information relating to this rulemaking not received on or before 4:30 p.m., April 2, 1986, will not necessarily be considered in the Director's decision.

ADDRESSES: Written comments, should be mailed or hand delivered to Mr. William J. Kovacic, Director, Kansas City Field Office, Office of Surface Mining Reclamation and Enforcement, Professional Building, Room 502, 1103 Grand Avenue, Kansas City, Missouri 64106; Telephone: (816) 374-5527.

Copies of the Iowa program, the proposed amendment and modification to the amendment, and all written comments received in response to this notice will be available for public review at the OSMRE Field Office listed above and at the OSMRE Headquarters Office and the Office of State regulatory authority listed below, during normal business hours, Monday through Friday, excluding holidays. Each requestor may receive, free of charge, one single copy of the proposed amendment by the contacting OSMRE's Kansas City Field Office.

City, Missouri 64106; Telephone: (816) 374–5527.

SUPPLEMENTARY INFORMATION:

I. Background

The Iowa program was conditionally approved by the Secretary of the Interior on January 21, 1981 (46 FR 5885). The approval was made effective April 10, 1981. Information pertinent to the general background, revisions, modifications, and amendments to the Iowa program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Iowa's program can be found in the January 21, 1981 **Federal Register**.

II. Proposed Amendment

By letters dated July 25, and 26, 1985, Iowa submitted proposed program amendments consisting of:

1. Amendments to IAC Chapter 4 rules for Iowa's Coal Regulatory Program requiring payment of all reclamation fees from previous and existing operations as required by section 402 of SMCRA; modifying the provision for a presiding officer of contested case hearings; correcting the requirements for local filing of permit applications—permit applications will be availabe for public inspection in the county recorder's office; clarifying the provision for incidental boundary changes allowing a total of 20 acres of incidental boundary changes over the life of the permit; modifying requirements for frequency and type of inspections including inactive operations and aerial inspections and establishing the standards for extension of abatement periods for notices of violations beyond 90 days.

2. An amendment establishing IAC Chapter 26 "Blaster Training, Examination and Certification of Coal Mines." This chapter establishes the requirements and the procedures applicable to the development of regulatory programs for training, examination, and certification of persons engaging in or directly responsible for the use of explosives in surface or underground coal mining operations.

3. The Iowa submission included a final rule IR 780–4.61(83) "Penalty Schedule". This was approved by the Office of Surface Mining on May 24, 1985 (50 FR 21440]. The changes made to this rule are only minor editorial ones. Therefore, it was not reproposed in the **Federal Register**, but was placed in the Administrative Record.

OSMRE announced receipt of the amendment and initiated a public comment period on October 25, 1985 (50 FR 43411). The comment period closed on November 25, 1985.

During review of the amendments, OSMRE identified several concerns. The concerns involved how aerial inspections were to be counted, the definition of inactive surface coal mining and reclamation operations, and some of the provisions of the blaster training program. OSMRE notified Ohio about these concerns by letter dated January 13, 1986. On February 13, 1986, the State responded providing clarification and explanation of these concerns by letter. On March 4, 1986, the State sent another letter of clarification to OSMRE.

The full text of the proposed amendment and of the subsequent material is available for review at the locations listed above under "**ADDRESSES**". OSMRE is now seeking public comment on the adequacy of Iowa's July 25 and 26, 1985 amendments in light of the February 13, 1986 and March 4, 1986 modifications. If the Director determines that the proposed amendment is no less stringent than SMCRA and no less effective than the Federal regulations, the amendment will be approved and become part of the approved permanent program.

BILLING CODE 4310-05-M

POSTAL SERVICE

39 CFR Part 111

Post Office Box Fee Group Application

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: This proposd rule change is designed to simplify post office box fee groups in noncity delivery (NCD) offices. The NCD offices have experienced difficulty in administering two or three different fee groups for the same post office box service This proposed rule change will provide that all NCD offices charge only the Group 2 fees. These fees average 76 percent less than the regular Group 1 fees charged at city delivery offices. No changes are proposed to the assignment of Group 3 fees at Community Post Office (CPOs). Certain other minor editorial changes are also proposed.

DATE: Comments must be received on or before April 17, 1986.

ADDRESS: Written comments should be mailed or delivered to the Director, Office of Mail Classification, Rates & Classification Department, Attn: Special Services Division, Room 8430, 475 L'Enfant Plaza, Washington, DC 20260-5371. Copies of all written comments will be available for photocopying between 9 a.m. and 4 p.m. Monday through Friday in Room 8430 at the above address.

FOR FURTHER INFORMATION CONTACT: F.E. Gardner, (202) 268–5178.

SUPPLEMENTARY INFORMATION: Although exempt from the notice and comment requirements of the Administrative Procedure Act [5 U.S.C. of 553(b), (c)] regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comment on the following proposed amendments of the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority citation for 39 CFR Part 111 continues to read as follows:

Authority: 5 U.S.C 552(a); 39 U.S.C. 101, 401, 404, 407, 408, 3001–3011, 3201–3219, 3403–3405, 3621; 42 U.S.C. 1973cc–13, 1973cc–14.

PART 951—POST OFFICE BOX (P.O. BOX) SERVICE

2. In 951.2, revise .221, .222, .23 and .24 to read as follows:

* * * * *

951.2 Fees.

* * * * *

951.22 Fee Groups.

.221 General Provisions

Customers at all facilities under the administration of the same post office are subject to the same post office box fees applicable at the main office. This includes any post office which has been discontinued and reestablished as a station or branch of another post office.

.222 Fee Group Application

a. Group 1 Fees

(1) Customers at all facilities of city delivery post offices who are eligible for any kind of delivery by postal carrier will be charged Group 1 fees. Customers may use one box at Group 2 fees if they

are ineligible for any kind of delivery by postal carrier.

(2) All customers who receive mail at a mail processing facility which is not under the administration of a post office must pay Group 1 fees.

b. Group 2 Fees

Customers at noncity delivery (NCD) offices will be charged Group 2 fees.

c. Group 3 Fees

Customers at Community Post Offices (CPOs) will be charged the flat Group 3 fee.

.23 Changes in Fees

Revised post office box fees may be required by a general fee change, by a change in carrier services, or by a change in the status of a postal facility. Revised post office box fees are effective on the date of the action which caused the change, unless another date is specified in an official announcement. If a post office box fee is increased, no customer will be required to pay at the new rate until the end of the period, (annual or semiannual), for which they have already paid.

.24 General Delivery

Customers who are eligible to use a post office box at Group 2 fees, but who, in fact, do not use a box, may receive no more than one separation is general delivery without time limit. Customers who are not eligible to use a post office box at Group 2 fees may not receive general delivery for periods longer than 30 days except as provided in 953.

* * * * *

PART 952—CALLER SERVICES

3. In 952, revise .124 and .222b(2) to read as follows:

952.124 Caller Service at Group 2 Noncity Delivery Offices Is Available Only as Provided by 952.222b(2).

* * * * * * *

952.222 b(2) Caller service will be provided for Group 2 non-city delivery offices only if a customer desires delivery through a post office box and either no post office box or no post office box of appropriate size is available. In that event, a single box number will be assigned and caller service proivided. The caller fee will be the same amount as the box fee for the largest box at the facility. Regular caller service fees are charged for any additional separations requested.

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published if the proposal is adopted.

W. Allen Sanders,

Associate General Counsel, Office of General Law and Administration.

SUPPLEMENTARY INFORMATION:

I. Authority

Section 5(a)(2) of TSCA (15 U.S.C. 2604(a)(2)) authorizes EPA to determine that a use of a chemical substance is a "significant new use." EPA must make this determination by rule, after considering all relevant factors, including those listed in section 5(a)(2). Once EPA determines a use to be a significant new use, persons must, under section 5(a)(1)(B) of TSCA, submit a notice to EPA at least 90 days before they manufacture, import, or process the substance for that use. Such a notice is subject generally to the same requirements and procedures as a PMN submitted under section 5(a)(1)(A) of TSCA which are interpreted at 40 CFR Part 720, published in the **Federal Register** of May 13, 1983 (48 FR 21722). In particular, these include the information submission requirements of section 5(b) and (d)(1) of TSCA. In addition, such notices are subject to the regulatory authorities of section 5 (e) and (f) of TSCA. If EPA does not take regulatory action under section 5, 6, or 7 of TSCA to control activities on which it has received a SNUR notice, section 5(g) of TSCA requires the Agency to explain in the **Federal Register** its reasons for not taking action.

Persons who intend to export a substance identified in a proposed or final SNUR are subject to the export notification provisions of TSCA section 12(b). The regulations that interpret section 12(b) appear at 40 CFR Part 707. Persons who intend to import a substance identified in a final SNUR are subject to the TSCA section 13 import certification requirements, which are codified at 19 CFR 12.118 through 12.127 and 127.28. The EPA policy in support of the import certification requirements appears at 40 CFR Part 707.

II. Applicability of General Provisions

EPA promulgated general provisions applicable to SNURs under 40 CFR Part 721, Subpart A published in the **Federal Register** of September 5, 1984 (49 FR 35011). Interested persons should refer to that document for a detailed discussion of the general provisions. EPA is proposing that these general provisions apply to this SNUR without change except as discussed in this preamble and set forth in § 721.135a.

III. Summary of This Proposed Rule

The chemical substances which are the subject of this proposed rule are identified generally as substituted

VOL 51
ISS 52
MR 18
1986
UMI

benzenes, halogenated. They were the subject of PMNs P–84–660 and P–84–704. EPA is proposing to designate the following as significant new uses of these substances:

1. Use other than as allowed under the terms of the section 5(e) Consent Order issued for the two substances.

2. Manufacturing or importing an aggregate volume of P–84–660 for the uses allowed in the section 5(e) Consent Order greater than that permitted the PMN submitter under the terms of the order.

3. Any manner or method of disposal associated with any use of the substances other than removal from waste streams by carbon bed filtration where the substances are either incinerated with the carbon in a waste incinerator, destroyed during the regeneration of the carbon, or landfilled along with the carbon in a facility permitted under the Resource Conservation and Recovery Act.

4. Any manner or method of manufacturing, importing, or processing associated with any use of the substances without establishing a program whereby:

a. Any person who may be dermally exposed to the substances must wear:

i. Gloves determined to be impervious to the substances.

ii. Clothing which covers any other exposed areas of the arms, legs, and torso.

iii. Chemical safety goggles or equivalent eye protection.

b. Any person who may be exposed to the substances as a vapor must wear a National Institute for Occupational Safety and Health (NIOSH) approved air supplied, positive pressure respirator, excluding single-use or disposable and air purifying respirators in NIOSH approval category 19C and in accordance with 30 CFR 11.110 Subpart J.

c. Potentially exposed individuals are informed of the possible hazards associated with P–84–660 and P–84–704. Such notification are made as part of a training program at which attendance is recorded and by means of a written statement. Both methods of notification must include the statement as provided under proposed § 721.135a(a)(2)(iv)(c).

d. Labels are affixed to each container of the substances distributed in commerce in accordance with proposed § 721.135a(a)(2)(iv)(D).

e. A material safety data sheet (MSDS) is provided when the substances are distributed in commerce. The MSDS must include, at a minimum, the language specified in proposed § 721.135a(a)(2)(iv)(C), and must specify the requirement for protective equipment under proposed § 721.135a(a)(2)(iv) (A) and (B).

IV. Background

On April 26, 1984, EPA received a PMN which the Agency designated P–84–660. EPA announced receipt of the PMN is the **Federal Register** of May 4, 1985 (49 FR 19114). On May 14, 1984, EPA received a PMN which the Agency designated P–84–704. EPA announced receipt of the PMN in the **Federal Register** of May 25, 1984 (49 FR 22130).

The notice submitter claimed the following as confidential business information (CBI): Company identity, the specific chemical identities, the uses, and the estimated production volumes. Under section 14(a)(4) of TSCA, the Agency may disclose CBI relevant in any proceeding. "[D]isclosure in such a proceeding shall be made in such manner as to preserve confidentiality to the extent practicable without impairing the proceeding." EPA is not convinced that this rulemaking will be so impaired by these claims as to justify disclosure of CBI. Therefore, EPA has decided not to disclose any of the CBI at this time. The Agency specifically requests comment on this approach for the SNUR rulemaking. For purposes of clarity, these substances will be referred to by their PMN numbers.

Based upon analogy to compounds with high lipid solubility and low molecular weight, the Agency has determined that the two substances may be readily absorbed by the skin, lungs, and intestines. Based on animal assays on a structurally analogous chemical, both PMN substances may cause chronic liver and kidney effects. In addition, two other analogues of P–84–660 may cause a variety of nervous system effects as well as reproductive failure and teratogenic effects. Therefore, the Agency has determined that P–84–660 may also cause these effects. Because divulging the specific analogues utilized by the Agency in developing its analysis might compromise the confidential identities of P–84–660 and P–84–704, the Agency has elected not to disclose the specific chemical identity of any analogue.

Based upon the available data, the Agency believes P–84–660 may cause liver, kidney, neurotoxic, reproductive, and teratogenic effects. The Agency also believes that P–84–704 may cause liver and kidney effects. During the review of the PMNs, the Agency concluded that the uncontrolled manufacture, import, processing, distribution in commerce, use, and disposal of the substances may present an unreasonable risk of injury to human health. Therefore, EPA regulated the substances under section 5(e) of TSCA pending the development of information sufficient to make a reasoned evaluation of the health effects.

EPA concluded that the use of appropriate protective equipment will significantly reduce exposure and potential risks to persons. The Agency negotiated a section 5(e) Consent Order with the notice submitter which requires that the submitter manufacture, import, and process the substances solely for the uses described in the PMNs. The aggregate volume from both manufacturing and importing P–84–660 is limited to a specified volume. During manufacturing and processing, or during response to emergencies or spills, the submitter is required to assure that persons who may be dermally exposed to these substances wear: (a) Gloves which have been determined to be impervious to the substance, (b) clothing which covers any other exposed areas of the arms, legs, and torso, and (c) chemical safety goggles or equivalent eye protection. It also requires that persons who may be exposed to the substances as vapors wear NIOSH-approved category 19C air supplied, positive pressure respirators, excluding single-use or disposable and air purifying respirators in accordance with 30 CFR 11.110. Subpart J. In addition, the submitter is required to label products containing P–84–660 and provide a MSDS to accompany the products when distributed in commerce, and notify persons potentially exposed to both substances through the use of specified warning statements. The Order also prohibits distribution of P–84–704 to others beside the PMN submitter. These requirements will remain in place until data are available to more accurately determine the risks associated with the substances. The Order became effective November 15, 1984.

By issuing a section 5(e) consent order which allows controlled commercial production and distribution of the substances, EPA adopted a regulatory approach which is appreciably less burdensome than an order prohibiting manufacture of the substances until additional data are submitted. At the same time, the section 5(e) consent order protects human health by requiring precautionary controls pending the development of the data needed for a reasoned evaluation of the risks associated with the substances.

Section 5(e) orders apply only to the notice submitter. When the notice submitter commences commercial manufacture of the substances and submits a Notice of Commencement of Manufacture or Import to EPA, the Agency will add the substances to the TSCA Chemical Substance Inventory. When a substance is listed on the Inventory, other persons may manufacture, import, or process the substance without controls. Therefore, EPA is proposing to designate the uses set forth in paragraph (a)(2) of the proposed § 721.135a as significant new uses so that the Agency can review these uses before they occur.

Through a SNUR, the Agency would ensure that all manufacturers, importers, and processors are subject to similar reporting requirements. In addition, a SNUR would afford EPA the opportunity to review exposure and toxicity information on the substances before a significant new use occurs and, if necessary, take action to ensure that persons will not be exposed to levels of P–84–660 and P–84–704 that are potentially hazardous.

V. Determination of Proposed Significant New Uses

To determine what would constitute significant new uses of these chemical substances, EPA considered relevant information about the toxicity of the substances, potential exposures associated with possible uses (such as uses other than those allowed under the section 5(e) consent order), and the four factors listed in section 5(a)(2) of TSCA. In particular, EPA considered the extent to which potential uses might change the magnitude and duration of exposure of humans to P–84–660 and P–84–704. Based on these considerations, EPA proposes to define the significant new uses of P–84–660 and P–84–704 as set forth in paragraph (a)(2) of the proposed § 721.135a.

EPA has already determined in the section 5(e) Order that unrestricted manufacture, import, processing, distribution in commerce, use, and disposal of the substances may present an unreasonable risk of injury to human health. While such a finding is not necessary to promulgate a SNUR, it strongly supports a determination that the new uses of the substances would be significant.

VI. Recordkeeping

To ensure compliance with this proposed rule and to assist enforcement efforts, EPA is proposing, under its authority in sections 5 and 8(a) of TSCA, that in addition to the requirements in § 721.17, persons who manufacture, import, or process P–84–660 and P–84–704 maintain the following records for 5 years from their creation:

1. Any determination that gloves are impervious to P–84–660 or P–84–704.

2. Names of persons who have attended safety meetings in accordance with proposed § 721.135a(a)(2)(iv)(C), dates of such meetings, and copies of any written information provided in accordance with proposed § 721.135a(a)(2)(iv)(C).

3. Dates of shipments of containers which have been labeled in accordance with proposed § 721.135a(a)(2)(iv)(D), copies of the labels, and the identities of persons to whom they have been shipped.

4. Any names used for P–84–660 and P–84–704 and the accompanying dates of use.

5. Documentation of quantities of P–84–660 which are manufactured and imported, with the accompanying dates.

These recordkeeping requirements would apply to small manufacturers, importers, and processors as well because the small business exemption of section 8 of TCSA is not applicable when the chemical substances which are the subject of the rule also are the subject of a section 5(e) order.

The Agency considered omitting these specific recordkeeping requirements, but believes compliance monitoring for this proposed SNUR would be made more difficult without them. The basis for the Agency's recordkeeping requirements has been set forth in the preambles to previously proposed SNURs. Persons interested in a complete discussion of this issue should read the proposed SNUR for P–83–370 published in the **Federal Register** of January 13, 1984 (49 FR 1753).

VII. Exemptions to Reporting Requirements

EPA has codified general exemption provisions covering SNUR reporting under § 721.19. On a case-by-case basis, the Agency may modify these provisions. However, in this case, the Agency is proposing that § 721.19 apply in its entirety.

EPA issued its final premanufacture notification rules under 40 CFR Part 720, published in the **Federal Register** of May 13, 1983 (48 FR 21722), including § 720.36 which contained detailed rules for the section 5(h)(3) exemption for chemical substances manufactured or imported in small quantities solely for research and development. On September 13, 1983 (48 FR 41132), EPA stayed the effectiveness of § 720.36, among other provisions of the PMN rule, pending further rulemaking to revise the provisions. Revisions of § 720.36 and other provisions were proposed on December 27, 1984 (49 FR 50201). Because § 720.36 was not in effect when EPA codified § 721.19, the Agency relied on the general definition of "small quantities solely for research and development" in § 720.3(cc) and section 5(h)(3) of TSCA to determine whether activities qualify under this exemption. Upon promulgation of a revised § 720.36, EPA intends to amend § 721.19 to adopt the provisions of the revised § 720.36.

Section 721.19(g) of the general SNUR provisions exempts persons from SNUR reporting when they manufacture (the term manufacture includes import) or process the substances solely for export and label the substances in accordance with section 12(a)(1)(B) of TSCA. While EPA is concerned about worker exposure during manufacture and processing of the substances, section 12(a) of TSCA prohibits EPA from requiring reporting of such manufacture or processing. However, such persons would be required to notify EPA of such export under section 12(b) of TSCA (see § 721.7 of the general SNUR provisions). Such notification will allow EPA to monitor manufacture and processing activities which are not subject to significant new use reporting.

The term "manufacture solely for export" is defined in the PMN rule (40 CFR 720.3(s)); an amendment clarifying this definition was proposed on December 27, 1984 (49 FR 50208). The term "process solely for export" is defined in § 721.3 of the general SNUR provisions in a similar fashion. Thus, persons would be exempt from reporting under this SNUR if they manufacture or process the substances solely for export from the United States, under the following restrictions: (1) There is no use of the substances in the United States, except in small quantities solely for research and development; (2) processing is restricted to sites under the control of the manufacturer or processor, respectively; and (3) distribution in commerce is limited to purposes of export. If a person manufactured or processed the substances both for export and for use in the United States, such activity would not be "solely for export" because the manufacture and processing would be for use in the United States regardless of whether any quantity of the substances were later exported.

VIII. Applicability of Proposal to Uses Occurring Before Promulgation of Final Rule

To establish a significant new use rule the Agency must, among other things, determine that the use is not ongoing. In this case, the chemical substances in question have just undergone premanufacture review. When the notice submitter begins manufacture of the substances, the submitter will send

BEST COPY AVAILABLE

VOL
51
ISS
52
MR
18
1986
UMI

EPA a Notice of Commencement of Manufacture, and the substances will be added to the Inventory. The notice submitter is prohibited by the section 5(e) order from undertaking the activities which the Agency is proposing be designated as significant new uses. Therefore, at this time, the Agency has concluded that these uses are not ongoing. However, EPA recognizes that when the chemical substances subject to this SNUR have been added to the Inventory, they may be manufactured, imported, or processed by other persons for a significant new use as defined in this proposal before promulgation of the rule.

If, after publication of this proposal, someone were to undertake the designated significant new uses, they could argue that the uses are not "new" at the time the rule is promulgated, and therefore not significant new uses. EPA finds that the intent of section 5(a)(1)(B) is best served by determining whether a use is a significant new use as of the proposal date of the SNUR. If uses begun during the proposal period were not considered to be significant new uses, it would be almost impossible for the Agency to establish SNUR notice requirements, since any person could defeat the SNUR by initiating the proposed significant new uses before the rule became final. This is contrary to the general intent of section 5(a)(1)(B).

Thus, if the substances are manufactured, imported, or processed between proposal and promulgation for a proposed significant new use, the Agency will consider such use to be a significant new use if it is retained in the final rule. EPA recognizes that this interpretation may disrupt commercial activities of persons who begin manufacture, import, or processing of the substances for a significant new use during the proposal period. However, this proposal constitutes notice of that potential disruption; persons who commence a proposed significant new use do so at their own risk.

The Agency, not wishing to unnecessarily disrupt the commercial activities of persons who engage in a proposed signficant new use prior to promulgation of a final SNUR, is considering amending Subpart A of 40 CFR Part 721 to allow for advance SNUR compliance (i.e., compliance prior to the date of promulgation). EPA will solicit public comment on an advance compliance exemption when such an exemption is proposed in the **Federal Register.**

IX. Determining When Substances are the Subject of This Proposed Rule

Because the identities of P-84-660 and P-84-704 are confidential, any person who proposes to manufacture or import P-84-660 and P-84-704 is unlikely to know that the substances are on the Inventory and, therefore, is likely to submit a *bona fide* request under either 40 CFR 710.7(e) or 720.25(b) to determine whether the substances are on the Inventory. If EPA determines that the person has a *bona fide* intent to manufacture or import the substances and that the substances the person proposes to maufacture or import are P-84-660 and P-84-704, EPA will inform the person that the substances are subject to this proposal. This will give the person notice of this proposal.

X. Determining When Certain Uses Are Subject to This Proposed Rule

EPA has codified procedures at § 721.6 under which any person who intends to manufacture, import, or process a chemical substance within the generic chemical name identified in this proposed rule would be able to ask EPA whether or not their chemical substance is subject to this SNUR. The process for doing so is very similar to the process required for manufacturers and importers to show a *bona fide* intent to manufacture or import under 40 CFR 710.7(q)(2) of the Inventory Reporting Rules and 40 CFR 720.25(b)(2) of the Premanufacture Notification Rules as published in the **Federal Register** of May 13, 1983 (48 FR 21722). The Agency does not intend to modify these procedures for this proposal.

EPA is proposing two confidential significant new uses in this SNUR: use of both substances other than as allowed in the section 5(e) Order, and production of more than a specified amount of P-84-660. The original notice submitter claimed this information as confidential business information. The Agency is proposing that the allowed uses and the production volume remain confidential in the final rule. For the same reasons that EPA believes it is appropriate to keep specific chemical identity confidential, EPA believes it is appropriate to keep this information confidential to protect the interests of the original notice submitter. EPA specifically requests comments on this issue.

As to determining uses other than those allowed in the section 5(e) Order, EPA would allow the person to show a *bona fide* intent to manufacture or import under § 721.6 and to describe the intended uses. If EPA determined that the person had a *bona fide* intent to manufacture or import one of the substances, EPA would inform the person whether the intented use or uses would be significant new uses under paragraph (a)(2)(i).

EPA is also proposing to reveal the specific production volume allowed in paragraph (a)(2)(ii) of proposed § 721.135a only to a manufacturer or importer who demonstrates a *bona fide* intent to manufacture or import P-84-660 under the procedure in § 721.6 of the general SNUR provisions and who describes an intended use or uses that are identical to uses allowed in the section 5(e) Order..Thus, if the manufacturer or importer is told that P-84-660 is on the Inventory and subject to this SNUR and that the proposed use is one allowed in the section 5(e) Order for P-84-660, the person will also be told the specific volume allowed in paragraph (a)(2)(ii). This will enable the manufacturer or importer to determine whether a SNUR notice will be necessary.

As an alternative to this approach, EPA considered requiring a manufacturer or importer to show not only a *bona fide* intent to manufacture or import the substances and to describe the specific uses, but also to identify the specific production volume the person intends for P-84-660. EPA would then tell the manufacturer or importer whether the volume intended would be significant new use under paragraph (a)(2)(ii). EPA has not adopted this approach for the proposal because the Agency believes it would involve a greater burden on manufacturers and importers potentially subject to the SNUR and would provide little additional confidentiality protection.

XI. Test Data and Other Information

EPA recognizes that under TSCA section 5, persons are not required to develop any particular test data before submitting a notice. Rather, persons are required only to submit test data in their possession or control and to describe any other data known to or reasonably ascertainable by them. However, in view of the potential health risks that may be posed by a significant new use of these substances, EPA believes, as a result of its review of the original PMNs for the chemical substances which are the subjects of this SNUR, that a more reasoned evaluation of the risks posed by these substances would require additional data on potential liver, kidney, neurotoxic, reproductive, and teratogenic effects. These data might be generated by a 90-day subchronic oral study on P-84-660. This study may not be the only means of addressing the

potential risks. Since P-84-704 is structurally similar to P-84-660, it would not be necessary to test it if P-84-660 were tested.

EPA encourages potential SNUR notice submitters to test the substances for these concerns. SNUR notices submitted for significant new uses without such test data will increase the likelihood that EPA will take action under section 5(e). Because the original PMN submitter is required to perform testing when the cumulative production volume reaches a specified level, it would be advisable that potential manufacturers, importers, or processors check with the Agency before undertaking any testing. As part of optional prenotice consultation, EPA will discuss the test data it believes necessary to evaluate a significant new use of the substances.

Test data should be developed according to TSCA good laboratory practices regulations at 40 CFR Part 792. Failure to do so may lead the Agency to find such data to be insufficient to reasonably evaluate the health effects of the substances. EPA encourages persons to consult with the Agency before selecting a protocol for testing the substances. EPA urges SNUR notice submitters to provide detailed information on human exposure that will result from the significant new use. In addition, EPA urges persons to submit information on potential benefits of the substances and information on risks posed by the substances compared to risks posed by substitutes.

XII. Economic Analysis

The Agency has evaluated the potential costs of establishing significant new use reporting requirements for these substances. This evaluation is summarized below. The Agency's economic analysis is available in the public file.

The only direct costs that will definitely occur as a result of the promulgation of this SNUR will be EPA's costs of issuing and enforcing the SNUR. It is estimated that the Agency costs of issuing a SNUR are $10,500-$17,600. While enforcement costs may also be incurred, the Agency cannot quantify them at this time.

Subsequent to promulgating the SNUR, the Agency believes that there would be three possible outcomes for companies that would manufacture, import, process, distribute in commerce, or dispose of the substances. The companies could: (1) Manufacture, import, process, distribute in commerce, or dispose of the substances within the limits of this SNUR; (2) manufacture, import, process, distribute in commerce, use, or dispose of the substances under circumstances requiring the submission of a SNUR notice; or, (3) not manufacture, import, process, distribute in commerce, use, or dispose of the substances. The costs of these outcomes are summarized below.

If a company decides to manufacture, import, process, distribute in commerce, use, or dispose of P-84-660 and P-84-704 within the limits of the SNUR and meets the limited production volume requirements, it will not incur the cost of submitting a SNUR notice. The only cost to the company would be the cost of specific protective equipment, recordkeeping, labeling, and imperviousness determinations. Protective equipment and recordkeeping costs, due to their recurring nature, are calculated as present value cost over an estimated 10-year life of the substances.

The PMN submitter claimed the actual exposure data as CBI. For analytical purposes, EPA has assumed that 10 workers will be exposed to P-84-660 and P-84-704 for 8 hours a day, 250 days per year. Each worker will be required to wear gloves (which are determined to be impervious to the chemcial substances), other protective clothing, chemical safety goggles, and an air-supplied positive pressure respirator, excluding single-use, disposable, and air purifying respirators. Assuming a 10 percent discount rate and a 10-year economic life for the two substances, the present value of outfitting each worker is estimated to cost $5,270 per worker; for 10 workers, the cost would be $52,700. On an annualized basis, these costs may exceed $780 and $7,800 for 1 worker and 10 workers, respectively. Permeation tests to determine if the gloves are impervious to the substances have been estimated to cost $500 per substance per test per substrate (annualized cost of $75). These tests may cost up to $7,000 to $10,000 if different substrates (i.e., different compositions of gloves) are tested (annualized cost of $1,480). To the extent a company is able to extrapolate from previous tests, draw from knowledge of similar types of chemicals, or rely on the glove manufacturer's specification as the basis for determining imperviousness, these costs may be less.

Workers who may be exposed to the two substances as vapors, in addition to the dermal protective equipment, are required to wear NIOSH-approved, category 19c air-supplied, positive pressure respirators. The total present value of supplying the respirator, hose, compressor, pressure reducing equipment, and other miscellaneous equipment has been estimated to cost $2,765 per worker (annualized cost of $410). The present value cost of the required respirators for 10 workers would be $20,720 (annualized cost of $3,065). EPA assumes that the other required protective clothing is standard equipment for every worker regardless of whether or not they work with the substances.

A company would also be required to inform the workers of the hazards associated with the chemical substances with an MSDS, with appropriate warning labels, and as part of a training program in safety meetings. In addition, the company would be required to maintain certain records. The initial cost of the labeling requirements is estimated to be between $135 and $500, which is the cost of developing the label. Other labeling costs are expected to be minimal. The annualized cost of labeling is $75. The present value of the cost of complying with the recordkeeping requirements over a 10-year period is estimated to be $1,520 (the annualized cost is $225).

If the intended production volume by a company exceeds the specific production limitations, or if the company decides to commence a significant new use, it will incur the cost of filing a SNUR notice ($1,400 to $8,000). The submitter may also experience up to a 3.2 percent reduction in profits due to delays in manufacturing, importing, or processing, and the cost of regulatory follow-up, if any.

If the company elects to test for central nervous system, liver, kidney, reproductive, and teratogenic effects, the estimated cost would range between an estimated $95,000 and $140,000, plus the cost of delay (probably a delay in profits of 2.5 to 3.0 years), and the cost of any regulatory follow-up.

Under this outcome, EPA will incur only enforcement costs once the SNUR has been issued.

If a company elects not to manufacture, import, process, distribute in commerce, use, or dispose of P-84-660 and P-84-704 within the limits of the SNUR, it will incur the cost of filing a SNUR notice. If a company decides to test, it will incur: (1) The cost of testing and possibly up to 3.2 percent reduction in profits due to delays in manufacturing or processing; and (2) the cost of any regulatory follow-up.

EPA costs following promulgation of the SNUR would include the cost of reviewing SNUR notices, estimated at $7,100 per notice, and the costs of modifying the terms of the SNUR if the information provided indicates that EPA's concerns would be adequately addressed by use of a different type of

VOL 51
ISS 52
MR 18
1986
UMI

exposure control. This cost is estimated at $8,700.

Some companies could find the cost of controlling exposure and potential testing costs too expensive to justify production, processing, and/or use. Therefore, there would be no direct costs as a result of the SNUR. The companies and society could lose benefits associated with the manufacture, processing, and use of the substances. However, the fact that the original PMN submitter intends to manufacture the substances under the conditions of the section 5(e) consent order indicates that the intended uses of the two substances will still return an acceptable profit under terms of the SNUR.

The Agency has not quantified the benefits of the proposed SNUR. In general, however, benefits will accrue if the proposed action leads to the identification and control of unreasonable risks before significant health effects occur. The proposal and promulgation of the SNUR provide benefits to society by minimizing or eliminating potential health and environmental effects for these chemical substances.

XIII. Confidential Business Information

Any person who submits comments which the person claims as CBI must mark the comments as "confidential," "trade secret," or other appropriate designation. Any comment not claimed as confidential at the time of submission will be placed in the public file. Any comments marked as confidential will be treated in accordance with the procedures in 40 CFR Part 2. EPA requests that any party submitting confidential comments prepare and submit a sanitized version of the comments which EPA can place in the public file.

XIV. Rulemaking Record

EPA has established a record for this rulemaking (docket control number OPTS–50641). The record includes basic information considered by the Agency in developing this proposed rule. EPA will supplement the record with additional information as it is received. The record now includes the following:

1. The PMNs for the substances.
2. The Federal Register notices of receipt of the PMNs.
3. The section 5(e) consent order.
4. The economic analysis of this proposed rule.
5. The toxicology support document.
6. The engineering support document.

The Agency will accept additional materials for inclusion in the record at any time between this proposal and designation of the complete record.

EPA will identify the complete rulemaking record by the date of promulgation. A public version of this record containing sanitized copies from which CBI has been deleted is available to the public from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in the OTS Public Information Office, Rm. E–107, 401 M St., SW., Washington, D.C.

XV. Regulatory Assessment Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore requires a Regulatory Impact Analysis. EPA has determined that this proposed rule is not a "major rule" because it will not have an effect on the economy of $100 million or more, and will not have a significant effect on competition, costs, or prices. While there is no precise way to calculate the annual cost of this proposed rule, for the reasons discussed in Unit XII of this preamble, EPA believes that the cost will be low. In addition, because of the nature of the proposed rule and the substances identified in it, EPA believes that there will be few significant new use notices submitted. Further, while the expense of a notice, the suggested testing, and the uncertainty of possible EPA regulation may discourage certain innovation, that impact may be limited because such factors are unlikely to discourage innovation of high potential value. Finally, this SNUR may encourage innovation in safe chemical substances or highly beneficial uses.

This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act, 5 U.S.C. 605(b), EPA certifies that this proposed rule will not, if promulgated, have a significant economic impact on a substantial number of small businesses. The Agency cannot determine whether parties affected by this proposed rule are likely to be small businesses. However, EPA believes that few manufacturers, importers, or processors will submit SNUR notices. Therefore, although the costs of preparing a notice under this proposed rule might be significant for some small businesses, the number of such businesses affected is not expected to be substantial.

C. Paperwork Reduction Act

OMB has approved the information collection requirements contained in the proposed rule under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* and has assigned OMB control number 2070–0012. Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs of OMB, marked Attention: Desk Officer for EPA. The final rule package will respond to any OMB or public comments on the information collection requirements.

List of Subjects in 40 CFR Part 721

Environmental protection, Chemicals, Hazardous substances, Recordkeeping and reporting requirements, Significant new uses.

Dated: March 7, 1986.

John A. Moore,

Assistant Administrator, for Pesticides and Toxic Substances.

PART 721—[AMENDED]

Therefore, it is proposed that 40 CFR Part 721 be amended as follows:

1. The authority citation for Part 721 would continue to read as follows:

Authority: 15 U.S.C. 2604 and 2607.

2. By adding new §§ 721.135 and 721.135a to read as follows:

§ 721.135 Substituted benzenes, halogenated.

§ 721.135a Substituted benzenes, halogenated under PMN 84–660 and 84–704.

(a) *Chemical substances and significant new uses subject to reporting.* (1) The following chemical substances, referred to by their Premanufacture Notice numbers and generic chemical name, are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this seciton: P–84–660, and P–84–704, substituted benzenes, halogenated.

(2) The significant new uses are:

(i) Use other than as allowed under the Order issued on November 15, 1984, under section 5(e) of the Act for Premanufacture Notices P–84–660 and P–84–704 (the Order).

(ii) Manufacturing or importing, for the uses allowed under the Order, an aggregate volume of P–84–660 greater than that allowed by the Order.

(iii) Any manner or method of disposal associated with any use of the substances other than removal from waste streams by carbon bed filtration where the substances are either incinerated with the carbon in a waste incinerator, destroyed during the regeneration of the carbon, or landfilled in a permitted facility under the Resource Conservation and Recovery Act, 42 U.S.C. 6901 *et seq.*

(iv) Any manner or method of manufacturing, importing, or processing associated with any use of the substances without establishing a program whereby:

(A) Any person who may be dermally exposed to the substances must wear:

(*1*) Gloves determined to be impervious to the substances under the conditons of exposure, including the duration of exposure. This determination is made either by testing the gloves under the conditions of exposure or by evaluating the specifications provided by the manufacturer of the gloves. Testing or evaluating the specifications includes consideration of permability penetration and potential chemical and mechanical degradation by the substances and associated chemical substances.

(*2*) Clothing which covers any other exposed areas of the arms, legs, and torso.

(*3*) Chemical safety goggles or equivalent eye protection.

(B) Any person who may be exposed to the substances as a vapor must wear a National Institute for Occupational Safety and Health approved air-supplied, positive pressure respirator, excluding single-use or disposable and air purifying respirators in approval category 19C and in acordance with 30 CFR 11.110, Subpart J.

(C) All persons who may be exposed to the substances are informed in writing, and by presenting the information as part of a training program in safety meetings at which attendance is recorded, by means of the following statement for P–84–660:

> WARNING: Avoid contact. Contact with skin and eyes may be harmful. Chemicals similar in structure to [insert appropriate name] have been found to cause liver, kidney, neurotoxic, reproductive, and teratogenic effects in laboratory animals. To protect yourself, you must wear chemical safety goggles, impervious gloves, a respirator, and protective clothing while handling this material.

and the following statement for P–84–704:

> WARNING: Avoid contact. Contact with skin and eyes may be harmful. Chemicals similar in structure to [insert appropriate name] have been found to cause liver and kidney effects in laboratory animals. To protect yourself, you must wear chemical safety goggles, impervious gloves, a respirator, and protective clothing while handling this material.

(D) A label is affixed to each container of the substances that may be distributed in commerce which includes a warning statement which consists, at a minimum, of the appropriate language in paragraph (a)(2)(iv)(C) of this section. The first word on the label is capitalized, and the type size for the first word is no smaller than 6 point type for a label 5 square inches or less in area, 10 point type for a label above 5 but no greater than 10 square inches in area, 12 point type for a label above 10 but no greater than 15 square inches in area, 14 point type for a label above 15 but no greater than 30 square inches in area, or 18 point type for all labels over 30 square inches in area. The type size of the remainder of the warning statement is no smaller than 6 point type. All required label text is of sufficient prominence, and is placed with such conspicuousness relative to other label text and graphic material, to insure that the warning statement is read and understood by the ordinary individual under customary conditions of purchase and use.

(E) A Material Safety Data Sheet (MSDS) is provided when the substances are distributed in commerce. The MSDS includes, at a minimum, the appropriate language specified in paragraph (a)(2)(iv)(C) of this section, and specifies the requirement for protective equipment in paragraph (a)(2)(iv)(A) and (B) of this section.

(b) *special Requirements.* The provisions of Subpart A of this Part apply to this section except as modified by this paragraph.

(1) *Determining whether a use is a significant new use.*

(i) a person who intends to manufacture, import, or process one of the substances identified in paragraph (a)(1) of this section may submit to EPA the use for which the person intends to manufacture, import, or process the substance and ask EPA whether that use is a significant new use under paragraph (a)(2)(i) of this section.

(ii) EPA will answer such an inquiry only if it determines that the person has a *bona fide* intent to manufacture, import, or process the substance. To establish a *bona fide* intent to manufacture, import, or process the substance, the person must submit to EPA the information required under § 721.6. If a person intends to manufacture, import, or process a substance described by the generic chemical name in paragraph (a)(1) of this section, but does not know whether the substance is one of the substances identified in paragraph (a)(1) of this section, the person may, in connection with a submission under § 721.6, ask both whether the substance is identified in paragraph (a)(1) of this section and whether the use is a significant new use under paragraph (a)(2)(i) of this section.

(iii) EPA will review the informaion submitted by the person under § 721.6 and this paragraph (b)(1) to determine whether the person has a *bona fide* intent to manufacture, import, or process the substance. If EPA determines that the person has a *bona fide* intent to manufacture, import, or process a substance identified in paragraph (a)(1) of this section, EPA will tell the person whether the use for which the person intends to manufacture, import, or process the substance is a significant new use under paragraph (a)(2)(i) of this section.

(iv) If the person is a manufacturer or importer of P–84–660 and EPA informs the person that the use for which the person intends to manufacture or import P–84–660 would not be a significant new use under paragraph (a)(2)(i) of this section, EPA will inform the person of the aggregate production volume limit identified in paragraph (a)(2)(ii) of this section.

(v) A disclosure to a person with a *bona fide* intent to manufacture, import, or process a substance identified in paragraph (a)(1) of this section that a use is or is not a significant new use under this section will not be considered public disclosure of confidential business information under section 14 of the Act.

(vi) EPA will answer an inquiry as to whether a use is a significant new use under this section within 30 days after receipt for a complete submission under this paragraph (b)(1).

(2) *Recordkeeping.* In addition to the requirements of § 721.17, manufacturers, importers, and processors of the chemical substances identified in paragraph (a)(1) of this section must maintain the following records for 5 years from their creation:

(i) Any determination that gloves are impervious to the substances in accordance with paragraph (a)(2)(iv) of this section.

(ii) Names of persons who attend safety meetings in accordance with paragraph (a)(2)(iv)(C) of this section, dates of such meetings, and copies of any written information provided in accordance with paragraph (a)(2)(iv)(C) of this section.

(iii) Dates of shipments of containers which have been labeled in accordance with paragraph (a)(2)(iv)(D) of this

VOL 51
ISS 52
MR 18
1986
UMI

section, copies of labels used, and the identities of persons to whom they have been shipped.

(iv) Any names used for the substances and the accompanying dates of use.

(v) Documentation of quantities of P-84-660 which are manufactured or imported, with the accompanying dates. (Approved by Office of Management and Budget (OMB) under control number 2070-0012.)

44 CFR Part 67

[Docket No. FEMA-6703]

Proposed Flood Elevation Determinations; Missouri

Correction

In FR Doc. 86-3750 beginning on page 6434, in the issue of Monday, February 24, 1986, make the following correction:

On page 6438, in the second column, under "Missouri", the bold heading "Flinghill" should read "Flinthill".

BILLING CODE 1505-01-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

45 CFR Part 1177

Claims Collection

AGENCY: National Endowment for the Humanities.

ACTION: Proposed rule.

SUMMARY: The National Endowment for the Humanities (Endowment) proposes to publish at 45 CFR Part 1177 a rule for the processing of debts owed to the United States. This rule would implement the Federal Claims Collection Act of 1966, the Debt Collection Act of 1982, and is consistent with the regulations issued jointly by the Department of Justice and the General Accounting Office at 4 CFR parts 101–105, as amended by 49 FR 8889. The Debt Collection Act of 1982 provides that agency heads shall act under debt collection regulations prescribed by the head of the agency and standards that the Attorney General and the Comptroller General prescribe jointly. These jointly prescribed federal standards are at 4 CFR parts 101–105.

The proposed rule will enhance the Endowment's ability to collect its debts by providing guidance to officers and employees charged with debt collection responsibilities. In addition, the proposed rule provides notice to Endowment debtors concerning agency debt collection practices.

DATE: Comments must be received on or before April 17, 1986.

ADDRESS: Comments may be addressed to Stephen J. McCleary, Deputy General Counsel, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Stephen J. McCleary, Deputy General Counsel at (202) 786-0322.

SUPPLEMENTARY INFORMATION: This rule implements the Federal Claims Collection Standards issued jointly by the General Accounting Office and the Department of Justice at 4 CFR parts 101–105 as amended by 49 FR 8889 on March 9, 1984. The Federal Claims Collection Act of 1966, codified at 31 U.S.C. 3711 and 3716–3718, and the Privacy Act, 5 U.S.C. 552a, were amended by the Debt Collection Act of 1982 to permit the disclosure of information from a system of records to a consumer reporting agency. The Debt Collection Act of 1982 also authorized the head of an agency to enter into contracts for private collection services.

E.O. 12291

The proposed rule does not require a Regulatory Impact Analysis because it is not a "major rule" as defined in Executive Order 12291, dated February 17, 1981 because it is unlikely to result in an annual effect on the economy of $100 million or more, a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographical regions; or a significant adverse effect on competition, employment, investment, productivity innovation or on the ability to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

I certify under 5 U.S.C. 605(b) that the proposed rule will not have a significant economic impact on a substantial number of small entities including small businesses, small organizations and small local governments. Accordingly, a regulatory flexibility analysis is not required by 5 U.S.C. 603.

Reporting and Recordkeeping Requirements

The proposed rule would establish no burdens as defined under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). These regulations impose no new reporting or recordkeeping requirements that must be cleared by the Office of Management and Budget.

List of Subjects in 45 CFR Part 1177

Administrative practice and procedure, Claims, Government employees, Privacy.

Dated: March 12, 1986.

John Agresto,

Acting Chairperson.

For the reasons set forth in the preamble, the National Endowment for the Humanities proposes to add at 45 CFR 1177 the following regulation:

PART 1177—CLAIMS COLLECTION

Sec.
1177.1 Purpose and scope.
1177.2 Definitions.
1177.3 Other remedies.
1177.4 Claims involving criminal activity or misconduct.
1177.5 Collection.
1177.6 Notices to debtor.
1177.7 Interest.
1177.8 Administrative offset
1177.9 Use of credit reporting agencies.
1177.10 Collection services.
1177.11 Referral to the Department of Justice or the General Accounting Office.
1177.12 Compromise, suspension and termination.
1177.13 Omissions not a defense.

Authority: 31 U.S.C. 3711, 3716–3719.

§ 1177.1 Purpose and scope.

This proposed rule prescribes standards and procedures for officers and employees of the Endowment who are responsible for the collection and disposition of debts owed to the United States. The authority for this proposed regulation is the Federal Claims Collection Act of 1966, as amended, 31 U.S.C. 3711 and 3716–3718; the Federal Claims Collection Standards at 4 CFR Parts 101–105, as amended by 49 FR 8889, 5 U.S.C. 552a), and Office of Management and Budget Circular A-129. The covered activities include: collecting of claims in any amount; compromising claims, or suspending or terminating the collection of claims that do not exceed $20,000 exclusive of interest and charges; and referring debts that cannot be disposed of by the Endowment to the Department of Justice or to the General Accounting Office for further administrative action or litigation.

§ 1177.2 Definitions.

For the purposes of this proposed rule the following definitions will apply:

"Claim" or "Debt" means an amount or property owed to the United States. Debts include but are not limited to: overpayments program beneficiaries;

overpayments to contractors and grantees; including overpayments arising from audit disallowances; excessive cash advances to grantees and contractors; and civil penalties and assessments. A debt is overdue, or delinquent if it is not paid by the due date specified in the initial notice of the debt (see sec. 1177.6 of this part) of if the debtor fails to satisfy his or her obligations under a repayment agreement.

"Debtor" means an individual, organization, association, partnership, or corporation, indebted to the United States, or the person or entity with legal responsibility for assuming the debtor's obligation.

§ 1177.3 Other remedies.

The remedies and sanctions available to the National Endowment for the Humanities under this rule are not intended to be exclusive. The Chairperson of the National Endowment for the Humanities or his designee may impose other appropriate sanctions upon a debtor for inexcusable, prolonged or repeated failure to pay a debt. For example, the Chairperson or his designee may place the debtor's name on a list of debarred, suspended or ineligible grantees and contractors; convert the method of payment under a grant from an advance to a reimbursement method; or revoke a grantee's letter of credit. In such cases, the debtor will be advised of the Endowment's action.

§ 1177.4 Claims involving criminal activity or misconduct

(a) A debtor whose indebtedness involves criminal activity such as fraud, embezzlement, theft, or misuse of government funds or property is subject to punishment by fine or imprisonment as well as to a civil claim by the United States for compensation for the misappropriated funds. The Endowment will refer these cases to the appropriate law enforcement agency for prosecution.

(b) Debts involving fraud, false claims or misrepresentation shall not be compromised, terminated, suspended or otherwise disposed of under this rule. Only the Department of Justice is authorized to compromise, terminate, suspend or otherwise dispose of such debts.

§ 1177.5 Collection.

(a) The Endowment will take aggressive action to collect debts and reduce delinquencies. Collection efforts shall include sending to the debtors's last known address a total of three progressively stronger written demands for payment at not more than 30-day intervals. When necessary to protect the Government's interest, written demand may be preceded by other appropriate action, including immediate referral for litigation. Other contact with the debtor or his or her representative or guarantor by telephone, in person and/or in writing may be appropriate to demand prompt payment, to discuss the debtor's position regarding the existence, amount and repayment of the debt, and to inform the debtor of his or her rights and the effect of nonpayment or delayed payment. A debtor who disputes a debt must promptly provide available supporting evidence.

(b) If a debtor is undergoing insolvency proceedings, the debt will be referred to the appropriate United States Attorney to file a claim. The United States may have a priority over other creditors under 31 U.S.C. 3713.

§ 1177.6 Notice to debtor.

(a) The first written demand for payment must inform the debtor of the following:

(1) The amount and nature of the debt;

(2) The date payment is due, which will generally be 30 days from the date the notice was mailed;

(3) The assessment of interest under § 1177.7 from the date the notice was mailed if payment is not received within the 30 days;

(4) The right to dispute the debt;

(5) The office, address and telephone number that the debtor should contact to discuss repayment or reconsideration of the debt; and

(6) The sanctions available to the National Endowment for the Humanities to collect a delinquent debt including, but not limited to, referral of the debt to a credit reporting agency, a private collection bureau, or to the Department of Justice for litigation.

§ 1177.7 Interest.

(a) Interest will accrue on all debts from the date when the first notice of the debt and the interest requirement is mailed to the last known address or hand-delivered to the debtor if the debt is not paid within 30 days from the date the first notice was mailed. The Endowment will charge an annual rate of interest that is equal to the average investment rate for the Treasury tax and loan accounts on September 30 of each year, rounded to the nearest whole per centum. This rate, which represents the current value of funds to the United States Treasury, may be revised quarterly by the Secretary of the Treasury and is published by the Secretary of the Treasury annually or quarterly in the **Federal Register** and the Treasury Financial Manual Bulletins.

(b) The rate of interest initially assessed will remain fixed for the duration of the indebtedness; except that if a debtor defaults on a repayment agreement, interest may be set at the Treasury rate in effect on the date a new agreement is executed.

§ 1177.8 Administrative offset of debts.

(a) "Administrative Offset" means satisfying a debt by withholding money payable by the United States or held by the United States for a debtor.

(b) The Endowment may collect debts owed by administrative offset if:

(1) The debt is certain in amount;

(2) Efforts to obtain direct payment have been, or would most likely be unsuccessful, or the Endowment and the debtor agree to the offset

(3) Offset is cost-effective or has significant deterrent value; and

(4) Offset is best suited to further and protect the Government's interest.

(c) The Endowment may offset a debt owed to another Federal agency from amounts due or payable by the Endowment to the debtor or request another Federal agency to offset a debt owed to the endowment.

(d) Prior to initiating administrative offset the National Endowment for the Humanities will send the debtor written notice of the following:

(1) The nature and amount of the debt and the agency's intention to collect the debt by offset 30 days from the date the notice was mailed if neither payment nor a satisfactory response is received by that date;

(2) The debtor's right to an opportunity to submit a good faith alternative repayment schedule, to inspect and copy agency records pertaining to the debt, to request a review of the determination of indebtedness; and to enter into a written agreement to repay the debt; and

(3) The applicable interest.

(e) The National Endowment for the Humanities may effect an administrative offset against a payment to be made to a debtor prior to the completion of the procedures required by paragraph (d) of this section if:

(1) Failure to offset would substantially prejudice the Government's ability to collect the debt, and

(2) The time before the payment is to be made does not reasonably permit completion of those procedures.

§ 1177.9 Use of credit reporting agencies.

(a) The Endowment may report delinquent debts over $100 to consumer or commercial credit reporting agencies

VOL
51
ISS
52
MR
18
1986
UMI

consistent with the notice requirements contained in the § 1177.6 of this Part.

(b) Debts owed by individuals may be reported to consumer reporting agencies as defined in 31 U.S.C. 3701(a)(3) pursuant to 5 U.S.C. 552a(b)(12) and 31 U.S.C. 3711(f). The Endowment may disclose only an individual's name, address, social security number, and the nature, amount, status and history of the debt and the program under which the claim arose.

§ 1177.10 Collection services.

(a) The Endowment may contract for collection services to recover delinquent debts. The Endowment may refer delinquent debts to private collection agencies listed on the Schedule compiled by the General Services Administration. In such contracts, the National Endowment for the Humanities will retain the authority to resolve disputes, compromise claims, terminate or suspend collection, and refer the matter to the Department of Justice or the General Accounting Office.

(b) The contractor shall be subject to the disclosure provisions of the Privacy Act of 1974, as amended (5 U.S.C. 552a(m)), and to applicable federal and state laws and regulations pertaining to debt collection practices, such as the Fair Collection Practices Act, 15 U.S.C. 1692, and shall be strictly accountable for all amounts collected.

(c) The contractor shall be required to provide to the Endowment any data contained in its files relating to the debt account upon agency request or upon returning an account to the Endowment for referral to the Department of Justice for litigation.

§ 1177.11 Referral to the Department of Justice or the General Accounting Office.

Debts over $600 but less than $100,000 which the Endowment determines can neither be collected nor otherwise disposed of will be referred for litigation to the United States Attorney in whose judicial district the debtor is located. Claims for amounts exceeding $100,000 shall be referred for litigation to the Commercial Litigation Branch, Civil Division of the Department of Justice.

§ 1177.12 Compromise, suspension and termination.

(a) The Chairperson of the National Endowment for the Humanities or his designee may compromise, suspend, or terminate the collection of debts where the outstanding principal is not greater than $20,000. Endowment procedures for writing off outstanding accounts are available to the public.

(b) The Chairperson of the National Endowment for the Humanities may compromise, suspend, or terminate collection of debts where the outstanding prinicipal is greater than $20,000 only with the approval of, or by referral to the United States Attorney or the Department of Justice.

(c) The Chairman of the National Endowment for the Humanities will refer to the General Accounting Office (GAO) debts arising from GAO audit exceptions.

§ 1177.13 Omissions not a defense.

Failure to comply with any provisions of this rule may not serve as a defense to any debtor.

[FR Doc. 86-5711 Filed 3-17-86; 8:45 am]

BILLING CODE 7536-01-M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Ch. II

[Docket No. R-101]

Marine Insurance Inquiry and Notice of Meeting

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Notice of Public Meeting.

SUMMARY: The Maritime Administration (MARAD) is continuing to review its policies concerning the eligibility of foreign insurance underwriters to write hull insurance on subsidized vessels or vessels that are security for MARAD vessel obligation guarantees issued under its Title XI program. To further evaluate the need for a rulemaking in this area and to elicit facts and opinions on this matter, MARAD has decided to hold a public meeting.

DATE: The meeting will be held on April 17, 1986, beginning at 10:00 A.M.

ADDRESS: Room 2230, Nassif Building, Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590. If necessary, the meeting will continue on the following day.

FOR FURTHER INFORMATION CONTACT: William B. Edersold, Office of the Associate Administrator for Maritime Aids, Maritime Adninistration, 400 Seventh Street, SW., Washington, D.C. 20590 Tel. (202) 382-0364. Persons desiring to participate in this hearing should notify the contact person by April 10, 1986, and indicate the amount of time they will need to present their views. Prepared statements and comments may be submitted by persons unable to participate in the inquiry, provided they are received by MARAD by April 14, 1986, so that they may be reproduced and made available at the inquiry.

SUPPLEMENTARY INFORMATION: On October 11, 1985, MARAD published an Advance Notice of Proposed Rulemaking (ANPRM) (50 FR 41531) in the **Federal Register** stating that the agency was considering whether to conduct a rulemaking, or take other administrative action, with respect to its existing policies of: accepting only American insurance underwriters, or certain British underwriters, as hull insurers of subsidized or Title XI program vessels; requiring that 75 percent of the required hull insurance coverage be placed in the American market when the rates and conditions are competitive; and limiting the underwriter's risk on any single vessel.

The board purpose of the (ANPRM) was to elicit information and opinions from commentors on the need for rulemaking in this area and data that would be useful in the formulation of a text for a Notice of Proposed Rulemaking. The ANPRM contained no specific proposals, but requested that comments on the basic policy change under consideration specifically address possible acceptance criteria for hull insurance underwriters. The comments received, however, were of a general nature and did not provide MARAD with sufficient information to achieve either the primary goal of determining the need for a rulemaking on the placement of hull insurance or, if appropriate, how to formulate the text of a proposed rule. Therefore, MARAD has decided to conduct a public marine insurance inquiry in order to give all interested parties an opportunity to provide more detailed information and support for their positions. In addition, this marine insurance inquiry should generate sufficient information to enable MARAD to decide whether to proceed with a rulemaking on this subject.

The broad scope of the inquiry, again, will encompass three general areas: (1) Whether MARAD should approve non-British foreign hull underwriters, and, if so, under what terms and conditions; (2) whether MARAD should modify or eliminate the current reservation of 75 percent of the required hull insurance coverage to the American market; and (3) whether the current limitation on a single underwriter's risk (10 percent of policyholder's surplus) should be increased, decreased, or eliminated.

During the inquiry, MARAD intends to specifically focus on obtaining meaningful information on the following issues:

1. Are the National Association of Insurance Commissioners (NAIC) tests an appropriate measure for all kinds of insuring organizations (large, small, stock, mutual)? Are there any biases in any of the ratios which would consistently produce satisfactory results for any group of insurers regardless of their financial condition? Should any failure to meet the "usual range" guidelines be cause for denying approval of a foreign insurer? Should MARAD withdraw approval of a U.S. insurer for a similar failure? If ratio tests are used as part of the approval process, what further evaluation would be recommended for ratio guidelines not met?

2. What requirements for state licensing in this country are particularly relevant? If MARAD does not require state licensing, but decides to use state standards as the basis for its approval, which requirements should be used? From the viewpoint of the foreign insurer, what are the pros and cons of opting for state licensing versus directly insuring from overseas? Similarly, what are the licensing or other requirements in England and Scandinavia (the only foreign areas for which comments were received) necessary for a domestic of U.S. underwriter to do business in those countries? Would it be appropriate for MARAD to accept approval by the insurance authorities in these countries as evidence of suitability for MARAD's program? If not, why not?

3. Some U.S. underwriters have stated that they do not object to additional competition, provided that the quality of security is high and does not present an inordinate risk for the U.S. taxpayer. One U.S. broker stated that there are strong, financially, secure insurers that meet broker security standards, but are unable to participate because of MARAD restrictions. what are those broker security standards and what markets are likely to provide sufficiently high quality insurance? Should the focus of MARAD's inquiry be limited to those markets?

4. What countries have the restrictive insurance practices which are of concern to the U.S. insurers? What are those practices that should be grounds for disqualification, and how should it be verified that such practices exist? Should only restrictive hull insurance practices be considered? Since MARAD's 75 percent U.S. market reservation is a restrictive practice, what kind of certification as to reciprocal treatment ought to be required as a condition for approval?

5. What would the impact be on the U.S. marine insurance market if MARAD changed its policy and admitted additional foreign underwriters, but retained a U.S. market reservation at 50 percent? 30 percent? what is the minimum level required to maintain a viable U.S. market? If this policy were adopted, on what basis, if any, should waivers of this requirement be granted?

6. Please comment on the view that hull insurance is marginally profitable at best, so that substantial premium savings must be a temporary action aimed at eliciting new business. Are overhead, expense levels and underwriting techniques so similar worldwide that there can be no appreciable long-term difference in rates? Is there a fundamental structural difference between stock and mutual companies which by reason of its non-profit orientation enables the mutual to operate on a significantly different rate structure?

7. What are the significant adverse effects which a policy change would have on competition, employment, investment, productivity or the ability of U.S.-based enterprises to compete with foreign enterprises? Is there anything inherent in the structure of the U.S. marine insurance industry which would make it unable to compete effectively and require protection? If protection is required and desirable, why is there a continuing need for an antitrust exemption under 46 App. U.S.C. 885? How can there be any real competition if operations are conducted under an umbrella of both an antitrust exemption and a market reservation? If this is not the case, please describe how true competition for the U.S.-flag operator's hull business does exist?

8. As a means of assessing the potential impact of a policy change on the balance of payments, approximately how much total hull premium is involved for MARAD program vessels? How much of that premium would be expected to be lost to foreign market if all restrictions on placement were removed? How much of what is lost could be expectd to flow back to the U.S. in the form of reinsurance? How much could rate levels be expected to decline as a result of deregulation?

9. Does "cut through" language, whereby a reinsurer agrees to direct suit by the assured, provide adequate access to the reinsurer? If it does, can reinsurance placed in this country by a foreign direct insurer be considered in the evaluation of the resources of the foreign insurer? Should the quality of the reinsurance be evaluated on the same basis as that of the direct insurer? Is diversification or concentration of reinsurance preferable? If reinsurers are subject to state regulation, shouldn't reinsurance placed in this country give an adequate measure of security to direct insurance placed with a foreign direct insurer?

10. The view has been stated that reserves must be adequate to cover shock losses, and that if the cost of reinsurance is adequate, there may not be enough to pay losses within their retention. Why must shock losses be covered from available surplus, if reinsurance is adequate and pays off quickly? Does not the ability of a mutual insurer to issue a supplemental call provide reasonable assurance of the ability to pay losses within their retention?

11. If it is important that there be adequate accessible assets in this country to protect the interests of the assureds, what type of assets are considered suitable and sufficiently accessible? (Bonds? Letters of Credit?) What is required to make such assets truly accessible to assureds?

12. If additional foreign underwriters were to be admitted only from Europe, what, if any, accounting practices and statutory requirements might cause MARAD to have difficulty evaluating financial statements and assessing financial condition, or could MARAD expect to be able to obtain sufficiently comparable data to that available in this country?

13. Are there currently any underwriting limitations in the American or London markets which would make it desirable to have additional approved underwriters in order to ensure that American assureds have adequate options? By limitations we mean any risks which will not be accepted, any types of vessels for which coverage is difficult to obtain at reasonable rates, any failure to grant rate reductions in response to improved loss records. If any such limitations exist, what is the justification?

14. If there is a state of crisis in the world insurance market, and the prospect that there will be a tightening of capacity, should this be compensated by an increase in the number of approved underwriters?

15. Given that quality of foreign insurance is of paramount importance, in order to assess the magnitude of the problem, what has been the incidence of insolvency among foreign hull underwriters and the amount of unpaid hull claims over the past several years? In the U.S., how does regulation ensure that losses will be paid? Would not attachable assets already be dissipated by the time insolvency occurs?

16. Are there any criteria for the approval of foreign underwriters, not

VOL
51
ISS
52
MR
18
1986
UMI

mentioned in any earlier comments, which MARAD ought to consider?

17. What is the basis for recommending a lower percentage than the current 10 percent limit on the amount which an underwriter may take on a single risk? If there is adequate reinsurance, is there any basis for continuing to impose any limits at all? If there is adequate reinsurance, should MARAD continue to prohibit captives?

18. If a mutual insurance company is already approved to write protection and indemnity insurance on MARAD program vessels, is there any basis inherent in either protection and indemnity or hull insurance for precluding participation by such a company in hull insurance on MARAD program vessels?

MARAD requests that any parties interested in this inquiry (underwriters, brokers, owners, banks, state regulatory agencies, U.S. or foreign) participate actively by answering those questions that concern them and by providing knowledgeable witnesses and other pertinent information. In view of the many similar responses to the ANPRM from interested parties, and to avoid time-consuming duplication in the presentation of views and information, MARAD suggests that prospective participants in the inquiry with identical or substantially the same interests in the matter coordinate and consolidate their presentations or submissions for the record. MARAD further requests that these witnesses be prepared to present detailed information to justify their position.

Any rulemaking that might ensue from this inquiry has been determined not to be major, pursuant to Executive Order 12291 (February 17, 1981). It would be significant under the Department of Transportation's Regulatory Policies and Procedures (February 26, 1979) and would require the preparation of a regulatory evaluation. The Maritime Administrator certifies that such a rulemaking would not exert a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act of 1980 (5 U.S.C. 601-612), since its major impact in the United States would be on ship operators, marine casualty underwriters and insurance brokers, the great majority of which are not small entities. While such a rulemaking may contain information collection requirement within the scope of the Paperwork Reduction Act of 1980 (Pub. L. 95-511), the submission of information for purposes of this inquiry is exempt from the scope of the Act (5 CFR 1320.7(k)(8).

By Order of the Maritime Administrator.

Dated: March 12, 1986.

Georgia P. Stammes,

Secretary, Maritime Administration.

Notices

Federal Register
Vol. 51, No. 52
Tuesday, March 18, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Citizens' Advisory Committee on Equal Opportunity; Meeting Change and Amendment

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), a change and amendment is made of the following committee meeting:

Name: Citizens' Advisory Committee on Equal Opportunity
Date: April 7-9, 1986
Place: Sheraton Hotel, 4728 Constitution Avenue, Baton Rouge, Louisiana
Time: 8:30 a.m.—5:00 p.m.
Purpose:
- —Advise the Secretary on the effectiveness of compliance program directives;
- —Review all aspects of the Department's policies, practices, and procedures on Equal Opportunity;
- —Recommend changes in Department rules, regulations, and orders to assure USDA activities are free from discrimination;

Additionally, will specifically focus on:
- —Continued outreach efforts in Equal Opportunity that are being initiated by the Committee members;
- —Networking with constituents groups that are recipients of USDA services.

The meeting is open to the public. Persons may participate in the meeting as time and space permit. Persons who wish to address the Committee at the meeting or who wish to file written comments before or after the meeting should contact: Lawrence Bembry Associate Director, Equal Opportunity, Office of Advocacy and Enterprise, 201 14th Street SW. Room 2305 Auditors Building, Washington, DC 20250 (202) 447-5681.

Written statements may be submitted until March 28, 1986.

Lawrence Bembry,

Associate Director, Equal Opportunity Office of Advocacy and Enterprise.

BILLING CODE 3410-01-M

DEPARTMENT OF AGRICULTURE

Forest Service

Structural Strengthening and Raising of Gibraltar Dam; Los Padres National Forest, Santa Barbara County, CA; Intent To Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service, and the City of Santa Barbara jointly will prepare an environmental impact statement/environmental impact report to assess the impacts of raising and strengthening Gibraltar Dam. The dam is situated on the Santa Ynez River in Santa Barbara County and in the Santa Barbara Ranger District, Los Padres National Forest.

The City of Santa Barbara, owner of Gibraltar Dam, has been directed to strengthen the Dam by the State of California in order to provide seismic safety. In addition, much of the storage capacity of the reservoir has been lost as a result of siltation. The City of Santa Barbara wishes: (1) to Study means of strengthening Gibraltar Dam and (2) to study the possibility of increasing dam height in order protect the long-term reliability of the reservoir as a water supply for the City. Los Padres National Forest manages most of the lands which currently are inundated by the present reservoir and lands which could be inundated as a consequence of increased dam height.

A range of alternatives will be considered, including no action. The range of alternatives has not been established.

Federal, State, and local agencies and individuals and other organizations who may be interested in or affected by the decision will be invited to participate in the joint scoping process. The public involvement plan will be jointly prepared to ensure that issues are scoped correctly. The scoping process will include:

1. Identification of potential issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues and those adequately treated in previous environmental analysis.
4. Determination of potential cooperating agencies and assignment of responsibilities.

The Fish and Wildlife Service and the Bureau of Reclamation, Department of the Interior, and the Federal Energy Regulatory Commission will be invited to participate as cooperating agencies in the environmental analysis.

The City of Santa Barbara and Los Padres National Forest will conduct a joint scoping hearing on May 2, 1986, at 9:00 a.m. in the City Council Chambers, City Hall, De La Guerra Plaza, Santa Barbara. Questions regarding this hearing should be addressed to Janice Hubbell, Environmental Analyst, City of Santa Barbara, P.O. Drawer P-P, 93102.

Erwin N. Ward, Acting Forest Supervisor, is the responsible official for the environmental impact statement.

The draft environmental impact statement should be available for public review by late September 1986. The final environmental impact statement is scheduled for completion in January 1986.

Written comments and suggestions concerning the analysis should be sent to Erwin N. Ward, Acting Forest Supervisor, Los Padres National Forest, Goleta, California, 93117-2053, by May 6, 1986.

Questions about the proposed action and environmental impact statement should be directed to John Bridgwater, Resource Officer, Santa Barbara Ranger District, Star Route, Santa Barbara, California, 93105; telephone (805) 967-3481 or 967-7312.

Dated: March 10, 1986.

Erwin N. Ward,

Acting Forest Supervisor, Los Padres National Forest.

[FR Doc. 86-5847 Filed 3-17-86; 8:45 am]

BILLING CODE 3410-11-M

Wolf Creek Valley Winter Sport Site; San Juan National Forest; Mineral County, CO; Intent To Prepare a Revised Environmental Impact Statement

The Forest Service, Department of Agriculture in cooperation with other federal, state, and local agencies will prepare a revised draft environmental impact statement concerning development of the proposed Wolf Creek Valley Winter Sports Site.

Westfork Investments Ltd. proposes to develop an alpine skiing area and year-round resort on public and private land. The area proposed for development, identified as Windy Pass in the San Juan National Forest Land and Resource Management Plan, is

VOL 51 ISS 52 MR 18 1986 UMI

located about eleven miles north and east of Pagosa Springs on U.S. Highway 160. The proposed skiing development would likely occur in phase and reach an ultimate capacity of 11,750 skiers-at-one-time served by approximately 15 lifts.

The environmental analysis of this proposal is being assisted and coordinated by a Joint Review Committee which was established and provided for in a Memorandum of Understanding dated August 27, 1984. Committee membership includes representatives of the USDA Forest Service; State of Colorado; Mineral County, Colorado; Archuleta County, Colorado; Town of Pagosa Springs; and Westfork Investments Ltd.

The alternatives analyzed are those of no action, of permitting development as proposed, and of permitting the development as proposed except in an area identified as the "back bowls".

The National Environmental Policy Act (NEPA) requires an early and open process for determining the scope of issues to be addressed and for identifying the significant issues related to a proposed action. The Forest Service with the Joint Review Committee has held numerous public meetings to identify issues and concerns, review alternatives and discuss anticipated impacts related to the proposal. A draft Environmental Impact Statement was written and made available for public review and comment. The comment period closed December 2, 1985 and comments were received through January 16, 1986. The responsible official decided that a revision of the EIS should be written because: (1) Various state and federal agencies requested clarification on numerous points, (2) additional information is now available for the proposed East Fork Resort, another ski area proposal in the vicinity, so better cumulative impacts can be disclosed, and (3) it is desirable to allow the public to review additional data as it becomes available so as to avoid public misunderstanding.

The revised draft Environmental Impact Statement is expected to be available for public review before the end of June 1986. The final Environmental Impact Statement is scheduled to be filled by the end of October 1986. A Record of Decision will be issued by the USDA Forest Service when the final Environmental Impact Statement is released. If the decision is to allow development, construction could not realistically begin on National Forest System lands until spring 1988.

John R. Kirkpatrick, San Juan National Forest Supervisor, is the responsible official.

Questions and comments about the proposed action and Environmental Impact Statement should be directed to: Samuel A. Scange, District Ranger, Pagosa Ranger District, P.O. Box 310, Pagosa Springs, Colorado 81147, (303) 264–2268.

Dated: March 2, 1986.

John R. Kirkpatrick,

Forest Supervisor.

BILLING CODE 3410-11-M

Quartz Hill Molybdenum Mine, Tongass National Forest, Ketchikan Area, Ketchikan, Alaska; Intent To Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service will prepare, through a third party consultant, an Environmental Impact Statement for the development of a proposed molybdenum mine at Quartz Hill within the non-wilderness portion of Misty Fiords National Monument. A previously issued Draft Environmental Statement on this subject will be revised due to changes in the plan of operations submitted by the mine operater and to new information developed during the public comment period on the original draft. The Plan of Operations submitted by the United States Borax & Chemical Corporation on behalf of Pacific Coast Molybdenum includes:

1. Construction and operation of an open pit capable of producing 800,000 tons of ore per day for more than 55 years.

2. Construction and use of an access road suitable for mine development.

3. Construction and operation of a mill capable of processing 80,000 tons of ore per day.

4. Construction and operation of a 100 megawatt power plant.

5. Construction and use of a tunnel for transportation of crushed ore.

6. Disposal of tailings in the marine environment of the Wilson Arm-Smeaton Bay fjord.

7. Construction and use of a well-field adjacent to the Wilson River to provide a 16,000 gpm water supply.

8. The workforce and their families to be housed in Ketchikan, Alaska and to commute to the mine in alternating weekly shifts.

9. Construction and use of associated ancillary structures i.e. docks, fuel storage, sediment control facilities, pipelines etc.

Alternatives to the proposed Plan of Operation will be analyzed including a no action alternative and alternative ways to arrange facilities or processes at the mine site. Possible alternatives include developing a townsite near the mine, developing water supplies in drainages other than Wilson River, tailings disposal on land or in Boca de Quarda Fjord, and relocating the existing access road from the Blossom River valley to the Keta River valley.

The initial scoping process occurred in January and February 1983 and consisted of a public meeting in Ketchikan and a public comment period during which written comments were received from individuals and organizations having an interest in the project. Inderdisciplinary Team meetings were held to discuss and identify public and agency issues, concerns and opportunities to be analyzed in the Environmental Statement.

The following groups have participated in the planning process have provided individuals to be members of the Interdisciplinary Team preparing the Environmental Statement:

The State of Alaska Departments of—
  Transportation and Public Facilities
  Community and Regional Affairs
  Natural Resources
  Commerce and Economic Development
  Fish and Game
National Marine Fisheries Service
U.S. Bureau of Mines
U.S. Fish and Wildlife Service
Southern Southeast Regional Aquaculture Association
U.S. Army Corps of Engineers
U.S. Environmental Protection Agency
Ketchikan Gateway Borough
United States Borax & Chemical Corporation

A Draft Environmental Statement was circulated in July 1984 for public review and comment ending 10/5/84. A public hearing was held in Ketchikan on the DEIS and an associated NPDES permit on 9/6/84. The comments received both in writing and at the hearing will be displayed in the Revised Draft Environmental Statement. The Revised Draft Environmental Statement should be available for public review by May 1986. The Final Environmental Statement is scheduled for completion in November 1986.

Michael A. Barton, Regional Forester of the Alaska Region, located in Juneau, Alaska, is the responsible official.

Written comments and suggestions should be sent to Win Green, Forest Supervisor, Ketchikan Area, Tongass National Forest, Department QH, Federal Building, Ketchikan, Alaska 99901.

Questions about the proposed action and environmental statement should be directed to Ed Johnson, Minerals and Watershed Staff Officer/Borax IDT Leader, Ketchikan Area, Tongass National Forest, phone (907) 225–3101.

Dated: March 7, 1986.

Michael A. Barton,

Regional Forester.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 8–86]

Foreign-Trade Zone 83—Huntsville, AL; Application for Subzone Chrysler Electronics Plant

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Huntsville-Madison County Airport Authority, grantee of Foreign-Trade Zone 83, requesting special-purpose subzone status for Chrysler Corporation's auto electronic products plant in Huntsville, Alabama, within the Huntsville Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on February 24, 1986.

The proposed subzone would be located at Chrysler's Huntsville Electronics Plant, 1024103 Wynn Drive, Huntsville. The 71-acre facility is used to produce radio/cassette players, ignition control computers and other electronic controls. Parts such as cassette heads, semiconductors, and capacitors, representing 6 percent of production costs, are sourced abroad. The finished electronic auto components are shipped to Chrysler assumbly plants in the U.S. and abroad.

Zone procedures would allow Chrysler to export finished components without paying customs duties on foreign materials. On the products used at its domestic auto assembly plants with subzone status, the company would be able to take advantage of the same duty rate that is available to importers of finished autos. The duty rates on the parts imported by Chrysler range from 4.0 to 10.0 percent, whereas the rate for finished autos is 2.6 percent. The savings from subzone status would contribute to the company's overall cost reduction program, helping it to become more competitive with auto plants abroad.

In accordance with the Board's reguations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; David L. Willette, Acting District Director, U.S. Customs Service, South Central Region, 250 N. Water Street, Mobile, Alabama 36652; and Colonel William Kirkpatrick, District Engineer, U.S. Army Engineer District Nashville, P.O. Box 1070, Nashville, TN 37202.

Comments concerning the proposed subzone are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before April 17, 1986.

A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

Port Director's Office, U.S. Customs Service, Huntsville-Madison County Airport, Huntsville, Alabama 35806;
Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1529, 14th and Pennsylvania, NW., Washington, D.C. 20230.

Dated: March 11, 1986.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 86–5898 Filed 3–17–86; 8:45 am]

BILLING CODE 3510-DS-M

[Order No. 320]

Resolution and Order Approving the Application of the City of New York, NY for a Subzone at the Apparel Plant of Jack Young Associates, Inc.

Proceedings of the Foreign-Trade Zones Board, Washington, DC.

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board has adopted the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the City of New York, New York, grantee of Foreign-Trade Zone 111, filed with the Foreign-Trade Zones Board (the Borad) on September 25, 1985, requesting special-purpose subzone status for the storage and sweater manufacturing-for-export operations of Jack Young Associates, Inc., in New York City, within the New York Customs port of entry, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that the proposal is in the public intesest, approves the application.

The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant of Authority To Establish a Foreign-Trade Subzone in New York City

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes", as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

Whereas, the Board's regulations (15 CFR 400.304) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved, and where a significant public benefit will result;

Whereas, the City of New York, New York, grantee of Foreign-Trade Zone No. 111, has made application (filed September 25, 1985, Docket 38–85, 50 FR 42198) in due and proper form to the Board for authority to establish a special-purpose subzone for the storage and sweater manufacturing-for-export operations of Jack Young Associates, Inc., in St. Albans (Queens), New York, within the New York Customs port of entry;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and,

Whereas, the Board has found that the requirements of the Act and the Board's regulations are satisfied;

Now, therefore, in accordance with the application filed September 25, 1985, the Board hereby authorizes the establishment of a subzone for storage and export manufacturing at the Jack Young Associates plant in New York City, designated on the records of the Board as Foreign-Trade Subzone No. 111A at the location mentioned above and more particularly described on the maps and drawings accompanying the application, said grant of authority being subject to the provisions and restrictions of the Act and the Regulations issued thereunder, to the same extent as though the same were fully set forth herein, and

VOL
51
ISS
52
MR
18
1986
UMI

also to the following express conditions and limitations:

Activation of the subzone shall be commenced within a reasonable time from the date of issuance of the grant, and prior thereto, any necessary permits shall be obtained from Federal, State, and municipal authorities.

Officers and employees of the United States shall have free and unrestricted access to and throughout the foreign-trade subzone in the performance of their official duties.

The grant shall not be construed to relieve responsible parties from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said subzone, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and District Army Engineer with the Grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

In witness whereof, the Foreign-Trade Zones Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer or his delegate at Washington, D.C., this 10th day of March 1986, pursuant to Order of the Board.

Foreign-Trade Zones Board.

Paul Freedenberg,

Assistant Secretary of Commerce for Trade Administration, Chairman, Committee of Alternates.

Automated Manufacturing Equipment Technical Advisory Committee; Partially Closed Meeting

A meeting of the Automated Manufacturing Equipment Technical Advisory Committee will be held April 9, 1986, 9:30 a.m., Herbert C. Hoover Building, Room 6029, 14th Street and Constitution Avenue, NW., Washington, DC. The Committee advises the Office of Technology and Policy Analysis with respect to technical questions that affect the level of export controls applicable to automated manufacturing equipment and related technology.

Agenda

1. Opening remarks by the Chairman.
2. Presentation of papers or comments by the public.
3. Numerical Control Equipment.
4. Precision Inspection Equipment.
5. Sensory Systems.
6. Electric Arc Devices/Isostatic Presses.
7. Local Area Networking.

Executive Session

8. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The general session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1986, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government in the Sunshine Act Pub. L. 94-409, that the matters to be discussed in the Excutive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: 202/377-4217. For further information or copies of the minutes, contact Liga Hagenah, (202) 377-4959.

Dated: March 12, 1986.

Margaret A. Cornejo,

Acting Director, Technical Support Staff, Office of Technology and Policy Analysis.

The MCTL Implementation Technical Advisory Committee; Partially Closed Meeting

A meeting of the MCTL Implementation Technical Advisory Committee will be held April 8, 1986, 9:30 a.m., Herbert C. Hoover Building, Room 3407, 14th Street and Constitution Avenue, NW., Washington, DC. The Committee advises and assists the Office of Technology and Policy Analysis in the implementation of the Militarily Critical Technologies List (MCTL) into the Export Administration Regulations and provide for continuing review to update the Regulations as needed.

Agena

1. Introduction of members and attendees.
2. Presentation of papers or comments by the public.
3. Approval of the minutes of the meeting on January 7.
4. Proposed work plan for 1986.
5. Discussion of Section 379.3.

Executive Session

6. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on February 19, 1985, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: (202) 377-4217. BILLING CODE 3510-DT-M

National Bureau of Standards

[Docket No. 51208-5208]

Federal Information Processing Standard 21-2, COBOL

AGENCY: National Bureau of Standards, Commerce.

ACTION: The purpose of this notice is to announce that the Secretary of Commerce (Secretary) has approved a revision of Federal Information Processing Standard 21-1, COBOL, which will be published as FIPS 21-2.

SUMMARY: On November 20, 1984, notice was published in the **Federal Register** (49 FR 45772) that a revised Federal Information Processing Standard for COBOL was being proposed for Federal use. The written comments submitted by interested parties and other material available to the Department relevant to this standard were reviewed by NBS. On the basis of this review, NBS recommended that the Secretary approve the standard as a Federal Information Processing Standard (FIPS) and prepared a detailed justification document for the Secretary's review in support of that recommendation.

The detailed justification document which was presented to the Secretary, and which includes an analysis of the written comments received, is part of the public record and is available for inspection and copying in the Department's Central Reference and Records Inspection Facility, Room 6628, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues, NW., Washington, DC 20230.

This approved revised standard contains two portions: (1) An announcement portion which provides information concerning the applicability, implementation, and maintenance of the standard, and (2) a specifications portion which deals with the technical requirements of the standard.

ADDRESS: Interested parties may purchase copies of this revised standard, including the technical specifications portion, from the National Technical Information Service (NTIS). Specific ordering information from NTIS for this standard is set out in the Where to Obtain Copies section of the announcement portion of the FIPS PUB.

FOR FURTHER INFORMATION CONTACT: Ms. Mabel Vickers, Center for Programming Science and Technology, Institute for Computer Sciences and Technology, National Bureau of Standards, Gaithersburg, MD 20899, (301) 921-2431.

Dated: March 12, 1986.

Ernest Ambler,

Director.

Federal Information Processing Standards Publication 21-2

(Date)

Announcing the Standard for COBOL

Federal Information Processing Standards Publications (FIPS PUB) are issued by the National Bureau of Standards pursuant to section 111(f)(2) of the Federal Property and Administrative Services Act of 1949, as amended, Pub. L. 89-306 (79 Stat. 1127), Executive Order 11717 (38 FR 12315, dated May 11, 1973), and Part 6 of Title 15 Code of Federal Regulations (CFR).

1. *Name of Standard.* COBOL (FIPS PUB 21-2).

2. *Category of Standard.* Software Standard, Programming Language.

3. *Explanation.* This publication announces the adoption of American National Standard Programming Language, COBOL, ANSI X3.23-1985, as amplified herein, as a Federal Information Processing Standard (FIPS). This revision supersedes FIPS PUB 21-1 and reflects major changes and improvements in the COBOL specifications. It also contains changes to the Objectives, Applicability, and Implementation portions of FIPS PUB 21-1 to recognize advances in programming technology and to provide consistent policy for all FIPS languages. The American National Standard defines the elements of the COBOL programming language and the rules for their use. The purpose of the standard is to promote portability of COBOL programs for use on a variety of data processing systems. The standard is used by implementors as the reference authority in developing processors and by users who need to know the precise syntactic and semantic rules of the standard language.

4. *Approving Authority.* Secretary of Commerce.

5. *Maintenance Agency.* Department of Commerce, National Bureau of Standards (Institute of Computer Science and Technology).

6. *Cross Index.* American National Standard Programming Language COBOL, ANSI X3.23-1985, ISO 1989-1985.

7. *Related Documents.*[1]

a. Federal Information Resources Management Regulation 201-8.1, Federal ADP and Telecommunication Standards.

b. Federal Information Processing Standards Publication 29, Interpretation Procedures for Federal Information Processing Standard Programming Languages.

c. NBS Special Publication 500-117, Selection and Use of General-Purpose Programming Languages.

8. *Objectives.* Federal standards for high level programming languages permit Federal departments and agencies to exercise more effective control over the production, management, and use of the Government's information resources. The primary objectives of Federal programming language standards are:

—To encourage more effective utilization and management of programmers by insuring that programming skills acquired on one job are transportable to other jobs, thereby reducing the cost of programmer re-training;

—To reduce the cost of program development by achieving the increased programmer productivity that is inherent in the use of high level programming languages;

—To reduce the overall software costs by making it easier and less expensive to maintain programs and to transfer programs among different computer systems, including replacement systems;

—To protect the existing software assets of the Federal Government by insuring to the maximal feasible extent that Federal programming language standards are technically sound and that subsequent revisions are compatible with the installed base.

Government-wide attainment of the above objectives depends upon the widespread availability and use of comprehensive and precise standard language specifications.

9. *Applicability.*

a. Federal standards for high level programming languages should be used for computer applications and programs that are either developed or acquired for government use. FIPS COBOL is one of the high level programming language standards provided for use by all Federal departments and agencies. FIPS COBOL is especially suited for applications that emphasize the manipulation of characters, records, files, and input/ouput (in contrast to those primarily concerned with scientific and numeric computations).

b. The use of FIPS high level programming languages is strongly recommended when one or more of the following situations exist:

—It is anticipated that the life of the program will be longer than the life of the presently utilized equipment;

---

[1] Refers to most recent revision of FIPS PUBS.

VOL
51
ISS
52
MR
18
1986
UMI

—The application or program is under constant review for updating of the specifications, and changes may result frequently;

—The application is being designed and programmed centrally for a decentrailzed system that employs computers of different makes, models and configurations;

—The program will or might be run on equipment other than that for which the program is initially written;

—The program is to be understood and maintained by programmers other than the original ones;

—The advantages of improved program design, debugging, documentation and intelligibility can be obtained through the use of this high level language regardless of interchange potential;

—The program is or is likely to be used by organizations outside the Federal Government (i.e., State and local governments, and others).

c. Nonstandard language features should be used only when the needed operation or function cannot reasonably be implemented with the standard features alone. Although nonstandard language features can be very useful, it should be recognized that their use may make the interchange of programs and future conversion to a revised standard or replacement processor more difficult and costly.

d. It is recognized that programmatic requirements may be more economically and efficiently satisfied through the use of report generation, database management, or text processing languages. The use of any facility should be considered in the context of system life, system cost data integrity, and the potential for data sharing

e. Programmatic requirements may be also more economically and efficiently satisfied by the use of automatic program generators. However, if the final output of a program generator is a COBOL source program, then the resulting program should conform to the conditions and specifications of FIPS COBOL.

10. *Specifications.* FIPS COBOL specifications are the language specifications contained in American National Standard Programming Language COBOL. ANSI X3.23–1985.

ANSI X3.23–1985 specifies the form of a program written in COBOL, formats for data, and rules for program and data interpretation.

The standard does not specify limits on the size of programs, minimum system requirements, the means of supervisory control of programs, or the means of transforming programs internally for processing

In addition, the following requirements apply:

a. For purposes of FIPS COBOL, the modules defined in ANSI X3.23–1985 are combined into three subsets and four optional modules. The three subsets are identified as Minimum, Intermediate, and High. The four optional modules are Report Writer, Communications, Debug, and Segmentation. These four optional modules are not an integral part of any of the subsets; however, none, all, or any combination of the optional modules may be associated with any of the subsets.

The high subset is composed of all language elements of the highest level of all required modules. The intermediate subset is composed of all language elements of level 1 of all required modules. The minimum subset is composed of all language elements of level 1 of the Nucleus, Sequential I–O, and Inter-Program Communication modules.

The following table reflects the composition of the required subsets and the relationship of the subsets and the optional modules. The numbers in the table refer to the level within a module as designated in ANSI X3.23–1985, and a dash denotes the corresponding module is omitted or may be omitted.

COBOL SUBSETS

Modules	Minimum	Intermediate	High
Required			
Nucleus	1	1	2
Sequential I–O	1	1	2
Relative I–O		1	2
Indexed I–O		1	2
Inter-program communication.	1	1	2
Sort-merge		1	2
Source text manipulation.		1	2
Optional			
Report writer	—, or 1	—, or 1	—, or 1
Communication	—, 1, or 2	—, 1, or 2	—, 1, or 2
Debug	—, 1, or 2	—, 1, or 2	—, 1, or 2
Segmentation	—, 1, or 2	—, 1, or 2	—, 1, or 2

b. A facility must be available in the processor for the user to optically specify monitoring of the source program at compile time. The monitoring may be specified for a FIPS COBOL subset, for any of the optional modules, for all of the obsolete language elements included in the processor, or for a combination of a FIPS COBOL subset, optional modules, and all obsolete elements. The monitoring may be specified for any FIPS COBOL subset at or below the highest subset for which the processor is implemented and for a level of an optional module at or below the level of the optional module for which the processor is implemented. The monitoring is an analysis of the snytax used in the source program against the syntax included in the user selected FIPS COBOL subset and optional modules. Any syntax used in the source program that does not conform to that included in the user selected FIPS COBOL subset and optional modules will be diagnosed and identified to the user through a message on the source program listing. Any syntax for an obsolete language element included in the processor and used in the source program will also be diagnosed and identified through a message on the source program listing. The determination of the need to flag any given source program syntax in accordance with these requirements cannot be logically resolved until the syntactic correctness of the source program has been established. The message provided will identify:

—The clause, statement or header that directly contains the nonconforming or obsolete syntax. (For the purpose of this requirement the definitions of clause, statement and header contained in American National Standard Programming Language COBOL, ANSI X3.23–1985, Section III. Glossary, and the definition of syntax contained in American National Dictionary for Information Processing Systems, X3/TR–1–82, apply).

—The source program line and an indication of the beginning location within the line of the clause, statement or header which contains the nonconforming or obsolete syntax;

—The syntax as "nonconforming standard" if the nonconforming syntax is included in the processor but is not within the user selected FIPS COBOL subset or optional modules except if monitoring is selected for the obsolete category then obsolete language elements are only flagged as "obsolete";

—The syntax as "nonconforming nonstandard" if the nonconforming syntax is a nonstandard extension included in the processor;

—the syntax as "obsolete" if the syntax identified is in the obsolete category within a FIPS COBOL subset or optional module included in the processor.

11. *Implementation.* The implementation of FIPS COBOL involves, three areas of consideration: acquisition of COBOL processors, interpretation of FIPS COBOL, and validation of COBOL processors.

11.1 *Acquisition of COBOL Processors.* This publication is effective October 1, 1986. COBOL processors acquired for Federal use after this date

should implement at least one of the required subsets of FIPS COBOL. If the functionality of one or more of the optional modules meets programmatic requirements, then those optional modules also should be acquired. Conformance to FIPS COBOL should be considered whether COBOL processors are developed internally, acquired as part of an ADP system procurement, acquired by separate procurement, used under an ADP leasing arrangement, or specified for use in contracts for programming services.

For processors conforming to FIPS PUB 21–1 ordered or delivered after (date of publication of final document in the **Federal Register**), the requirement to contain any of the optional modules defined herein is waived. Each optional module that is needed to meet programmatic requirements should be explicitly cited as a requirement in the order for the processor.

A transition period provides time for industry to produce COBOL processors conforming to the standard. The transition period begins on the effective date and continues for one (1) year thereafter. The following apply during the transition period:

a. The provisions of FIPS PUB 21–1, with the exception concerning optional modules stated above, apply to processors ordered before the effective date but delivered subsequent to the effective date.

b. The provisions of this publication apply to orders placed after the effective date; however, a processor conforming to FIPS PUB 21–2, if available, may be acquired for use prior to the effective date. If a conforming processor is not available, a processor conforming to FIPS PUB 21–1 may be acquired for interim use during the transition period.

11.2 *Interpretation of FIPS COBOL.* NBS provides for the resolution of questions regarding FIPS COBOL specifications and requirements, and issues official interpretations as needed. All questions about the interpretation of FIPS COBOL should be addressed to: Director, Institute for Computer Sciences and Technology, ATTN: COBOL Interpretation, National Bureau of Standards, Gaithersburg, MD 20899.

11.3 *Validation of COBOL Processors.* The General Services Administration (GSA), through its Federal Software Management Support Center (FSMSC), provides a service for the purpose of validating the conformance to this standard of processors offered for Federal procurement. The validation system reports the nature of any deviations that are detected. This service is offered on a reimbursable basis. Further information about the validation service can be obtained from the FSMSC which is located at 5203 Leesburg Pike, Suite 1100, Falls Church, Virginia 22041–3467 (703–756–6156).

12. *Where to Obtain Copies.* Copies of this publication are for sale by the National Technical Information Service, U.S. Department of Commerce, Springfield, VA 22161. (Sale of the included specifications document is by arrangement with the American National Standards Institute.) When ordering, refer to Federal Information Processing Standards Publication 21–2 FIPS PUB 21–2), and title. Payment may be made by check, money order, or deposit account.

BILLING CODE 3510-CN-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Bilateral Textile Consultations With the Government of Malaysia to Review Trade in Category 315

March 13, 1986.

On February 28, 1986, the Government of the United States requested consultations with the Government of Malaysia with respect to Category 315 (cotton printcloth). This request was made on the basis of the agreement between the Governments of the United States and Malaysia relating to trade in cotton, wool, and man-made fiber textile products, effected by exchange of notes dated July 1 and July 11, 1985. The agreement provides for consultations when the orderly development of trade between the two countries may be impeded by imports due to market disruption, or the threat thereof.

The purpose of this notice is to advise the public that, pending agreement on a mutually satisfactory solution concerning this category, the Government of the United States has decided to control imports during the ninety-day consultation period which began on February 28, 1986 and extends through May 28, 1986 at a level of 2,139,148 square yards. If no solution is agreed upon in consultations between the two governments, CITA, pursuant to the agreement, may establish a prorated specific limit of 4,360,344 square yards for Category 315 for the entry and withdrawal from warehouse for consumption of textile products, produced or manufactured in Malaysia and exported during the period beginning on May 29, 1986 and extending through December 31, 1986.

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit imports of cotton textile products in Category 315 produced or manufactured in Malaysia and exported during the ninety-day period which began on February 28, 1986 and extends through May 28, 1986 in excess of the established limit. In the event the limit established for the ninety-day period is exceeded, such excess amounts, if allowed to enter, may be charged to the levels established during the subsequent restraint period.

A summary market statement for this category follows this notice.

Anyone wishing comment or provide data or information regarding the treatment of Category 315 under the agreement with Malaysia, or on any other aspect thereof, or to comment on domestic production or availability of textile products included in the category, is invited to submit such comments or information in ten copies to Mr. Ronald I. Levin, Acting Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230. Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC, and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Malaysia—Market Statement

Category 315—Cotton Printcloth

February 1986.

Summary and Conslusions

U.S. imports of Category 315 from Malaysia were 7,391,000 square yards during 1985, a substantial increase over the 136,000 square yards imported a year earlier. There were no imports of Category 315 from Malaysia in

VOL
51
ISS
52
MR
18
1986
UMI

1983; however, it is now the seventh largest supplier in the United States.

This sharp and substantial increase in imports of low-valued fabric is disrupting the U.S. market for Category 315.

U.S. Production and Producers' Market Share

U.S. production of Category 315 trended downward through 1982 when the U.S. market was severely impacted by recession and by a large carryover of printcloth stocks which had been imported in 1981. Production under these conditions was only 350 million square yards in 1982. After a slow start, production increased to 425 million square yeards in 1983 and to 450 million in 1984. For the first six months of 1985, production dropped 3 percent below the comparable period of 1984 level.

The apparent market for Category 315 is erratic. However, there has been a distinct downward trend in the U.S. producers' share of the market. In 1980, the domestic producers provided 81 percent of the market; in 1984, they provided 57 percent.

Imports and Import Penetration

Imports of Category 315 have been erratic but with a distinct upward trend. Imports in 1984 were a record 338 million square yards, nearly three times the 1980 imports of 116 million square yards. Imports temporarily dropped in 1985 due to embargoes on entries from certain countries and heavy stocks of unsold fabric in the marketing channels.

The ratio of imports to domestic production tripled from 23.5 percent in 1980 to 75.1 percent in 1984.

Duty-Paid Values and U.S. Producer Prices

Approximately 70 percent of the imports from Malaysia are entered under TSUSA No. 328.3927. This is a cotton/polyester printcloth with yarn count in the thirties. This fabric was priced below the U.S. prices for identical fabrics.

Committee for the Implementation of Textile Agreements

March 13, 1986.

Commissioner of Customs
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement, effected by exchange of notes dated July 1 and July 11, 1985, between the Governments of the United States and Malaysia; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on March 19, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 315, produced or manufactured in Malaysia and exported during the ninety-day period which began on February 28, 1986 and extends through May 28, 1986, in excess of 2,139,148 square yards.[1]

Textile products in Category 315 which have been exported to the United States prior to February 28, 1986 shall not be subject to this directive.

Textile products in Category 315 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

the Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,
Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 86-5905 Filed 3-17-86; 8:45 am]

BILLING CODE 3510-DR-M

---

[1] The limit has not been adjusted to account for any imports exported after February 27, 1986.

Import Limits for Certain Cotton Textile Products Produced or Manufactured in Brazil

March 13, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 19, 1986. For further information contact Nathaniel Cohen, Trade Reference Assistant, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 7 and 29, 1985 between the Governments of the United States and the Federative Republic of Brazil provides, among other things, for designated percentage increases in certain categories (swing), and for the borrowing of yardage from the succeeding year's level with the amount used being deducted from the level in the succeeding year (carryforward). Increases for swing and carryforward are being applied to the restraint limits previously established for cotton textile products in Categories 300/301, 313, 317, and 350, produced or manufactured in Brazil and exported during the agreement year which began on April 1, 1985 and extends through March 31, 1986. In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to adjust the restraint limits for these categories.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

Ronald I. Levin,
Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 13, 1986.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive issued to you on October 15, 1985 by the Charmen, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool, and man-made fiber textile products, produced or manufactured in Brazil and exported during the twelve-month period which began on April 1, 1985 and extends through March 31, 1986[1]

Effective on March 19, 1986, the directive of October 15, 1985 is hereby amended to include the following adjusted restraint limits:

Category	Adjusted limits [2]
300/301	9,369,263 pounds.
313	33,800,000 square yards.
317	13,720,909 square yards.
350	67,200 dozen.

[2] The limits have not been adjusted to account for any imports exported after March 31, 1985.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Sincerely,

Ronald I. Levin,
Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 86-5902 Filed 3-17-86; 8:45 am]

BILLING CODE 3510-DR-M

---

[1] The agreement provides, in part, that: (1) Specific limits may be exceeded during the agreement year by designated percentages; (2) Specific limits may be adjusted for carryover and carryforward; and (3) Administrative arrangements of adjustments may be made to resolve minor problems arising in the implementation of the agreement.

Certain Cotton Textile Products Produced or Manufactured in Pakistan

March 13, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 19, 1986. For further information contact Diana Solkoff, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce (202) 377-4212.

Background

In consultations held in December 1985, pursuant to the terms of the Bilateral Cotton Textile Agreement of March 9 and 11, 1982, as amended, between the Governments of the United States and Pakistan, the Government of the United States agreed to rescind calls previously made concerning imports of men's and boys' other cotton coats in Category 334 and cotton dressing gowns in Category 350, produced or manufactured in Pakistan. Accordingly, the import control limits currently in effect are being cancelled. The United States Government reserves the right to request consultations with the Government of Pakistan in the future concerning these categories should imports reach levels which are disruptive to the U.S. market.

The two Governments also agreed during the December 1985 consultations to further amend their bilateral agreement to establish an adjusted aggregate limit of 235,123,446, square yards equivalent for cotton textile products in Categories 300 through 369, exported to the United States during the agreement year which began on January 1, 1986 and extends through December 31, 1986. The United States Government reserves its right under the agreement, as further amended, to deny entry permanently to shipments which are in excess of this adjusted aggregate limit.

In the letter which follows this notice the Chairman of CITA directs the Commissioner of Customs to cancel the import restraint limits in effect for cotton textile products in Categories 334 and 350. Inasmuch as the aggregate limit has already been adjusted in accordance with this amendment, no further instructions to Customs concerning it are needed at this time.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

Ronald I. Levin,
Acting Chairman, Committee for the Implementation of Textile Agreement.

Committee for the Implementation of Textile Agreements

March 13, 1986.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear M. Commissioner: This directive amends, but does not cancel, the directive of December 26, 1985 concerning certain categories of cotton textile products, produced or manufactured in pakistan and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986.

Effective on March 19, 1986, the directive of December 26, 1985 is hereby amended to cancel the import restraint limits established for cotton textile products in Categories 334 and 350.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,
Acting Chairman, Committee for the Implementation of Textile Agreement.

[FR Doc. 86-5904 Filed 3-17-86; 8:45 am]

BILLING CODE 3510-DR-M

Restraint Limit for Wool Textile Products Produced or Manufactured in the Hungarian People's Republic

March 13, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 19, 1986. For further information contact Eve Anderson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

On December 19, 1985 a notice was published in the Federal Register (50 FR 51739) which announced import restraint limits for certain wool textile products, including Category 433 (men's and boys' wool suit-type coats), produced or manufactured in the Hungarian People's Republic and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986. In the letter which follows this notice, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to reduce the limit established for Category 433 from 7,573 dozen to 7,123 dozen to account for carryforward used during the 1985 agreement period.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

Ronald I. Levin,
Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 13, 1986.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 16, 1985, which directed you to prohibit entry of certain wool textile products, produced or manufactured in the Hungarian People's Republic and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986.

Effective on March 19, 1986, the directive of December 16, 1985 is hereby amended to include an adjusted restraint limit of 7,123 dozen in Category 433.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs

VOL 51 ISS 52 MR 18 1986 UMI

exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Deducting Charges From the Import Restraint Limit for Certain Cotton Textile Products Produced or Manufactured in Israel

March 13, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 18, 1986. For further information contact Eve Anderson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

On November 13, 1985 a notice was published in the Federal Register (950 FR 46809), which announced that, on November 4, 1985, the Governments of the United States and Israel had exchanged letters on an arrangement establishing a limit of 750,000 numbers for cotton sheets in Category 361, produced or manufactured in Israel and exported during the seven-month period which began on September 1, 1985 and extends through March 31, 1986. That limit is now filled.

In reviewing the import charges, the Committee for the Implementation of Textile Agreements has determined that an error in the import data has resulted in 189,330 numbers being incorrectly charged to the limit. Accordingly, in the letter which follows this notice the Chairman of CITA directs the Commissioner of Customs to deduct 189,330 numbers from the import charges. This will reopen the category.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

Ronald I Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

March 13, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: To facilitate implementation of the arrangement of November 4, 1985 between the Governments of the United States and Israel, I request that, effective on March 18, 1986, you deduct 189,330 numbers from the imports charged to the restraint limit established in the directive of November 7, 1985 for cotton textile products in Category 361, produced or manufactured in Israel and exported during the seven-month period which began on September 1, 1985 and extends through March 31, 1986.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Request for Extension of Approval of Information Collection Requirements—Flammability Standards for Carpets and Rugs

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1981 (44 U.S.C. Chapter 35), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval through March 31, 1989, of information collection requirements in regulations implementing flammability standards for carpets and rugs. The regulations are codified at 16 CFR Parts 1630 and 1631, and prescribe requirements for testing and recordkeeping by persons and firms issuing guaranties of products subject to the Standard for the Surface Flammability of Carpets and Rugs and the Standard for the Surface Flammability of Small Carpets and Rugs.

Additional Details About the Requested Extension of Approval of Requirements for Collection of Information

Agency address: Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C. 20207.

Title of information collection: Standard for the Flammability of Carpets and Rugs (FF 1-70), 16 CFR Part 1630; Standard for the Flammability of Small Carpets and Rugs (FF 2-70), 16 CFR Part 1631.

Type of request: Extension of approval.

Frequency of collection: Varies depending upon volume of goods manufactured or imported.

General description of respondents: Manufacturers and importers of products subject to the flammability standards for carpets and rugs.

Estimated number of respondents: 120.

Estimated average number of hours for each respondent: 532 per year.

Comments: Comments on this requested extension of approval of information collection requirements should be addressed to Andy Velez-Rivera, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503; telephone: (202) 395-7340. Copies of the request for extension of information collection requirements are available from Francine Shacter, Office of Budget, Planning, and Program Evaluation, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 492-6529.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: March 12, 1986.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Semi-Conductor Dependency

ACTION: Notice of Advisory Committee offer for prearranged public witnesses.

SUMMARY: The Defense Science Board Task Force on Semi-Conductor Dependency will meet on 29 May as previously announced in closed session. However, during the 1300 to 1700 period, public witnesses will be permitted. Any individual or organization desiring to appear before the Task Force is encouraged to submit a written request. Individuals may contact Mr. Maynard, the Task Force Executive Secretary, at OUSDRE, Room 3E114, The Pentagon, Washington, DC 20301, for approval and scheduling.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting this Task Force will evaluate the Department of Defense's Dependency on foreign sources of supply for Semi-Conductors.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Panel meeting, concerns matters listed in 5 U.S.C. 552b(c)(1)(1982), and that accordingly this meeting will be closed to the public, except for the afternoon of 29 May as explained above.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

March 11, 1986.

BILLING CODE 3810-01-M

Defense Science Board Task Force on Use of Commercial Components in Military Equipment; Meeting

ACTION: Notice of Advisory Committee meetings.

SUMMARY: The Defense Board Summer Study Task Force on Use of Commercial Components in Military Equipment will hold preliminary closed sessions on 10 April 1986 in Redondo Beach, California, and on 8 May and 20 June 1986, at the Pentagon, Washington, DC.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting this Task Force will receive classified briefings on military acquisition programs and systems availability and the affect of increased use of commercial items on force posture.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Panel meeting, concerns matters listed in 5 U.S.C. 552b(c)(1)(1982), and that accordingly this meeting will be closed to the public.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

March 12, 1986.

BILLING CODE 3810-01-M

Strategic Defense Initiative Organization

ACTION: Notice of DoD intent to establish a Federally Funded Research and Development Center (FFRDC).

SUMMARY: The Department of Defense announces its intention to establish a Federally Funded Research and Development Center (FFRDC) to support the Strategic Defense Initiative Organization (SDIO) and to designate the FFRDC as the Strategic Defense Initiative Institute (SDII). The purpose of this action is to make continuously available to the Strategic Defense Initiative Organization (SDIO) a relatively small but dedicated technical support unit that can facilitate the utilization, in a manner that is more timely, cost effective, and productive than currently possible, of the large national capability that must be applied to the Strategic Defense initiative Program (SSIP). To accomplish this goal, the support unit personnel must have the across-the-board SDI-related technical skills and functional capabilities to preform a technology evaluation and integration role in support of the SDIO.

The SDII will seek flexible and innovative approaches to solving complex and multidimensional problems for the SDIP. In accomplishing this task, it will tap the broad base of talent, relevant experience, and perspectives available from addressing prior programmatic challenges. This will require contributions from a wide range of agencies and existing organizations, each of which already has some of the resource and skills in the needed areas, but no one of which can address SDIP technical support needs as a unified, coordinate whole

The SDII must be free from actual, potential, or apparent individual or organizational conflicts of interest. It must gain no competitive advantage from its position over those whose efforts it is helping the SDIO oversee; nor lack objectivity as a result of having profit-seeking manufacturing, or other conflicting organizational goals, such as a desire to serve other clients.

It has been decided, based on a careful comparative evaluation by the SDIO of all feasible institutional alternatives, that only a carefully designated, new Federally Funded Research and Development Center (FFRDC) within ready physical access of the SDIO can effectively satisfy the above purpose of the SDII. Accordingly, this announcement is being issued in compliance with the procedures of OFPP Policy Letter 84-1 of April 4, 1984, "Federally Funded Research and Development Centers."

The Mission Statement for the SDII is a follows:

Mission Statement

The specific mission of the SDII will be to perform, in a highly flexible manner, research, studies, and analyses of emerging technologies and system concepts relative to the Strategic Defense Initiative Program (SDIP); and to provide technical evaluation of basic and applied research efforts and program developments by other contractors. In particular, the scope and nature of the effort to be performed by the SDII in support of the SDIO will include, but not be limited to: (1) Identifying and evaluating existing and potential technical advances, technologies, and system concepts from all available sources; (2) Reducing the costs and increasing the effectiveness of basic and applied SDIP research; (3) Providing advice on the relative utility and integration implications of each of the complex technical aspects of the SDIP; (4) Assessing and helping to develop evolving technical requirements, architectures, and their related testbed needs; (5) Performing test and evaluation planning; (6) Integrating Offense/Defense scenarios and analyses into useful conclusions and framing of issues for decision by the SDIO; (7) Developing and maintaining a data base on active SDIP projects and capabilities, and continually analyzing same for overlap, duplication, and opportunities for coordination; (8) Conducting SDIP-related studies and analyses; and (9) Coordinating and performing other technical and liaison tasks, including interface with the pertinent acquisition activities of the military services, related to performance of SDIP-related technical activities in industry, universities, government laboratories, and elsewhere.

This announcement is not a synopsis in accordance with Section 16 of the Office of Federal Procurement Policy Act, or otherwise a synopsis of sources sought in connection with a procurement. Is it being published in response to Paragraph 6b(2) of the Office of Federal Procurement Policy policy letter on FFRDC's which provides

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

Fund for the Improvement of Postsecondary Education

AGENCY: Department of Education.

ACTION: Application notice for the comprehensive program final year dissemination competition for fiscal year 1986.

Applications are invited for new awards to be made in fiscal year 1986 under the Comprehensive Program Final Year Dissemination Competition conducted by the Fund for the Improvement of Postsecondary Education.

Under this competition, the Secretary of Education makes awards to institutions of postsecondary education and other public and private educational institutions and agencies. The purpose of the awards is to improve postsecondary education by supporting the efforts of current grantees to disseminate project ideas and results.

Authority for this program is contained in Part A of Title X of the Higher Education Act, as amended.

(20 U.S.C. 1135)

Closing Date for Transmittal of Applications: An application for a Final Year Dissemination award must be mailed or hand delivered by May 2, 1986.

Applications Delivered by Mail: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: 84.116D, 400 Maryland Avenue SW., Washington, DC 20202.

To establish proof of mailing, an applicant must show one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legibly mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, or receipt from a commerical carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

Applications Delivered by Hand: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Attention: 84.116D, 7th and D Streets SW., Region Office Building 3, Room 3633, Washington, DC.

The Application Control Center will accept hand delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, DC time) daily, except Saturdays, Sundays, and Federal holidays. An application that is hand delivered will not be accepted after 4:30 p.m. on May 1, 1986.

Program Information

Type of Competition: Applications under the Final Year Dissemination competitions are limited to grantees of the Fund whose projects are in their final year of funding, except that a recipient of a single-year grant may apply for assistance under this Competition within one year following the termination of its project.

Selection Criteria: The following selection criteria apply to the fiscal year 1986 competition:

(a) *Significance for Postsecondary Education.* The Secretary reviews each proposed project for its significance in improving post-secondary education by determining the extent to which it would—

(1) Achieve the purposes of the Final Year Dissemination Competition;

(2) Address an important problem or need;

(3) Involve learner-centered improvements;

(4) Achieve far-reaching impact through improvements that will be useful in a variety of ways and in a variety of settings; and

(5) Increase the cost-effectiveness of services.

(b) *Feasibility.* The Secretary reviews each proposed project for its feasibility by determining the extent to which—

(1) The project represents an appropriate response to the problem or need addressed;

(2) The applicant is capable of carrying out the project, as evidenced by the quality of the dissemination project design;

(3) The applicant is capable of carrying out the project, as evidenced by the adequacy of resources, including money, personnel, facilities, equipment, and supplies;

(4) The applicant is capable of carrying out the dissemination project, as evidenced by the applicant's qualifications and relevant prior experience; and

(5) The applicant and any other participating organizations are committed to the success of the dissemination project, as evidenced by contributions of resources and prior work in the area.

(c) *Appropriateness of funding projects.* The Secretary reviews each application to determine whether support of the proposed project by the Fund is appropriate in terms of the availability of other funding sources for

the proposed dissemination activities.
(20 U.S.C. 1135)

The selection criteria (a)(1), (a)(2), (a)(3), (a)(4), (a)(5), (b)(1), (b)(2), (b)(3), (b)(4), (b)(5), and (c) are of equal importance. In applying the criteria, the Secretary first analyzes an application in terms of each individual criterion. The Secretary then bases the final judgment of an application on an overall assessment of the degree to which the applicant addresses all selection criteria.

Other Information To Be Requested from Applicants: During the final stages of the selection process, the Secretary will contact by telephone all applicants being considered for funding in order to clarify or verify information relevant to their applications.

Available Funds: The Department of Education Appropriation Act, 1986 (Pub. L. 99-178), appropriated $12,710,000 for the Fund for the Improvement of Postsecondary Education. Approximately $100,000 will be available for Final Year Dissemination awards under the Comprehensive program. These funds could support approximately 12 new awards. The estimated size of the final year awards is $8,000 for a 12-month period.

These estimates do not bind the U.S. Department of Education to a specific number of grants, or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Application Forms: Application forms included in the program information packages will be sent directly to all potential applicants that are eligible for a Final Year Dissemination award.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. However, the program information package is intended only to aid applicants in applying for assistance under this competition. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirements beyond those specifically imposed under the statute and regulations governing the competition.

(Approved by the Office of Management and Budget under control number 1840-0117)

Applicable Regulations: The regulations governing awards made by the Fund for the Improvement of Postsecondary Education are contained in:

(1) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 78, with the exceptions noted in the regulations referred to below.

(2) The regulations in 34 CFR Part 630.

Further Information: For further information contact the Fund for the Improvement of Postsecondary Education regarding the Comprehensive Program Final Year Dissemination Competition (84.116D), telephone (202) 245-8091.

(U.S.C. 1135)

(Catalog of Federal Domestic Assistance No. 84.116D, Fund for the Improvement of Postsecondary Education—Comprehensive Program Final Year Dissemination Competition)

BILLING CODE 4000-01-M

Office of Bilingual Education and Minority Languages Affairs

Emergency Immigrant Education Program for fiscal year 1986; Application for New Awards

AGENCY: Department of Education.

ACTION: Applicaton notice for new awards under the Emergency Immigrant Education Program for fiscal year 1986.

Programmatic and Fiscal Information

Notice is given that the Secretary has established a closing date for the transmittal of applications for assistance under the Emergency Immigrant Education Program. A State educational agency (SEA) may apply for a grant if it meets the eligibility requirements contained in 34 CFR 581.2. This program provides financial assistance to SEAs for educational services and costs for immigrant children enrolled in elementary and secondary public and nonpublic schools.

For fiscal year 1986 awards to SEAs, $28,710,000 is available. This amount reflects a reduction of $1,290,000 pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985, Pub. L. 99-177.

Applicants should be aware that the President has proposed budget rescissions to the Congress that may eliminate funds for this program. The deadline established in this notice will not be extended and applicants should prepare and submit applications pending further notification. The Secretary estimates that these funds will support 34 States.

These estimates do not bind the U.S. Department of Education to a specific number of grants or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Closing Date for Transmittal of Applications

Applications for new awards must be mailed or hand delivered on or before May 9, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: CFDA No. 84.162, 400 Maryland Avenue SW., Washington, DC 20202.

Each late applicant will be notified that its application will not be considered.

Applications that are hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building No. 3, 7th and D Streets SW., Washington, DC.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, DC time) daily, except Saturdays, Sundays, and Federal holidays.

Applicable Regulations

Regulations applicable to this program include the following:

(a) The regulations governing the Emergency Immigrant Education Program in 34 CFR Part 581.

(b) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, 78, and 79.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of Executive Order 12372 is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

Immediately upon receipt of this notice, applicants that are governmental entities, must contact the appropriate State single point of contact to find out about, and to comply with, the State's process under the Executive Order. Applicants proposing to perform activities in more than one State should contact, immediately upon receipt of this notice, the single point of contact for each State and follow the procedures established in those States under the Executive Order. A list containing the single point of contact for each State is

VOL 51
ISS 52
MR 18
1986
UMI

included in the application package for this program.

In States that have not established a process or chosen this program for review, State, areawide, regional, and local entities may submit comments directly to the Department.

All comments from State single points of contact and all comments from State, areawide, regional, and local entities must be mailed or hand delivered by July 8, 1986 to the following address:

The Secretary, U.S. Department of Education, Room 4181 (CFDA No. 84.162), 400 Maryland Avenue SW., Washington, DC 20202.

PLEASE NOTE THAT THE ABOVE ADDRESS IS NOT THE SAME ADDRESS AS THE ONE TO WHICH THE APPLICANT SUBMITS ITS COMPLETED APPLICATION.

Do Not Send Applications to the Above Address

Application forms

Application forms and program information packages are available.

These may be obtained by writing to the Office of Bilingual Education and Minority Languages Affairs, U.S. Department of Education, 400 Maryland Avenue SW., (Room 421, Reporters Building), Washington, DC 20202. The Office of Bilingual Education and Minority Languages Affairs will mail application forms and program information packages to all SEAs.

Further Information: For further information contact Jonathan Chang, Office of Bilingual Education and Minority Languages Affairs, U.S. Department of Education, 400 Maryland Avenue SW. (Room 421, Reporters Building), Washington, DC 20202. Telephone: (202) 732–1842.

Program Authority: 20 U.S.C. 4101–4108.

For further information concerning licensing of the inventions, please contact Robert J. Marchick, Office of the Assistant General Counsel for Patents, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

Copies of specifications of the listed U.S. patent applications may be obtained, for a modest fee, from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161.

Issued in Washington, DC on March 12, 1986.

J. Michael Farrell,

General Counsel.

Department of Energy Patent Applications

Serial No. and Title of Invention

667,255—Liquid-Film Electron Stripper
668,054—Fabrication of Low Density Ceramic Material
670,777—In-Line Beam Current Monitor
672,228—Thermoacoustic Magnetohydrodynamic Electrical Generator
672,229—Multi-port Valve Assembly
673,450—Tokamak Reactor First Wall
673,968—Method of Forming a Foamed Thermoplastic Polymer
673,969—Organic Metal Neutron Detector
673,970—Preparing Reflective Substrate Surfaces for Laser Treatment
676,045—Abrasive Slurry Composition for Machining Boron Carbide
676,046—Method for Improving Product Yields in an Anionic Metalloporphyin-Based Artificial Photosynthesis System
676,047—Transmissive Metallic Contact for Amorphous Silicon Solar Cells
676,149—Spot Test for 1,3,5-Triamino-2,4,6-Trinitrobenzene, TATB
676,338—Density Gradient Free Electron Collisionally Excited X-Ray Laser
676,340—Short Protection Device for Stack of Electrolytic Cells
676,342—Microwave Coupler and Method
676,343—Method of Synthesizing and Growing Copper-Indium-Diselenide ($CuInSe_2$) Crystals
676,344—Apparatus for Connecting Aligned Abutted Tubes
678,148—Cycling Cryopump
678,202—Process for Selectively Patterning Epitaxial Film Growth on a Semiconductor Substrate
678,913—Dump Assembly
679,841—Magnetically Focussed Liquid Drop Radiator
679,842—Method of Preparing P–I–N–Junctions in Amorphous Silicon Semiconductors
684,099—Process for Producing Peracids from Aliphatic Hydroxy Carboxylic Acids
685,013—Preparation of Nuclear Fuel Spheres by Flotation-Internal Gelation
685,096—Method for Sensing and Measuring a Concentration or Partial Pressure of a Reactant Used in a Redox Reaction
685,100—Process for Converting Magnesium Fluoride to Calcium Fluoride
685,177—Low Voltage Solid-State Lateral Coloration Electrochromic Device
688,668—Composite Material for Thermal Energy Storage
688,669—Electrolysis Cell for Reprocessing Plutonium Reactor Fuel
688,670—Optical Emission Line Monitor With Background Observation and Cancellation
688,671—Production of Glass or Glass-Ceramic to Metal Seals with the Application of Pressure

688,672—Miniature Plasma Accelerating Detonator and Method of Detonating Insensitive Materials
688,673—Radioactive Waste Disposal Package
689,104—Liquid Chromatography/Fourier Transform IR Spectrometry Interface Flow Cell
689,735—Glass Electrolyte Composition
690,022—Recirculating Electric Air Filter
690,023—Disk Filter
690,218—Narrow Band Gap Amorphous Silicon Semiconductors
690,544—Progressing Batch Hydrolysis Process
691,825—High Efficiency, Direct Detection of Ions from Resonance Ionization of Sputtered Atoms
692,747—Diagnostic Apparatus and Method for Use in the Alignment of One or More Laser Means Onto a Fiber Optics Interface
692,748—Recirculating Cross-Correlation Detector
692,760—Optical Switch
696,273—First Wall for Polarized Fusion Reactors
696,276—Extrusion Cast Explosive
696,547—Isoptic Generator for Bismuth-212 Based on Radium
696,548—Apparatus and Method for the Preparation of Dioxygen Difluoride
696,549—Apparatus for Laser Beam Profile Measurements
696,550—Machine Imparting Complex Rotary Motion for Lapping a Spherical Inner Diameter
697,296—Phase Comparator Apparatus and Method
697,824—Fiberoptic Spectrophotometer
697,828—Predicting Threshold and Location of Laser Damage on Optical Surfaces
697,989—Direct Fissile Assay of Enriched Uranium Using Random Self-Interrogation and Neutron Coincidence Response
699,092—Low Activation Ferritic Alloys
699,878—Log Amplifier with Pole Zero Compensation
699,879—Microwave Detector
699,887—Control System for a Small Fission Reactors
699,889—Removal of Sulfur and Nitrogen Containing Pollutants from Discharge Gases
700,845—Synthesis of New Amorphous Metallic Spin Glasses
701,010—Magnetic Shielding
702,540—Flexible Swivel Connection
702,569—Excimer Laser Phototherapy for the Dissolution of Abnormal Growth
702,692—Reactor Design for Uniform Chemical Vapor Deposition-Grown Films Without Substrate Rotation
702,715—Semiconductor Electrode with Improved Photostability Characteristics
702,716—Semiconductor Bridge (SCB) Igniter
702,751—Gated Strip Proportional Detector
702,752—Boiling Water Neutronic Reactor Incorporating a Process Inherent Safety Design
703,577—Steady-State Inductive Spheromak Operation
704,114—Pulse-Excited, Auto-Zeroing Multiple Channel Data Transmission System
704,115—Multiple Channel Optical Data Acquisition system
704,455—Gas Ampoule-Syringe
704,697—Inorganic-Polymer-Derived Dielectric Films

[FR Doc. 86–5877 Filed 3–17–86; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project Nos. 9556–000, et al.]

Hydroelectric Applications (Kamargo Corp., et al.); Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1 a. Type of Application: Preliminary Permit.

b. Project No.: 9556–000.

c. Date Filed: October 24, 1985.

d. Applicant: Kamargo Corporation.

e. Name of Project: Poors Island.

f. Location: Black River, Jefferson County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Paul J. Elston, 420 Lexington Avenue, Suite 440, New York, NY 10170, (212) 986–0440.

i. Comment Date: May 7, 1986.

j. Description of Project: The proposed project would develop the unutilized capacity at the licensed Black River Project No. 2569, which includes: (1) An existing concrete gravity dam, 770 feet long and 23 feet high; (2) an existing concrete gravity dam 90 feet long, to be demolished; and (3) an existing impoundment 40 acres in surface area with a storage capacity of 460 acre-feet at a normal maximum surface elevation of 564 feet mean sea level. The proposed project would consist of: (1) A proposed intake/powerhouse structure of reinforced concrete, 100 feet long and 120 feet wide; (2) a proposed excavated intake channel 170 feet long, 120 feet wide and 25 feet deep; (3) three proposed turbine/generators of 3.65 MW capacity each; (4) a proposed 23 kV transmission line 800 feet long; and (5) appurtenant facilities.

The estimated annual energy production is 16,000,000 kWh. The net hydraulic head is 22 feet. Project power would be sold to Niagara Mohawk Power Corporation. The dams are owned by Niagara Mohawk Power Corporation.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, & D2.

l. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $160,000.

2 a. Type of Application: Preliminary Permit.

b. Project No. 9655–000.

c. Date Filed: December 2, 1985.

d. Applicant: American Power Producers, Inc.

e. Name of Project: Lake Isabel.

f. Location: On Lake Isabel in Sec. 36, T.28N., R.9E., in the Mt. Baker Snoqualmie National Forest near the town of Goldbar in Snohomish County, Washington.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Roy W. Johnson, American Power Producers, Inc., 1819—12th Avenue, Seattle, WA 98122, (206) 323–3150.

i. Comment Date: May 2, 1986.

j. Description of Project: The proposed project would consist of: (1) A 32-foot-high dam at elevation 2,842 feet; (2) a 9,900-foot-long penstock; (3) a powerhouse containing one generating unit with a rated capacity of 5,000 kW; and (4) a 250-foot-long transmission line. Applicant estimates the average annual energy production to be 43,800,000 KWh.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 36 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $9,000. No new roads would be constructed or drilling conducted during the feasibility study.

k. Purpose of Project: The power produced is proposed to be sold to the local power company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C and D2.

3 a. Type of Application: License (Over 5MW).

b. Project No.: 8990–000.

c. Date Filed: March 1, 1985.

d. Applicant: Noah Corporation.

e. Name of Project: Opekiska Lock and Dam.

f. Location: At the U.S. Army Corps of Engineers' Opekiska Lock and Dam on the Monongahela River in Monongalia County, West Virginia.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. James B. Price, President, Noah Corp., P.O. Drawer 640, Aiken, SC 29802, (803) 649–1115.

i. Comment Date: April 18, 1986.

j. Competing Application: Project No. 8179–000, Date Filed: March 19, 1984.

k. Description of Project: The proposed run-of-river project would utilize the U.S. Army Corps of Engineers' Opekiska Lock and Dam and would consist of: (1) A new intake structure; (2) a new powerhouse with a 10-MW turbine-generator unit; (3) a new tailrace; (4) a new 4,400-foot-long transmission line; and (5) other appurtenances. Applicant estimates an average annual generation of 34,700 MWh.

l. Purpose of Project: Project energy would be sold to the Monongahela Power Company.

m. This notice also consists of the following standard paragraphs: A4, B, and C.

4 a. Type of Application: Preliminary Permit.

b. Project No.: 9622–000.

c. Date Filed: November 15, 1985.

d. Applicant: Adirondack Hydro Development Corporation.

e. Name of Project: Ploof Falls.

f. Location: St. Regis River in Franklin County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Malcolm M. Preston, Adirondack Hydro Development Corporation, Market Street, Potsdam Industrial Plaza, Potsdam, NY 13676, (315) 265–6090.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing 8-foot-high, 250-foot-long concrete dam owned by the State of New York; (2) an existing reservoir with a surface area of 3 acres and a gross storage capacity of 30 acre-feet and a water surface elevation of 1,120 feet msl; (3) a proposed 96-inch-diameter, 60-foot-long penstock; (4) a proposed powerhouse containing a generating unit with a rated capacity of 925-kW; and (5) a proposed 1,800-foot-long transmission line tying in to the existing Niagara Mohawk Power Corporation system. The Applicant estimates a 4,980,000 kWh average annual energy production.

k. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending on the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under the permit would be $110,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

5 a. Type of Application: License (5 MW or less).

b. Project No.: 8460–001.

c. Date Filed: June 10, 1985.

d. Applicant: Contoocook Valley Paper Company, Inc.

e. Name of Project: West Hennicker.

f. Location: Contoocook River in Merrimack County, New Hampshire.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Ms. Mary E. Fletcher, President, Contoocook Valley Paper Company, Inc. P.O. Box 434, Milford, NH 03055, (603) 428–3263.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would consist of (1) An existing 12-foot-high, 137-foot-long concrete dam owned by the Applicant with a crest elevation of 430 feet msl; (2) an existing reservoir with a surface area of 10 acres and a storage capacity of 98 acre-feet; (3) a proposed powerhouse at the dam containing a generating unit with a rated capacity of 95 kW; (4) a proposed canal 20 to 30-foot-wide, 5 to 12-foot-high, 1,000-foot-long; (5) a proposed millpond with a surface area of 1 acre and a storage capacity of 5 acre-feet; (6) a proposed 20-foot-high, 50-foot-long intake structure; (7) four 8-foot-diameter, 350-foot-long penstocks; (8) a proposed powerhouse containing a generating unit with a rated capacity of 1,400 kW; (9) a proposed 250-foot/long transmission line tying into the existing Pubic Service Company of New Hampshire system. The Applicant estimates a 4,189,300 kWh average annual energy production.

k. Purpose of Project: Power will be sold to the Public Service Company of New Hampshire.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, and Dl.

6 a. Type of Application: Preliminary Permit.

b. Project No: 9793–000.

c. Date Filed: December 30, 1985.

d. Applicant: Hillcrest Hydroelectric Company.

e. Name of Project: Hillcrest.

f. Location: Upper Ammonoosuc River in Coos County, New Hampshire.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Harold Turner, Jr., Hillcrest Hydroelectric Company, P.O. Box 7191, Concord, NH 03301, (603) 497–3940.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing 17-foot-high, 105-foot-long concrete dam owned by the Berlin Water Department; (2) an existing reservoir with a surface area of 4.5 acres and a storage capcity of 40 acre-feet at elevation 1,490 feet msl; (3) an existing 16-inch-diameter, 27,700-foot-long penstock; (4) a proposed powerhouse containing a generating unit with a rated capacity of 50 kW; and (5) a proposed 1,600-foot-long transmission line typing into the existing Public Service Service Company of New Hampshire system. The Applicant estimates a 425,00 kWh average annual energy production.

k. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $5,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

7a. Type of Application: Minor License.

b. Project No: 9654–000.

c. Date Filed: November 29, 1985.

d. Applicant: Martin Wirkkala.

e. Name of Project: Burnham Creek.

f. Location: On Burnham Creek in Sec. 21, T10N, R9W, near Naselle in Pacific County, Washington.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. R. L. Van Wormer, Independent Ecological Services, 1514 Muirhead, Olympia, WA 98502, (206) 943–0127.

i. Comment Date: May 9, 1986.

j. Description of Project: The existing project would consist of: (1) A 20-foot-high earthen dam; (2) a reservoir with a surface area of 5.57 acres with a water surface elevation of 53.2 feet MSL; (3) a 76-foot-long penstock varying in diameter from 30 inches to 18 inches; (4) a powerhouse containing one generating unit rated at 23 kW, producing an average annual output of 43,000 kWh; and (5) a 1,500-foot-long, 600-volt transmission line.

k. Purpose of Project: The power produced is proposed to be sold to the local power company.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

8 a. Type of Application: Transfer of License.

b. Project No.: 2615–004.

c. Date Filed: December 30, 1985.

d. Applicant: Central Maine Power Company, Scott Paper Company, Milstar Manufacturing, and the Madison Paper Corporation (Owners of Brassua Dam or Transferors) and the Brassua Hydroelectric Limited Partnership.

e. Name of Project: Brassua Storage Project.

f. Location: On the Moose River in Somerset County, Maine.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. John Gulliver, c/o Peirce, Atwood, Scribner, Allen, Smith, & Lancaster, One Monument Square, Portland, ME 04101, (207) 773–6411.

i. Comment Date: April 21, 1986.

j. Description of Project: On September 16, 1977, a minor license was issued to the Central Maine Power Company, the Milstar Manufacturing Corporation and the Kennebec River Pulp and Paper Company, Inc. to construct, operate and maintain the Brassua Storage Project No. 2615. Subsequently, by order issued June 14, 1978, the Commission approved the transfer of Kennebec River Pulp and Paper Company, Inc.'s interest in Project No. 2615 to the Madison Paper Corporation. It is now proposed to transfer the license to the Owners of Brassua Dam and the Brassua Hydroelectric Limited Partnership (hereinafter referred to as the "Co-Transferees"). The Co-Transferees are an unincorporated association of domestic corporations (the Owners of Brassua Dam) and a private limited partnership organized under the laws of the State of Maine (Brassua Hydroelectric Limited Partnership). The purpose of the proposed transfer is to facilitate the expeditious development of hydroelectric generation capacity at the project. As stated in the application for amendment of license for the Brassua Dam filed simultaneously with this application for license transfer, the proposed development of hydroelectric generation capacity at the project will result in annual production of approximately 17 million kWh, thereby, reducing Maine's dependence on fossil fuels. Approval of the license transfer will be in the public interest because it will place both the license and the project properties in the hands of Co-transferees, entities appropriately structured and qualified to undertake the financial and operational steps necessary to develop the project expeditiously. Co-transferee, Owners of Brassua Dam, consists of corporate entities having business experience in the financing, design, and development of hydroelectric projects. Co-transferee, Brassua Hydroelectric Limited Partnership, a new entity, is structured so as to attract the level of financial participation necessary to ensure successful development of the project, and has, as its general partner, Swift River/Hafslund Company, an entity having business experience in the financing, design, and development of hydroelectric projects.

k. This notice also consists of the following standard paragraphs: B and C.

9 a. Type of Application: Preliminary Permit.

b. Project No.: 9897–000

c. Date Filed: February 3, 1986.

d. Applicant: Salmon Falls Creek Associates.

e. Name of Project: Salmon Falls Creek.

f. Location: At Salmon Falls Dam on Salmon Falls Creek in Twin Falls County, Idaho

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Jordan Walker, 484 East 300 North Manti, UT 84642, (801) 835–0202.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would utilize the Salmon Falls Canal Company's existing Salmon Falls Dam and would consist of: (1) The existing 226-foot-high earthfilled dam; (2) the existing reservoir which has a surface area of 3,000 acres and a 228,000 acre/feet storage capacity at reservoir elevation 5007 feet; (3) a 1,000-foot-long, 48-inch-diameter penstock; (4) a powerhouse containing a generating unit with a capacity of 4702 kW and an average annual generation of 8,231 MWh; and (4) a 2-mile-long transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 36 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $85,000. No new roads would be constructed or drilling conducted during the feasibility study.

k. Purpose of Project: Project power would be sold.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, D2.

10 a. Type of Application: Preliminary Permit.

b. Project No. 9899–000.

c. Date Filed: February 3, 1986.

d. Applicant: Plymouth Dam Associates.

e. Name of Project: Plymouth Dam.

f. Location: On the Schuylkill River in Montgomery and Chester Counties, Pennsylvania.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mike Graham, 484 East 300 North, Manti, UT 84642, (801) 835–0202.

i. Comment Date: April 18, 1986.

j. Competing Application: Project No. 9531–000, Date Filed October 9, 1985.

k. Description of Project: The proposed project would consist of: (1) The existing 8.2-foot-high and 530-foot-long gravity and timber crib Plymouth Dam owned by the Pennsylvania Department of Environmental Resources; (2) a reservoir with a surface area of 500 acres; (3) a new intake structure; (4) a new powerhouse at the dam with 4 turbine-generator units with a total installed capacity of 1,600 kW; (5) a new 12–kV and 1-mile-long transmission line; and (6) other appurtenances. Applicant estimates an average annual generation of 7,000,000 kWh.

l. Purpose of Project: Project energy would be sold to Philadelphia Electric Power.

m. This notice also consists of the following standard paragraphs: A8, B, C, and D2.

n. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time it would prepare studies of the hydraulic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of the studies, Applicant would prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be $50,000.

11 a. Type of Application: License (5 MW or less).

b. Project No. 9175-001.

c. Date Filed: May 31, 1985.

d. Applicant: Rivers Electric Co., Inc.

e. Name of Project: Eddyville Falls Dam.

f. Location: Rondout Creek in Ulster County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Charles R. Pepe, River Electric Co., Inc., 120 North Pascack Road, Spring Valley, NY 10977, (914) 356–1900.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing 11-foot-high, 220-foot-long gravity dam owned by Michael and Florence Briglia and has a crest elevation of 16 feet msl; (2) an existing reservoir with negligible storage capacity and a surface area of 15 acres; (3) a proposed powerhouse at the base of the dam containing a generating unit with a rated capacity of 1,392 kW; (4) a proposed 200-foot-long transmission line tying into the existing Central Hudson Gas and Electric Corporation's system; and (5) appurtenant facilities. The Applicant estimates a 6.0 million kWh average annual energy production.

k. Purpose of Project: Power generated would be sold to Central Hudson Gas and Electric Corporation.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

12 a. Type of Application: Preliminary Permit.

b. Project No: 9638–000.

c. Date Filed: November 22, 1985.

d. Applicant: Lock 16 Associates.

e. Name of Project: Mississippi Lock & Dam No. 16.

f. Location: On the Mississippi River in Rock Island County, Illinois and Muscatine County, Iowa.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. J. Kirk Rector, Lock 16 Associates, 5041 S. Boabab Drive, Salt Lake City, UT 84117, (801) 272–2030.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would utilize the existing U.S. Army Corps of Engineers Mississippi Lock and Dam No. 16, and would consist of: (1), 35 new steel penstocks each 60 feet long and 16 feet in diameter; (2) a new concrete powerhouse approximately 900 feet by 84 feet containing 35 turbine/generator units having a total installed capacity of 14,000 kW operating at 9 feet of hydraulic head; (3) a new rock tailrace approximately 130 feet long and 900 feet wide; (4) a new 28,000-foot-long 115-kV transmission line; and (5) appurtenant facilities. The Applicant estimates the average annual energy production to be 74.8 GWh.

k. Purpose of Project: The Applicant intends to sell the power generated at the proposed facility to the City of Muscatine, Iowa.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $155,000.

h. Contact Person: Mr. Jeff Burt, President, Idaho Natural Energy, Inc., 165 Wright Brothers Drive, Salt Lake City, Utah 84116 and Mr. Clark M. Mower, Vice-President, Bingham Engineering, 100 Lindbergh Plaza 2, 5160 Wiley Post Way, Salt Lake City, Utah 84116 (801) 532–2520.

i. Comment Date: May 9, 1986.

j. Description of Project: The proposed project would consist of: (1) An 8-foot-high, 75-foot-wide concrete diversion dam having sluice gates, trashracks, fish screening and a fish bypass located at elevation 3,450 feet; (2) a 27,770-foot-long steel penstock with a diameter varying from 72-inches, 66-inches, and 60-inches; (3) a 100-foot-wide, 50-foot-long, 30-foot-high powerhouse containing two generating units with a total rated capacity of 30 MW, producing an estimated annual average output of 81.8 million kWh; (4) a 20-foot-wide, 30-foot-long tailrace discharging water released from the turbines into Smith Creek at elevation 1,840 feet above Smith Falls; (5) a 700-foot-long, 115-kV transmission line interconnecting to an existing Northern Light Inc. transmission system. The existing system will be upgraded 30-miles to an existing Bonneville Power Authority Substation in Bonners Ferry, Idaho; (6) a 1,100-foot-long, 20-foot-wide access road allowing access from Forest Service Road # 281 to the south side of the diversion structure permitting construction and maintenance activities; and an existing 200-foot-long logging road widened to permit access to the diversion dam from the north side.

The cost of the project would be $27,381,000 dollars.

k. Purpose of Project: Project power will be sold to either Pacific Power and Light Company or Idaho Power Company.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

14 a. Type of Application: Preliminary Permit.

b. Project No.: 9630–000.

c. Date Filed: November 19, 1985.

d. Applicant: Joint Venturers.

e. Name of Project: Burnside Project.

f. Location: Hockanum River in Hartford County, Connecticut.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Brooke J. Pennypacker, Hydro-Tech, Inc., P.O. Box 277, South Barre, MA 01074, (617) 355–2139.

i. Comment Date: May 8, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing 12-foot-high, 160-foot-long concrete gravity dam; (2) a reservoir with a surface area of 3 acres, a storage capacity of 21 acre-feet, and a normal water surface elevation of 34 feet m.s.l.; (3) a concrete intake structure; (4) a 62-foot-long masonry intake flume; (5) an existing concrete and brick powerhouse containing one generating unit with a capacity of 150 kW; (6) a 251-foot-long concrete, stone, and earth tailrace; (7) an existing transmission line, 150 feet long; and (8) appurtenant facilities. The Applicant estimates the average annual generation would be 570,000 kWh. The existing dam is owned by Joint Venturers, East Hartford, Connecticut.

k. Purpose of Project: Project power would be sold to the Connecticut Light and Power Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, & D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time it would prepare studies of the hydraulic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of the studies, Applicant would prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be $3,500.

15 a. Type of Application: Preliminary Permit.

b. Project No.: 9784–000.

c. Date Filed: December 30, 1985.

d. Applicant: North American Hydro, Inc. and Renaissance Hydro Associates.

e. Name of Project: Manawa Dam Project.

f. Location: On the Little Wolf River in the City of Manawa, Waupaca County, Wisconsin.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Charles Alsberg, North American Hydro, Inc., P.O. Box 167, Neshkoro, WI 54960, (414) 293–4628.

i. Comment Date: May 12, 1986.

j. Description of Project: The proposed project would consist of: (1) The existing Manawa Dam approximately 114 feet long and 16 feet high; (2) an existing 195-acre reservoir having a storage capacity of 1,078 acre-feet; (3) an existing concrete powerhouse approximately 20 feet by 32 feet containing two turbine/generator units having a total installed capacity of 250 kW operating at 12 feet of hydraulic head; and (4) appurtenant facilities. The existing facilities would be rehabilitated and place back into service. An existing 12.7-kV transmission line is available at the site. The Applicant estimates that the average annual energy generation would be 900,000 kWh. The project dam is owned by the City of Manawa.

k. Purpose of Project: The Applicant intends to sell the power generated at the proposed facility to the Wisconsin Power and Light Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, & D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $15,000.

16 a. Type of Application: Preliminary Permit.

b. Project No: 9781–000.

c. Date Filed: December 30, 1985.

d. Applicant: North American Hydro, Inc. and Renaissance hydro Associates.

e. Name of Project: Chetek Dam Project.

f. Location: On the Chetek River in the City of Chetek, Barron County, Wisconsin.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Charles Alsberg, North American Hydro, Inc., P.O. Box 167, Neshkoro, WI 54960, (414) 293–4628.

i. Comment Date: May 7, 1986.

j. Description of Project: The proposed project would consist of: (1) The existing concrete Chetek Dam approximately 110 feet long and 12 feet high; (2) an existing 3,425-acre reservoir having a storage capacity of 28,500 acre-feet; (3) an existing powerhouse located at the east end of the dam spillway containing a single turbine/generator unit with a capacity of 250 kW operating at 12 feet of hydraulic head; and (4) appurtenant facilities. The existing facilities would be rehabilitated and placed back into service. An existing 12.7-kV transmission line is available at the site. The Applicant estimates that the average annual energey generation would be 650,000 kWh. The project is owned by Barron County.

k. Purpose of Project: The Applicant intends to sell the power generated at the proposed facility to Northern States Power Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, & D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $15,000.

d. Applicant: Taft hydropower, Inc.

e. Name of Project: Fort Drum Hydropower Porject.

f. Location: On the Indian River near Antwerp, Jefferson County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person:

Mr. Lawrence R. Taft, 10315 Caughdenoy Rd., Central Square, NY 13036, (315) 437–2547

Mr. Neal F. Dunlevy, Stetson Dale Engineering PC, 185 Genesee St., Utica, NY 13501, (315) 797–5800.

i. Comment Date: May 7, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing stone masonry gravity dam approximately 250 feet long and 12 feet high; (2) an existing 30 acre reservoir with a storage capacity of 150 acre-feet at an elevation of 514 msl (the use of flashboards 3 feet high will be investigated); (3) a new intake cannel 15 feet wide, 7 feet deep, and 200 feet long; (4) a proposed intake structure, gate, and trash racks; (5) a new penstock eight feet in diameter and 150 feet long; (6) a new reinforced concrete powerhouse 15 feet wide, 25 feet long, and 10 feet high housing one 500 kW bulb turbine-generator; (7) a proposed tailrace 15 feet wide, 7 feet deep, and 50 feet long; (8) a proposed 13.8 kV transmission line approximately 3,000 feet long; and (9) appurtenant facilities. The Applicant estimates that the average annual energy generation would be 2.0 GWh. The project energy would be sold to the Niagara Mohawk Power Company. The dam is owned by the Village of Antwerp, New York.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

l. Proposed Scope under this Permit: A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $25,000.

19 a. Type of Application: Preliminary Permit.

i. Comment Date: April 21, 1986.

j. Competing Application: Project No. 9804, Date Filed 12–30–85.

k. Description of Project: The proposed project would consist of: (1) A 10-foot-high diversion dam at elevation 6,080 feet; (2) a 1.25-mile-long canal (3) a 700-foot-long, 96-inch-diameter penstock; (4) a powerhouse containing a generating unit with a capacity of 2,650 kW and an average annual generation of 15.8 GWh; and (5) a 1.3-mile-long Transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 36 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $145,000. No new roads would be constructed or drilling conducted during the feasibility study.

l. Project power would be sold.

j. Competing Application: Project No. 9656, Date Filed: 12/02/85; Due Date: April 7, 1986.

k. Description of Project: The proposed project would consist of: (1) A 6-foot-high diversion dam at elevation 2600 feet; (2) a 4,150-mile-long, 60-inch-diameter penstock; (3) a powerhouse containing a generating unit with a capacity of 1,810 kW and an average annual generation of 7,927,800 kWh; and (4) a 1.8-mile-long transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 36 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $85,000. No new roads would be constructed or drilling conducted during the feasibility study.

l. Purpose of Project: Project power would be sold.

m. This notice also consists of the following standard paragraphs: A8, B, C, D2.

Standard Paragraphs

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted in response to this notice.

A4. Development Application—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, any competing development applications or notices of intent to file competing development applications, must be filed in response to and in compliance with the public notice of the initial development application. No competing applications or notices of intent may be filed in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36 (1985)). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application.

A competing preliminary permit application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application.

A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A8. Preliminary Permit—Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit and development applications or notices of intent. Any competing preliminary permit or development application, or notice of intent to file a competing preliminary permit or development application, must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice.

A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION",

"COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC. 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203–RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. *Agency Comments*—Federal State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D2. *Agency Comments*—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in section 408 of the Energy Security Act of 1980, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 30 of the Federal Power Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: March 13, 1986.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–5909 Filed 3–17–86; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP83–30–043]

Transcontinental Gas Pipeline Corp.; Proposed Changes in FERC Gas Tariff

March 12, 1986.

Take notice that on February 28, 1986, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing certain revised tariff sheets to Original Volume No. 2 of its FERC Gas Tariff, proposed to be made effective April 1, 1986. Transco states that such sheets are being filed in compliance with Article IV of the "Interim Settlement Agreement as to Rates of Transcontinental Gas Pipe Line Corporation" (Interim Settlement) approved by the Commission as an uncontested settlement in Transco's Docket No. RP83–30. The revised tariff sheets are being filed to implement the second of three increments of the conversion of Transco's production area transportation rates to rolled-in, mileage-based rates as required by the Interim Settlement.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 19, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

Environmental assessments (EA's) were prepared for the above proposed projects. Based on independent analyses of the above actions as set forth in the EA's the Commission's staff concludes that these projects would not have significant effects on the quality of the human environment. Therefore, environmental impact statements for these projects will not be prepared. Copies of the EA's are available for review of the Commission's Division of Public Information, Room 1000, 825 North Capitol Street NW., Washington, DC 20426.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. QF86-375-001]

Garden State Paper Co., Inc.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

March 12, 1986.

On March 4, 1986, Garden State Paper Company, Inc. (Applicant), of 950 River Drive, Garfield, New Jersey 07026 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The facility is a topping-cycle cogeneration facility, wholly owned and operated by the applicant, and is located at 950 River Drive, Garfield, New Jersey. The facility contains five power boilers and is equipped with four turbine generators, and furnishes steam, electricity, mechanical energy and heated water. The electric power production capacity is 15 megawatts. The primary energy sources used by the facility are Natural Gas, 2.8% Sulfur No. 6 oil and .3% Sulfur No. 6 Oil. The facility was installed prior to November 9, 1978.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. QF86-542-000]

Springfield Hydroelectric Co.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

March 12, 1986.

On February 28, 1986, Springfield Hydroelectric Company, (Applicant), of 26 State Street, Montpelier, Vermont 05602 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The 400 kilowatt hydroelectric facility (FERC P. 8014) will be located on the Black River in Windsor County, Vermont.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 211 and

214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

A separate application is required for a hydroelectric project license, preliminary permit or exemption from licensing. Comments on such applications are requested by separate public notice. Qualifying status serves only to establish eligibility for benefits provided by PURPA, as implemented by the Commission's regulations, 18 CFR Part 292. It does not relieve a facility of any other requirements of local, State or Federal law, including those regarding siting, construction, operation, licensing and pollution abatement.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Notice of Implementation of Special Refund Procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding to adversely affected parties $100,000 gained as a result of a consent order which the DOE entered into with Ferrell Companies, Inc., a reseller-retailer of petroleum products, located in Liberty Missouri. The money is being held in escrow following the settlement of enforcement proceedings brought by the DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Comments must be filed within 30 days of publication of this notice in the **Federal Register** and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC. 20585. All comments should conspicuously display a reference to case number HEF-0587.

FOR FURTHER INFORMATION CONTACT: Sharon Dennis, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC. 20585 (202) 252-6602.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulation of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision sets forth procedure and standards that the DOE has tentatively formulated to distribute to adversely affected parties $100,000 plus accrued interest obtained by the DOE under the terms of a consent order enterd into with Ferrell Companies, Inc. The funds were provided to the DOE by Ferrell to settle all claims and disputes between the firm and the DOE regarding the manner in which the firm applied the federal price regulations with respect to its sales of propane during the consent order period October 1, 1973, through January 27, 1981.

OHA proposes that a two-stage refund process be followed. In the first stage, OHA has tentatively determined that a portion of the consent order funds should be distributed to firms and individuals who purchased propane from Ferrell. In order to obtain a refund, a claimant will be required to submit a schedule of its monthly purchases from Ferrell and to demonstrate that it was injured by Ferrell's pricing practices. Applicants must submit specific documentation regarding the date, place, and volume of product purchased, whether the increased costs were absorbed by the claimant or passed through to other purchasers, and the extent of any injury alleged to have been suffered. An applicant claiming $5,000 or less, however, will be required to document only its purchase volumes.

Applications for refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Some residual funds may remain after all meritorious first-stage claims have been satisfied. OHA invites interested parties to submit their views concerning alternative methods of distributing any remaining funds in a subsequent proceeding.

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice. All comments received in this proceeding will be available for public inspection between 1:00 and 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E-234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: March 7, 1986.

George B. Breznay,

Director, Office of Hearings, and Appeals.

Implementation of Special Refund Procedures

March 7, 1986.

Name of Firm: Farrell Companies, Inc.
Date of Filing: June 4, 1985.
Case Number: HEF-0587.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special procedures to distribute funds received as a result of an enforcement proceeding in order to remedy the effects of actual or alleged violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. In accordance with the provisions of Subpart V, on June 4, 1985, ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with Ferrell Companies, Inc. (Farrell) and its subsidiaries.[1]

I. Background

Ferrell is a "reseller-retailer" of covered products as that term was defined in 10 CFR 212.31 with its home office located in Liberty, Missouri. A DOE audit of Ferrell's records revealed possible violations of the Mandatory Petroleum Price Regulations 10 CFR Part 212, Subpart F. The audit alleged that between October 1, 1973 and January 27, 1981, Ferrell committed certain pricing violations in its sales of propane.[2]

In order to settle all claims and disputes between Ferrell and the DOE regarding the firm's sales of propane during the period covered by the audit, Ferrell and the DOE entered into a consent order on December 12, 1984.[3]

---

[1] The subsidiaries of Ferrell Companies, Inc., a Kansas corporation, are: Ferrell Companies, Inc., a Delaware corporation; Sentry Underground Storage Company; Indian Wells Oil Company; FCI, Inc.; Propane Industrial, Inc.; Ferrell Leasing Corporation; Indian Wells Production Company; Ferrell Securities, Inc.; One Liberty Plaza, Inc.; One Liberty Plaza Real Estate, Inc.; and Ferrellgas, Inc. For purposes of this proceeding, any reference to Ferrell includes its subsidiaries.

[2] The audit involved only two of Ferrell's subsidiaries, Ferrellgas, Inc. and Propane Industrial, Inc.

[3] We note, however, that the consent order has no effect upon, and resolves no matters regarding, the claims pending in Indian Wells Oil Company, Case No. HRO-0075, nor does it resolve any liability which Ferrell may have for the amounts claimed in that case based on any ownership interest which Ferrell may hold in Indian Wells.

VOL

1986
UMI

The consent order refers to ERA's allegations of overcharges, but notes that there was no finding that violations occurred. In addition, the consent order states that Ferrell does not admit that it violated the regulations.

Under the terms of the consent order, Ferrell agreed to deposit $100,000 into an interest-bearing escrow account for ultimate distribution by the DOE. Ferrell remitted this sum on December 12, 1984. This decision concerns the distribution of the funds in the Ferrell escrow account.[4]

II. Proposed Refund Procedures

The procedural regulations of the DOE set forth general guidelines which may be used by OHA in formulating and implementing a plan of distribution for funds received as a result of an enforcement proceeding. 10 CFR Part 205, Subpart V. The Subpart V process may be used in situations where the DOE is unable to identify readily those persons who likely were injured by alleged overcharges or readily ascertain the amount of such persons' injures. For a more detailed discussion of Subpart V and the authority of OHA to fashion procedures to distribute refunds, *see Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (*Vickers*).

As in other Subpart V cases, we believe that the distribution of refunds in this proceeding should take place in two stages. In the first stage, we will attempt to provide refunds to identifiable purchasers of propane that were injured by Ferrell's alleged pricing practices between October 1, 1973 and January 27, 1981 (the consent order period). Any funds that remain after all meritirious first-stage claims have been paid may be distributed in a second-stage proceeding. *See, e.g., Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) (*Amoco*).

A. Refunds to Identifiable Purchasers

In the first stage of the Ferrell refund proceeding, we propose to distribute the funds currently in escrow to claimants who demonstrate that they were injured by Ferrell's alleged overcharges. As we have done in many prior refund cases, we propose to adopt certain presumptions which will be used to help determine the level of a purchaser's injury.

The use of presumptions in refund cases is specifically authorized by applicable DOE procedural regulations. Section 205.282(e) of those regulations states that:

> [i]n establishing standards and procedures for implementing refund distributions, the Office of Hearings and Appeals shall take into account the desirability of distributing the refunds in an efficient, effective and equitable manner and resolving to the maximum extent practicable all outstanding claims. In order to do so, the standards for evaluation of individual claims may be based upon appropriate presumptions.

10 CFR 205.282(e). The presumptions we plan to adopt in this case are used to permit claimants to participate in the refund process without incurring inordinate expenses and will enable OHA to consider the refund applications in the most efficient way possible in view of the limited resources available. First, we plan to adopt a presumption that the alleged overcharges were dispersed evenly among all sales of products made during the consent order period. In the past, we have referred to a refund process that uses this presumption as a volumetric system. Second, we propose to adopt a presumption of injury with respect to small claims. Third, we plan to adopt a presumption that spot purchasers were not injured by the alleged overcharges. As a separate matter, we are making a proposed finding that end users experienced injury.

The pro rata, or volumetric, refund presumption assumes that alleged overcharges by a consent order firm were spread equally over all gallons of products marketed by that firm. In the absence of better information, this assumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices. This presumption is rebuttable, however. A claimant which believes that it suffered a disproportionate share of the alleged overcharges may submit evidence proving this claim in order to receive a larger refund. *See Sid Richardson Carbon and Gasoline Co. and Richardson Products Co./Siouxland Propane Co.*, 12 DOE ¶ 85,054 (1984), and cases cited therein at 88,164.

Under the volumetric system we plan to adopt, a claimant will be eligible to receive a refund equal to the number of gallons purchased from Ferrell times the volumetric factor. The volumetric factor is the average per gallon refund and in this case equals $.000136 per gallon.[5] In addition, successful claimants will receive a proportionate share of the accrued interest.

Second, we plan to presume that purchasers of Ferrell's products seeking small refunds were injured by Ferrell's pricing practices. There are a number of bases for the presumption that claimants seeking small refunds were injured. *See, e.g., Urban Oil Co.*, 9 DOE ¶ 82,541 (1982). The firms that will be eligible for refunds are purchasers that were in the chain of distribution of the products to which the alleged overcharges are attached. These purchasers therefore experienced some impact of the alleged overcharges. Without some presumptions as to injury, in order to support a specific claim of injury a claimant would have to compile and submit very detailed factual information regarding the impact of alleged overcharges which occurred many years ago. Such a demonstration, if even possible, would generally be very time-consuming and expensive. In the case of relatively small claims, the cost to the claimant of gathering the necessary information and the cost to OHA of analyzing it could certainly exceed the value of any expected refund as well as any analytic benefits to be derived. Consequently, without simplified procedures, some potential claimants could be effectively denied an opportunity to seek a refund since it would be uneconomic to do so. As a result, we intend to adopt a small claims presumption which will eliminate the need for a claimant to submit and OHA to analyze extensive, detailed proof of the result of the initial impact of the alleged overcharges.

Under the small-claims presumption, a claimant that is a reseller or retailer will not be required to submit any additional evidence of injury beyond purchase volumes if its refund claim is based on purchases below a certain level. Principal among the factors which determine the value of this threshold is the concern that the cost to the applicant and the government of compiling and analyzing information sufficient to show injury not exceed the amount of the refund to be gained. In this case, where the refund amount is fairly low, $5,000 is a reasonable value for the small-claim threshold. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 at 88,210 (1984); *Office of Special Counsel*, 11 DOE ¶ 85,226 (1984) (*Conoco*), and cases cited therein.

A reseller or retailer which seeks a refund of more than $5,000 will be

required to document its claim. While there are a variety of methods by which a claimant could show that it did not pass the alleged overcharges on to its customers, the claimant would generally have to show that at the time of the alleged overcharges, it maintained a bank of unrecovered costs, and that market conditions would not permit it to pass through those increased costs.[6]

If a reseller or retailer made only spot purchases, we propose that it should not receive a refund since it is unlikely to have experienced injury. This is true because:

> [t]hose customers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of [the firm's product] at increased prices unless they were able to pass through the full amount of [the firm's] quoted selling price at the time of purchase to their own customers.

Vickers, 8 DOE at 85,396–97. The same principles apply in this case. Accordingly, we propose that resellers and retailers which made only spot purchases from Ferrell not receive refunds unless they present evidence which rebuts this presumption and establishes the extent to which they experienced injury.

As noted above, we are making a proposed finding that end users whose business operations are unrelated to the petroleum industry were injured by the alleged overcharges. These entities were not subject to DOE regulations during the relevant period, and are thus outside our inquiry about pass-through of overcharges. *See Office of Enforcement*, 10 DOE ¶ 85,072 (1983) (*PVM*); *see also Texas Oil & Gas Corp.*, 12 DOE at 88,209, and cases cited therein. Therefore, we propose that for end users of propane sold by Ferrell, documentation of purchase volumes will provide a sufficient showing of injury.

In addition, we propose that firms whose prices for goods and services are regulated by a governmental agency or by the terms of a cooperative agreement not be required to provide a detailed demonstration that they absorbed the alleged overcharges associated with Ferrell's sales of propane. *See, e.g., Office of Special Counsel*, 9 DOE ¶ 82,538 (1982) (*Tenneco*), and *Office of Special Counsel*, 9 DOE ¶ 82,545 at 85,244 (1982) (*Pennzoil*). Those firms should provide with their applications a full explanation of the manner in which refunds would be passed through to their customers and of how the appropriate regulatory body or membership group will be advised of the applicant's receipt of any refund money. Sales by cooperatives to nonmembers, however, will be treated the same as sales by any other reseller.

As in previous cases, only claims for at least $15 plus interest will be processed. In prior refund cases we have found that the cost of processing claims for smaller amounts outweighs the benefits of restitution. *See, e.g., Uban Oil Co.*, 9 DOE at 85,225. *See also* 10 CFR 205.286(b). The same principle applies here.

III. Applications for Refund

In order to receive a refund, each claimant will be required to submit a schedule of its monthly purchases of propane from Ferrell. If they claim injury at a level greater than the threshold level, they must document this injury in accordance with the procedures described above, including specific information as to the volume and per gallon price of propane purchased, the date of purchase, the name of the firm from which the purchase was made, and the extent of any injury alleged. A claimant must also indicate whether it has previously received a refund, from any source, with respect to the alleged overcharges identified in the ERA audit underlying this proceeding.[7] Each applicant must also state whether there has been a change in ownership of the firm since the audit period. If there has been a change in ownership, the applicant must provide the names and addresses of the other owners, and should either state the reasons why the refund should be paid to the applicant rather than to the other owners or provide a signed statement from the other owners indicating that they do not claim a refund. Finally, an applicant should report whether it is or has been involved as a party in any DOE enforcement or private, § 210 actions. If these actions have been concluded the applicant should furnish a copy of any final order issued in the matter. If the action is still in progress, the applicant should briefly describe the action and its current status. The applicant must keep OHA informed of any change in status while its Application for Refund is pending. *See* 10 CFR 205.9(d).

In the event that money remains after all meritorious claims have been satisfied, residual funds could be distributed in a number of ways in a subsequent proceeding. However, we will not be in a position to decide what should be done with any remaining funds until the initial stage of this refund proceeding has been completed. We encourage the submission by interested parties of proposals which address alternative methods of distributing any remaining funds.

It is therefore ordered that:

The refund amount remitted to the Department of Energy by Ferrell Companies, Inc. pursuant to the Consent Order executed on December 12, 1984, will be distributed in accordance with the foregoing Decision.

[FR Doc. 86–5878 Filed 3–17–86; 8:45 am]

BILLING CODE 6450-01-M

Cases Filed the Week of February 21 Through February 28, 1986

During the Week of February 21 through February 28, 1986, the applications for relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

George B. Breznay,
Director, Office of Hearings and Appeals.
March 12, 1986.

---

[4] As of January 31, 1986, the Ferrell escrow account contained a total of $109,407.84, representing $100,000 in principal and $9,407.84 in accrued interest.

[5] This figure is derived by dividing the $100,000 principal amount by the 733,366,000 gallons of propane reportedly sold by Ferrell and its subsidiaries during the consent order period. *See* December 10, 1985 Letter from James E. Ferrell, President of Ferrell Companies, Inc. to Richard T. Tedrow, Deputy Director, OHA.

[6] Resellers or retailers who claim a refund in excess of $5,000 but who cannot establish that they did not pass through the price increases will be eligible for a refund of up to the $5,000 threshold, without being required to submit further evidence of injury. Firms potentially eligible for greater refunds may choose to limit their claims to $5,000. *See* Vickers, 8 DOE at 85,396. *See also* Office of Enforcement, 10 DOE ¶ 85,029 at 88,122 (1982) (Ada).

[7] The audit files indicate that on December 26, 1974, Ferrell signed an Accord and Satisfaction with the FEA in which it agreed to remit $12,500 to the FEA to settle alleged overcharges on Ferrell's sales of propane to Lyons Diecasting, a wholesale customer of Ferrellgas, Inc. On the basis of this information, we propose that Lyons Diecasting be precluded from receiving a refund in this proceeding.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of Feb. 21 through Feb. 28, 1986]

Date	Name and location of applicant	Case No.	Type of submission
Feb. 21, 1986	Economic Regulatory Administration, Washington, DC	HRR-0036	Request for modification/rescission. If granted: The July 1, 1985 Remedial Order issued to P & R Trading Co. (Case No. HRO-0081) would be amended to include as a named party Benton Pratt, the individual, as stated in the Proposed Remedial Order.
Feb. 24, 1986	Tri-Service Drilling Company, Washington, DC	KRD-0120	Motion for discovery. If granted: Discovery would be granted to Tri-Service Drilling Company in connection with the firm's Statement of Objections submitted in response to the Proposed Remedial Order issued to the firm (Case No. KRO-0120).
Feb. 26, 1986	Vanderbilt Energy Corporation, Enid, OK	KRD-0014	Motion for discovery. If granted: Discovery would be granted Vanderbilt Energy Corporation in connection with the firm's Statement of Objections submitted in response to the Proposed Remedial Order issued to the firm (Case No. HRO-0080).
Feb. 27, 1986	Economic Regulatory Administration, Washington, DC	KRZ-0036	Interlocutory. If granted: The May 31, 1985 Proposed Remedial Order issued to Tonkawa Refining Company would be amended.
Do	Edwin Milton Jones, Jr., Houston, TX	KRD-0015	Motion for discovery. If granted: Discovery would be granted to Edwin Milton Jones, Jr. in connection with the Statement of Objections submitted in response to the Proposed Remedial Order (Case No. HRO-0225) issued to Edwin Milton Jones, Jr.

BILLING CODE 6450-01-M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Notice of proposed implementation of special refund procedures and solicitation of comments.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy announces the procedures for disbursement of $1,400,000.00 (plus accrued interest) obtained as the result of a Consent Order between the DOE and Placid Oil Company (Placid). The funds will be distributed to refund applicants who purchased petroleum products from Placid during the settlement period (August 19, 1973 through January 27, 1981).

DATE AND ADDRESS: Comments must be filed in duplicate by (30 days from date of publication in the *Federal Register*) and should be addressed to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585. All comments should refer to Case No. KEF-0007.

FOR FURTHER INFORMATION CONTACT: Matt Husten, Staff Analyst, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-2400.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulations of the Department of Energy (DOE), 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order summarized below. The Proposed Decision and Order sets forth the procedures that the DOE has tentatively formulated to distribute monies obtained from Placid Oil Company (Placid). Placid, the owner and operator of a refinery located in Port Allen, Louisiana, entered into a Consent Order to settle possible pricing violations with respect to its sales of petroleum products during the period August 19, 1973 through January 27, 1981. Under the terms of the Consent Order, Placid has remitted $1,400,000 which is being held in an interest-bearing escrow account pending determination of its proper distribution.

The DOE proposes that the Placid consent order funds be distributed in a two-stage refund proceeding. The first stage will attempt to refund monies to injured Placid customers who are able to document their purchases of Placid product. The Proposed Decision and Order provides that the funds will generally be distributed to successful claimants based on the number of gallons of product which they purchased and the extent to which they can prove that they were injured by Placid's alleged overcharges. After meritorious claims are paid in the first stage, second-stage refund procedures may become necessary to distribute any remaining funds.

Applications for Refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties are requested to submit two copies of their comments. Comments should be submitted with in 30 days of publication of this notice in the Federal Register, and should be sent to the address set forth at the beginning of this notice. All comments received will be available for public inspection between the hours of 1:00 p.m. to 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E-234, 1000 Independence Avenue SW., Washington, DC 20585.

Dated: March 6, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Special Refund Procedures

March 6, 1986.

Name of Case: Placid Oil Company
Date of Filing: October 18, 1985
Case Number: KEF-0007

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) of the DOE may request that the Office of Hearings and Appeals (OHA) of the DOE formulate and implement special refund procedures in certain instances. *See* 10 CFR Part 205, Subpart V. Such procedures enable the DOE to refund monies to those injured by alleged violations of the DOE petroleum pricing regulations.

On October 18, 1985, the ERA requested that the OHA formulate and implement procedures to distribute funds the DOE had received pursuant to a Consent Order entered into with Placid Oil Company (Placid). This Proposed Decision outlines the procedures that the OHA has tentatively formulated to distribute the Placid consent order funds.

I. Background

Placid was a "refiner" and "reseller" of petroleum products as those terms were defined in 10 CFR 212.31.[1] The ERA audited Placid to determine the firm's compliance with the regulations applicable to refiners and resellers. On February 18, 1983, the ERA issued a Proposed Remedial Order (PRO) to Placid alleging that, from August 1973 through January 1976, the firm charged prices for motor gasoline, natural gas liquids (NGLs), natural gas liquid products (NGLPs), middle distillates and residual fuel in excess of the prices allowed under the DOE regulations.

In order to settle the claims made in the PRO and certain other claims by the DOE which might have arisen, Placid and the DOE entered into a Consent Order on February 22, 1984 (the Consent Order). Placid's first sales of crude oil were specifically excluded from the ambit of the Consent Order, as were Placid's obligations under the DOE Entitlements Program. *See* Consent Order, ¶¶ 302, 501. Pursuant to the Consent Order, Placid remitted the sum of $1,400,000 to the DOE to cover certain alleged violations of the applicable price regulations during the period between August 19, 1973 and January 28, 1981.

II. Jurisdiction and Authority To Fashion Refund Procedures

The Subpart V process is useful in situations where the DOE is unable to ascertain the identity of the particular persons entitled to receive refunds or the precise amounts of such refunds. 10 CFR 205.280; *see also* 44 Fed. Reg. 8562 (February 9, 1979). For a detailed discussion of Subpart V and the authority of the OHA to fashion procedures to distribute refunds obtained as part of settlement agreements, see *Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (hereinafter cited as *Vickers*).

We have considered the ERA's October 18, 1985 petition requesting that we implement a Subpart V proceeding with respect to the Placid consent order funds. We have determined that such a proceeding is appropriate in this case.

III. Proposed Refund Procedures

We propose a two-stage process to distribute the Placid monies. In the first stage, we will attempt to refund monies to those who purchase Placid products during the settlement period. Purchasers must file claims and document that purchases in order to be eligible for portions of the consent order funds. In addition, purchasers will be required to demonstrate that they were injured by the alleged overcharges—e.g., that they did not pass through any alleged overcharges to their own customers.

After meritorious claims are paid in the first stage, a second stage may become necessary to distribute any remaining funds. *See generally Office of Special Counsel*, 10 DOE ¶ 85,048 (1982). We will not set forth second-stage procedures at this time.

---

[1] According to documents in the DOE audit file, Toro Petroleum Corporation (Toro) operated a gasoline blending facility during 1973 and early 1974. In February 1974, Ryder Systems, Inc. (Ryder) acquired more than 50 percent of Toro's capital stock, and commenced building a refinery that by late 1974 allowed Toro to produce distillates and residual fuel. In December 1974, Placid Refining Company, a wholly-owned subsidiary of Placid Oil Company, purchased Toro from Ryder. Toro's and Ryder's activities from August 19, 1973 forward are covered under the terms of the Placid Consent Order, and we will accept Applications for Refund from Toro's and Ryder's customers who purchased covered product during the consent order period.

VOL 51 ISS 52 MR 18 1986 UMI

With regard to first-stage procedures, we propose adoption of certain presumptions. Presumptions in refund cases are specifically authorized by the DOE procedural regulations. Section 205.282(e) of those regulations states that:

> [I]n establishing standards and procedures for implementing refund distributions, the Office of Hearings and Appeals shall take into account the desirability of distributing the refunds in an efficient, effective and equitable manner and resolving to the maximum extent practicable all outstanding claims. In order to do so, the standards for evaluation of individual claims may be based upon appropriate presumptions.

10 CFR 205.282(e). The presumptions we propose to adopt in this case will permit claimants to participate in the refund process without incurring disproportionate expenses, and will enable the OHA to consider refund applications efficiently.

A. Allocation of Funds and a Volumetric Refund Presumption

We note that Placid may have acted as a reseller of crude oil during the consent order period. Although crude oil resales are not specifically excluded from the scope of the Consent Order, the DOE audit underlying the Consent Order apparently did not examine any crude oil resales Placid may have made. *See* Consent Order, ¶ 302. Accordingly, we have tentatively concluded that the Placid consent order funds should be allocated to purchasers of products other than crude oil.

We propose the adoption of a presumption that the alleged overcharges were dispersed equally over all sales of products other than crude oil made by Placid during the consent order period. To implement such a presumption, we will calculate a volumetric refund figure. This figure is equal to the amount of available consent order funds divided by the number of gallons of covered product other than crude oil sold by Placid during the consent order period. Based on information from the Placid audit files, we estimate that Placid sold 4,083,904,613 gallons of covered products during the consent order period. This results in a volumetric refund figure of $0.000343 per gallon ($1,400,000 of consent order funds divided by 4,083,904,613 gallons sold). A claimant will be eligible to receive a refund equal to the documented number of gallons bought from Placid during the consent order period, multiplied by the volumetric refund figure of $0.000343.[2] In addition, interest which has accrued on the consent order funds will be applied to each paid refund on a pro rata basis.

B. Demonstrating Injury and Related Presumptions

In order to be eligible to receive a refund, claimants will, with several exceptions discussed later in this Proposed Decision, be required to demonstrate that they have been injured by Placid's alleged overcharges. While there are a variety of methods of demonstrating injury, several elements are common to the showings required of refiners, resellers and retailers that purchased covered product from Placid during the consent order period. First, as a preliminary to a showing of injury, a firm must demonstrate that during the period covered by the Consent Order, it maintained "banks" of unrecovered increased product costs which were at least equal to the amount of the refund claimed. Any demonstration of the existence of banks should show that banks where maintained, or could have been maintained, until the relevant product was decontrolled.[3] If actual, contemporaneously calculated cost banks are not available, we will accept other types of information that demonstrate the existence of cost banks during the relevant period. For example, monthly profit margin data may in some cases demonstrate the existence of cost banks. *See Husky Oil Co.*, 13 DOE ¶ 85,045 (1985); *Bayou State Oil Corp.*, 12 DOE ¶ 85,197 (1985).

In addition to demonstrating the existence of banks, a refiner, reseller or retailer claimant must demonstrate that cognizable injury resulted from the purchase of Placid's allegedly overpriced product.[4] A firm migh establish that it absorbed the alleged overcharges by showing, for example, that market conditions would not permit it to increase its prices to pass additional costs through to its own customers. *Office of Enforcement*, 10 DOE ¶ 85,056 (1983); *Office of Enforcement*, 10 DOE ¶ 85,029 (1982).

1. Small Claims Presumptions. In order to support a specific claim of injury, a firm would have to compile and submit detailed factual information regarding the impact of alleged overcharges that occurred many years ago. In prior refund proceedings, we have adoped a small claims procedure to assure that the costs of filing a refund application, and the cost to the OHA of analyzing it, do not exceed the anticipated refund. *See, e.g., Aztex Energy Co.*, 12 DOE ¶ 85,116 (1984); *Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 (1984). We find that such a small claims procedure is warranted in this refund proceeding as well.

In many recent cases, we have adopted $5,000 as a reasonable value for a threshold refund amount. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 (1984); *Marion Corp.*, 12 DOE ¶ 85,014 (1984). The factual situations in the cases cited above are similar to the circumstances surrounding this case. Accordingly, we propose that firms claiming volumetric refunds of $5,000 or less should not be required to provide banks of unrecouped increased product costs or evidence of injury.[5]

2. End-User Presumption. In prior refund proceedings, we have adopted a presumption that end-users of covered products absorbed alleged overcharges. Unlike regulated firms in the petroleum industry, firms that were the ultimate consumers of covered products generally were not subject to price controls during the consent order period, and were not required to keep records that justified selling price increases by reference to petroleum cost increases. For these reasons, an analysis of the impact of the increased cost of petroleum products on the final prices on non-petroleum goods and services would be beyond the scope of this special refund proceeding. *See Office of Enforcement, Economic Regulatory Administration: In the Matter of PVM Oil Associates, Inc.*, 10 DOE ¶ 85,072 (1983) *see also Texas Oil & Gas Corp.*, 12 DOE at 88,209, and cases cited therein. We therefore propose that an end-user of Placid product will not be required to demonstrate that Placid's alleged overcharges caused injury. Documentation of purchase from Placid, we propose, will be a sufficient showing that the end-user was injured by the alleged overcharges.

3. Agricultural Cooperatives and Firms Not Regulated by the DOE. Firms regulated by a governmental agency other than the DOE or by the terms of a cooperative agreement will not be required to demonstrate that they absorbed Placid's alleged overcharges. In the case of otherwise regulated firms, e.g., public utilities, any alleged overcharges incurred as a result of the alleged violations of the DOE regulations would routinely have been passed through to the utilities' customers. Similarly, any refunds received by such firms would be reflected in the rates they are allowed to charge their customers. Overcharges incurred by, and refunds granted to, cooperatives will also directly influence the prices charged to member customers. Consequently, since the benefits of refunds will accrue to the ultimate consumers affected by Placid's alleged overcharges (the ratepayers or cooperative members), otherwise regulated firms and cooperatives need only document their purchase volumes from Placid to be eligible to receive refunds. *See Office of Special Counsel*, 9 DOE ¶ 82,538 (1982). Nonetheless, these firms should include with their applications a full, detailed explanation of the manner in which refunds would be passed through to customers and an explanation of how the appropriate regulatory body or membership group would be advised of the applicant's receipt of a refund.

4. Spot Purchaser Presumption. We also propose to adopt a rebuttable presumption that firms which made only spot purchases of Placid product have suffered no injury. Spot purchasers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot purchases of Placid's product at increased prices unless such purchases were economically advantageous. *See Vickers*, 8 DOE at 85,396–97. Accordingly, a spot purchaser claimant will be required to submit additional evidence sufficient to establish that it suffered injury as a result of Placid's alleged overcharges. For example, a spot purchaser might attempt to show that it paid Placid uncompetitive prices, and was subsequently unable to recover those prices. *See Ropet, Inc./Duquesne Light Co.*, 13 DOE ¶ 85,153 (1985).

Comments regarding the tentative distribution scheme set forth in this Proposed Decision should be filed with the Office of Hearings and Appeals within 30 days of publication of this Proposed Decision in the **Federal Register**. Detailed procedures for filing Applications for Refund will be provided in a final Decision and Order. *See Vickers.* Applications for Refund should not be filed at this time.

Any purchaser claiming a portion of the consent order funds will be required to file an Application for Refund pursuant to 10 CFR 205.283. Applications should provide all relevant information necessary to establish a claim in accordance with the presumptions outlined above, including, where necessary, specific documentation concerning the date, place, price and volume of product purchased; banks of unrecouped increased product costs; and the extent of any injury alleged. Before disposing of any of the consent order funds, we intend to publicize widely the distribution process and to provide an opportunity for any affected party to file a claim.

It is Therefore Ordered That:

The $1,400,000 refund amount obtained from Placid Oil Company pursuant to the Consent Order entered into with the Department of Energy on February 22, 1984 will be distributed in accordance with the foregoing Proposed Decision.

[FR Doc. 86–5921 Filed 3–17–86; 8:45 am]

BILLING CODE 6450-01-M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Notice of Implementation of Special Refund Procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding to adversely affected parties $66,969 obtained as a result of a consent order which the DOE entered into with Key Oil Company, a reseller-retailer of diesel fuel located in Franklin, Kentucky. The money is being held in escrow following the settlement of enforcement proceedings brought by the DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Comments must be filed within 30 days of publication of this notice in the **Federal Register** and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. All comments should conspicuously display a reference to case number HEF–0106.

FOR FURTHER INFORMATION CONTACT: Nancy L. Kestenbaum, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–6602.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulations of the Department of Energy, 10 CFR 205.282(b) notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision sets forth procedures and standards that the DOE has tentatively formulated to distribute to adversely affected parties $66,969 plus accrued interest obtained by the DOE under the terms of a consent order entered into with Key Oil Company. The funds were provided to the DOE by Key to settle all claims and disputes between the firm and the DOE regarding the

---

[2] The volumetric refund methodology does not purport to refund the exact amount that a customer may have been overcharged. Rather, it is a method by which a customer may receive an appropriate portion of the consent order funds. We recognize, however, that the impact of a firm's pricing practices on an individual purchaser could have been greater, and therefore any purchaser will be allowed to file a claim that it absorbed a disproportionate share of the alleged Placid overcharges during the consent order period. An application requesting a refund greater than the amount calculated using the volumetric presumption must document the disproportionate impact of the alleged overcharges. *See, e.g., Amtel, Inc.*, 12 DOE ¶ 85,073 at 88,233–34 (1984).

[3] We note that effective July 15, 1979, the retailer price rule for motor gasoline was amended. That amendment eliminated the banking provision for retailers of motor gasoline. 44 FR 42541 (July 19, 1979). Accordingly, retailers will not be required to submit evidence that they maintained banks of unrecouped increased product costs for motor gasoline after July 15, 1979. They will, however, be required to furnish information demonstrating (1) the existence of banks through July 15, 1979, and (2) that they suffered injury as a result of their motor gasoline purchases from Placid, both before and after the banking provision change. See Note 4.

We also note that effective May 1, 1980, a new rule regarding the pricing of motor gasoline by resellers and reseller-retailers went into effect. As a result, these types of firms were allowed to calculate maximum lawful selling prices either under a fixed-margin approach set forth in the new rule or using the method established by rules in effect on April 30, 1980. 45 FR 29546 (May 2, 1980). As a result, Placid's customers who were motor gasoline resellers or reseller-retailers and who chose the fixed-margin approach were not to maintain banks subsequent to April 30, 1980. The lack of motor gasoline cost banks for the period beyond April 30, 1980, will not preclude a refund based upon a firm's total purchases of covered Placid products. Nonetheless, if a firm had chosen the fixed-margin approach, and is unable to show that it maintained cost banks for motor gasoline after April 30, 1980, it must still demonstrate that it maintained cost banks until that point, and that it absorbed the effects of Placid's alleged overcharges. See Note 4.

[4] The OHA has consistently held, an continues to believe, that the existence of banks of unrecouped increased product costs does not demonstrate injury. *National Helium Corp./Farmland Industries, Inc.*, 11 DOE ¶ 85,257 (1984); *Palo Pinto Oil & Gas/Gulf Oil Corp.*, 10 DOE ¶ 85,049 (1983). In a recent district court case, our judgment in this matter was upheld:

> OHA's requirement of proof of nonpass-through is entirely reasonable and well within OHA's authority. . . The basis for OHA's presumption [that first purchasers passed through alleged overcharges] is strengthened by the very structure of the price control regulations. Under the regulations, refiners such as ARCO and Mobil were generally permitted to pass on their increased costs to the full extent that the market would bear. . . Indeed, plaintiffs [ARCO and Mobil] do not dispute that while substantial sums were amassed in cost banks, the size of these banks was small in comparision to the huge cost increases that were passed on to downstream consumers.
>
> Perhaps most important, OHA's requirement that a direct purchaser prove nonpass-through is consistent with the equitable principles under which the Subpart V provisions must operate.

Atlantic Richfield Co. v. DOE, Nos. 84–190/84–735, slip op. at 24–28 (D. Del. September 28, 1985).

[5] Firms that claim refunds in excess of $5,000 but which are unable to establish that they absorbed Placid's price increases will be eligible for refunds up to the $5,000 threshold, without being required to submit further evidence of injury. Firms potentially eligible for greater refunds may choose to limit their claims to $5,000 in order to avoid having to submit detailed documentation of their injury. *See Vickers*, 8 DOE at 85,396.

manner in which the firm applied the federal price regulations with respect to its sales of diesel fuel during the consent order period November 1, 1973 through March 31, 1974.

OHA proposes that a two-stage refund process be followed. In the first stage, OHA has tentatively determined that a portion of the consent order funds should be distributed to the eight first purchasers who may have been overcharged. In order to obtain a refund, each claimant will be required either to submit a schedule of its monthly purchases from Key or to submit a statement verifying that it purchased diesel fuel from Key and is willing to rely on the data in the audit files. Certain firms will also be required to make specific demonstrations of injury. In addition, applications for refund will be accepted from purchasers not identified by the DOE audit. These purchasers will be required to provide specific documentation concerning the date, place, price, and volume of product purchased, the name of the firm from which the purchase was made, and the extent of any injury alleged. Appications for refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Some residual funds may remain after all meritorious first-stage claims have been satisfied. OHA invites interested parties to submit their views concerning alternative methods of distributiong any remaining funds in a subsequent proceeding.

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice. All comments received in this proceeding will be available for public inspection between 1:00 and 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E–234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: March 11, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

March 11, 1986.

Name of Petitioner: Key Oil Company.
Date of Filing: October 13, 1983.
Case Number: HEF–0106.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special procedures to distribute funds received as a result of an enforcement proceeding in order to remedy the effects of alleged or actual violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. In accordance with the provisions of Subpart V, on October 13, 1983, ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with Key Oil Company (Key).

I. Background

Key is a "reseller-retailer" of diesel fuel as that term was defined in 10 CFR 212.31 and is located in Franklin, Kentucky. Based on an audit of Key's records, ERA issued a Proposed Remedial Order (PRO) on March 20, 1981, alleging that Key committed certain pricing violations with respect to its sales of diesel fuel.

In order to settle all claims and disputes between Key and the DOE regarding the firm's sales of diesel fuel during the period covered by the PRO, Key and the DOE entered into a consent order on September 29, 1981. The consent order funds represented 64.3 percent of the amount of the overcharges originally stated in the PRO. The consent order refers to ERA's allegations of overcharges, but notes that there was no finding that violations occurred. In addition, the consent order states that Key does not admit that it violated the regulations.

The consent order required Key to pay a total of $58,730, plus installment interest, in 24 equal monthly installments. The first payment was received on October 16, 1981 and the last on September 21, 1983.[1] This decision concerns the distribution of the funds in the escrow account.

II. Proposed Refund Procedures

The procedural regulations of the DOE set forth general guidelines which may be used by OHA in formulating and implementing a plan of distribution for funds received as a result of enforcement proceedings. 10 CFR Part 205, Subpart V. The Subpart V process may be used in situations where the DOE is unable to identify readily those persons who might have been injured by alleged overcharges or to ascertain readily the amount of such persons' injuries. For a more detailed discussion of Subpart V and the authority of OHA to fashion procedures to distribute refunds, *see Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (*Vickers*).

As in other Subpart V cases, we believe that the distribution of refunds in this proceeding should take place in two stages. In the first stage, we will attempt to provide refunds to identifiable purchasers of refined petroleum products who may have been injured by Key's pricing practices during the consent order period. Any funds that remain after all meritorious first-stage claims have been paid may be distributed in a second-stage proceeding. *See, e.g. Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) (*Amoco*).

A. Refunds to Identified and Unidentified Purchasers

The basic purpose of a special refund proceeding is to recompense parties who were injured as a result of alleged or actual violations of the DOE regulations. In order to effect restitution in this proceeding, we have decided to rely in part on the information contained in the DOE's audit files. Our experience with similar cases supports the use of this approach in Subpart V cases where many of the purchasers of a firm's products are identified in the audit file. *See, e.g., Marion Corp.*, 12 DOE ¶ 85,014 (1984) (*Marion*). Under these circumstances, a reasonably precise determination can be made regarding the identify of the allegedly overcharged parties and the amount of alleged overcharges each party suffered.

During the DOE's audit of Key, eight first purchasers were identified as having allegedly been overcharged. ERA also alleged overcharges to customers who were not identified. We recogniae that the DOE audit files do not necessarily provide conclusive evidence regarding the identify of all possible refund recipients or the appropriate refund for a particular firm. However, the information contained in those audit files may reasonably be used for guidance. *See Armstrong and Associates/City of San Antonio*, 10 DOE ¶ 85,050 at 88,259 (1983). In *Marion*, we stated that "the information contained in the . . . audit file can be used for guidance in fashioning a refund plan which is likely to correspond more closely to the injuries probably experienced than would a distribution plan based solely on a volumetric approach." 12 DOE at 88,031. In previous cases of this type, we have proposed that the funds in the escrow account be apportioned among the direct customers identified by the audit, other direct customers who can show injury, and subsequent repurchasers. *See, e.g., Bob's Oil Co.*, 12 DOE ¶ 85,024 (1984); *Richards Oil Co.*, 12 DOE ¶ 85,150 (1984). The first purchasers identified by the audit, and the portion of the consent order fund which was allotted to each customer by ERA, are listed in the Appendix. We will allot the remaining $59,268 plus accrued interest to customers who are as yet unidentified.

As we have done in many prior refund cases, we propose to adopt certain presumptions which will be used to help determine the level of a purchaser's injury. Presumptions in refund cases are specifically authorized by applicable DOE procedural regulations. 10 CFR 205.282(e). The presumptions we plan to adopt in this case are used to permit claimants to participate in the refund process without incurring inordinate expenses and to enable OHA to consider the refund applications in the most efficient way possible in view of the limited resources available.

As an initial matter, we will adopt a presumption that the alleged overcharges committed by Key were dispersed evenly among all sales of diesel fuel made by the firm during the relevant consent order period. In the past, OHA has used a volumetric refund amount as an equitable means of distributing funds based on this presumption. In the absence of better information, this assumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices.

We recognize that the impact on an individual purchaser could have been greater than that estimated by using the volumetric factor, and any purchaser may file a refund application based on a claim that it suffered a disproportionate share of the alleged overcharges. *See Sid Richardson Carbon and Gasoline Co. and Richardson Products/Co. Siouxland Propane Co.*, 12 DOE ¶ 85,054 (1984), and cases cited therein at 88,164.

Using a volumetric approach, a successful claimant's refund is determined by multiplying a factor, known as the volumetric refund amount, by the number of gallons of diesel fuel purchased by the claimant. For claimants which purchased diesel fuel from Key but were ot identified by ERA, the volumetric factor is $0.01838 per gallon.[2] In addition, successful claimants will receie a proportionate share of accrued interest.

Second, we plan to presume that purchasers of Key's products seeking small refunds were injured by Key's pricing practices. There are a number of bases for the presumption that claimants seeking small refunds were injured. *See, e.g., Uban Oil Co.*, 9 DOE ¶ 82, 541 (1982). The firms that will be eligible for refunds are purchasers that were in the chain of distribution of the products to which the alleged overcharges are attached. These purchasers therefore experienced some impact of the alleged overcharges. Without some presumptions as to injury, in order to support a specific claim of injury a claimant would have to compile and submit very detailed factual information regarding the impact of alleged overcharges which occurred many years ago. This procedure is generally time-consuming and expensive. In the case of relatively small claims, the cost to the claimant of gathering the necessary information and the cost to OHA of analyzing it could certainly exceed the expected refund and whatever benefits are derived from any additional precision. Consequently, without simplified procedures, some potential claimants would be effectively denied an opportunity to seek a refund sicne it would be uneconomic to do so. As a result, we intend to adopt a small claims presumption which will eliminate the need for a claimant to submit and OHA to analyze extensive, detailed proof of the result of the initial impact of the alleged overcharges.

Under the small-claims presumption, a claimant who is a reseller or retailer will not be required to submit any additional evidence of injury beyond purchase volumes if its refund claim is based on purchases below a certain level. Several factors determine the value of this threshold. Principal among these factors is the concern that the cost to the applicant and the government of compiling and analyzing information sufficient to show injury not exceed the amount of the refund to be gained. In this case, where the refund amount is fairly low, $5,000 is a reasonable value for the threshold. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 at 88,210 (1984); *Office of Special Counsel, 11 DOE ¶ 85,226 (1984) (Conoco)*, and cases cited therein.

Unlike threshold claimants, a reseller or retailer which claims a refund in excess of $5,000 will be required to provide detailed documentation of its injury. While there are a variety of methods by which a firm can make such a showing, a firm is generally required to demonstrate that it maintained a "bank" of unrecovered costs, in order to show that it did not pass the alleged overcharges through to its own customers, and to show that market conditions would not permit it to pass through those increase costs.[3]

We are proposing a finding that end user—or ultimate consumer—purchasers whose business operations are unrelated to the petroleum industry were injured by the alleged overcharges settled in the consent order. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the consent order period, and they were not required to keep records which justified selling price increases by reference to cost increases. An analysis of the impact of the alleged overcharges on the final prices of non-petroleum goods refund proceeding. *See Office of Enforcement*, 10 DOE ¶ 85,072 (1983) (*PVM*); *see also Texas Oil & Gas Corp.*, 12 DOE at 88,209, and cases cited therein. To prove injury, ultimate consumers must document only their purchase volumes.

In addition, we propose that firms whose prices for goods and services are regulated by a governmental agency or by the terms of a cooperative agreement not be required to demonstrate that they absorbed the alleged overcharge for refined petroleum products. In the case of regulated firms, *e.g.*, public utilities, and overcharges incurred as a result or Key's alleged violátions of the DOE regulations would routinely be passed through to their customers. Similarly, any refunds received by such firms would be reflected in the rates they were allowed to charge their customers. Refunds to agricultural cooperatives would likewise directly influence the prices charged to their member customers. Consequently, we propose adding such firms to the class of claimants that are not required to show that they did not pass through to their customers cost increases resulting from alleged overcharges. *See, e.g., Office of Special Counsel*, 9 DOE ¶ 82,539 (1982)

---

[1] The total consent order payment including installment interest amounted to $66,969. We have used this figure as the principal amount. As of February 28, 1986, the escrow account contained $92,043, including accrued interest.

[2] This figure was derived by dividing the remaining $59,268 principal amount by the 3,224,075 gallons of diesel fuel sold by Key during the consent order period.

[3] Resellers or retailers who claim a refund in excess of $5,000 but who cannot establish that they did not pass through the price increases will be eligible for a refund of up to $5,000 threshold, without being require to submit further evidence of injury. Firms potentially eligible for greater refunds may choose to limit their claims to $5,000. *See* Vickers, 8 DOE at 85,396. *See also* Office of Enforcement, 10 DOE ¶ 85,029 at 88,125 (1982) (Ada).

(*Tenneco*), and *Office of Special Counsel*, 9 DOE ¶ 82,545 at 85,244 (1982) (*Pennzoil*). Instead, those firms should provide with their applications a full explanation of the manner in which refunds would be passed through to their customers and of how the appropriate regulatory body or membership group will be advised to the applicant's receipt of any refund money. Sales by cooperatives to nonmembers, however, will be treated the same as sales by any other reseller.

As in previous cases, only claims for at least $15 will be processed. We have found through our experience in prior refund cases that the cost of processing claims for refunds of less than $15 outweighs the benefits of restitution in those situations. *See, e.g., Uban Oil Co.*, 9 DOE At 85,225. *See also* 10 CFR 205.286(b). The same principle applies here.

B. Applications for Refund

Any purchaser claiming a portion of the consent order funds should file an Application for Refund pursuant to 10 CFR 205.283. In its application, a claimant must include a schedule, broken down by product, of its relevant information necessary to support their claim in accordance with the presumptions stated above. A claimant must also state whether it has previously received a refund, from any source, with respect to the alleged overcharges underlying these proceedings. Each applicant must also state whether there has been a change in ownership of the firm since the audit period. If there has been a change in ownership, the applicant must provide the names and addresses of the other owners, and should either state the reasons why the refund should be paid to the applicant rather than to the other owners or provide a signed statement from the other owners indicating that they do not claim a refund. Finally, an applicant should report whether it is or has been involved as a party in DOE enforcement or private, section 210 actions. If these actions have been concluded the applicant should furnish a copy of any final order issued in the matter. If the action is still in progress, the applicant should briefly describe the action and its current status. The applicant must keep OHA informed of any change in status while its Application for Refund is pending. *See* 10 CFR 205.9(d).

In the event that money remains after all meritorious claims have been satisfied, residual funds could be distributed in a number of ways in a subsequent proceeding. However, we will not be in a position to decide what should be done with any remaining funds until the initial stage of this refund proceeding has been completed. We encourage the submission by interested parties of proposals which address alternative methods of distributing any remaining funds.

It Is Therefore Ordered That:

The refund amount remitted to the Department of Energy by Key Oil Company pursuant to the consent order executed on *September 29, 1981*, will be distributed in accordance with the foregoing decision.

Appendix

KEY OIL COMPANY

First purchasers	Share of settlement[1]
Cecil Key Truck Stop, Highway 222 & 165, Glendale, KY 42740	$1,340
Tri County Paving & Stone, Post Office Box 92, Rockfield, KY 42274	736
Gassie Construction Company, 720 Beech Street, Bowling Green, KY 42101	409

ENVIRONMENTAL PROTECTION AGENCY

[SAB-FRL-2986-4]

Science Advisory Board, Executive Committee, Open Meeting

Under Pub. L. 92-463, notice is hereby given of a meeting of the Science Advisory Board's Executive Committee on April 7–8, 1986 in the Administrator's Conference Room 1101, West Tower, of the Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. The meeting will begin at 9:00 a.m. on April 7, and will adjourn at approximately 12:00 noon on April 8, 1986.

The agenda for the meeting includes discussion of a resolution by the Environmental Health Committee on the preparation of Agency risk assessment; briefing on EPA's comparative risk project; EPA requests for new SAB reviews; briefing on the Agency's Risk Assessment Forum; committee and subcommittee reports; and other issues of members interest.

The meeting is open to the public. Any member of the public wishing to attend, obtain information, or submit written comments should contact Dr. Terry F. Yosie, Director, Science Advisory Board or Mrs. Joanna Foellmer located at 401 M Street, SW., Washington, D.C. 20460 or call, (202) 382-4126 by close of business April 1, 1986

Dated: March 10, 1986.

Terry F. Yosie,

Director, Science Advisory Board.

BILLING CODE 6560-50-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Information Collection Submitted To OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of Information Collection submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

Title of Information Collection: Application for Federal Deposit Insurance by Operating Noninsured Institutions (OMB No. 3064-0060).

Background

In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget form SF-83, "Request for OMB Review," for the information collection system identified above.

ADDRESSES: Written comments regarding the submission should be addressed to Robert Neal, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 and to John Keiper, Assistant Executive Secretary (Administration), Federal Deposit Insurance Corporation, Washington, DC 20429.

Comments: Comments on the collection of information should be submitted on or before April 2, 1986.

FOR FURTHER INFORMATION CONTACT: Requests for a copy of the submission should be sent to John Keiper, Assistant Executive Secretary (Administration), Federal Deposit Insurance Corporation, Washington, DC 20429, telephone (202) 898-3810.

SUMMARY: The FDIC is requesting OMB approval for extending the expiration date of the form used by operating noninsured financial institutions who apply for FDIC deposit insurance. The form, FDIC 6200/07, requires the applicant to furnish information about the institution's financial history and condition, capital structure, future earnings prospects, the identity of the management, and information about the community served. The information collected on the form is used by the FDIC as a basis for evaluating certain factors as required by section 5 of the Federal Deposit Insurance Act (12 U.S.C. 1815) before approving the application. It is estimated that it takes an applicant, on its average, 15 hours to prepare the application form.

Dated: March 12, 1986.

Federal Deposit Insurance Corporation

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 4160-01-M

Public Workshop; Bioequivalence of Solid Oral Dosage Forms; Change of Meeting Dates

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing a change in the dates for the forthcoming public workshop on bioequivalence of conventional release, solid-oral drug dosage forms.

DATE: The workshop will now be held on September 29 through October 1, 1986, 9 a.m. to 5 p.m.

ADDRESS: The meeting will be held in the first floor auditorium at the Department of Health and Human Services, North Building, 330 Independence Avenue SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Steve Moore, Division of Bioequivalence, Center for Drugs and Biologics (HFN-250), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6776.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of January 17, 1986 (51 FR 2574), a public workshop on bioequivalence issues was announced. In late January, the National Association of Pharmaceutical Manufacturers and the Generic Pharmaceutical Industry Association requested that the workshop be postponed until September. The reasons given for their request were insufficient time to prepare for the meeting, previous commitments for key scientific and technical personnel, a conference already being held immediately preceding the planned workshop, and other conflicts with the May dates. In order to provide an opportunity for the greatest number of concerned individual to participate. FDA is moving the dates of the meeting from May 7 through 9, 1986, to September 29 through October 1, 1986. The hours and location of the meeting stay the same.

The workshop will follow the previously announced format and provide a forum to discuss:

(1) The design of in vivo bioequivalence testing for conventional release, solid oral dosage forms of drugs;

(2) Quantitative and statistical analysis and evaluation of bioequivalence testing studies for conventional release, solid oral dosage forms of drugs;

(3) In vivo and in vitro data correlation and its implications on bioequivalence; and

(4) Agency procedures and regulatory aspects of bioequivalence.

Additional information on the workshop and directions on participation as a speaker on the program will be provided in a subsequent notice.

Dated: March 12, 1986.

Adam J. Trujillo,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Revision of Income Criteria for Eligibility for Uncompensated Services

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: This notice announces the applicability of the recent revision of the Poverty Income Guidelines to uncompensated services programs administered by health care facilities pursuant to Titles VI and XVI of the Public Health Service Act.

DATE: The revision of the guidelines must be implemented by affected facilities on April 12, 1986.

FOR FURTHER INFORMATION CONTACT: Martin J. Frankel, Director, Division of Facilities Compliance, Office of Health Facilities, Bureau of Health Maintenance Organizations and Resources Development, Health Resources and Services Administration, 5600 Fishers Lane, Room 11-19,

VOL
51

UMI

Rockville, Maryland 20857, Telephone 301 443-5856.

SUPPLEMENTARY INFORMATION: On February 11, 1986 [51 FR 5105], the annual revision of the Poverty Income Guidelines was issued effective upon publication in the **Federal Register**. That revision affects, among others, health care facilities that have received construction assistance under Title VI or Title XVI of the Public Health Service Act, 42 U.S.C. 291, et seq., and 42 U.S.C. 300q, et seq., respectively. The regulations applicable to those facilities provide that the eligibility of persons for uncompensated services is to be determined in accordance with the current Poverty Income Guidelines of the Department of Health and Human Services, formerly published by the Community Services Administration (CSA). See 42 CFR 124.506(a). The statute which gave this Department authority to revise the guidelines also provides that any reference in law to the Poverty Income Guidelines constitutes a reference to, in this case, the present revision [Pub. L. 97–35, 683(c)(1)]. A discussion of the basis for delaying the effective date of the guidelines for eligibility for uncompensated services can be found in the **Federal Register**, Volume 47, No. 79, page 17489, published on April 23, 1982.

Dated: March 12, 1986.

John H. Kelso,

Acting Administrator.

BILLING CODE 4160-16-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Blackfeet Indian Reservation, MT; Ordinance Amending Laws Relating to the Use and Distribution of Liquor

February 28, 1986.

This Notice is published in accordance with authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8, and in accordance with the Act of August 15, 1953, 67 Stat. 586, 18 U.S.C. 1161. I certify that Resolution No. 283–85 and Ordinance No. 73 were duly adopted by the Blackfeet Tribal Business Council on June 6, 1985. Resolution 283–85 and Ordinance No. 73 provide for the distribution of alcoholic beverages in the area of Indian country under the jurisdiction of the Blackfeet Indian Tribe. The ordinance reads as follows:

Ross O. Swimmer,

Assistant Secretary, Indian Affairs.

Resolution 283–85

Whereas: The Blackfeet Tribal Business Council is the duly constituted governing body within the exterior boundaries of the Blackfeet Indian Reservation; and

Whereas: The Blackfeet Tribal Business Council has been organized to represent, develop, protect and advance the views, interests, education and resources or the Blackfeet Indian Reservation; and

Whereas: Pursuant to Article VI, Section 1(h), the Blackfeet Tribal Business Council has been empowered to adopt laws regulating and licensing all business activities conducted upon the Blackfeet Indian Reservation; and

Whereas: The Congress of the United States has delegated its authority to regulate the sale of alcoholic beverages within Indian reservations to the various tribal governments who occupy those reservations; and

Whereas: Pursuant to the Act of June 30, 1919 (41 Stat. 3, 17), the Congress of the United States expressly provided that the lands within the Blackfeet Reservation, whether allotted, unallotted, reserved, set aside for townsite purposes, or otherwise disposed of, shall be subject to all the laws of the United States prohibiting the introduction into the Blackfeet Reservation until otherwise provided by Congress; and

Whereas: Congress has never provided that the liquor laws of the United States would not be applicable to all lands within the exterior boundaries of the Blackfeet Reservation; and

Whereas: Pursuant to Title 18 of the United States Code, Section 1161, liquor ordinances of the Blackfeet Tribe are a part of the federal liquor laws; and

Whereas: The Blackfeet Tribal Business Council first advertised the attached Ordinance No. 73, in the local newspaper for two weeks and then held a public hearing in Browning, Montana, regarding said ordinance; and

Whereas: After due consideration the Blackfeet Tribal Business Council believes that the attached ordinance fairly represents the views, policy and needs of the Blackfeet Nation in the area of liquor regulation; now

Therefore Be It Resolve: That the Blackfeet Tribal Business Council hereby adopts the attached Ordinance No. 73, and requests its prompt approval by the Secretary of the Interior or his authorized agent; and

Be It Further Resolved: That all prior ordinances regulating the sale of alcoholic beverages shall be repealed as of the date of the approval of the attached Ordinance No. 73, by the Secretary of the Interior or his authorized representative and final publication in the Federal Register; and

Now Be It Finally Resolved: That upon final approval of the attached Ordinance No. 73, and its final publication in the Federal Register, the authority of the Tribal Council as stated in the ordinance shall be delegated to the Tribal Revenue Department until otherwise changed by the Blackfeet Tribal Business Council.

Attest:

Myra J. Galbreath,

Secretary, Blackfeet Tribal Business Council.

The Blackfeet Tribe of the Blackfeet Indian Nation.

John Yellow Kidney,

Vice-Chairman, Blackfeet Tribal Business Council.

Certification

I hereby certify that the foregoing resolution was adopted by the Blackfeet Tribal Business Council during a duly called, noticed and convened Regular Session assembled for business the 6th day of June, 1985, with Seven (7) members present to constitute a quorum, and by a vote of Five (5) for and Two (2) opposed.

Myra J. Galbreath,

Secretary, Blackfeet Tribal Business Council.

Ordinance No. 73

Regulation and Control of Alcohol

Part 1.—General Provisions

1. Declaration of Public Policy—Subject Matters of Regulation
2. Sale of Alcoholic Beverages Privilege, Not Right

Part 2.—Retail Sales Restrictions

1. Unlawful Sales and Other Transactions
2. Sales and Distribution of Alcoholic Beverages Lawful
3. Closing Hours for Licensed Retail Establishments
4. Sale of Alcoholic Beverages During Closed Hours Unlawful
5. Lapse of License for Non-Use
6. Tribal License Automatically Revoked with Loss of State License

Part 3.—License Administration

1. License Classification
2. Beer Retailer's License—Application and Issuance—Check of Books of Account and Premises by Tribe

3. Retail Beer License for On-Premises Consumption—Wine License Amendment—Limit on Number of Licenses
4. Retail Beer and Wine License for Off-Premises Consumption Only—Discretionary Authority to Issue—Limited to Tribal Members Only or 51% Member Owned Businesses on New Licenses
5. Beer License Transfers
6. All Beverage License—Quotas
7. Census
8. Special License to Sell Beer and Wine—Application and Issuance

Part 4.—Licensing Criteria and Procedure

1. License as Privilege—Criteria for Decision on Application
2. Application and Investigation
3. Notice of Application—Publication—Protest
4. Protests and Hearing—Posting and Contents of License—Privilege—Expiration
5. Transfer—By Sale—In Case of Death of Licensee—From Premises to Premises
6. Denial of License—Public Safety and Welfare
7. Expiration of License
8. Renewal—Revocation or Suspension—Penalty
9. Judicial Review Concerning Alcoholic Beverage Laws

Part 5.—Licensing Fees

1. Retail Sales License and Special License Fees

Part 6.—Violations and Enforcement

1. Investigations—Search Warrants—Seizure and Forfeiture of Unlawful Alcoholic Beverages and Conveyance Devices
2. When Force May be Used in Seizure—Hearing Required in Forfeiture Cases
3. Inspection of Carrier's Records—Unlawful for Carrier to Refuse
4. Violation of Code Civil Action in Tribal Court—Corrective Action Before Judicial Proceedings

Part 7.—Prohibitions and Penalties

1. Unlawful Transfer, Sale and Possession of Alcoholic Beverages
2. Penalty for Sale of Alcoholic Beverages Without a License
3. Providing Alcoholic Beverages to Intoxicated Persons Prohibited
4. Age Limit on Sale Alcoholic Beverages—Penalty for Violation
5. Miscellaneous Prohibitions—Penalty
6. Firearms Not Allowed on Premises
7. Minors Not Allowed—Eating Establishments Exception
8. Sale of Alcoholic Beverages from Drive-In Windows or Similar Devices Prohibited
9. Penalty for Violating Ordinance—Revocation of License
10. Officer or Agent, of Firm or Corporation, and Occupant of Premises Deemed Party to Violation
11. Injunction Actions
12. Delegation of Authority
13. Federal Laws Applicable

Part 8.—Regulation of Wholesalers, Brewers, and State Liquor Stores

1. Brewers License to Sell Products—License Fee
2. Wholesale Distribution of Beer and Wine—License Required—Fee
3. State Liquor Store—Limit—Fee
4. Renewal—Suspension, Revocation—Expiration
5. Violators—Enforcement

Part 9.—Effective Date and Repeal

1. Effective Date
2. Repeal of Prior Ordinance and Resolutions

Ordinance No. 73

Regulation and Control of Liquor

Part 1.—General Provisions

1.0 *Declaration of Public Policy—Subject Matters of Regulation.* (A) It is hereby declared to be the public policy of the Blackfeet Tribe to effectuate and ensure the entire control of the sale and distribution of all alcoholic beverages within the Blackfeet Indian Reservation, subject to the inherent sovereign power of the Blackfeet Nation and the power delegated to the Tribe by the United States Congress and concurrently with the State of Montana.

(B) This code is an exercise of the police powers of the Blackfeet Nation and the power delegated pursuant to Title 18, Section 1161 of the United States Code, in and for the protection of the welfare, health, peace, morals and safety of the people of the Blackfeet Nation and residents of the Blackfeet Indian Reservation.

(C) It is further the policy of the Blackfeet Nation to effectuate the economic rights of members of the Blackfeet Nation, as guaranteed by Article VIII, Section 2, of the Blackfeet Constitution. This policy is implemented herein by limiting the issuance of new licenses to enrolled members of the Blackfeet Nation or business entities which are at least fifty-one percent (51%) owned by enrolled members of the Blackfeet Nation.

2.0 *Sale of Alcoholic Beverages Privilege, Not Right.* A license for the sale or distribution of alcoholic beverages within the Blackfeet Indian Reservation is a privilege which the Blackfeet Nation may grant or deny and is not a right to which any person or entity is entitled.

Part 2.—Retail Sales Restrictions

1.0 *Unlawful Sales and Other Transactions.* (A) It shall be unlawful for any licensee, his/her employee or employees, or any other person to sell, deliver, or give away or cause or permit to be sold, delivered, or given away any alcoholic beverage to any person:

(1) Under nineteen (19) years of age; or

(2) Who is obviously, actually or apparently intoxicated.

(B) It shall be unlawful for any person or entity to sell or distribute alcoholic beverages within the exterior boundaries of the Blackfeet Indian Reservation without first obtaining a license pursuant to this ordinance.

(C) It shall be mandatory under this law for all licensees to display in a prominent place in their premises a placard stating fully the consequences for violations of provisions of this law by persons under nineteen (19) years of age.

2.0 *Sales and Distribution of Alcoholic Beverages Unlawful.* It shall be lawful for a licensed person or business entity to sell or distribute alcoholic beverages within the exterior boundaries of the Blackfeet Indian Reservation, provided that the licensee complies with the provisions of this ordinance, concurrently with the laws of the State of Montana.

3.0 *Closing Hours for Licensed Retail Establishments.* All licensed establishments wherein alcoholic beverages are offered for sale, or given away at retail shall be closed:

(A) Each day between 2:00 a.m. and 8:00 a.m., and

(B) Easter Sunday between 8:00 a.m. and 2:00 p.m. (all day);

(C) From 8:00 p.m. December 24 (Christmas Eve) to 8:00 p.m. December 25 (Christmas Day); and

The Blackfeet Tribal Business Council retains discretionary authority to close licensed retail establishments in recognition of Indian religious ceremonies, after giving due notice. Provided, however, that when a licensed retail establishment is operated in conjunction with a restaurant, hotel, or other lawful business other than the sale of intoxicating alcoholic beverages, then such other lawful business need not be closed, but only the part whereof such alcoholic beverages are sold.

4.0 *Sale of Alcoholic Beverages During Closed Hours Unlawful.* It shall be unlawful for any licensed tribal

VOL

52
MR
18
1986
UMI

establishments to sell, offer for sale, or give away alcoholic beverages during the hours when the licensed retail establishments are required by this ordinance to be closed or otherwise refrain from the sale of alcoholic beverages.

5.0 *Lapse of License for Non-Use.* (A) Any retail license issued pursuant to this ordinance (including any retail license to sell alcoholic beverages for off-premises consumption) not actually used in a going establishment for ninety (90) days shall automatically lapse. Upon determining the fact of non-use, the Tribal Council shall cancel such license of record and no portion of the fee paid therefore shall be refundable.

(B) The provisions of this section shall not apply to the license of any licensee whose premises are operated on a seasonal basis in connection with a bona fide resort, park hotel, tourist facility from the Tribal Business Council to close the business.

(C) The Tribal Council may, in its discretion, waive the effects of this section for a licensee who failed to use his license in a going establishment for ninety (90) days should the Council find that said lapse was reasonably beyond control of the licensee.

6.0 *Tribal License Automatically Revoked With Loss of State License.* Pursuant to federal law, the regulation of transactions involving alcoholic beverages within the Indian Reservation is a matter of concurrent jurisdiction between the various Indian tribes and the States in which their reservations are located. Thus to validly engage in the business of selling or distributing alcoholic beverages on Indian reservations a licensee must possess both a tribal and state license.

(A) Any tribal license issued pursuant to this ordinance will be automatically revoked ninety (90) days after the Tribal Council receives notification from proper State officials that the licensee's state license has been revoked or has otherwise expired, and that all state appeals processes have been exhausted.

Part 3.—License Administration

1.0 *License Classification.* (A) The issuance of licenses for the retail sale of alcoholic beverages within the Blackfeet Indian Reservation shall be based upon the following classifications.

CLASS 1. *All Beverage License:* This license enables the licensee to sell liquor, beer, wine and other alcoholic beverages, as provided by law, at retail within the boundaries of the Blackfeet Indian Reservation.

CLASS 2. *On-Premises Retail Beer License, With Available Wine Sales Amendment:* This license enables the licensee to sell beer for on-premises consumption. For an additioinal fee a wine amendment is available. The license must make an initial showing that the sale of beer for on premises consumption is supplementary to a restaurant or prepared food business. Non-retention of the beer license, for any reason, will mean automatic loss of the wine license amendment.

CLASS 3. *Off-Premises Retail Beer License With Available Wine Sales Amendment:* This license enables the licensee to sell beer and wine with an amendment, in the original package for off-premises consumption only. The licensee must make an initial showing that the license will be used in conjunction with a business operated primarily as a bona fide grocery store or drug store.

(B) The issuance of new licenses in Class 1, 2, and 3 shall be limited to enrolled members of the Blackfeet Indian Nation or business entities which are at least fifty-one percent (51%) owned and operated by an enrolled member of the Blackfeet Indian Nation.

CLASS 4. *Special Licenses:* This license consists of special permission enabling the licensee to sell beer or wine to the patrons of some preplanned community event, to be consumed within the enclosure where the event is held. Allowable events include company picnics, conventions, fairs, civil entertainment, and sporting events.

2.0 *Beer Retailer's License—Application and Issuance—Check of Books of Account and Premises by Tribe.* (A) Any person desiring to have and possess beer and wine for sale under this ordinance for the purpose of selling it at retail shall first apply to the Tribal Council for a license to do so and tender with said application the license fee provided for.

(B) Upon being satisfied, from such application or otherwise, that the applicant is qualified as provided, the Tribal Council shall issue a license to such person or applicant, which license shall at all times be prominently displayed in the place of business of the applicant.

(C) If the Tribal Council shall find that the applicant is not qualified, no license shall be granted and the license fee tendered shall be promptly returned.

(D) The Tribal Council shall have the right and is hereby given the authority to make, at any time, an examination of the books of account of any such retailer and his premises and otherwise check his methods of conducting business in so much as it regards his retail liquor license, through independent licensed auditors.

3.0 *Retailer Beer License for On-Premises Consumption—Wine License Amendment—Limit On Number of Licenses.* (A) Except as otherwise provided by law, a license to sell beer at retail for on premises consumption, or beer and wine at retail for on-premises consumption, in accordance with the provisions of this ordinance, may be issued to any person, firm or corporation who is approved by the Tribal Council as a fit and proper person, firm or corporation to sell beer, except that:

(1) in the TOWN OF BROWNING, and within a distance of five (5) miles from the city limits of Browning, not more than one (1) license for every 1,000 persons residing in the above described area shall be issued and said license may not be used in conjunction with a retail all-beverage license.

(2) in the unincorporated TOWN OF EAST GLACIER PARK and within a distance of five (5) miles from the limits of East Glacier Park, not more than one (1) license for every 1,000 persons residing in the described area, shall be issued and said license may not be used in conjunction with a retail all-beverage license.

(3) the number of retail beer licenses for on-premises consumption, which may be issued by the Tribal Council, excluding those provided for in subsections (1) and (2) above, shall be determined on a limitation of no more than one (1) per 750 persons in that area and provided further, that, in the exercise of its sound discretion, the Tribal Council first determines that the issuance of said license is required by public convenience and necessity.

(B) Retail beer licenses, or beer and wine licenses, of issue on January 1, 1985, and which are in excess of the foregoing limitations shall be renewable, but no new licenses may be issued in violation of such limitations.

(C) An applicant for a license to sell beer, or beer and wine for on-premises consumption, at retail, must make a satisfactory showing that the sale of beer, or beer and wine for consumption on premises would be supplemental to the applicant's primary business activity of operating a restaurant or other prepared food business.

(D) Any licensee possessing an on-premises retail beer license may apply for an on-premises retail wine license amendment. An applicant to sell wine for on-premises consumption at retail, must first possess a valid retail on-premises beer license; provided, however, that this requirement shall not prevent an applicant from applying for an on-premises beer license and the retail on-premises wine license

simultaneously. Non-retention of the retail beer license, for whatever reason, shall mean automatic loss of the amendment.

A person holding a retail on-premises beer and wine license, may sell beer and wine for consumption on or off the premises.

4.0 *Retail Beer and Wine License for Off-Premises Consumption Only—Discretionary Authority to Issue—Limited to Tribal Members Only of 51% Member Owned Businesses on New Licenses.* (A) A retail license to sell beer or wine, or both in the original package for off-premises consumption only may be issued to any person, firm, or corporation to sell beer or wine, or both, and whose premises proposed for licensing are operated as a bona fide grocery store or drug store.

(B) The number of such licenses which the Tribal Council may issue is not limited, but shall be determined by the Tribal Council in the exercise of its sound discretion, and the Tribal Council may in the exercise of its sound discretion grant or deny any application for any such license or suspend or revoke any cush license for cause.

(C) Provided, however, that the issueance of new licenses pursuant to this section is limited to enrolled members of the Blackfeet Indian Nation or business entities which are at least 51% owned by enrolled members of the Blackfeet Nation.

Retail beer, or beer and wine, licenses for off-premises consumption only, which are held by persons not members of the Blackfeet Nation, or by entities which are not 51% owned by enrolled members of the Blackfeet Nation, and which were of issue prior January 1, 1985 [sic], are not affected by the limitation in this sub-section. Said licenses shall be renewable and transferable subject to the limitations contained in this ordinance.

5.0 *Beer License Transfers.* (A) A transfer of any beer retailer's license, including transfer of a beer license with a wine license amendment, may be made upon application to the Tribal Council with the consent of the Council, provided that the transferee qualifies under this ordinance, and subject to the following limitations:

(1) Transfer of a license which was issued after January 1, 1985, as a new license with tribal member preference, may be made only to another enrolled member of the Blackfeet Nation or a business entity which is 51% owned by an enrolled member of the Blackfeet Nation.

(2) Transfer of a license issued prior to January 1, 1985, may be made to any qualified applicant, and will not be limited to tribal member preference.

6.0 *All-Beverage License—Quotas.* (A) Except as otherwise provided by law, a license to sell beer, wine and liquor at retail (an all-beverage license) in accordance with the provisions of this ordinance, may be issued to any person approved by the Tribal Council as a fit and proper person to sell such beverages, except that the number of all-beverage licenses which the Tribal Council may issue shall be limited as follows:

(1) There shall be no more than four (4) Class 1 all-beverage licenses for the TOWN OF BROWNING and within a five (5) mile radius of the town limits. An additional license will be available with each increase of 1,000 persons residing in the above described area.

(2) There shall be no more than one (1) Class 1 all-beverage license for the unincorporated TOWN OF EAST GLACIER PARK and within a five (5) mile distance from its limits, for every 1,000 persons residing in said area.

(3) The number of retail All-Beverage licenses which the Tribal Council may issue for premises situated outside the areas identified in (1) and (2) above, may not be more than one license for every 750 persons residing on the Blackfeet Indian Reservation, excluding the population of the area identified in (1) and (2) above.

(B) Retail all-beverage licenses of issue on January 1, 1985, and which are in excess of the foregoing limitations shall be renewable, but no new licenses may be issued in violation of such limitations.

(C) Any original license issued pursuant to this section, shall be issued only upon the Tribal Council having first determined, upon a hearing held pursuant to this ordinance, that the issuance of said license is justified by public convenience and necessity.

(D) Transfers of all-beverage licenses which were of issue prior to January 1, 1985, will not be limited to tribal members preference, and may otherwise be made to any qualified applicant.

7.0 *Census.* The most recent census of the Blackfeet Nation shall be the basis upon which the limitations outlined in this ordinance shall be detemined.

8.0 *Special License to Sell Beer and Wine—Application and Issuance.* (A) Any association or corporation conducting a picnic, convention, fair, community entertainment, or sporting event shall in the sound discretion of the Tribal Council be entitled to a special permit to sell beer and wine to the patrons of such event to be consumed within the enclosure where the event is to be held.

(B) An application for a special license shall be presented at least three (3) days in advance of the start of the proposed event and shall describe the location of the enclosure where the event is to be held.

(C) The application shall be accompanied by the amount of the license fee and a written statement of approval of the premises where the event is to be held issued by [sic] law enforcement agency that has jurisdiction over the premises and patrons.

(D) The license issued is a special license and authorises the sale of beer and wine only on the date and during the period stated in the application and approval.

Part 4.—Licensing Criteria and Procedure

1.0 *License as Privilege—Criteria for Decision on Application.* (A) A license under this ordinance is a privilege which the Blackfeet Nation may grant to, or deny, any applicant and is not a right to which any applicant is entitled.

(B) Except as provided herein, in the case of a license that permits onpremises consumption, the Tribal Council must find in every case in which it issues a new license, or in which it approves the transfer of a license that:

(1) In the case of the issuance of a new license, that the applicant is an enrolled member of the Blackfeet Indian Nation, or if the applicant is a firm or corporation, that the applicant is at least 51% owned by an enrolled member of the Blackfeet Indian Nation.

(2) The applicant is financially responsible.

(3) The applicant will not have an interest in more than one establishment licensed for all-beverage sales.

(4) The applicant's past record and present status as a seller of alcoholic beverages and as a businessman and citizen demonstrates that he is likely to operate his establishment in compliance with all applicable tribal laws.

(5) The applicant is not under the age of twenty-one (21) years.

(6) The applicant has obtained the necessary general tribal business license.

(7) The applicant has not been convicted of a felony, or if the applicant has been convicted of a felony, that his rights have been restored.

(8) In the case of the transfer of a license originally issued as a new license after January 1, 1985, that the applicant is an enrolled member of the Blackfeet Indian Nation, or if the applicant is a firm or corporation, that at

VOL 51
ISS 52
MR 18
1986
UMI

least 51% of the firm or corporation is owned by enrolled members of the Blackfeet Indian Nation.

(C) The requirements of this sub-section will apply to all new licenses and transfers occurring after January 1, 1985, in Class 1, Class 2, and Class 3 licenses, except as otherwise provided in specific sub-sections. [sic, 2.0 *Application and Investigation*]

(A) Prior to the issuance of any license under this ordinance, the applicant shall file with the Tribal Council, any application in writing, signed by the applicant and containing such statements relative to the applicant and the premises where the alcoholic beverage is to be sold, as may be required by the Tribal Council, including, but not limited to the following:

(1) The name, age and place or residence of the applicant.

(2) The location of the premises where the license will be used.

(3) In the case of a firm or corporation, the names of all partners and shareholders in the firm or corporation; the percentage of ownership held by each partner or shareholder; the relationship, if any between the partners or shareholders (husband, wife, son, brother-in-law, etc.); and whether or not each shareholder or partner is an enrolled member of the Blackfeet Indian Nation.

(4) In the case of an individual applicant, whether the applicant is an enrolled member of the Blackfeet Indian Nation.

(5) Financial records and reports of the applicant. The application shall be verified by the affidavit of the person making the same before a person authorized to administer oaths.

(B) Upon receipt of a completed application of a license under this ordinance, accompanied by the necessary license fee, as further required in this ordinance, the Tribal Council shall within thirty (30) days make a complete and thorough investigation of all matters pertaining to the application and shall determine whether the applicant is qualified to receive a license and whether the applicant's premises are fit to carry on the business and that tribal law will be complied with.

(C) Upon proof that the applicant has made any false statement on the application, the application may be denied, or if issued, the license may be revoked.

3.0 *Notice of Application—Publication—Protest.* (A) When an application has been filed with the Tribal Council to sell alcoholic beverages at retail or to transfer such license, the Tribal Council shall promptly publish in a newspaper of general circulation within the Blackfeet Indian Reservation a notice that such applicant has made application for such license and that protests against the issuance of a license to the applicant may be mailed to a named tribal administrator within ten (10) days after the final notice is published. Notice of application for either transfer or sale shall be published once a week for four (4) consecutive weeks. Notice may be substantially as follows:

Notice of Application for Transfer of or for Retail Sale of Alcoholic Beverages

Notice is Hereby Given that on the ——— day of ———, 198—, one (name of applicant) filed an application for a license to engage in the retail sale of alcoholic beverages within the boundaries of the Blackfeet Indian Reservation.

The license is to be used at (describe location of premises where alcoholic beverages will be sold), and protests, if there are any, against the issuance of such license may be mailed to ———, Blackfeet Nation, Browning, Montana 59417, on or before ——— day of —, 198—.

Dated: ————————.

(B) Each applicant shall, at the time of filing his application, pay to the Blackfeet Nation an amount sufficient to cover the costs of publication of the notice.

(C) If the Tribal Council receives no written protests, it may issue a license without holding a public hearing. If written protests against the issuance of the license or transfer of an existing license are received, the Tribal Council shall hold a public hearing in Browning at the Blackfeet Tribal Offices. Additional public hearings may be held at the discretion of the Tribal Council.

4.0 *Protests and Hearing—Posting and Contents of License—Privilege—Expiration.* (A) No license may be issued until after the date set in the notice for hearing protests.

(B) Every license issued under this ordinance shall contain:

(1) The name of the person [sic] whom it was issued.

(2) The location of the premises, by street number or other appropriate description, where the license is to be used.

(3) Other information such as the Tribal Council shall deem necessary. Each license must be posted in a conspicuous place on the premises wherein the business authorized under the license is to be conducted. Such license shall be exhibited upon request to any authorized representative of the Tribal Council or to any peace officer of the Blackfeet Nation or Bureau of Indian Affairs.

(C) Any license issued under this ordinance shall be considered a personal privilege to the licensee named in the license and shall be good until the expiration of the license unless sooner revoked or suspended.

5.0 *Transfer—By Sale—In Case of Death of Licensee—From Premises to Premises.* (A) Except as otherwise provided in this ordinance, no license for the retail sale of alcoholic beverages shall be transferred or sold. Nor shall said license be used for any place of business not described in the license without first making application to and receiving the approval of the Tribal Council.

(B) A license for the retail sale of alcoholic beverages may be transferred to the executor or administrator of the estate of any business of selling alcoholic beverages under a license, and in such event a license may descend or be disposed of with the business to which it is applicable under the appropriate probate proceedings.

(C) A license to sell alcoholic beverages at retail may be transferred to a qualified purchaser, upon a bona fide sale of the business operated under that license. No transfer of any license as to person or location shall be effective until approval by the Tribal Council, and any licensee, transferee or proposed transferee who operates or attempts to operate under any supposedly transferred license shall be considered as operating without a license to operate the business to be transferred, under the license, pending final approval, providing an application for transfer has been filed with the Tribal Council.

6.0 *Denial of License—Public Safety and Welfare.* (A) The Tribal Council may deny the issuance of any license for the retail sale of alcoholic beverages if it determines that the premises proposed for licensing cannot be properly policed by local authorities.

(B) Nor may a license under this ordinance be issued if the Tribal Council finds upon the evidence presented at the hearing, that the welfare of the people residing in the vicinity of the place of which such license is desired will be adversely and seriously affected and the public interest will not be served by the issuance of such license.

7.0 *Expiration of License.* (A) Each July 1st, the Tribal Council shall issue licenses to holders of retail licenses to sell alcoholic beverages within the Blackfeet Reservation on an annual basis and as such fees as are prescribed by law, such licenses are subject to

revocation or suspension as provided for in Part 4, section 8 of this ordinance after midnight on June 30th of the licensing year for which the license fee has not been paid, if the annual license fees are not paid. Initial licenses issued under this ordinance, shall be issued, at the annual rate, for a period ending June 30, 1986, regardless of when issued.

8.0 *Renewal—Revocation or Suspension—Penalty.* (A) The Tribal Council may upon its own motion, and shall upon the written, verified complaint of any person, investigate the action and operation of any retail seller or alcoholic beverages licensed under this ordinance.

(B) If the Tribal Council, after investigation, shall have reasonable cause to believe that any such license has violated the provisions of this ordinance, it may, in its discretion, and in addition to other penalties prescribed:

(1) Reprimand the licensee; or

(2) Suspend a license for a period not to exceed three (3) months; or

(3) Revoke the license of any such licensee; or

(4) Refuse to grant a renewal of such license upon the expiration thereof; or

(5) Impose a civil penalty not to exceed One Thousand Five Hundred Dollars ($1,500.00), subject to the right to a hearing in the Blackfeet Tribal Court. The affected licensee may seek a stay of the imposition of the fine provided the licensee files a petition for hearing on the fine with the Blackfeet Tribal Court within ten (10) working days of the day the licensee is notified of the fine. Failure to file a petition within the required time shall result in a loss of the Tribal Court's jurisdiction to review the fine pursuant to this ordinance.

9.0 *Judicial Review Concerning Alcoholic Beverage Laws.* (A) Any interested party shall have the right to seek judicial review of any decision of the Tribal Council concerning the issuance, transfer, suspension, or revocation of any license to sell at retail alcoholic beverages within the Blackfeet Reservation by the Blackfeet Tribal Court.

(B) Judicial revied under this provision will be limited to a review of the record of the prior proceedings on the affected license. The Court will be limited to determining:

(1) Whether the Tribal Council abused its discretion by acting arbitrarily or capriciously; or

(2) Whether the Tribal Council's decision is supported by the record of the case and the facts contained therein; or

(3) Whether the Tribal Council's decision is consistent with the applicable provisions of the law.

(C) The Tribal Council's decision shall be final unless modified or reversed by the Tribal Court.

Part 5.—Licensing Fees

1.0 *Retail Sales License and Special License Fees.* (A) Each retail beer, or retail beer and wine license, under the provisions of this ordinance, shall pay an annual license fee as follows:

(1) Retail on-premises beer license, Two Hundred Dollars ($200.00); with wine license amendment, an additional Two Hundred Dollars ($200.00).

(2) For a license to sell beer at retail for off-premises consumption only, Two Hundred Dollars ($200.00); for a wine license amendment to sell at retail for off-premises consumption only, an additional Two Hundred Dollars ($200.00).

(B) The fee of special license to sell beer and wine at certain gatherings shall be computed at a rate of Thirty Five Dollars ($35.00) a day for two or more days, but in no case less than Seventy Five Dollars ($75.00).

(C) The fee for licensees licensed as Class 1, All-Beverage retail sellers of alcoholic beverages shall be Five Hundred Dollars ($500.00).

(D) The license fee provided for in this ordinance are exclusive of and in addition to other license fees chargeable by the Blackfeet Nation for the privilege of carrying on business within the Blackfeet Indian Reservation.

(E) In addition to other license fees, the Tribal Council may require a licensee to pay a late fee of thirty percent (30%) of any license fee delinquent on July 1st of the renewal year, and sixty percent (60%) of any license fee delinquent of August 1st of the renewal year, and one hundred percent (100%) of any license fee delinquent on September 1st of the renewal year.

Part 6.—Violations and Enforcement

1.0 *Investigations—Search Warrants—Seizure and Forfeiture of Unlawful Alcoholic Beverages and Conveyance Devices.* (A) The Tribal Council may employ or appoint investigators or prosecuting officers who, under the Council's discretion, will perform such duties as it may require, and who shall be paid such fees and expenses as the Council may fix.

(B) Upon information or oath by any investigator appointed under this ordinance or any tribal or Bureau of Indian Affairs police officer showing reasonable cause to believe that alcoholic beverages are being illegally sold or kept for sale or for any unlawful purpose in any building or premises, it shall be lawful for the Tribal Court by warrant to authorize and empower the police officer or investigator or any other person named in the warrant to enter and search the building or premises and every part thereof and for that purpose to break open any lock, door, or fastening, to break open any closet, cupboard, box or other receptacle where alcoholic beverages might be concealed.

(C) The Tribal Council or any duly authorized representative thereof or any tribal or Bureau of Indian Affairs police officer shall have the right at any time to make an examination of the premises of any retail licensee as to whether the laws of the Blackfeet Nation are being complied with.

(D) Any investigator, duly appointed representative of the Blackfeet Tribal Council or any tribal or Bureau of Indian Affairs police officer who finds an alcoholic beverage which he has reasonable cause to believe is had or kept by any person in violation of the provisions of this ordinance may forthwith seize and remove the same and the packages in which the alcoholic beverage is kept, and upon a finding that the alcoholic beverage is being kept or sold in violation of this ordinance, the alcoholic beverage and all packages containing the same shall, in addition to other penalties prescribed by this ordinance, be forfeited as a matter of law to the Blackfeet Nation.

Whenever a vehicle or other conveyance device of any kind is used to store or transport alcoholic beverages for purposes contrary to the provisions of this ordinance, the vehicle or conveyance device may be seized forthwith. Upon a finding by the Tribal Court that the person in possession of the vehicle or conveyance device or person in charge in said vehicle or conveyance device was in violation of the provisions of this ordinance, the Court may, in addition to any other possible penalties, declare in and by decree that the vehicle or conveyance device, which had been seized, to be forfeited to the Blackfeet Nation.

2.0 *When Force May be Used in Seizure—Hearing Required in Forfeiture Cases.* (A) Where alcoholic beverages are found by an investigator or tribal or Bureau of Indian Affairs Police Officer on any premises or in any place in such quantities as to satisfy the investigator or police officer that such alcoholic beverage is being had or kept contrary to the provisions of this ordinance, it shall force if necessary and seize any alcoholic beverage found, including the packages in which it was had or kept, and immediately turn such alcoholic beverage over to the tribal council.

VOL
51
ISS
52
MR
18
1986
UMI

(B) In all cases where alcoholic beverages, or alcoholic beverages and vehicles and conveyance devices, are seized, the Tribal Council or its designated prosecuting officer shall commence an action in the tribal court against the seized alcoholic beverage, vehicle or conveyance device, and the person or persons actually or apparently in possession or control thereof if any such person be presented at the time of the seizure. The alcoholic beverage shall be named as a defendant to the action.

(C) The complaint shall show the date and place of seizure, the name of the person or persons actually or apparently in or [sic] control thereof if any such person be present at the time of the seizure, the reason the tribal council claims the right to possess the alcoholic beverage or conveyance device, or both, and shall demand that all persons who claim any right to the possession of the alcoholic beverage or conveyance device, or both, shall show the nature of their claim or claims and that the court declare the same to be contraband and that the court order the contraband forfeited to the Blackfeet Nation.

(D) A summons shall be issued, served or published as in all civil actions pursuant to the Tribal Law and Order Code, except that the court summons shall be published in a local newspaper within the Blackfeet Indian Reservation.

(E) In every case in which an alcoholic beverage or a conveyance device is seized by an investigator or police officer, it shall be his duty to forthwith make or cause to be made to the Tribal Council a report in writing of the particulars of the seizure.

3.0 *Inspection of Carrier's Records—Unlawful for Carrier to Refuse.* (A) For the purpose of obtaining information concerning any matter relating to the administration or enforcement of this ordinance, the Tribal Council or any person appointed by it in writing for the purpose, may inspect the freight and express books, and any other documents in the possession of any common carrier doing business within the exterior boundaries of the Blackfeet Indian Reservation, containing any information or record relating to any goods shipped, carried, received for shipment, or co-signed for shipment within the reservation. (B) Every common carrier and every official employee of any such company or common carrier who neglects or refuses to produce and submit for inspection any book, record, or document requested by the tribal council or its authorized representative, where that document relates to enforcement or administration under this ordinance, shall be deemed in violation of this ordinance and shall be subject to a fine of One Hundred Dollars ($100.00) per day for each day during which the violation continues, not to exceed Five Thousand Dollars ($5,000.00).

4.0 *Violation of Code Civil Action in Tribal Court—Corrective Action Before Judicial Proceedings.* (A) Every action charging a violation of the provisions of this ordinance shall be brought by the Tribal Council or its prosecuting officer, in the name of the Blackfeet Tribe, against the licensee or other alleged violator in the Blackfeet Tribal Court as a civil action.

(B) Provided, however, that the Tribal Council may, in the exercise of its sound discretion, resolve any alleged violation only when alleged to have been committed, by an authorized licensee, at the administrative level through the collection of an appropriate fine amount, an undertaking of corrective measures by the licensee, or other allowed penalty. Should an alleged violator agree to administrative resolution of the complaint, he shall not be allowed to seek judicial review of the administrative resolution.

Part 7.—Prohibitions and Penalties

1.0 *Unlawful Transfer, Sale and Possession of Alcoholic Beverages.* (A) Except when in possession of fully issued tribal license and as otherwise provided by this ordinance no person shall, within the Blackfeet Indian Reservation, by himself or through others, keep for sale, or directly or indirectly sell or offer to sell, or to give any other person alcoholic beverages.

(B) This section shall not apply to the county sheriff, tribal police, Bureau of Indian Affairs police, Blackfeet Tribal Council or its authorized representative when in possession of alcoholic beverages under judicial process or to sales by said entities and persons when under judicial process.

2.0 *Penalty for Sale of Alcoholic Beverages Without a License.* Any person who has not been issued a license for the retail sale of any alcoholic beverages under this ordinance who sells or keeps for sale any alcoholic beverage has committed a violation, and upon a finding thereof is punishable by a civil penalty of not less than Five Hundred Dollars ($500.00) nor more than One Thousand Five Hundred Dollars ($1,500.00).

3.0 *Providing Alcoholic Beverages to Intoxicated Persons Prohibited.* (A) No retail seller of alcoholic beverages licensed pursuant to this ordinance may, either through themselves or an agent, sell any alcoholic beverages or permit alcoholic beverages to be sold to any person apparently under the influence of alcohol.

(B) Any retail seller of alcoholic beverages who is licensed pursuant to this ordinance who sells or allows to be sold alcoholic beverages to a person obviously intoxicated, is deemed to have violated this ordinance and upon a finding thereof is punishable of a civil penalty of up to Five Hundred Dollars ($500.00) for each infraction.

(C) No person may give alcoholic beverages to a person apparently under the influence of alcohol.

4.0 *Age Limit on Sale of Alcoholic Beverages—Penalty for Violation.* (A) Except in the case of an alcoholic beverage given to a person under nineteen (19) years of age by his parent or guardian for beverage purposes of administered or sold to him for medicinal purposes, no person shall sell, give or otherwise supply alcoholic beverages to any person under the age of nineteen (19) years or permit any person under that age to consume an alcoholic beverage.

(B) Any person shall have violated this provision who:

(1) invites a person under nineteen (19) years of age into a public place where alcoholic beverages are sold and treats, gives, or purchases an alcoholic beverage for such person; or

(2) holds out such person to the owner of a retail alcoholic beverage establishment that the person is older than nineteen (19) years of age or represents the same to the employees and agents of the owner.

(C) Any person who violates this provision may, upon a finding thereof, be punished through a civil penalty or a fine of not less than Two Hundred Fifty Dollars ($250.00) for each violation.

(D) Provided however, should the drinking age for the State of Montana be changed, the drinking age stated in this ordinance will automatically be changed to reflect the new change.

5.0 *Miscellaneous Prohibitions—Penalty.* (A) All licenses to sell at retail alcoholic beverages [sic] pursuant to this ordinance are hereby prohibited from engaging in the following activities:

(1) From engaging in pawnbroking or taking goods or materials in hock; or

(2) Lending money or engaging in similar activity to indigent persons solely for the purpose of enabling them to purchase alcoholic beverages in his establishment; or

(3) From allowing the consumption of alcoholic beverages on his premises which were purchased for off-premises consumption only; or

(4) From allowing fighting or threatening to fight on his premises or

from generally failing to keep order in his premises.

(B) Any licensee found to be in violation of any of the provisions of this section shall be deemed to have violated this ordinance and is subject to a civil penalty of not less than Three Hundred Dollars ($300.00) for each separate violation.

6.0 *Firearms Not Allowed on Premises.* (A) There shall be no firearms or other dangerous weapons allowed at any time on the premises where alcoholic beverages are being sold at retail, with the exception of licensed firearms for the maintenance of order, firearms possessed by duly authorized peace officers, and firearms maintained by the licensee for protection of himself, his agents, and invitees.

(B) Any person found in possession of a firearm or other dangerous weapon on a premises where alcoholic beverages are being sold at retail shall upon a finding thereof in court, be subject to a civil fine of not less than Two Hundred Fifty Dollars ($250.00).

7.0 *Minors Not Allowed—Eating Establishments Exception.* (A) Minors shall not be allowed in any establishment where alcoholic beverages are sold for on-premises consumption, except where a restaurant or other prepared food business is operated in conjunction therewith.

(B) Any licensee who is found to have violated this provision shall be deemed to have violated this ordinance and be subject to a civil fine of not less than Two Hundred Fifty Dollars ($250.00) for each violation.

8.0 *Sale of Alcoholic Beverages From Drive-In Windows or Similar Devices Prohibited.* (A) It is the public policy of the people of the Blackfeet Nation to stop the carnage that is taking place on the highways of the Blackfeet Reservation and which is occurring as a result of the high number of drinking drivers. It has been statistically proven that drinking drivers account for a significant percentage of all highway deaths and accidents. It is the public policy of the people of the Blackfeet Nation to prevent drinking and driving, not to encourage or facilitate such action.

(B) It shall be unlawful and a violation of this ordinance, to sell or offer to sell alcoholic beverages through drive-up windows or other similar devices which would allow the retail purchaser to purchase alcoholic beverages while remaining in his vehicle. Drive-up windows and other similar devices are hereby declared to be public nuisances and thus subject to injunction to prevent uses in violation of this ordinance.

(C) A licensee found to have violated this provision shall be subject to a civil penalty of not less than One Thousand Dollars ($1,000.00) and not more than Five Thousand Dollars ($5,000.00).

9.0 *Penalty for Violating Ordinance—Revocation of License.* (A) If any retail licensee is convicted of a violation under this ordinance, his license shall be immediately revoked or in the discretion of the Tribal Council such other sanction may be imposed as is authorized by this ordinance. Any person violating the provisions of this ordinance shall, upon a finding thereof, be deemed guilty and subject to such fine or penalty as is provided in this ordinance.

(B) A person under the age of nineteen (19) who is found to have violated any provision of this ordinance shall be subject to a One Hundred Dollar ($100.00) civil penalty for each offense.

10.0 *Officer or Agent, of Firm or Corporation, and Occupant of Premises Deemed Party to Violation.* (A) Where a violation of this ordinance is committed by a corporation or firm, the officer or agent in charge of the premises where the violation was committed shall be deemed to be a party to the violation and shall be personally liable to [sic] the penalties prescribed for the offense as principal offender.

(B) Upon proof of the fact that a violation of this ordinance has been committed by any person in the employ of the occupant of any house or premises, or by any guest of the occupant of any premises where the violation was committed, the occupant of the premises shall be personally liable for the penalties prescribed for the violation as principal offender, notwithstanding the fact that the occupant did not commit the violation or authorize its commission.

(C) Nothing in sections (A) and (B) above will relieve the person actually committing the offense for liability therefore.

11.0 *Injunction Actions.* (A) Upon the determination of the Tribal Council, in the exercise of its sound discretion, an injunction and immediate temporary restraining order may be sought against any retail licensee requesting that he be prohibited from further sales of alcoholic beverages and that his business activities be immediately suspended.

(B) The action may be started by the Tribal Council filing a petition in the Tribal Court, verified by affidavit, showing the need for immediate measures and showing that the licensee has been notified.

(C) If the Court finds that the circumstances present a public nuisance or that the public health and welfare has been or is endangered it shall issue a temporary restraining order and schedule a show cause hearing no later than five (5) working days from the date the temporary order is issued.

(D) The temporary restraining order will dissolve of its own force and effect on the fifth day if the Tribe fails to go forward on its petition on the day set for the hearing.

12.0 *Delegation of Authority.* The Blackfeet Tribal Council hereby reserves the right to delegate any of the powers and duties stated in this ordinance to any agency of the Blackfeet Tribe. In the event of such delegation, the Tribal Council shall promply notify all interested persons by proper publication of which activities or duties have been delegated and to which agency the delegation was made.

13.0 *Federal Laws Applicable.* The Federal Indian Liquor Laws remain applicable to any act or transaction not authorized by this ordinance and not otherwise in compliance with Federal law, violators may be subject to federal prosecution.

Part 8.—Regulation of Wholesalers, Brewers, and State Liquor Stores

1.0 *Brewers License to Sell Products—License Fee.* (A) It shall be unlawful for any brewer of beer, wherever located, to sell his product within the exterior boundaries of the Blackfeet Reservation without first obtaining a license and paying the appropriate fee as provided by this ordinance.

(B) Every brewer who is licensed to do business within the State of Montana, may obtain a license to sell his product within the Blackfeet Indian Reservation by making application with the Blackfeet Tribal Council and submitting a fee of Five Hundred Dollars ($500.00) therewith.

(C) Upon being satisfied that the applicant is duly licensed by the State of Montana and otherwise of good moral character, the Tribal Council shall issue such license to the applicant.

2.0 *Wholesale Distribution of Beer and Wine—License Required—Fee.* (A) It shall be unlawful for any person or firm to sell, offer to sell, or possess for sale any beer, or wine, or both, for wholesale distribution, within the exterior boundaries of the Blackfeet Reservation without first obtaining license and paying the appropriate fee as required by this ordinance.

(B) Any person desiring to possess and sell beer for wholesale or wine for

VOL

MR
18
1986
UMI

wholesale, or both, under the provisions of this ordinance shall apply to the Tribal Council for a license to do so, submitting with his application his annual license fee of One Thousand Dollars ($1,000.00).

(C) Upon being satisfied that the applicant is of good moral character, has sufficient capital and is otherwise a law abiding citizen, the Tribal Council shall issue the license to the applicant.

(D) If the Tribal Council shall determine that the license should not be granted, the applicant shall be promptly notified and his license fee returned.

(E) This provision does not apply to stores owned or operated by the State of Montana as State Liquor Stores.

3.0 *State Liquor Store—Limit—Fee.* (A) There shall be one (1) State Liquor Store on the Blackfeet Indian Reservation. Said store shall not sell alcoholic beverages on the Blackfeet Indian Reservation, whether at wholesale or retail, without first obtaining a license pursuant to this ordinance and paying the appropriate fee.

(B) Upon application by the State of Montana and the tendering of a One Thousand Dollar ($1,000.00) license fee therewith, the Tribal Council shall issue a license to the State Liquor Store which will enable said store to sell alcoholic beverages at wholesale and at retail.

4.0 *Renewal—Suspension—Revocation—Expiration.* Licenses issued to wholesale distributors of alcoholic beverages, brewers, and the State Liquor Store, pursuant to this Part, shall be subject to expiration, renewal, revocation and suspension pursuant to the provisions of Part 4, sections 7, 8, and 9.

5.0 *Violators—Enforcement.* The provisions of this part may be enforced pursuant to the provisions of Part 8, sections 1 through 6 of the ordinance, including those provisions providing for the seizure and forfeiture of contraband alcoholic beverages and conveyance devices which are used in violation of this ordinance.

Part 9.—Effective Date and Repeal.

1.0 *Effective Date.* This ordinance shall be effective upon approval by the Bureau of Indian Affairs and publication as required by law.

2.0 *Repeal of Prior Ordinances and Resolutions.* This Ordinance No. 73, hereby repeals all prior ordinances and resolutons which regulate or purport to regulate the sale and distribution of alcoholic beverages within the Blackfeet Indian Reservation including Ordinance No. 6A. This ordinance is controlling.

BILLING CODE 4310-02-M

Bureau Of Land Management

Environmental Statement, Availability, etc.: Little Grand Canyon, San Rafael River, Side Mountain Wilderness Study Area, and Flume Canyon Wilderness Study Area, UT

AGENCY: Bureau of Land Management, Moab, Interior.

ACTION: Notice of comment periods on two draft environmental assessments ending 30 days from publication of this notice.

SUMMARY: The first environmental assessment has been prepared in response to an application from an outfitter for a commercial Special Recreation Use Permit for the Little Grand Canyon portion of the San Rafael River. Most of this Canyon is located within the Side Mountain Wilderness Study Area, UT-060-023. Under the proposed action BLM would issue new permits on a year-to-year basis pending completion of the San Rafael Resource Management Plan.

The second evaluates a proposed change in kind of livestock from sheep to cattle for 2500 acres of the Corral Wash Grazing Allotment within the Flume Canyon Wilderness Study Area, UT-060-100B.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, Moab District Office, P.O. Box 970, Moab, UT 84532, (801) 259-6111.

Gene Nodine,

District Manager.

BILLING CODE 4310-84-M

Availability of the House Range Resource Area Draft Resource Management Plan/Environmental Impact Statement, and Public Open House

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Availability of the draft RMP/EIS and notice of public open house.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, notice is hereby given that the Bureau of Land Management has prepared a Draft House Range Resource Area Resource Management Plan/Environmental Impact Statement. The Draft RMP/EIS described and analyzes the impacts of four alternatives for managing the Public Lands in the House Range Resource Area. The alternatives recommend levels of grazing for livestock, wildlife, and wild horses and provide overall management prescriptions to guide the multiple-use management of all resoureces. Future recreation designations are also recommended.

DATES: Writen comments on the Draft RMP/EIS should be submitted by June 13, 1986. A Public Open House will be held as scheduled below to receive comments on the alternatives and potential impacts discussed in the Draft RMP/EIS. Written and verbal comments will be accepted.

Date: May 12, 1986
Time: Starting at 3:00 p.m. and ending at 7:00 p.m.
Place: Bureau of Land Management, 15 East 500 North, Fillmore, Utah 84631.

Written and verbal comments received during the Public Open House and all written comments received prior to June 13, 1986 concerning the adequacy of the Draft RMP/EIS will receive consideration in the preparation of the final RMP/EIS.

ADDRESS: Written comments on the Draft RMP/EIS should be sent to: Richfield District Manager, Bureau of Land Management, 150 East 900 North, Richfield, Utah 84701.

FOR FURTHER INFORMATION CONTACT: Mr. Alan Partridge at the above address or telephone (801) 896-8221.

SUPPLEMENTARY INFORMATION: A limited number of copies of the Draft RMP/EIS are available upon request at the above address, or from BLM Offices at the following locations:

Bureau of Land Management, Office of Public Affairs, Main Interior Building, 18th and C Streets NW., Washington, DC 20240
Bureau of Land Mangement, Utah State Office, CPS Financial Center, 324 South State Street, Salt Lake City, Utah 84111-2303.

Dated: March 10, 1986.

Donald L. Pendleton,

District Manager.

BILLING CODE 4310-84-M

Minerals Management Service

Funding Guidelines Working Panel; Meeting

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of Meeting of Working Panel Established by the Royalty Management Advisory Committee.

SUMMARY: The Minerals Management Service hereby gives notice that the 202/205 Funding Guidelines Working Panel, established by the Royalty Management Advisory Committee, will meet in Lakewood, Colorado, at the location and on the dates indicated in the Location and Dates section below.

Sections 202 and 205 of the Federal Oil and Gas Royalty Management Act of 1982 authorize the Secretary to delegate authority to any State to conduct audits of mineral leases on Federal and Indian lands. Standards and specific criteria are needed to ensure an equitable allocation of available funds among the participating States and Indian tribes. The 202/205 Funding Guidelines Working Panel will submit recommendations to the Advisory Committee regarding such standards and specific criteria.

SUPPLEMENTARY INFORMATION: The 202/205 Funding Guidelines Working Panel is one of six working panels established by then Royalty Management Advisory Committee. The panels are composed of both Advisory Committee members and non-Committee members, and were established to provide the Advisory Committee with analyses of specific issues and proposed recommendations. Panel recommendations will be reviewed by the Advisory Committee, which will then decide what advice recommendations to give to the Department of the Interior and MMS. Although the panels may meet with Department of the Interior or MMS staff members to obtain information they require in conducting their analyses, advice and recommendations of the panels will be made to the Advisory Committee and not to the Department of the Interior or the MMS.

Location and Dates

The 202/205 Funding Guidelines Working Panel will meet at the Sheraton Inn Hotel, 360 Union Boulevard, Lakewood, Colorado, April 8-10, 1986.

The panel will meet from 8 a.m. to 5 p.m. daily. If the meeting is completed in less than the three days scheduled, the panel will adjourn upon such completion.

The public is invited to attend these meetings and make oral or written comments. A time will be set aside by the Panel chairperson during which the public will be invited to make oral comments. Written comments should be submitted by April 30, 1986, to the address listed in the **FOR FURTHER INFORMATION CONTACT** Section below.

FOR FURTHER INFORMATION CONTACT: Vernon B. Ingraham, Minerals Management Service, Royalty Management Program, Office of External Affairs, Denver Federal Center, Building 85, P.O. Box 25165, Mail Stop 660, Denver, Colorado 80225, telephone number (303) 231-3360, (FTS) 326-3360.

Dated: March 13, 1986.

Donald T. Sant,

Acting Director, Minerals Management Service.

National Park Service

Boundary Adjustment of Lake Mead National Recreation Area.

By virtue of Section 2 of Pub. L. 88-639, 78 Statute 1039, enacted October 8, 1964 which authorizes the Secretary of the Interior to revise the boundaries of Lake Mead National Recreation Area, the following 935 acres of private land are hereby deleted from Lake Mead National Recreation Area:

All those parcels of land located in Township 21 South, Range 63 East, Mount Diablo Meridian, Nevada, and being more particularly described as follows:

Sec. 14, SW¼ NW¼ SE¼, NE¼, W½ SW¼ SE¼ NE¼, S½ NE¼ SW¼ NE¼, SE¼ SW¼ NE¼, W½ SW¼ NE¼, NW¼ NE¼ SW¼ NE¼, W½, W½ SE¼, W½ W½ NE¼ SE¼;

Section 23, W½ E½, W½.

The revised boundary of Lake Mead National Recreation Area reflecting this 935 acre deletion is depicted on the map entitled "Boundary Map, Lake Mead National Recreation Area", Numbered 80,013(B) and dated February 24, 1986. This map is available for public inspection at the Western Regional Office, National Park Service, 450 Golden Gate Avenue, P.O. Box 36063, San Francisco, California 94102, and at the Headquarters Office of the Superintendent of Lake Mead National Recreation Area.

Inquires concerning the area within Lake Mead National Recreation Area shall be directed to the Director, National Park Service, U.S. Department of the Interior, Washington, DC 20013-7127, or to the Regional Director, Western Regional Office.

Howard H. Chapman,

Regional Director, Western Region.

Appalachian National Scenic Trail Sale of Excess Lands

AGENCY: National Park Service, Interior.

ACTION: Notice, Sale of Lands Excess to the Appalachian National Scenic Trail, Warren and Fauquier Counties, Virginia.

SUMMARY: The following lands have been identified as suitable for disposal by public sale under the provisions of Section 7(f)(2) of the National Trails Systems Act, Pub. L. 90–543, as amended by Pub. L. 98–11 on March 28, 1983.

Tract No.	Option	Size (acres)	Location	Fair market value
420-31		62.50	Fauquier County	62,500
420-32/33	(a)	5.62	Warren County	15,000
	(b)	2.60	Warren County	15,000
	(c)	3.22	Warren County	13,000
	(d)	3.63	Warren County	13,000
	(e)	3.64	Warren County	13,000
	(f)	3.77	Warren County	13,000
	(g)	4.74	Warren County	15,000
	(h)	5.15	Warren/Fauquier County.	13,000
	(i)	32.37	Warren/Fauquier County.	99,000
420-35/37		20.80	Warren/Fauquier County.	16,050
420-38/39	(a)	111.24	Warren/Fauquier County.	89,000
	(b)	111.24	Warren/Fauquier County.	66,700
420-41		23.00	Warren County	114,000
419-27		52.10	Fauquier County	31,300

The lands and improvements thereon, if any, are not required for the protection or management of the Appalachian National Scenic Trail. The lands are offered subject to existing rights of record and such terms and conditions as are deemed necessary for the protection and management of the Appalachian National Scenic Trail.

The lands will be offered for sale to the highest bidder. Bids in an amount less than the appraised fair market value will not be considered. Sealed bids must be received prior to 1:00 P.M. on May 5, 1986 at the Appalachian Trail Land Acquisition Field Office, P.O. Box 908, 210 Porter Avenue, Martinsburg, West Virginia 25401. Specifications for bidding and conveyance, legal descriptions, narrative descriptions of the lands and improvements thereon, maps, preference rights, deed restrictions and reservations, and other information regarding the terms and conditions of the sale are available for public inspection at the Appalachian Trail Land Acquisition Field Office, 210 Porter Avenue, Martinsburg, West Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. Donald J. Owen, Appalachian Trail Land Acquisition Field Office, P.O. Box 908, Martinsburg, West Virginia 25401, Telephone (304) 263–4943.

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–32 (Sub-32)]

Boston and Maine Corporation—Abandonment in Hillsborough County; NH; Findings

The Commission has found that public convenience and necessity permit Boston and Maine Corporation to abandon its 18.61-mile line of railroad between Wilton and Bennington, NH, extending from milepost N–16.36 to milepost N–32.36 and milepost W–59.39

to milepost W–62.00, in Hillsborough County, NH.

A certificate will be issued authorizing this abandonment unless within 10 days after this publication the Commission also finds that: (1) A financially responsible person has offered assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this Notice. The following notation must be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB–OFA". Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Lodging of Partial Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on February 28, 1986, a proposed partial consent decree in *United States* v. *Broderick Investment Co., et al.*, Civil Action No. 86–Z369 was lodged with the United States District Court for the District of Colorado. The action arises under sections 106 and 107 of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") and section 3008 of the Resource Conservation and Recovery Act ("RCRA"). The proposed decree imposes a civil penalty of one hundred thousand ($100,000) dollars under RCRA and requires the defendants to perform the Remedial Investigation and Feasibility Study ("RI/FS") for the Broderick wood processing and preservation facility in Denver, Colorado. The RI/FS will be designed to determine the full extent of contamination at the Broderick facility and to evaluate remedial action alternatives to abate such contamination.

The Department of Justice will receive for a period of thirty (30) days from the date of publication comments relating to the proposed partial consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Broderick Investment Co., et al.*, D.J. Ref. 90–7–1–254.

The proposed consent decree may be examined at the Office of the United States Attorney, 1961 Stout Street, Suite 1200, Federal Office Building, Denver, Colorado 80294 and at the Region VIII Office of the Environmental Protection Agency, 999—18th Street, Suite 1300, One Denver Place, Denver, Colorado 80202–2413, and at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1515. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $3.60 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 86–5873 Filed 3–17–86; 8:45 am]

BILLING CODE 4410-01-M

Antitrust Division

United States v. Pacific Telesis Group, et al.: Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b) through (h), that a proposed Final Judgment, Stipulation and Competitive Impact Statement have been filed with the United States District Court for the Central District of California in *United States of America* v. *Pacific Telesis Group, et al.*, Civil Action No. 86–1298 RMT.

The complaint of the United States in this case alleges that the acquisition by Pacific Telesis Group ("Telesis") of Communications Industries, Inc. would result in Telesis becoming a partner of LIN Cellular Communications Corporation ("LIN") in one of the two cellular radio systems in Dallas-Ft. Worth, Texas, thereby gaining access to LIN's cellular strategies. By affording Telesis access to LIN's competitive plans, the acquisition would violate section 7 of the Clayton Act, 15 U.S.C. 18 and section 1 of the Sherman Act, 15 U.S.C. 1 by increasing the potential for collusion between Telesis and LIN in the Los Angeles, California cellular market, a market in which they are the only two competitors. The partnership between Telesis and LIN in the Dallas-Ft. Worth cellular system may have a significant anticompetitive effect by hampering LIN's ability to compete effectively in the Los Angeles or Dallas-Ft. Worth cellular markets, and thereby increase the already significant incentives and opportunities for collusion between LIN and Telesis in the Los Angeles cellular market.

The proposed Final Judgment denies Telesis access to LIN's competitive strategies by restricting Telesis to an essentially passive investment role in the Dallas-Ft. Worth partnership. Telesis is prohibited from participating in the affairs of the Dallas-Ft. Worth partnership except in very limited ways. It may not attend meetings of or have employees in common with the Dallas-Ft. Worth partnership and its right to vote is significantly limited. The information that Telesis may obtain concerning the Dallas-Ft. Worth cellular system is strictly limited.

Telesis has agreed to comply with the restrictions contained in the proposed Final Judgment as of the date of filing, and the Department has determined that the proposed Final Judgment provides effective antitrust relief without the costs and delay that would result from litigation.

Public comment is invited within the statutory 60-day comment period. Such comments, and responses thereto, will be published in the Federal Register and filed with the Court. Comments should be directed to Barry Grossman, Chief, Communications and Finance Section, Antitrust Division (SAFE–504), Department of Justice, Washington, DC 20530 (202/724–6693).

Joseph H. Widmar,

Director of Operations, Antitrust Division.

United States District Court for the Central District of California

United States of America, plaintiff, v. Pacific Telesis Group, and Communications Industries, Inc., defendants.

[No. CV–86–1298–RMT]

February 28, 1986.

Stipulation for Entry of Final Judgment

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

(1) The parties consent that a Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements

VOL 51 ISS 52 MR 18 1986 UMI

of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendants and by filing that notice with the Court;

(2) The parties shall abide by and comply with the provisions of the proposed Final Judgment pending entry of the Final Judgment; and

(3) In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding.

Dated: February 27, 1986.

For the Plaintiff United States of America: W. Stephen Cannon, *Acting Assistant Attorney General.* Joseph H. Widmar, Barry Grossman, Kevin R. Sullivan, *U.S. Department of Justice.*

For the Defendants: Nancy C. Garrison, Christine A. Wardell, John Dorsey, Michael L. Volkov, *Attorneys, U.S. Department of Justice, Antitrust Division, Washington, D.C. 20530, (202) 724-6693.*

For Pacific Telesis Group: Stanley M. Gorinson, *Pillsbury, Madison & Sutro, 1667 K Street NW., Washington, D.C. 20006, (202) 887-0300.*

For Communications Industries, Inc: Carl W. Northrop, *Kadison, Pfaelzer, Woodard, Quinn & Rossi, 2000 Pennsylvania Ave. NW., Suite 7500, Washington, DC. 20006, (202) 452-8300.*

United States District Court for the Central District of California

United States of America, plaintiff, v. Pacific Telesis Group, and Communications Industries, Inc., defendants.

[No. CV-]

Final Judgment (Proposed)

Whereas, plaintiff, United States of America, filed its Complaint herein on February 28, 1986, and plaintiff and defendants, by their respective attorneys, have consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein and without this Final Judgment constituting any evidence against or an admission by any party with respect to any such issue; and

Whereas, the defendants have agreed to be bound by the provisions of this Final Judgment pending its approval by the Court;

Now, Therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby

Ordered, Adjudged and Decreed as follows:

I. Jurisdiction

This Court has jurisdiction over the subject matter of this action and over each of the parties hereto. The Complaint states a claim upon which relief may be granted against each defendant under Section 1 of the Sherman Act (15 U.S.C. 1), and section 7 of the Clayton Act, as amended (15 U.S.C. 18).

II. Definitions

As used in this Final Judgment:

A. "Affiliate" or "affiliates" means any organization or entilty in which, directly or indirectly, the named person has control or substantial ownership. For purposes hereof, "substantial ownership" means a direct or indirect equity interest (or the equivalent thereof) of fifty percent (50%) or more of an entity. Any parent company of a named person shall also be deemed its affiliate.

B. "Agent" means any person who is in the service of the named person pursuant to a contract of hire, express or implied, where the named person has the power or right to control and direct such person in the material details of how the work is perfored, provided, however, that a reseller of cellular services or a seller or lessor of cellular equipment not otherwise affiliated with Telesis or CI shall not be deemed its agent for purposes of this Final Judgment.

C. "Block A cellular license" means the authorization issued by the Federal Communications Commission granting authority to operate a cellular system on the Block A frequencies in a particular CGSA, assigned initially by the Federal Communications Commission for use by companies other than affiliates of an exchange telephone company.

D. "Block B cellular license" means the authorization issued by the Federal Communications Commission granting authority to operate a cellular system on the Block B frequencies in a particular CGSA, assigned initially by the Federal Communications Commission for use by affiliates of companies that provide local exchange telephone service in that area.

E. "Cellular system" menas a high capacity land mobile system (i.e., involving portable and car radiotelephones) authorized by the Federal Communications Commission, pursuant to §§ 22.900-22.921 of its rules (47 CFR 22.900-22.921), for use primarily to provide two-way mobile telephone service.

F. "CGSA" means the Cellular Geographic Service Area of a cellular system, which defines the geographic area intended to be served by that cellular system pursuant to §§22.903 of the Federal Communications Commission's rules, 47 CFR 22.903.

G. "CI" means the defendant Communications Industries, Inc.; each division, subsidiary (including but not limited to Gensub, Inc.), or affiliate thereof and each officer, director, employee, agent, or other person acting for or on behalf of any of them; provided, however, that a reseller of cellular services or a seller or lessor of cellular equipment not otherwise affiliated with CI shall not be deemed on agent or other person acting on behalf of CI for purposes of this Final Judgment.

H. "D/FW" means the Texas partnership known as D/FW Signal, established pursuant to the Partnership Agreement in Respect of D/FW Signal Partnership, dated December 9, 1985.

I. "D/FW partner" means any current or future partner in D/FW, or any successor of any of them.

J. "Document" means written, recorded, or graphic material of any kind, including but not limited to electronically stored data from which information can be obtained either directly or by translation through detection devices or readers.

K. "Information" means knowledge or intelligence represented by any form of writing, signs, signals, pictures, sounds, or other symbols.

L. "LACTC" means the California partnership known as Los Angeles Cellular Telephone Company, holding the Block A cellular license for the Los Angles CGSA, established pursuant to the partnership agreement dated June 22, 1983.

M. "LIN" means LIN Broadcasting Corporation; each division, subsidiary or affiliate thereof, and each officer, director, employee, agent, or other person acting for or on behalf of any of them.

N. "Metroplex" means the Texas partnership known as Metroplex Telephone Company, holding the Block A cellular license for the Dallas-Fort Worth CGSA, established pursuant to the Amended and Restated Partnership Agreement dated November 9, 1984.

O. "Metroplex partner" means any current or future partner in Metroplex, and any successor to any of them.

P. "Person" means any natural person, corporation, association, firm,

partnership, or other business or legal entity.

Q. "Telesis" means the defendant Pacific Telesis Group; each division, subsidiary or affiliate thereof, and each officer, director, employee, agent, or other person acting for or on behalf of any of them; provided, however, that a reseller of cellular services or a seller or lessor of cellular equipment not otherwise affiliated with Telesis shall not be deemed an agent or other person acting on behalf of Telesis for purposes of this Final Judgment. Telesis includes Communications Industries, Inc. after its acquisition by Telesis. In addition, solely for purposes of this Final Judgment, Telesis includes the trustee under the Temporary Trust Agreement dated July 26, 1985, as amended, James F. Rill, andc any successor trustee.

R. "Telesis-CI closing" means the transfer of the stock of CI to the Temporary Voting Trust established pursuant to the Temporary Voting Trust Agreement, dated July 26, 1985, as amended, on the "Closing Date" as defined in section 10.02 of the Agreement and Plan of Reorganization, dated May 21, 1985.

III. Applicability

A. The provisions of this Final Judgment shall apply to Telesis and CI, their successors and assigns, and to all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise, including but not limited to all persons who receive notice pursuant to Paragraph V of this Final Judgment.

B. Telesis shall require, as a condition of the sale or other disposition of all or substantially all of its assets or stock, or of its interests in both D/FW and the Los Angeles cellular system to a single purchaser, that the acquiring party agree to be bound by the provisions of this Final Judgment; provided, however, that if Telesis' interests in both D/FW and the Los Angeles Block B cellular system are not transferred to a single purchaser, this provision shall not apply.

IV. Restrictions on Telesis' Access to D/FW aznd Metroplex Information

A. Except as expressly permitted by this Paragraph IV:

1. Telesis shall not participate in the management or operation of D/FW or Metroplex.

2. Telesis shall not be an officer, a member of the partners' committee or a member of any other committee of D/FW or Metroplex.

3. Telesis shall attend no meetings, formal or informal, of D/FW, Metroplex or any committee of D/FW or Metroplex.

4. No officer or employee of Telesis shall be an officer, employee or agent of D/FW or Metroplex, provided, however that Telesis shall not be precluded, upon the receipt of any necessary regulatory or judicial approvals, from acting as a reseller of Metroplex or D/FW in accordance with the provisions of this Final Judgment.

5. Telesis shall not request, obtain, inspect or otherwise have access to any books, records, documents or other information generated by or for D/FW, Metroplex or LIN, that relates directly or indirectly to their cellular radio operations, provided, however, that Telesis may obtain:

(a) Information that is available to the public;

(b) Financial statements of D/FW and Metroplex (i.e. a balance sheet, a statement of earnings and a statement of changes in financial condition);

(c) A summary of a financial audit of D/FW, not more than once annually, prepared by an independent financial auditor selected by Telesis;

(d) Notice of capital calls, limited to the amount of the call and not specifying the purpose for which the funds are to be expended;

(e) Notice of rights to purchase or sell interests in Metroplex or D/FW;

(f) Notice and full information of any transfer or proposed transfer by a Metroplex or D/FW partner of its interest in Metroplex or D/FW or any portion thereof and any notice and full information of rights of first refusal regarding such proposed transfer;

(g) Notice of and full information relating to any matter on which Telesis is permitted to vote under Paragraph IV(A)(7) of this Final Judgment;

(h) Notice of any allocations made to the partnership accounts of any of the Metroplex or D/FW partners;

(i) The names and business addresses of persons to whom notice is to be given pursuant to Paragraph V of this Final Judgment; and

(j) Any additional financial information necessary to permit Telesis to prepare its state or federal tax returns.

6. Telesis shall not discuss with any D/FW or Metroplex partner or any person acting on behalf of any D/FW or Metroplex partner, any information generated by or for D/FW, Metroplex, LACTC or LIN that relates directly or indirectly to their cellular radio operations and which is obtained through D/FW or Metroplex, except information permitted to be disclosed to Telesis pursuant to Paragraph IV(A)(5) of this Final Judgment.

7. Telesis shall not vote on any matters submitted for vote of the D/FW or Metroplex partnership except that Telesis may vote, by written ballot or consent and without attending any partnership or partners' committee meeting, on:

(a) The proposed admission of a partner to either D/FW or Metroplex;

(b) A proposed merger or consolidation of D/FW or Metroplex;

(c) A proposed sale of substantially all of the assets of D/FW or Metroplex; or

(d) A proposed amendment to the D/FW or Metroplex partnership agreement.

B. All communications between Telesis, and D/FW or Metroplex, and between Telesis and any of the D/FW or Metroplex partners, of information generated by or for D/FW, Metroplex, LACTC or LIN that relates directly or indirectly to their cellular radio operations and which is obtained through D/FW or Metroplex, and all votes on D/FW or Metroplex partnership matters, shall be in written form. Complete and accurate copies of such communications, information and votes shall be retained by Telesis and may be examined by representatives of the Department of Justice pursuant to Section VI of this decree.

C. The provisions of this Final Judgment do not prohibit Telesis from receiving distributions and any other payments to which it may be entitled under the D/FW partnership agreement or the Metroplex partnership agreement.

D. Prior to the Telesis-CI closing, Telesis shall have entered into an amendment to the D/FW partnership agreement in the form of Exhibit A to this Final Judgment. No subsequent amendments shall be made to the D/FW partnership agreement unless Telesis submits such proposed amendment to the Department of Justice at least thirty (30) days prior to its effective date. If the Department of Justice during the thirty (30) day period does not object to the proposed amendment, it shall take effect, but it shall not operate as a modification of this Final Judgment. If the Department of Justice during the thirty (30) day period objects in writing to such proposed amendment, the proposed amendment shall not become effective until the Department of Justice removes its objection or this Court rules, on the motion of either party to this Final Judgment, that the proposed amendment is consistent with this Final Judgment or that modification of the Final Judgment is warranted in accordance with legal standards governing modifications of consent

VOL 51
ISS 52
MR 18
1986
UMI

decrees. Plaintiff and defendant shall take all reasonable steps to expedite a resolution of any matter submitted to the Court under this Section IV(D).

V. Compliance Provisions

A. Not later than fifteen (15) days after the Telesis-CI closing, Telesis shall distribute to each officer and each management official with significant responsibility for Telesis' cellular operations, to the trustee under the Temporary Trust Agreement dated July 26, 1985, to any consultant providing services related to the operation of Telesis' cellular business who also provides or has provided consulting services to D/FW or Metroplex or any D/FW partner or Metroplex partner, and to any independent financial auditor hired pursuant to Paragraph IV(A)(5)(c) above:

1. A copy of this Final Judgment; and

2. In the case of Telesis employees, an admonition that noncompliance with this Final Judgment will result in appropriate disciplinary action, which may include dismissal.

B. Within thirty (30) days after the Telesis-CI closing, Telesis shall obtain from each person to whom notice is given pursuant to Paragraph V(A) of this Final Judgment a certificate in substantially the following form:

The undersigned hereby (1) acknowledges receipt of a copy of the Final Judgment and a written directive setting forth the policy regarding compliance with the Final Judgment, (2) represents that the undersigned has read such Final Judgment and understands the restrictions on disclosure of information, (3) acknowledges that the undersigned (if an employee of Telesis) has been advised and understands that non-compliance with the Final Judgment will result in appropriate disciplinary measures, which may include dismissal, and (4) acknowledges that the undersigned has been advised and understands that willful non-compliance with the Final Judgment may also result in conviction for contempt of court and imprisonment and/or fine.

C. Within ten (10) days after any additional person becomes subject to the requirements of Paragraph V(A) and V(B) Telesis shall provide the notice specified in Paragraph V(A) and obtain the acknowledgment specified in Paragraph V(B) from such person.

D. Telesis shall take appropriate disciplinary action against any person under its control who refuses or fails to comply with this Final Judgment.

E. Within ten (10) days after the Telesis-CI closing, Telesis shall send to (i) each officer or management official of D/FW and Metroplex with significant responsibility for cellular operations, (ii) either the chief executive officer or the officer with primary responsibility for cellular operations for each Metroplex or D/FW partner; and (iii) each person who is a representative, alternate representative, or officer of the D/FW or Metroplex partnership committees; by registered mail return receipt requested, the following:

1. A copy of this Final Judgment;

2. An admonition that willful disclosure to Telesis of information prohibited to Telesis under the Final Judgment may result in conviction for contempt of court and imprisonment or fine;

3. A written request that such persons take all necessary steps to inform those persons under his or her supervision or control who may have access to information that directly or indirectly relates to the cellular operations of D/FW, Metroplex or LIN of the restrictions imposed by this Final Judgment on the disclosure of such information to Telesis.

F. Not later than ninety (90) days after the Telesis-CI closing, Telesis shall provide to the Department of Justice a list of the persons notified pursuant to Paragraphs V(A) and V(E) of this Final Judgment. Telesis shall retain in its files for at least five (5) years from date of signature, the certificates required by Paragraph V(B) and the registered receipts required by Paragraph (V)(E) of this Final Judgment.

VI. Visitorial Provisions

For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time:

A. Duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to Telesis made to its principal office, be permitted access during office hours of Telesis to depose or interview officers, employees, or agents, and to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of Telesis, which may have counsel present, relating to any matters contained in this Final Judgment.

B. Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, made to Telesis' principal office, Telesis shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested.

C. No information or documents obtained by the means provided in this Paragraph VI shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party (including grand jury proceedings), or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

D. If at the time information or documents are furnished by Telesis to plaintiff, Telesis represents and identifies in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and Telesis marks each pertinent page of such material, "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then ten (10) days notice shall be given by plaintiff to Telesis prior to divulging such material in any legal proceeding (other than a grand jury proceeding) to which Telesis is not a party.

VII. Termination of Judgment

This Final Judgment shall expire on the tenth anniversary of the date of its entry or, prior to that date, upon the happening of any of the following events:

A. The transfer by LIN of its entire interest in the Block A cellular license for the Los Angeles CGSA to a person not affiliated with LIN or with any D/FW or Metroplex partner (other than Telesis);

B. The transfer by LIN of its entire interest in Metroplex to any person unaffiliated with LIN and having no interest in the Block A cellular license in the Los Angeles CGSA;

C. The transfer by Telesis of its entire interest in D/FW and Metroplex to a third person unaffiliated with Telesis (or if any portion thereof is so transferred, this Final Judgment shall no longer have any force and effect with respect to such portion);

D. The transfer by Telesis of its entire interest in the Block B cellular license in the Los Angeles CGSA;

E. The failure to consummate the Telesis-CI merger and the termination of the Agreement and Plan of Reorganization dated May 21, 1985 between Telesis and CI; or

F. A determination by this Court that termination of this Final Judgment is warranted under the legal standards

applicable to termination of antitrust consent decrees because:

1. There has been a substantial reduction in the ownership interest, management role, or extent of control by LIN in either LACTC or Metroplex; or

2. There have been other substantial changes in the circumstances that led to entry of the decree.

G. The grant by this Court of a stipulated motion by the parties to this Final Judgment requesting termination.

VIII. Retention of Jurisdiction

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction, implementation, modification or termination of any of the provisions of this Final Judgment, for the enforcement of compliance herewith, and for the punishment of any violations hereof.

IX. Public Interest Determination

Entry of this Final Judgment is in the public interest.

United States District Judge.

Presented by

Nancy C. Garrison, Christine A. Wardell,
John Dorsey, Michael L. Volkov,
Antitrust Division, Department of Justice, Washington, DC 20530, Attorneys for Plaintiff.

Exhibit A—First Amendment to Partnership Agreement of D/FW Signal Partnership

This first amendment to partnership agreement of D/FW signal partnership ("First Amendment"), dated as of February 27, 1986, is made by and among *GENSUB, INC.*, a Texas corporation ("Gensub"), *METROMEDIA TELECOMMUNICATIONS, INC.*, a Delaware corporation ("Metromedia"), and *PAGE COMMUNICATIONS, INC.*, a Texas corporation ("Page").

Witnesseth:

Whereas Gensub, Metromedia and Page have previously entered into a Partnership Agreement dated as of December 9, 1985 ("Prior Agreement") of D/FW Signal Partnership, a Texas general partnership ("D/FW Signal"); and

Whereas D/FW Signal is one of the general partners of Metroplex Telephone Company, a Texas general partnership ("Metroplex") which partnership is controlled and managed by Lin Cellular Communications Corporation, a Texas corporation ("Lin"); and

Whereas in connection with the proposed merger of an indirect wholly owned subsidiary of Pacific Telesis Group, a Nevada corporation ("Telesis"), with and into Communications Industries, Inc. ("CI"), a Texas corporation and the parent company of Gensub, the United States Department of Justice ("DOJ") has raised questions regarding Gensub's participation in Metroplex due to Lin's position as general manager of the Metroplex and Los Angeles Block A cellular systems and, as a result, that Gensub may gain access to certain information deemed by the DOJ to be competitively "sensitive" with respect to the cellular operations of Lin and its affiliates in Los Angeles;

Now, Therefore, in consideration of the mutual covenants and agreements set forth herein and in the Prior Agreement, the parties hereto agree as follows:

1. *Definitions.* For purposes of this First Amendment, Gensub shall include all affiliates of Gensub, including Telesis and CI. The term "affiliate" means any organization or entity in which, directly or indirectly, the named person has control or any substantial ownership. For purposes hereof, the term "substantial ownership" means a direct or indirect equity interest (or the equivalent thereof) of fifty percent (50%) or more of an entity. Any parent company of a named person shall also be deemed its affiliate. The term "Information" means knowledge or intelligence generated by or for D/FW Signal, Metroplex, or Lin represented by any form of writing, signs, signals, pictures, sounds or other symbols that relate, directly or indirectly, to the cellular radio operations of D/FW Signal, Metroplex or Lin or their affiliates. The term "Agent" means any person who is in the service of the named person pursuant to a contract of hire, express or implied, where the named person has the power or right to control and direct such person in the material details of how the work is performed provided, however, that a reseller of cellular services or a seller or lessor of cellular equipment not otherwise affiliated with Telesis shall not be deemed its agent.

2. *Amendment to section 3.4(b).* It is the intent of the parties that, during the term of this First Amendment, Gensub shall not receive operating or capital budgets of Metroplex. Accordingly, section 3.4(b) of the Prior Agreement is amended to add the following clause at the end of the first sentence of such section:

> provided, however, that Gensub shall not be provided with copies of the aforesaid operating and capital budgets nor with any business plan of Metroplex.

3. *Amendment to Add section 5.1(d).* It is the intent of the parties that, during the term of this First Amendment, Gensub shall not participate in the management or operation of D/FW Signal or Metroplex nor shall Gensub attend any formal or informal D/FW Signal or Metroplex meetings (including committee meetings) and shall not vote its Units except on any proposal to admit a partner to D/FW Signal or to Metroplex, to vote on a fundamental partnership change, or to vote on an amendment to the Metroplex or D/FW Signal Partnership Agreements. Accordingly, Section 5.1. of the Prior Agreement is amended to add a new Section 5.1(d) as follows:

> (d) Notwithstanding anything herein to the contrary, Gensub shall not vote its Units except that Gensub shall be entitled to vote by written ballot or consent, without attending any meeting, on any proposal regarding any of the following: (i) the proposed admission of a partner to either Metroplex or D/FW Signal; (ii) a proosed merger or consolidation of Metroplex or D/FW Signal; (iii) a proposed sale of substantially all of the assets of Metroplex or D/FW Signal or (iv) a proposed amendment of the D/FW Signal or Metroplex partnership agreements.

4. *Amendment to section 6.3.* It is the intent of the parties that, for the term of this First Amendment, Gensub shall be prohibited from inspecting the books and records of D/FW Signal and Metroplex otherwise than in accordance herein. Accordingly, Section 6.3 of the Prior Agreement is amended to add the following clause at the end of such section:

> *provided further, however* that Gensub shall not request, obtain, inspect or otherwise have access to any books, records, documents or other information, that relates directly or indirectly to the cellular radio operations of D/FW Signal, Metroplex or Lin otherwise than as permitted by the First Amendment to this Agreement dated as of February 27, 1986 ("First Amendment").

5. *Amendment to Add section 6.4* It is the intent of the parties that, during the term of this First Amendment, Gensub shall not receive any Information or publicity notices. Accordingly, Section 12.11 of the Prior Agreement is amended by adding "except Gensub" after the word "Partners" on the sixth line of such section. In addition, Article VI of the Prior Agreement is amended to add the following as a new section 6.4:

> 6.4 *Restriction on Information.* The Partners each hereby agree to refrain fromp roviding Gensub with any material or Information they receive from Lin or

VOL
51
ISS
52
MR
18
1986
UMI

Metroplex except that Gensub shall obtain: (i) Information that is available to the public; (ii) Financial statements of D/FW Signal and Metroplex (i.e. a balance sheet, a statement of earnings and a statement of changes in financial condition); (iii) Upon the request of Gensub, a summary of a financial audit of D/FW Signal, not more than once annually, prepared by an independent financial auditor selected by Gensub; (iv) Notice of capital calls, limited to the amount of the call and not specifying the purpose for which the funds are to be expended; (v) Notice of rights to purchase or sell interests in Metroplex or D/FW Signal; (vi) Notice and full information of any transfer or proposed transfer by a Partner to Metroplex or D/FW Signal of its interest in Metroplex or D/FW Signal or any portion thereof, and any notice and full information of rights of first refusal regarding such proposed transfer; (vii) Notice of and full information relating to any matter on which Gensub is permitted to vote pursuant to this First Amendment; (viii) Notice of any allocations made to the partnership accounts of any of the Partners to Metroplex or D/FW Signal; and (ix) Any additonal financial information necessary to permit Gensub and its affiliates to prepare its stae or fedeal tax returns. Any and all notices to which Gensub is entitled under this section 6.4 shall be given sufficiently in advance to permit Gensub to respond and thereby protect its interest in the partnerships.

6. *Amendment to section 12.3.* It is the intent of the parties that, during the term of this First Amendment, any proposed amendment to the Prior Agreement shall be made in compliance with Section 14 of this First Amendment. Accordingly, section 12.3 of the Prior Agreement is amended, in the second sentence thereof, by changing the comma after "herein" to a period, and by adding the following sentence to replace the remainder of section 12.3 as follows:

> It may be modified or amended only by an instrument in writing signed by all of the Partners, and must be furnished to the DOJ at least 30 days prior to the date such instrument is proposed to become effective. If the DOJ has not objected to the proposed amendment within such 30 day period, such amendment shall become immediately effective.

7. *Amendment to Add section 12.15.* It is the intent of the parties that the revisions made to the Prior Agreement pursuant to this First Amendment shall be automatically extinguished when the reasons for entering into this First Amendment are no longer present. Accordingly, Article XII of the Prior Agreement is amended to add the following as a new section 12.15:

> 12.15 *Temporary Amendments.* Sections 5.1(d) and 6.4 of this Agreement shall automatically be extinguished and void and shall no longer be in force and effect, and sections 3.4(b), 6.3, 12.3 and 12.11 of the Prior Agreement and sections 2.02, 2.03, 2.07, 2.08, 2.11 3.02, 3.03, 4.01, 4.02, 4.03, 8.02, 8.03, 11.03, and Article XII of the Rules shall automatically revert to the provisions set forth in the Prior Agreement before being revised pursuant to the First Amendment and shall no longer be in force and effect, upon the earliest to occur of ten years from the date that the Final Judgment in the *United States v. Pacific Telesis Group and Communications Industries, Inc.* is entered by the Court or any of the following events shall occur:
>
> (a) The transfer by Lin of its entire interest in the Block A cellular license for the Los Angeles Cellular Geographic Service Area ("Los Angeles CGSA") to a person not affiliated with Lin or with any D/FW Signal or Metroplex partner (other than Telesis); or
>
> (b) The transfer by Lin of its entire interest in Metroplex to any person unaffiliated with Lin and having no interest in the Block A license in the Los Angeles CGSA; or
>
> (c) The transfer by Telesis of its entire interest in D/FW Signal and Metroplex to a third party unaffiliated with Telesis (or if any portion thereof is so transferred, this Agreement shall terminate as to such portion and all voting, informational and inspection rights shall be reinstated with respect to such portion); or
>
> (d) The transfer by Telesis of its entire interest in the Block B cellular license in the Los Angeles CFSA; or
>
> (e) (i) The termination of the Final Judgment in *United States v. Pacific Telesis Group and Communications Industries, Inc.* filed in the United States District Court for the Central District of California or (ii) the failure by the Court to entes such Final Judgment, provided however that such failure by the Court shall not automatically terminate the First Amendment, which termination shall only be effective upon the written election of Gensub in its sole discretion; or
>
> (f) The failure to consummate the Telesis/CI merger and the termination of the Agreement and Plan of Reorganization dated as of May 21, 1985.

8. *Amendments to sections 2.02, 2.03, 4.01, 4.02 and 4.03 of the Rules.* Gensub hereby agrees to refrain from attending any formal or informal meetings of D/FW Signal or of Metroplex, or of either of their Partners' Committees. Accordingly, sections 2.03, 4.01, 4.02 and 4.03 of the Rules are hereby amended to add the following proviso at the end of such sections and in section 2.02 of the Rules at the end of the first sentence in such section:

> provided, however, that Gensub shall not be entitled to attend any such meetings.

9. *Amendments to sections 2.07, 2.08 and 2.11 of the Rules.* It is the intent of the parties that Gensub refrain from voting on any proposals except those specified in Section 3 of this First Amendment. Accordingly, the following clause is added at the end of sections 2.07 and 2.08 of the Rules:

> In calculating the vote on any matter to be considered, the number of Units held by Gensub shall first be deducted from the total number of Units available to vote, except that no such deduction shall be made when voting on any of the following: (i) The proposed admission of a Partner to Metroplex or D/FW Signal, (ii) a proposed merger or consolidation of Metroplex or D/FW Signal (iii) a proposed sale of substantially all of the assets of Metroplex or D/FW Signal, or (iv) a proposed amendment to the Metroplex or D/FW Signal partnership agreements.

In addition, section 2.11 is amended by adding the following proviso at the end of the first sentence of such section:

> provided however, that Gensub's consent shall not be required unless the consent relates to any of the following, which would require Gensub's consent: (i) The proposed admission of a Partner to Metroplex or D/FW Signal, (ii) a proposed merger or consolidation of Metroplex or D/FW Signal, (iii) a proposed sale of substantially all of the assets of Metroplex or D/FW Signal, or (iv) a proposed amendment to the Metroplex or D/FW Signal partnership agreements.

10. *Amendments to sections 3.02 and 3.03 of the Rules.* It is the intent of the parties that, during the term of this First Amendment, Gensub shall not appoint a representative to either the Metroplex or the D/FW Signal Partners' Committees. Accordingly, Gensub hereby resigns from both of such Partners' Committees and, further, sections 3.02 and 3.03 of the Rules are amended to insert the following clause at the beginning of such sections:

> Except Gensub,

11. *Amendment to sections 8.02 and 8.03 of the Rules.* It is the intent of the parties that, during the term of this First Amendment, no officer or employee of Gensub shall be an officer, employee or agent of D/FW Signal or Metroplex. Accordingly, Gensub hereby resigns as Chairman of D/FW Signal and, further, sections 8.02 and 8.03 of the Rules are amended to add the following sentence at the end of such sections:

> all officers elected or appointed pursuant to this Section shall be unaffiliated with Gensub.

12. *Amendment to section 11.03 of the Rules.* It is the intent of the parties that, during the term of this First Amendment, no reports shall be provided to Gensub that are prohibited hereunder. Accordingly, section 11.03 of the Rules is amended to add the following clause at the end of such Section:

> provided, however, that no reports shall be provided to Gensub that are prohibited by the First Amendment.

13. *Amendment to Article XII of the Rules.* It is the intent of the parties that the Rules of the Partnership, during the term of this First Amendment, may be

amended only in compliance with section 14 of this First Amendment. Accordingly, Article XII of the Rules is amended by restating such Article in its entirety as follows:

> These Rules may be altered, amended or repealed, or new rules may be adopted, only by an instrument in writing signed by all of the Partners, and must be furnished to the DOJ at least 30 days prior to the date such instrument is proposed to become effective. If the DOJ has not objected to the proposed amendment within such 30 day period, such amendment shall become immediately effective.

14. *Amendments.* Any proposed amendment to this First Amendment or to the Prior Agreement must be in writing, signed by all of the parties hereto, and must be furnished to the DOJ at least 30 days prior to the date it is proposed to become effective. If the DOJ has not objected to the amendment within such 30-day period, such amendment shall become immediately effective.

15. *Relation to Prior Agreement.* The parties hereto acknowledge and agree that, except to the extent expressly amended pursuant hereto, the Prior Agreement shall remain unchanged and in full force and effect.

16. *Governing Law.* This First Amendment and the legal relations among the parties hereto shall be governed by and construed in accordance with the laws of the State of Texas, as if all parties to this First Amendment were resident and doing business in such state.

17. *Counterparts.* This First Amendment may be executed and delivered by one or more parties to this First Amendment on any number of separate counterparts, and all of said counterparts taken together shall be deemed to constitute one and the same agreement.

In witness whereof, the undersigned have executed and delivered this First Amendment as of the day and year first written above.

United States District Court for the Central District of California

United States of America, Plaintiff, v. *Pacific Telesis Group, and Communications Industries, Inc.,* Defendants.

[No. CV-86-1298-RMT]

Competitive Impact Statement

February 28, 1986.

Pursuant to section 2(b) of the Antitrust Procedures and Penalties Act (15 U.S.C. 16(b)), the United States of America hereby files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry against Pacific Telesis Group ("Telesis") and Communications Industries, Inc. ("CI") in this civil antitrust proceeding.

I. Nature and Purpose of the Proceeding

This civil action began on February 28, 1986, when the United States filed a complaint alleging that the proposed acquisition of CI by Telesis would violate section 7 of the Clayton Act (15 U.S.C. 18) and section 1 of the Sherman Act (15 U.S.C. 1). The complaint alleges that the effect of the acquisition may be substantially to lessen competition in the provision of cellular telephone service in Los Angeles, California. As a result of the acquisition, Telesis will become a partner with LIN Cellular Communications Corporation (LIN) in one of the two cellular systems in Dallas-Ft. Worth, Texas, thereby increasing the potential for collusion between Telesis and LIN, the only two firms in the Los Angeles cellular market. The complaint requests that Telesis be required to divest its interest in the Dallas-Ft. Worth cellular system or that other appropriate relief be granted to prevent Telesis from participating in or gaining access to confidential information about the Dallas-Ft. Worth cellular system.

The United States, Telesis and CI have stipulated that the proposed Final Judgment may be entered after compliance with the Antitrust Procedures and Penalties Act. Entry of the proposed Final Judgment will terminate the action, except that the Court will retain jurisdiction to construe, modify or enforce the Final Judgment and to punish violations of the Final Judgment.

II. Events Giving Rise to the Alleged Violation

On May 21, 1985, Telesis and CI entered into an Agreement and Plan of Reorganization (Merger Agreement) pursuant to which Telesis will acquire all of the outstanding common stock of CI for $32.75 per share or a total purchase price of approximately $432 million. The Merger Agreement provides for a two-step process. "Step One", the "closing" under the Merger Agreement, will result in transfer of CI's stock to a temporary trust, under which CI's present management will continue to run its businesses.[1] At that time, the CI stockholders will be paid and will have no further ownership interest in CI. "Step Two" of the transaction, transfer of control of CI from the trustee to Telesis, will occur after the necessary regulatory approvals have been secured and divestitures required by the FCC and the MFJ Court have been completed.

The alleged violation arises from the impact of the acquisition on the market for cellular radio services in Dallas-Forth Worth, Texas, and Los Angeles, California. Cellular radio is a high-capacity, two-way mobile telephone service. Unlike traditional mobile telephone systems, in which transmission on a particular frequency covers an entire metropolitan area, a cellular system is divided into several "cells," each of which is assigned a subsect of the 333 channels available to the entire system. The same frequency subsets can be reused in non-adjacent cells, thereby greatly increasing the system's capacity. Cellular telephone systems are connected to the public switched, or "landline" telephone network, and cellular subscribers are able to make local and interexchange calls in essentially the same manner as ordinary telephone users. Cellular systems are designed to provide subscribers with transmission quality and call completion ratios comparable to those traditional landline service.

Cellular radio is a product that under present technology is competitively distinct from other telecommunications services, particularly in urban markets. The capacity of older mobile telephone technologies is so limited relative to cellular radio that such systems cannot effectively constrain cellular prices. Local landline telephone service is not a substitute for cellular service because it does not offer mobility, an important attraction of cellular.[2]

---

[1] The conditions to closing under the Merger Agreement include obtaining: (1) Federal Communications Commission ("FCC") approval of the transfer of CI's stock to the trust, (2) California Public Utility Commission (PUC) approvals, (3) a waiver of the Modification of Final Judgment, *United States v. AT&T,* 552 F. Supp. 131 (D.D.C. 1982), aff'd sub. nom. *Maryland v. United States,* 460 U.S. 1001 (1983) ("MFJ") to permit the transaction, and (4) approval by CI's shareholders. The FCC has approved the "Step One" transfers, the CI shareholders have approved the merger, and the MFJ Court has granted the waivers, with conditions, including divestiture of specified CI assets and businesses. The California PUC is expected to rule on February 28, 1986.

[2] In the future, cellular service could become a partial substitute for landline telephone service. Today, however, cellular prices are significantly higher and the capacity of cellular systems is more limited than that of landline te'ephone services.

The FCC is responsible for licensing cellular radio systems, and has authorized two cellular systems in each franchise area (called a Cellular Geographic Service Area, or CGSA).[3] As a result of the FCC's regulations, all cellular radio markets are highly concentrated, with only two firms, and there is no possibility of new entry.

Telesis, which is the parent company of Pacific Bell and Nevada Bell, and CI each provides a variety of telecommunications services. PacTel Mobile Access, a wholly-owned subsidiary of Telesis, holds controlling interests in the wireline cellular systems in Los Angles, San Diego, Sacramento and Oxnard-Simi Valley-Ventura, California, and a 23.5 percent interest in the San Francisco non-wireline cellular system. CI holds substantial interests in the non-wireline cellular systems in San Diego and San Francisco, California; Atlanta, Georgia; and Tampa-St. Petersburg, Florida.[4]

CI, through its subsidiary, Gensub, Inc., owns approximately a 48 percent interest in D/FW Signal, a Texas general partnership, which in turn owns a 34 percent interest in Metroplex Telephone Company ("Metroplex"), a Texas general partnership that holds the non-wireline license for the Dallas-Ft. Worth, Texas CGSA. Thus, CI owns approximately a 16 percent interest in Metroplex. As a result of Telesis' acquisition of CI, Telesis will acquire this CI interest in the Dallas-Ft. Worth system.

LIN owns approximately a 60 percent interest in Metroplex and manages the Dallas-Ft. Worth non-wireline cellular system. LIN also has a 35 percent equity interest and a 50 percent voting interest in Los Angles Cellular Telephone Company ("LACTC"), the non-wireline cellular carrier that is Telesis" only competitor in the Los Angles, California CGSA.[5]

The effect of Telesis' acquisition of CI's interest in the Dallas-Ft. Worth non-wireline cellular system may be substantially to lessen competition or tend to create a monopoly in violation of section 7 of the Clayton Act and to unreasonably restrain competition in violation of Section 1 of the Sherman Act in the Los Angles market for cellular radio service. The partnership between Telesis and LIN in the Dallas-Ft. Worth cellular system may have a significant anticompetitive effect by hampering LIN's ability to compete effectively in Los Angeles or in Dallas-Ft. Worth, and thereby increasing the already significant incentives and opportunites for collusion between LIN and Telesis in the Los Angeles cellular market.[6]

In order to realize efficiencies from its ownership interests and management role in Dallas-Ft. Worth, Los Angeles and other cellular systems, LIN intends to operate those systems in a centralized manner, coordinating closely the operations of all of its cellular systems. It plans to use substantially similar operational and promotional strategies in each of these markets, and it intends to develop technical improvements that it will employ in all of its cellular systems. It is important to the success of LIN's centralized form of operation that its plans not be disclosed to its competitors in advance of implementation.

The partnership agreement governing the Dallas-Ft. Worth non-wireline cellular system, however, affords each partner advance access to all information and plans concerning the operation of that cellular system. Since LIN will employ much of the same technology and marketing plans in Los Angeles as it does in Dallas-Ft. Worth, its partners in Dallas-Ft. Worth will have advance knowledge of LIN's competitive strategy in Los Angeles. Thus, if Telesis, LIN's only competitor in Los Angeles, acquired CI's interest in the Dallas-Ft. Worth system without modification of the current partnership agreement, it would have access to otherwise confidential, competitively sensitive information held by LIN. Such access would give Telesis time to react to LIN's competitive technical and marketing strategies that it normally would not have. The effectiveness of LIN's strategies for the Los Angeles market may therefore be reduced because of Telesis' access to this information through the Dallas-Ft. Worth partnership. LIN would sacrifice significant efficiencies if it had to develop separate plans and strategies to prevent Telesis from gaining access to its proprietary information.

By making it more difficult for LIN to compete effectively with Telesis in Los Angeles, Telesis' presence in the Dallas-Ft. Worth partnership may facilitate, and increase the risk of, collusion between Telesis and LIN. A collusive agreement between Telesis and LIN in Los Angeles could involve a variety of elements, including pricing, the introduction of service enhancements, and the implementation of technical modifications. Collusion would be attractive to LIN because it would allow LIN to disclose information to the Dallas-Ft. Worth partnership without fear of adverse consequences in Los Angeles. By colluding with Telesis, LIN could avoid the harmful effects of information transfer and increase significantly the profitability of its cellular operations.

Moreover, the Dallas-Ft. Worth partnership between Telesis and LIN would provide additional opportunities for communications necessary to the creation and enforcement of any collusive agreement. The discussion of information in the Dallas-Ft. Worth partnership that would not normally be disclosed between competitors provides an attractive opportunity for reaching and enforcing anticompetitive agreements in Los Angeles without detection.

The reduced incentives to innovate and the increased potential for collusion created when competitors in one market become partners in another is of particular concern in cellular radio markets because of the absence of other competitors and the absolute barriers to entry. Because FCC rules permit only two cellular systems in each metropolitan area, there would be no cellular competition in Los Angeles if Telesis and LIN colluded.

III. Explanation of the Proposed Final Judgment and Its Effects on Competition

The United States brought this action because the effect of Telesis' acquisition

---

[3] *Cellular Communications Systems*, 86 F.C.C.2d 469, 476 (1981). The FCC generally based its CGSA delineations on an area's corresponding Metropolitan Statistical Area. Each of the two cellular systems in an area is allocated 333 radio channels. 47 CFR 22.903. The FCC's rules initially reserved one of the two licenses in each CGSA for the local wireline telephone company affiliate; this is commonly referred to as the "wireline", or "block B", license. The second cellular franchise could be awarded to any other qualified applicant; it is commonly referred to as the "non-wireline", or "block A", license. *Cellular Communications Systems, supra*, at 487–92.

[4] CI also provides paging and other mobile communications services and manufactures telecommunications equipment. To comply with the MFJ and the FCC's rules, Telesis will divest or discontinue CI's manufacturing operations, CI's San Diego cellular system, voice storage and retrieval services in California, interexchange paging services in California, and certain interexchange microwave facilities owned by CI in Kentucky and Northern California.

[5] In addition, LIN holds controlling interests in the Philadelphia and New York non-wireline cellular systems, as well as a substantial interest in the Houston non-wireline cellular partnership.

[6] The acquisition also will create other partner-competitor overlaps that, due to nature and extent of the ownership interests involved and other relevant considerations, appear less likely to reduce competition, and thus, are not challenged in this complaint. These include relationships between Telesis and McCaw Communications, which is Telesis' partner in San Francisco and will be Telesis' competitor in Sacramento, and between Telesis and Graphic Scanning (Dallas-Fort Worth partner/Oxnard, Fresno competitor), and between Telesis and American Cellular Telephone Corp. (Louisville, Jacksonville partner/Los Angeles competitor).

---

of CI's interest in the Dallas-Ft. Worth cellular partnership may be substantially to lessen competition in violation of Section 7 of the Clayton Act or to restrain competition in violation of Section 1 of the Sherman Act in the market for cellular services in Los Angeles. The anticompetitive effects associated with the merger, however, can be largely eliminated if Telesis does not participate actively in the Dallas-Ft. Worth cellular system.

To this end, Paragraph IV of the proposed Final Judgment restricts Telesis to an essentially passive investment role in the Dallas-Ft. Worth partnership, D/FW and Metroplex. It prohibits Telesis from participating in the affairs of these partnerships except in very limited ways. Telesis is prohibited from playing any role in the daily operations and planning of the Metroplex cellular system. It may not attend meetings of or have employees in common with D/FW or Metroplex. Telesis' right to vote is significantly limited. It may vote only (and only in writing) on the proposed admission of a partner to D/FW or Metroplex, a proposed merger or consolidation of D/FW or Metroplex, a proposed sale of all or substantially all of the assets of D/FW or Metroplex, or a proposed amendment of the D/FW or Metroplex partnership agreement.

Paragraphs IV(A)–(C) of the proposed Final Judgment also strictly limit the information Telesis may obtain about the Dallas-Ft. Worth system or about LIN's cellular operations. Telesis may obtain from the Dallas-Ft. Worth partnerships only information available to the public; financial statements of D/FW and Metroplex; a summary of results of an independent financial audit that it may request; notice of capital calls; notice of rights to purchase or sell interests in D/FW or Metroplex; notice and full information on any transfer or proposed transfer by a Metroplex or D/FW partner of its interest in Metroplex or D/FW and of rights of first refusal regarding such proposed transfer; notice and full information on matters on which it is permitted to vote; notice of any allocations made to the partnership accounts of any of the Metroplex or D/FW partners; information needed to notify persons of their decree obligations; and any additional financial information necessary to permit Telesis to prepare its state or federal tax returns. To facilitate monitoring of compliance with these restrictions, communications between Telesis and the D/FW and Metroplex partnerships and partners concerning the cellular operations of LIN or the Dallas-Ft. Worth system, and all Telesis votes in the D/FW and Metroplex partnerships must be in writing.

Paragraph IV (D) of the proposed Final Judgment requires Telesis to enter into an amendment to the D/FW partnership agreement in the form of Exhibit A to the proposed Final Judgment in order to conform the partnership agreement to the terms of the proposed Final Judgment. Paragraph IV(D) further requires that Telesis submit any proposed amendment to the D/FW partnership agreement to the Department of Justice at least thirty (30) days prior to the effective date of the amendment. If the Department of Justice during the thirty (30) day period does not object to the proposed amendment, it shall take effect. An amendment to the partnership agreement, however, would not operate as a modification of the Final Judgment. If the Department of Justice objects in writing to a proposed amendment to the D/FW partnership agreement, the proposed amendment shall not become effective until the Department of Justice removes its objection or the Court rules, on the motion of either party to the Final Judgment, that the proposed amendment is consistent with the Final Judgment or that modification of the Final Judgment is warranted.

Under Paragraph III of the Final Judgment, the restrictions on Telesis' access to information from the Dallas-Ft. Worth partnership are binding not only on Telesis and CI but on "all other persons in active concert or participation with any of them who shall have received actual notice of [the] proposed Final Judgment by personal service or otherwise." Telesis is required by Paragraph V of the proposed Final Judgment to inform its officers and management officials with significant responsibility for Telesis' cellular operations, the trustee under the Temporary Trust Agreement dated July 26, 1985, certain consultants providing services related to the operation of Telesis' cellular business, and any independent financial auditor that Telesis may hire, about the Final Judgment and their obligations to comply with it. In addition, Telesis is required by Paragraph V(E) of the proposed Final Judgment to inform each officer or management official of D/FW and Metroplex with significant responsibility for cellular operations, either the Chief operating officer or the officer with primary responsibility for cellular operations for each Metroplex or D/FW partner, and each person who is a representative, alternate representative, or officer of the D/FW or Metroplex partnership committee about the Final Judgment and their obligations to comply with it.

Paragraph VI of the proposed Final Judgment allows the United States to obtain information and documents relating to Telesis' compliance with the proposed Final Judgment.

Paragraph VII of the Final Judgment provides that the Final Judgment shall terminate ten years after it is entered. Because the anticompetitive effect at issue in this case arises from the resulting partner-competitor relationship between Telesis and LIN, Paragraph VII further provides that the Final Judgment will terminate if Telesis or LIN disposes of its entire interest in their competing Los Angeles systems, or if Telesis or LIN disposes of its entire interest in the Dallas-Ft. Worth partnership.

IV. Remedies Available to Potential Private Litigants

Section 4 of the Clayton Act (15 U.S.C. 15) provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages the person has suffered, as well as costs and reasonable attorney fees. Entry of the proposed Final Judgment will neither impair nor assist the bringing of any private antitrust damage actions. Under provisions of section 5(a) of the Clayton Act (15 U.S.C. 16(a)), entry of the proposed Final Judgment would have no *prima facie* effect in any private lawsuit that may be brought against Telesis or CI.

V. Procedures Available for Modification of the Proposed Final Judgment

The United States and defendants Telesis and CI have stipulated that the proposed Final Judgment may be entered by the Court after compliance with the provisions of the Antitrust Procedures and Penalties Act, provided that the United States has not withdrawn its consent. The Act conditions entry upon the Court's determination that the proposed Final Judgment is in the public interest.

The Act provides a period of at least sixty (60) days preceding the effective date of the proposed Final Judgment within which any person may submit to the United States written comments regarding the proposed Final Judgment. Any person who wants to comment on the proposed Final Judgment should do so within sixty (60) days of the date of publication of this Competitive Impact Statement in the Federal Register. The United States will evaluate the

VOL 51 ISS 52 MR 18 1986 UMI

comments, determine whether it should withdraw its consent, and respond to the comments. The comments and the response of the United States will be filed with the Court and published in the **Federal Register**. Written comments should be submitted to: Barry Grossman, Chief, Communications and Finance Section, Antitrust Division (504 Safeway), U.S. Department of Justice, Washington DC 20530.

Under Paragraph VIII of the proposed Final Judgment, the Court would retain jurisdiction over this matter for the purpose of enabling the United States, Telesis or CI to apply to the Court for such further orders or directions as may be necessary or appropriate for the construction, implementation, modification, or enforcement of compliance with the Final Judgment, or for the punishment of any violations of the Final Judgment.

VI. Alternatives to the Proposed Final Judgment

The only alternative remedy considered was to require Telesis to divest CI's interest in the Dallas-Ft. Worth system. The United States determined that the competitive danger raised by the acquisition would be largely eliminated and the public interest would be served best by obtaining Telesis' consent to an enforceable decree limiting its participation in the Dallas-Ft. Worth partnership and by filing the proposed Final Judgment with the Court prior to the consummation of the proposed merger. Although the proposed Final Judgment may not be entered until the criteria established by the Antitrust Procedures and Penalties Act (15 U.S.C. 16(b)-(h) have been satisfied, the public will benefit immediately from the safeguards contained in the proposed Final Judgment because Telesis and CI have stipulated to comply with the terms of the Final Judgment pending its entry by the Court. The United States believes that the overriding public interest in having these enforceable safeguards in effect prior to consummation of the proposed merger required that it not attempt to seek a preliminary injunction, and thereby avoid the risk that the merger might be permitted to go forward without any enforcable safeguards in effect.

VII. Determinative Documents

The only document determinative in the formulation of the proposed Final Judgment was the First Amendment to Partnership Agreement D/FW Signal Partnership, amending that agreement to conform to the restrictions of the Final Judgment. A copy of that agreement is being filed by the United States pursuant to section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b), as Exhibit A to the proposed Final Judgment.

Dated: February 27, 1986.

Respectfully Submitted,

Barry Grossman,
Kevin R. Sullivan,
Nancy C. Garrison,
Christine A. Wardell,

BILLING CODE 4410-01-M

Proposed Modification of Final Judgment

Notice is hereby given that Waste Management, Inc. and WM Acquiring Corp. (collectively "WMI") have filed with the United States District Court for the District of Columbia a petition to modify the final judgment in *United States v. Waste Management, Inc., et al.*, Civil No. 84-2832; and the Department of Justice ("Department"), in a stipulation also filed with the court, has consented to modification of the judgment, but has reserved the right to withdraw its consent pending receipt of public comments. The complaint in this case, filed on September 12, 1984, challenged WMI's acquisition of SCA Services, Inc. ("SCA") under section 7 of the Clayton Act, 15 U.S.C. 18. It alleged, among other things, that the effect of the acquisition might be substantially to lessen competition in the provision of solid waste collection and disposal services in twenty local geographic markets throughout the United States and in the provision of hazardous waste landfill services in the southeastern United States and portions of the midwestern United States. A consent judgment was entered on June 6, 1985. That judgment required WMI to divest 39 SCA business, approximately 40 percent of SCA, and certain businesses of WMI to Genstar Refuse Services Corporation (since renamed GSX Corporation), of wholly-owned subsidiary of Genstar Corporation.

The proposed modification of the judgment allows WMI to acquire from GSX the following businesses:

Berkley Division/Cal's Collection—(Assonet, Massachusetts)
J.K. Municipal—(Rowley, Massachusetts)
Independent Landfill—(Muskegon, Michigan)
Interstate Waste Removal Co.—(Trenton, New Jersey)
Eastern Collection and Eastern Transfer (excepting Eastern Municipal Business)—(Rowley, Massachusetts)

The proposed modification also affects the divestiture of a ninety (90) acre potential hazardous waste landfill site in Northwood, Ohio. The proposal allows WMI to keep the site and divest to GSX (or its assignee) an option to purchase a 118 acre site immediately to the east of the original site.

The Department has filed with the court a memorandum setting forth the reasons why the Department believes that modification of the judgment would serve the public interest. Copies of the complaint, final judgment, WMI's motion papers, the stipulation containing the Government's consent, the Department's memorandum and all further papers filed with the court in connection with this petition will be available for inspection in the the Legal Procedure Unit of the Antitrust Division, Room 7233, Department of Justice, Tenth Street and Pennsylvania Avenue, NW., Washington, DC 20530 (telephone: 202-633-2481), and at the Office of the Clerk of the United States District Court for the District of Columbia, United States Courthouse, Washington, DC 20001. Copies of any of these materials may be obtained from the Legal Procedure Unit upon request and payment of the copying fee set by the Department of Justice regulations.

Interested persons may submit comments regarding the proposed modification of the decree to the Department. Such comments must be received by the Division within the sixty day period established by court order, and will be filled with the court. Comments should be addressed to Anthony V. Nanni, Chief, Litigation I Section, Antitrust Division, Department of Justice, Washington, DC 20530 (telephone: 202-633-2541).

Dated: March 10, 1986.

Joseph H. Widmar,
Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

Notice Pursuant to the National Cooperative Research Act of 1984—Pyrethrin Joint Research Venture

Notice is hereby given pursuant to section 6(a) of the National Cooperative Research Act of 1984, Pub. L. No. 98-462 ("the Act"), that Fairfield American Corporation has filed a written notification simultaneously with the

Attorney General and the Federal Trade Commission disclosing: (1) The identities of the parties to the PYRETHRIN Joint Research Venture and (2) the nature and objectives of the PYRETHRIN Joint Research Venture. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to Section 6(b) of the Act, the identities of the parties to the PYRETHRIN Joint Research Venture and its general areas of planned activities are given below.

The parties to the PYRETHRIN Joint Research Venture are as follows:

Chemical Specialties Manufacturers Association
Fairfield American Corporation
McLaughlin Gormley King Company
Office of Pyrethrum of Rwanda ("OPYRWA")
Penick—BIO-UCLAF Corporation
Prentiss Drug & Chemical Corporation
Pyrethrum Board of Kenya
S.C. Johnson & Son, Inc.
Tanganyika Pyrethrum Board

The objective of the PYRETHRIN Joint Research Venture is to sponsor and conduct toxicological research on the pesticide ingredient PYRETHRIN and to submit the results of the research to the U.S. Environmental Protection Agency ("EPA") in connection with the PYRETHRIN Date Call-In. This research on PYRETHRIN, which is the active ingredient in certain commercially available pesticide products, will be conducted pursuant to the Data Call-In Notice issued by the EPA on September 27, 1985.

Joseph H. Widmar,
Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

Notice Pursuant to the National Cooperative Research Act of 1984; Semiconductor Research Corp.

Notice is hereby given that pursuant to section 6(a) of the National Cooperative Research Act of 1984, Pub. L. No. 98-462 ("the Act"), Semiconductor Research Corporation ("SRC") has filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing certain changes in the membership of SRC. The changes consist of the addition of E-Systems Inc. and Rockwell International Corp. to SRC; the deletion of Zilog, Incorporated, from SRC; the deletion of Micro Mask, Incorporated, from the Semiconductor Equipment and Materials Institute, Inc. ("SEMI") Chapter of the SRC; and the addition of the following companies to the SEMI Chapter of the SRC:

E/G Electrograph Inc.
Emergent Technologies Corporation
Genus, Inc.
Ion Implant Services
Machine Intelligence Corporation
MG Industries/Scientific Gases
The Micromanipulator Company, Inc.
Sage Enterprises, Inc.
UTI Instruments Company

SRC filed its notification of these membership changes for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to Section 6(b) of the Act, the identities of the parties to SRC and SRC's general areas of planned activity are given below.

SRC is a joint venture which, with the deletion and addition of the previously identified companies consists of the following members:

- Advanced Micro Devices, Incorporated
- AT&T Technologies, Incorporated
- Burroughs Corporation
- Control Data Corporation
- Digital Equipment Corporation
- E.I. du Pont de Nemours & Company
- Eastman Kodak Company
- Eaton Corporation
- E-Systems Inc.
- GCA Corporation
- General Electric Corporation
- General Motors Corporation
- Goodyear Aerospace Corporation
- GTE Laboratories, Incorporated
- Harris Corporation
- Hewlett-Packard Company
- Honeywell, Incorporated
- IBM Corporation
- Intel Corporation
- LSI Logic Corporation
- Monolithic Memories, Incorporated
- Monsanto Company
- Motorola, Incorporated
- National Semiconductor Corporation
- Perkin-Elmer Corporation
- RCA Corporation
- Rockwell International Corp.
- SEMI Chapter, consisting of:
  - FEP Analytic (division of Verity Instruments, Inc.)
  - Amedyne
  - E/G Electrograph Inc.

SRC's purpose is to plan, promote, coordinate, sponsor, and conduct research supportive of the semiconductor industry and directed toward:

1. Increasing knowledge of semiconductor materials and phenomena, and of related scientific and engineering subjects that are required for the useful application of semiconductors;

2. Developing new and more efficient designs and manufacturing technologies for semiconductor devices;

3. Indentifying directions, limits, opportunities, and problems in generic semiconductor technologies;

4. Increasing the number of scientists and engineers proficient in research, development, and manufacture of semiconductor devices;

5. Increasing industry-university ties, establishing university semiconductor research centers with major long-term research thrusts, and developing university semiconductor research activities with more precisely defined, short-term objectives;

6. Developing more relevant graduate school education and a larger supply of graduate students in areas related to semiconductor technology;

7. Increasing the ability of universities to attract and retain competent faculty in the semiconductor field;

8. Decreasing fragmentation and redundancy in United States semiconductor research;

9. Establishing advanced research efforts for critical semiconductor technology areas that are beyond the individual resources for many SRC members;

10. Promoting efficient communication of research results to SRC members and

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extension, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in. Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone (202) 523–6331 Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW, Room N-1301, Washington, DC 20210. Comments should also be sent to the OMB reviewer, Nancy Wentzler, Telephone (202) 395–6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, Washington, DC 20503.

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Extension

Employment Standards Administration
Authorization for Release of Medical Information
1215–0057; CM–936
On occasion
Individuals or households
3,000 responses; 250 hours; 1 form

This form is necessary to obtain information on miners from medical institutions and private physicians who normally would not release this information to the Department. The form is used by the miner to give consent for the release of medical information pertaining to the miner.

Employment Standards Administration
Establishment Information and Establishment Information (Spanish)
1215–0006, WH–45 and WH–45 (Sp.)
On Occasion
Business or other for profit; non-profit institutions; small business organizations
4500 responses; 750 hours; 2 forms

Forms WH–45 and WH–45 (Sp.) are used in determining coverage of various establishments that are being considered for investigation under the Fair Labor Standards Act.

Employment Standards Administration
Continuance of Compensation
1215–0154; CA–12
Annually
Individuals or households
7,300 responses; 608 hours; 1 form

The Continuance of Compensation Claims Form is used to provide information concerning the continued entitlement of beneficiaries in death cases under the provisions of 5 USC 8101, et seq.

Employment Standards Administration
Claims for Compensation by Dependents and Dependents Information Reports (Death)
1215–0155; CA–5, 5b, 1615, 1617, 1085, 1074, 1031, 1072, 1093
On occasion; Semi-annually (CA–1617)
Individuals or households
3,765 responses; 2,097 hours; 9 forms

Reports are claims for compensation by survivors due to the death of a Federal employee, and supplemental reports concerning dependency status in various types of cases.

Mine Safety and Health Administration
Records of Results of Examinations of Self-Rescuers
1219–0044
Quarterly
Businesses or other for profit; small businesses or organizations
1,900 respondents; 8,056 hours

Requires underground coal mine operators to keep records of the results of examinations of self-rescue devices.

Mine Safety and Health Administration
Ventilation System and Methane and Dust Control Plan
1219–0064
On occasion; semi-annually
Businesses or other for profit; small businesses or organizations
2,100 respondents; 13,000 hours

Requires operators of underground coal mines to submit a detailed ventilation system and methane and dust control plan and revisions thereof to MSHA for approval.

Mine Safety and Health Administration
Ventilation Tests and Examinations in Underground Coal Mines
1219–0088
Daily/weekly
Businesses or other for profit; small businesses or organizations
1,900 respondents; 5,343,137 hours

Standards require that records be kept of certain tests and examinations which are required to be performed to monitor the ventilation system in underground coal mines. The information is used to insure that the integrity of the ventilation system is being maintained and that a safe working environment is being provided to miners.

Signed at Washington, DC, this 13th day of March, 1986.

Paul E. Larson,

Departmental Clearance Officer.

BILLING CODE 4510-27-M, 4510-43-M

Employment and Training Administration

[TA–W–17,245]

Fieldcrest-Cannon, Inc., Concord, NC; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on February 28, 1986 in response to a worker petition which was

filed on behalf of workers at Fieldcrest-Cannon, Inc., Concord, North Carolina.

A negative determination applicable to the petitioning group of workers was issued on March 3, 1986 (TA–W–16,475). No new information is evident which would result in a reversal of the Department's previous determination. Consequently, further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed at Washington, DC, this 11th day of March 1986.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 86–5929 Filed 3–17–86; 8:45 am]

BILLING CODE 4510-30-M

[TA–W–16,383]

Western Nuclear, Incorporated, Jeffrey City, WY; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on September 9, 1985 in response to a worker petition received on August 29, 1985 which was filed on behalf of workers at the Jeffrey City, Wyoming operations of Western Nuclear, Incorporated..

A negative determination applicable to the petitioning group of workers was issued on September 25, 1985 (TA–W–15,056). No new information is evident which would result in a reversal of the Department's previous determination. Consequently, further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed at Washington, DC, this 7th day of March 1986.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance; Conway-Winter, Inc., et al.

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period March 3, 1986—March 7, 1986.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) that sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to work separations at the firm.

TA–W–16,559; Conaway-Winter, Inc., Birch Tree, MO

TA–W–16,536; Advanced Hemstitching, New York, NY

TA–W–16,519; Ashland Petroleum Co., Freedom, PA

TA–W–16,475; Cannon Mills Co., Plant # 6, Concord, NC

TA–W–16,454; Cooper Range Co., White Pine Copper Div., White Pine, MI

TA–W–16,427; ASL Industries, Inc., Unionville, NY

TA–W–16,453; Coors Porcelain Co., Grand Junction, CO

TA–W–16,403; AVX Corp., Olean, NY

TA–W–16,407; Thatcher Glass Corp., Tampa, FL

TA–W–16,375; American Cyanamid Co., Milton, FL

TA–W–16,504; West Point Peppperell, Inc., Shawmut Cordurory Plant, Shawmut, AL

TA–W–16,312; Atlas Crankshaft Corp., Fostoria, OH

TA–W–16,349; United Technologies, Mostek Corp., Colorado Springs, CO

TA–W–16,352; Cummings Engine Co., Madison, IN

TA–W–16,353; Cummings Engine Co., Seymour, IN

TA–W–16,354; Cummings Engine Co., Indianapolis, IN

TA–W–16,355; Cummings Engine Co., Walesboro, IN

TA–W–16,356; Cummings Engine Co., Columbus, IN

TA–W–16,461; Midwest Steel and Iron Works, Pueblo, CO

TA–W–16,461A; Midwest Steet and Iron Works, Denver, CO

TA–W–16,364 and TA–W–16, 646; Cyclops Corp., Empire-Detroit Steel Div., Dover, OH

In the following cases in the investigation revealed that criterion (3) had not been met for the reasons specified.

TA–W–16,529; Sunshine Mining Co., Eureka, UT

Aggregate U.S. imports of flux for copper smelting are negligible.

TA–W–16,530; Vulcan Mold and Iron Co., Latrobe, PA

Aggregate U.S. imports of iron ingot molds are negligilbe.

TA–W–16,527; Nitrochem Energy Corp., Biwabik, MN

Aggregate U.S. imports of water gels and slurries; blasting agents and explosives are negligible.

TA–W–16,400; ASARCO, Inc. Corpus Christi, TX

Aggregate U.S. imports of slab zinc did not increase as required for certification.

TA–W–16,318; Health Co., Benton Harbor, MI

Sales, production and employment did not decline during the relevant period as required for certification.

TA–W–16,503; Monessen Southwestern Railway Co., Monessen, PA

Sales or production did not decline during the relevant period as required for certification. Declines in production/employment due to labor dispute are not a basis for certification under Section 222 of the Trade Act of 1974.

TA–W–16,567; Wheeling-Pittsburgh Steel Corp., Coke and By-Products Department, Monessen, PA

Sales or production did not decline during the relevant period as required for certification. Declines in production/employment due to labor disputes are not a basis for certification under Section 222 of the Trade Act of 1974.

Affirmative Determinations

TA–W–16,468; Samson Altman, Inc., Waltham, MA

A certification was issued covering all workers of the firm separated on or after January 1, 1985 and before November 1, 1985.

TA–W–16,562; Hansley Industries, Inc., Paris, KY

A certification was issued covering all workers of the firm separated on or after October 15, 1984.

TA–W–16,513; Brown Shoe Co., Trenton, TN

BILLING CODE 4510-30-M

Pension and Welfare Benefits Administration

[Application No. D–6063; et al.]

Proposed Exemptions; Allright Auto Parks, Inc., Profit Sharing Plan and Trust, et al.

AGENCY: Pension and Welfare Benefits Adminsitration, Labor.

ACTION: Notice of Proposed Exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions form certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this **Federal Register** Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, Room N–5669, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington DC 20210. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be avaialble for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Departmnt for a complete satement of the facts and representations.

Allright Auto Parks, Inc. Profit Sharing Plan and Trust (the Plan) Located in Houston, Texas

[Application No. D–6063]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale by the Plan to Allright Auto Parks, Inc. (the Employer) of a certain parcel of improved real property (the Property), provided that the terms of the proposed sale, including the sale price, are at least as favorable to the Plan as an arm's-length transaction with an unrelated party at the time of the consummation of the transaction.

Summary of Facts and Representations

1. The Plan is a defined contribution plan which, as of June 30, 1984, had 1,590 participants and total assets of $6,859,071. The trustee of the Plan is Texas Commerce Bank, N.A. (the Trustee). The Administrative Committee of the Plan (the Committee), which is composed of directors and officers of the Employer, has responsibility for directing Plan investments.

2. The Employer is a Texas corporation engaged in the automobile parking lot business with its headquarters located at the Concord Tower, Suite 1200, 1919 Smith Street, Houston, Texas. The Employer was acquired in July 1982 by a foreign interest, the Nedinco Acquisition Corporation (the Buyer), through the merger of the Employer and Nedinco Merger, Inc., a Delaware corporation wholly-owned by the Buyer. After the merger, the Buyer changed its corporate name to that of the Employer.

3. The Property is 11,250 square feet of land located at the northwest corner of Jackson and Prather Streets, Dallas, Texas. The Employer owns the adjacent 6,750 square foot tract of land located at the northeast corner of Jackson and S. Ervay Streets. Both the Property and the Employer's property are currently utilized as paved parking lots and are within the Dallas Central Business District. The Plan acquired the Property in 1972 from an unrelated party and entered into a lease of the Property with the Employer on December 1, 1973 (the Initial Lease). The term of the Initial Lease was for five years with rental payments of $2,340 per month. The Initial Lease was renewed on a month-to-month basis under the same terms until May 1, 1981, at which time a new two year lease was signed with an increase in rent to $3,600 per month (the Renewal Lease). The Renewal Lease expired on April 30, 1983, but continued thereafter under the same terms on a month-to-month basis. The applicant represents that the leasing of the Property satisfied the requirements of section 414(c)(2) of the Act through June 30, 1984 as a "binding contract" under applicable state law with terms at least as favorable to the Plan as an arm's-length transaction with an unrelated party.[1] The employer has continued to lease the Property beyond June 30, 1984, paying monthly rentals of $3,600 to the Plan. The Employer states that the necessary excise tax forms will be prepared and filed to report as a prohibited transaction the lease of the Property to the Employer, and that all appropriate taxes for the leasing transaction will be paid for the period from June 30, 1984 to the date of the proposed sale within 60 days of the date of a grant of this proposed exemption.

4. The applicant proposes that the Plan sell the Property to the Employer.

---

[1] The Department expresses no opinion regarding the applicability of section 414(c)(2) of the Act to this lease arrangement.

UMI

The Trustee states that it will serve as an independent fiduciary with respect to the sale. The Trustee chose the Cushman & Wakefield Appraisal Division (the Appraiser), an independent real estate appraiser in Dallas, Texas, to provide an updated appraisal of the Property's fair market value. The Appraiser initially estimated the Property's value at $956,000, or approximately $85.00 per square foot, as of September 27, 1985, and the fair market ground rental at $95,600 per annum based on a 10% rate of return on the appraised value. The Appraiser's valuation was based on an analysis of comparable land sales generally located along and south of Jackson Street in the Dallas Central Business District. However, the Appraiser later reconsidered the original evaluation based on some additional sales of properties located within the northern half of the Dallas Central Business District. Under the Appraiser's revised valuation, the fair market value of the Property is $100.00 per square foot or $1,125,000, as of September 27, 1985. The Appraiser states further that when the plottage value (i.e. the increment of value derived from the greater utility created when two or more sites are assembled under a single ownership) of the Property and the Employer's contiguous property is considered along with the market data, the fair market value of the subject half block would be $125.00 per square foot, making the Property's value approximately $1,406,250. In consideration of the Appraiser's findings and the other previous appraisals of the Property, the Employer proposes to pay $135.00 per square foot or $1,518,750 for the Property.[8] The Trustee states that the Employer's ownership of the adjacent property makes the Employer the best purchaser for the Property and that such a sale would be in the best interest of the Plan's participants and beneficiaries. The Trustee states further that the sale and use of the proceeds from the sale will have a positive effect on both the Plan's liquidity and its ability to diversify its investments with the available cash.

5. The Trustee acknowledges its duties, responsibilities and liabilities under the Act as a fiduciary of the Plan. The Trustee states that it has the authority, and will assume the responsibility, necessary to approve or disapprove the proposed sale. The Trustee will also pursue the Employer for the differences between the actual rentals paid on the Property under the current lease to the Employer and the fair market value rental as stated in the Appraiser's valuation of the Property, plus interest on the deficiency at an appropriate market rate of interest, beginning with June 30, 1984 through the date of sale. The Trustee states further that it has in place the necessary mechanisms to monitor the receipt of rental differentials and will take other such steps necessary to protect the interests of the Plan and assure that it is made whole based upon the fair market rental value of the Property as appraised by the Appraiser. The Employer has agreed to pay such amounts as are determined by the Trustee to be due.

6. The Trustee represents that it is not related to and shares no common interests with the Employer and that there are no owners or managers of the Employer serving on the Board of Directors of the Trustee. Loans outstanding to the Employer, as of April 1985, represented only .09% of the Trustee's total loans and lease financing. Total deposits of $530,104 for the Employer and its related companies represented .004% of the total deposits of the Trustee as of March 31, 1985. The applicant states that the Plan will not pay any commissions or other expenses in connection with the sale.

7. In summary, the applicant represents that the proposed transaction meets the statutory criteria of section 408(a) of the Act because: (a) The sale will be a one-time transaction for cash; (b) the Plan will receive an amount equal to or greater than the fair market value of the Property; (c) the Plan will not incur any expenses with respect to the sale; and (d) the Trustee states that the transaction is in the Plan's best interest and will allow the Plan to divest itself of the Property and reinvest the proceeds in investments yielding a higher rate of return.

Intrec, Inc. Money Purchase Pension Plan and Intrec, Inc. Defined Benefit Pension Plan (the Plans) Located in Santa Monica, California

[Application Nos. D-6167 and D-6168]

Proposed Exemption

The Department is considering granting and exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale for cash by the Plans of certain real property to Quaestor, Inc. (Quaestor), a party in interest with respect to the Plans,[9] provided that the price received is not less than the fair market value of the real property on the date of sale, and provided further that the net cash proceeds to the Plans are at least equal to the Plans' cash outlay for the property to the date of sale, plus interest on funds advanced by the Plans at 1% per annum over the 1-year Treasury Bill rate on the date of advance.

Summary of Facts and Representations

1. The Plans are a defined contribution (money purchase) pension plan and a defined benefit pension plan respectively, each with the same five participants. As of April 30, 1985, total assets of the money purchase plan were $393,733, and of the defined benefit plan $267,996. The Plans' sponsor is Intrec, Inc. (Intrec), a management consultant firm located in Santa Monica, California. The Plans' trustee is Michael A. Levin, Vice President and Treasurer of Intrec. The Plans' Investment Committee (the Committee) is composed of Richard R. Hallock, Director and President of both Intrec and Quaestor, and Saul M. Weingarten, Director and Secretary of both Intrec and Quaestor.

2. In May, 1983, the Committee received an application for a loan of $36,000 for a term of six months, to be secured by a fourth deed of trust on a house and lot and a contiguous lot which were at that time listed for sale (the Real Property), located in Carmel Valley, California, from Bernard L. Friedman (Mr. Friedman), an unrelated third party. At that time Mr. Friedman furnished the Committee with an appraisal of the house and lot prepared by Coutchie & Wolf Associates, real estate appraisers and consultants located in Salinas, California, estimating their fair market value as of April 12, 1982 at $850,000. Senior encumbrances borrowed by Mr. Friedman from unrelated financial institutions totaled $370,000, which, together with the applied for loan of $36,000, resulted in a loan/value ratio of 48%. The senior encumbrances consisted of a first deed of trust securing a loan of $99,000 from San Francisco Federal Savings and Loan; a second deed of trust securing a loan of $200,000 from Pan American Savings and Loan; and a third deed of trust securing a loan of $75,000 from Pan American Savings and Loan. Through amortization of principal the original total of $374,000 had been reduced to the $370,000 mentioned above. Accordingly, the Committee made the loan to Mr. Friedman, considering it to be a sound investment, since the loan/value ratio was well below the 70% upper limit used by the Committee, and since the prospect for the sale of the Real Property and repayment of the loans appeared excellent.

3. At the end of the six months, Mr. Friedman failed to pay the note, and also allowed the senior encumbrances to go into default. In order to protect the Plans' investment, the Committee decided to cure the default condition on the senior debt and commence foreclosure proceedings on the deliquent note. Accordingly, the Plans obtained title to the Real Property on June 18, 1984. During these proceedings, and subsequent to taking title to the Real Property, the Plans continued to make payments due on the senior debt, property taxes, and insurance at the rate of approximately $5,500 per month. The total of funds advanced by the Plans through December 3, 1985, including the original loan, delinquent payments on the senior encumbrances, and the pay off of the third note, is $246,907, with the underlying debt being approximately $291,000.

4. Upon completion of the foreclosure proceedings, the Real Property was listed for sale by Porter-Marquard Realty at $575,000 and subsequently reduced to $535,000. No offers to purchase the Real Property were received at these prices. The Real Property was then listed with another realtor, Sidney H. Yateman (Mr. Yateman), at $445,000 for the house alone and $75,000 for the contiguous lot. Two offers have been received at $350,000, and have been countered at $415,000; but there is little likelihood that the counter-offer will be accepted.

5. G.J. Kraft, a licensed real estate appraiser located in Monterey, California, estimated the fair market value of the Real Property at $510,000 ($420,000 for the house and $90,000 for the contiguous lot) as of August 5, 1985. The applicant represents that the great discrepancy between the original appraisal of the Real Property at $850,000 in 1982 and the latest appraisal is due, in part, to the failure of the original appraisal to take into account the lower average value of the other houses in the area. Further, the original appraisal was prepared to support an application by Mr. Friedman for a loan and lists no recent sales of comparable properties, but instead lists the asking prices (ranging from $900,000 to $1,500,000) of three homes then being offered for sale as a basis for appraised value. Mr. Kraft cites as further reasons for the decline in value a severe recessive economy with relatively high interest rates and a depressed real estate market in the Carmel Valley area, a growth moratorium on all major subdivisions under the Carmel Valley Master Plan, and increased traffic congestion in the area. Finally, the applicant notes that the Real Property is showing the results of deferred maintenance.

6. The applicant seeks an administrative exemption for the Plans to sell the Real Property to Quaestor for cash for no less than the fair market value of the Real Property on the date of sale, provided that the net cash proceeds to the Plans are at least equal to the Plans' total cash outlay for the Real Property to the date of sale, including all taxes, fees, payments of interest and principal, and underlying debt. Quaestor will also pay interest on the funds advanced by the Plans at 1% per annum over the 1-year Treasury Bill rate as of the date of advance from the date of advance until the date of sale to Quaestor. The applicant thus represents that the proposed sale will make the Plans whole with respect to any losses sustained in connection with the Real Property. The Plans will not be required to pay any real estate commissions or fees in connection with the sale.

7. Mr. Yateman, who is also a practicing attorney and member of the California Bar, has agreed to serve as independent fiduciary to oversee the proposed transaction. Mr. Yateman represents that he is aware of his duties, responsibilities and potential liabilities in serving as independent fiduciary. After examining the terms of the proposed transaction and the overall needs of the Plans, Mr. Yateman represents that the proposed transaction is in the best interest of the Plans' participants and beneficiaries and protective of their rights. Mr. Yateman further states that the interest to be paid to the plans at 1% per annum over prime rate for the use of the funds advanced by the Plans is adequate compensation for the loss of earnings by the Plans occasioned by their acquisition and holding of the Real Property. Mr. Yateman finally states that when the proposed transaction is consummated he will review and verify all amounts paid by Quaestor to the Plans in accordance with the terms herein set forth.

8. In summary, the applicant represents that the proposed transaction will satisfy the terms and conditions of section 408(a) of the Act because: (a) The Real Property will be sold for no less than its fair market value at the time of the sale as determined by an independent appraiser; (b) the sale represents a one-time transaction for cash which can be easily verified; (c) the sale will not require the payment of any commissions by the Plans; (d) the proposed sale will make the Plans whole with respect to any losses incurred in connection with the Real Property and compensate them for income lost through investment of the Plans' funds in the Real Property; and (e) the trustees of the Plans and the independent fiduciary have determined that the proposed transaction would be in the best interest and protective of the Plans and of their participants and beneficiaries.

For Further Information Contact: Joseph L. Roberts III of the Department, telephone (202) 523-8194. (This is not a toll-free number.)

Mandel-Kahn Industries, Inc. Profit Sharing Plan (the Plan) Located in Houston, Texas

[Application No. D-6450]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of sections 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply, effective February 10, 1986, to the loans of money (the Loans) by the Plan to its sponsor, Mandel-Kahn Industries, Inc. (the Company). The proposed exemption would also exempt for the term of the Loans the personal guarantees of the Company's obligation by Joel H. Mandel and Jack B. Kahn, parties in interest with respect to the Plan.

Effective Date: If granted, this exemption will be effective February 10, 1986.

---

[8] The applicant represents that the sale of the Property at this price will not result in a contribution to the Plan which exceeds the limitations set forth in section 415(c) of the Code.

[9] Quaestor is a party in interest with respect to the Plans under section 3(14) of the Act because 73% of its voting stock is owned by Richard R. Hallock, Director and President of Intrec, Inc., the Plans' sponsor.

VOL 51
ISS 52
MR 18
1986
UMI

Summary of Facts and Representations

1. The Plan is a qualified profit sharing plan with approximately 633 participants and net assets of $3,061,720 as of April 30, 1985. The Plan Administrator is Gilbert Araiza, Jr. and the Trustees are Joel H. Mandel and Jack B. Kahn. The Trustees own or control a plurality of the Company's stock.

2. The Company, a corporation engaged in the wholesale distribution of non-food items to supermarkets, owns and maintains a fleet of vehicles (the Vehicles). Pursuant to Prohibited Transaction Exemption 81-9 (PTE 81-9) (February 10, 1981, 46 FR 11739), a temporary exemption for a five-year period, the Plan has financed the purchase of some of the Vehicles. First City National Bank of Houston (the Bank) has financed others at an interest rate of one percent above the prevailing prime rate of the Bank.

3. The Trustees are requesting an exemption beginning on the expiration date of PTE 81-9 for the Plan to make the Loans to the Company on a recurring basis for the purchase of the Vehicles. Each loan would be subject to the following conditions:

1. Each loan will be collateralized by a promissory note and security agreement.
2. Each loan will have a first lien on the vehicle and in addition will be collateralized by other vehicles which are owned by the Company such that at all times each loan will be collateralized in an amount at least equal to 150% of the outstanding balance of such loan.
3. Each vehicle purchased will be a new vehicle.
4. No loan will exceed 80% of the purchase price of the vehicle financed, excluding the tax, title and license costs.
5. The maximum length of each loan will be thirty-six months.
6. The interest rate on the Loans will be fixed at 2¼% above the prevailing prime rate set by the Bank with the maximum rate being the rate which is legally allowed under the usury statutes of the State of Texas.
7. At the time of its making, no loan, together with all other loans, will exceed 25% of the dollar volume of the total assets of the Plan.
8. Each loan will be personally guaranteed by Joel H. Mandel and Jack B. Kahn, who are principal stockholders of the Company.

4. Before the Plan enters into any loan transaction, an independent fiduciary, Mr. Dale A. Steele, Sr., C.P.A., will certify that such loan would be an appropriate investment for the Plan and that the terms of such loan are equal to or better than those which the Plan would receive in dealing with an unrelated third party. Mr. Steele will also be responsible for monitoring the payments on the Loans and for monitoring the fair market value of the collateral used in securing the Loans. Mr. Steele is engaged in the practice of public accounting in Houston, Texas, and is knowledgeable about loan transactions and trust administration. Mr. Steele represents that he has experience in ERISA, and both understands and acknowledges his duties, responsibilities and liabilities in acting as fiduciary under ERISA. Mr. Steele is unrelated to the Company and the Plan. The Bank will release money to fund a loan only upon its receipt of (1) a promissory note and security agreement in proper form, (2) proof of payment of the purchase price to the seller of the vehicle, (3) a true and correct copy of the application for a title to the vehicle, the sales tax receipt, and the seller's affidavit of sale, and (4) the written approval of Mr. Steele. The Bank will receive all loan payments and will notify Mr. Steele of any failure on the part of the Company to make a loan payment within fifteen days from the date such payment is due.

5. Kenneth H. Knop, Esquire (Mr. Knop), independent fiduciary with respect to PTE 81-9, represents that the Trustees and Plan Administrator discharged their fiduciary responsibilities with respect to PTE 81-9 fully, correctly, and timely; that all loans and loan payments have been properly accounted for by the Bank; and that all loan payments have been promptly paid when due. The applicant represents that Mr. Knop asked to be relieved as independent fiduciary because he was not able to charge the Plan fees commensurate with the time expended on behalf of the Plan.

6. In summary, the applicant represents that the proposed transaction will satisfy the terms and conditions of section 408(a) of the Act because: (a) The Loans will be in the best interest of the Plan; (b) the Loans will be approved and monitored by an independent fiduciary; (c) the Plan will receive a high rate of return on its investment; and (d) the Loans will be secured at all times by collateral valued at 150% of the outstanding balance of the Loans and by personal guarantees of the majority shareholders of the Company.

For Further Information Contact: Joseph L. Roberts III of the Department, telephone (202) 523-8194 (This is not a toll-free number).

Eastern Carolina Neurosurgical Associates, Inc. Employees Retirement Plan (the Plan) Located in Greenville, North Carolina

[Application No. D-6503]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance wth the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to 1) the proposed purchase of 16,0000 shares of First Federal Savings and Loan Association of pitt County (First Federal) common stock (the Stock) by the individually directed account of Robert L. Timmons (Dr. Timmons) in the Plan (the Timmons Account) from Dr. Timmons, a party in interest with respect to the Plan; and 2) the proposed purchase of 15,000 shares of the Stock by the individually directed account of Ira M. Hardy, II (Dr. Hardy) in the Plan (the Hardy Account) from Dr. Hardy, a party in interest with respect to the Plan, provided that the price paid for the Stock is no greater than the fair market value of the Stock on the date of purchase.

Summary of Facts and Representations

1. The Plan is a money purchase pension plan with nine participants and total assets of $2,090,149 as of January 20, 1986. The Plan is sponsored by Eastern Carolina Neurosurgical Associates, Inc. (the Employer), a North Carolina medical professional corporation located at 125 Moye Boulevard, Greenville, North Carolina. The trustees of the Plan are Dr. Timmons, Dr. Hardy, and Dr. John R. Leonard, III, (the Trustees), who are the decision-makers with respect to Plan investments. The Trustees are officers and directors of the Employer.

2. Dr. Timmons and Dr. Hardy propose to sell 16,000 and 15,000 shares, respectively, of the Stock to the Timmons Account and the Hardy Account (the Accounts) in the Plan. Both Dr. Timmons and Dr. Hardy purchased the Stock in 1982 for a price of $6.00 per share as part of an original offering by First Federal. The Stock was purchased as an investment with anticipated long term capital gain. The applicant states that recent changes in federal banking regulations have made First Federal an attractive take-over candidate. Drs. Timmons and Hardy desire to sell the Stock to generate some liquidity for personal and business reasons, but they do not wish to sell the Stock on the open market at this time because a substantial increase in the Stock's value is anticipated. Therefore, Drs. Timmons and Hardy wish to sell their shares of the Stock to the Account so they can take advantage of any future appreciation of the Stock as participants of the Plan.

3. The applicant has submitted a valuation of the Stock by Burney S. Warren, II, (Mr. Warren), the President of First Federal, based on three major trades of the Stock which were the only trades of major blocks of the Stock during 1985. Mr. Warren, who is unrelated to Drs. Timmons and Hardy, represents that these major trades involved a total of 40,400 shares of the Stock which were transferred for a combined purchase price of $468,000 for an average of $11.58 per share. Two of the trades, on October 13, 1985 and November 21, 1985, were with parties totally unrelated to First Federal. Only one of the major trades mentioned by Mr. Warren involved a transaction with "insiders" or major stockholders. On August 14, 1985, 18,400 shares of the Stock were sold to seven major stockholders of First Federal for $12.00 per share by an individual who was selling all of his Stock. Mr. Warren States that there were approximately 329 stockholders of First Federal as of June 30, 1985 and that the marketplace generally has determined the value of the Stock when traded. The applicant proposes to have the Accounts purchase the Stock for $11.58 per share.

4. First Federal is a stockholder owned, federally chartered savings and loan association. The applicant states that there are presently about 370,000 outstanding shares of the Stock. The blocks of the Stock to be sold by Drs. Timmons and Hardy represent 4.32% and 4.05%, respectively, of the total outstanding shares. The Stock is registered with the Federal Home Loan Bank Board, which has substantially similar requirements as those of the Securities and Exchange Commission. The applicant represents that there are no restrictions on the sale or transfer of this Stock.

5. The applicant states that the Timmons Account and the Hardy Account had total assets of $752,608 and $731,109, respectively, as of January 20, 1986. The proposed purchase of 16,000 shares of the Stock by the Timmons Account and 15,000 shares of the Stock by the Hardy Account at $11.58 per share would involve less than 25% of the assets of each of the Accounts. In addition, the Plan will not incur any expenses on the purchase of the Stock for the Accounts. The Trustees state that any expenses relating to the proposed transactions will be paid by Dr. Timmons and Dr. Hardy.

6. In summary the applicant represents that the proposed transactions will satisfy the statutory criteria of section 408(a) of the Act because: (a) The purchase of the Stock will be a one-time transaction for cash; (b) the Accounts will purchase the Stock at a price no greater than the fair market value of the Stock; (c) the Accounts will not pay any expenses in connection with the transactions; and (d) Drs. Timmons and Hardy, the only paticipants to be affected by the transactions, have determined that the transactions are appropriate and in the best interest of the Accounts and desire that the transactions be consummated.

Notice to Interested Persons: Because Drs. Timmons and Hardy are the only participants in the Plan to be affected by the proposed transactions, it has been determined that there is no need to distribute the notice of proposed exemption to interested persons. Comments and requests for a public hearing are due 30 days from the date of publication of this proposed exemption in the **Federal Register**.

For Further Information Contact: Mr. E.F. Willians of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 13th day of March, 1986.

Elliot I. Daniel,

Assistant Administrator for Regulations and Interpretations, Pension and Welfare Benefits Administration, Department of Labor.

[FR Doc. 86-5927 Filed 3-17-86; 8:45 am]

BILLING CODE 4510-29-M

[Prohibited Transaction Exemption 86-38; Exemption Application No. D-6155 et al.]

Grant of Individual Exemptions; Knutson Companies, Employees Amended Profit Sharing Trust et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of Individual Exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, D.C. The notices also

VOL
51
ISS
52
MR
18
1986
UMI

invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of pendency were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

Knutson Companies Employees Amended Profit Sharing Trust (the Plan) Located in Minneapolis, Minnesota [Prohibited Transaction Exemption 86–38; Exemption Application No. D–6155]

Exemption

The restrictions of section 406(a) and 406 (b)((1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the sale of certain real property by the Plan to The Knutson Companies, Inc., for $852,800 in cash, provided that such price is not less than the fair market value of the property on the date of sale and provided further that the net cash proceeds to the Plan are at least equal to the Plan's cash outlay for the property to the date of sale.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on January 17, 1986 at 51 FR 2600.

For Further Informaton Contact: Joseph L. Roberts III of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

Benham Management Corporation Money Purchase Pension Plan and Trust (the Plan) Location in Palo Alto, California [Prohibited Transaction Exemption 86–39; Exemption Application No. D–6296]

Exemption

The restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)((1) (A) and (E) of the Code, shall not apply to the proposed sale by the Plan of 45 units (the Units) in Wester Timber Group 37, Ltd., a California limited partnership, to Benham Management Corporation, the sponsor of the Plan, provided that the sales price is not less than the higher of either $45,000 or the fair market value of the Units on the date of the sale.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on January 17, 1986 at 51 FR 2604.

For Further Information Contact: Mr. E.F. Williams of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Burt Chevrolet, Inc. Employees Retirement Plan and Trust (the plan) Located in Englewood, Colorado [Prohibited Transaction Exemption 86–40; Exemption Application No. D–6331]

Exemption

The restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)((1) (A) and (E) of the Code, shall not apply to the proposed sale by the Plan to Burt Chevrolet, Inc. (the Employer) of a certain parcel of improved real property (the Property) which is currently being leased to the Employer, provided that the sales price is no less than the fair market value of the Property on the date of the sale.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on January 17, 1986 at 51 FR 2605.

Rex Moore Electrical Contractors & Engineers Profit Sharing Plan (the Plan) Located in Sacramento, CA [Prohibited Transaction Exemption 86–41; Exemption Application No. D–6363]

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply, for a period of 5 years, to the proposed loans by the Plan of up to 25% of its assets to Rex Moore Electrical Contractors and Engineers, Inc., provided that the terms of the transactions are not less favorable to the Plan that those obtainable in an arm's-length transaction with an unrelated party at the time of entering into each transaction.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on January 17, 1986 at 51 FR 2606.

Temporary Nature of Exemption

This exemption is temporary and will expire 5 years after the date of grant with respect to the making of any loan. Subsequent to the expiration of this exemption, the Plan may hold loans originated during this 5 year period until the loans are repaid. Should the applicant wish to continue entering into loan transactions beyond the 5 year period, the applicant may submit another application for exemption.

Warner Plumbing Employee's Profit Sharing Plan (the Plan) Located in Springfield, Virginia [Prohibited Transaction Exemption 86–42; Exemption Application No. D–6434]

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the sale by the Plan, for the total cash consideration of $700,000, of certain real property (the Suitland Property), to The Warner Corporation, a contributing employer and a party in interest with respect to the Plan, provided the price paid for the Suitland Property is not less than its fair market value at the time the transaction is consummated.

For a more complete statement of the facts and representations supporting the the Department's decision to grant this exemption refer to the notice of proposed exemption published on January 17, 1986 at 51 FR 2608.

For Further Information Contact: Ms. Jan D. Broady of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Astro Homes, Inc. Profit Sharing Plan (the Plan) Located in Utica, Michigan [Prohibited Transaction Exemption 86–43; Exemption Application No. D–6165]

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed sale of a parcel of vacant land located in Macomb County, Michigan and concurrent extension of credit by the Plan to Lombardo Enterprises, Inc., or to the guarantee of repayment by Mr. Cosimo Lombardo, provided that the terms of the transactions are not less favorable to the Plan than those obtainable in an arm's length transaction with an unrelated person.

For a more complete statement of the facts and representations supporting the the Department's decision to grant this exemption refer to the notice of proposed exemption published on January 17, 1986 at 51 FR 2601.

For Further Information Contact: Alan H. Levitas of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

The Travelers Separate Account "R" (the Account) Located in Hartford, Connecticut [Prohibited Transaction Exemption 86–44; Exemption Application No. D–6456]

Exemption

The restrictions of section 406(a), 406(b) (1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply, effective December 16, 1985, to the sale of certain agricultural properties by the Account to the Travelers Insurance Company, provided that the terms of the sale are not less favorable to the Account than those terms obtainable in an arm's length transaction with an unrelated person.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on January 17, 1986 at 51 FR 2609.

Effective Date: December 16, 1985.

For Further Information Contact: Mr. Alan H. Levitas of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 13th day of March, 1986.

Elliot I. Daniel,

Assistant Administrator for Regulations and Interpretations Pension and Welfare Benefits Administration, Department of Labor.

BILLING CODE 4510-29-M

NATIONAL COMMISSION FOR EMPLOYMENT POLICY

Meeting

ACTION: Notice of hearing.

SUMMARY: Under the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given of a public hearing of the National Commission for Employment Policy at the Seelbach Hotel, 500 Fourth Avenue, Louisville, Kentucky.

DATE: Friday, April 11, 1986; 9:00 a.m. to 12:30 p.m.

Status: The hearing is open to the public.

Matters to be discussed: Commission members will hear testimony on dislocated worker issues from various witnesses representing State and local government, the private sector, and education. Witnesses will testify on the range of dislocated worker issues experienced in the Commonwealth of Kentucky generally and the Louisville area in particular. Attention will be given to the range of responses to dislocated worker problems with special attention being given to programs operated under Title III of the Job Training Partnership Act.

FOR FURTHER INFORMATON, CONTACT: Ms. Kathy McMichael, National Commission for Employment Policy, 1522 K Street, NW, Suite 300, Washington, DC 20005, (202) 724–1545.

SUPPLEMENTARY INFORMATION: The national Commission for Employment Policy is authorized by the Job Training Partnership Act (Pub. L. 97–300). The Act gives the Commission the broad responsibility of advising the President and the Congress. Handicapped individuals wishing to attend should contact the Commission so that appropriate accommodations can be made. No public testimony will be authorized except by those asked to do so prior to the hearing date. However, written testimony for the record will be accepted at the Commission offices through April 25, 1986.

Copies of the testimony and materials prepared for the hearing will be available for public inspection at the Commission's offices, 1522 K St. NW, Suite 300, Washington, DC 20005.

Signed this 12th day of March, 1986.

Carol J. Romero,

Acting Director.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-237/249]

Commonwealth Edison Co.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of exemptions from certain requirements of section III.G of Appendix R to 10 CFR Part 50 to Commonwealth Edison Company (CECo) (the licensee) for Dresden Nuclear Power Station, Unit Nos. 2 and 3, located at the licensee's site in Grundy County, Illinois.

Environmental Assessment

Identification of Proposed Action:

The proposed action would grant exemptions from certain requirements of section III.G of Appendix R to 10 CFR Part 50 which relate to fire protection features for ensuring that systems and associated circuits used to achieve and maintain safe shutdown are free of fire damage. The exemptions are technical since the licensee must demonstrate that fire protection configurations meet the specific requirements of Section III.G or that alternate fire protection configurations can be justified by an acceptable fire hazard analysis.

The Need for the Proposed Action:

The proposed exemptions are needed because the features described in the licensee's request regarding the existing and proposed fire protection at the plant for these items are the most practical method for meeting the intent of Appendix R and literal compliance would not significantly enhance the fire protection capability at Dresden Station.

Environmental Impacts of the Proposed Action

The proposed exemptions will provide a degree of fire protection such that there is no increase in the risk of fires at Dresden. Consequently, the probability of fires has not been increased and the post-fire radiological releases will not be greater than previously determined nor do the proposed exemptions otherwise affect radiological plant effluents. Therefore, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed exemptions.

With regard to potential nonradiological impacts, the proposed exemptions involve features located entirely within the restricted areas as defined in 10 CFR Part 20. They do not affect nonradiological plant effluents and have no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed exemptions.

Alternative Use of Resources: This action involves no use of resources not previously considered in the Final Environmental Statement dated November 1973 for the Dresden Nuclear Power Station, Unit Nos. 2 and 3.

Agencies and Persons Consulted: The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemptions.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the licensee's letters dated August 10, 1984 and September 18, 1985. These letters are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Morris Public Library, 604 Liberty Street, Morris, Illinois 60451.

Dated at Bethesda, Maryland this 12th day of March 1986.

For the Nuclear Regulatory Commission.

John A. Zwolinski,

Director, BWR Project Directorate No. 1, Division of BWR Licensing.

[FR Doc. 86-5907 Filed 3-17-86; 8:45 am]

BILLING CODE 7590-01-M

OFFICE OF PERSONNEL MANAGEMENT

Federal Employees Health Benefits Program; Health Practitioners; Public Comments

AGENCY: Office of Personnel Management.

ACTION: Request for comments.

SUMMARY: The Office of Personnel Management (OPM) is requesting comments on the question of whether to extend a provision of the Federal Employees Health Benefits (FEHB) law to cover nonphysician health practitioners not currently covered. The comments being requested are not intended for the purpose of rulemaking. They are elicited to help OPM evaluate the feasibility, effectiveness and affordability of broadening the scope of health care providers covered under the FEHB law.

DATE: Comments must be received on or before March 25, 1986.

ADDRESS: Written comments may be sent to Jean M. Barber, Executive Assistant Director for Actuarial Analysis and Insurance, Compensation Group, Office of Personnel Management, P.O. Box 707, Washington, DC 20044, or delivered to OPM, Room 3415, 1900 E Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Lease, Chief, Program Planning and Evaluation Division, (202) 632-4958. (Commenters who would like to expand on their written comments, or persons wishing to make their views known informally may also contact Mr. Lease by telephone.)

SUPPLEMENTARY INFORMATION: Under current law (5 U.S.C. 8902(k)(1)), FEHB fee-for-service plans that pay for or reimburse the cost of services which may be performed by licensed or certified clinical psychologists and optometrists must allow individuals they cover to be free to select and have direct access to such clinical psychologists and optometrists without supervision or referral by a physician and have payment or reimbursement made to them or on their behalf for services performed.

Pub. L. 99-251 directs OPM to conduct a study on the issue of extending current law to require FEHB fee-for-service plans that pay for or reimburse the cost of services which may be performed by other health practitioners, such as nursemidwives, nurse practitioners, chiropractors, and clinical social workers, to provide those whom they cover the same freedom of selection, direct access, and payment or reimbursement entitlement. OPM must send a written report on the study to the Congress before April 1, 1986. So that all interested parties may provide input for the study, the Director of OPM is requesting public comments on the following issues:

(1) Specific nonphysician health practioners that should be extended coverage under 5 U.S.C. 8902(k)(1) and the rationale for each in terms of service delivery and quality.

(2) Potential cost impact on enrollees and the Government for covering the above-specified health practitioners under 5 U.S.C. 8902(k)(1).

In addition, commenters are invited to submit any other views they may have on the subject, as well as statistical data and research studies in support of their views.

Office of Personnel Management.

Constance Horner,

Director.

BILLING CODE 6325-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. IA-1015; (803-41)]

Rockefeller and Co., Inc.; Application for Order Permitting Performance-Based Fees

March 10, 1986.

Notice is hereby given that Rockefeller and Co., Inc. ("Applicant"), 30 Rockefeller Center, New York, NY 10112, a registered investment adviser under the Investment Advisers Act of 1940 ("Act"), filed an application on September 17, 1984, and amendments thereto on January 31 and February 20, 1986, requesting a Commission order pursuant to section 206A of the Act granting an exemption from section 205(1) of the Act to the extent necessary to allow the general partners ("General Partners") of certain limited partnerships ("Partnerships") proposed to be organized by Applicant to receive fees ("Performance Fees") based upon a share of the profits and losses of such Partnerships. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act and the rules thereunder for the text of the applicable provisions.

Applicant states that it was organized by the Rockefeller family ("Family") to provide investment advisory services to Family members and Family-related entities. Applicant is owned by 5600, Inc. ("5600"), which is owned by a Family trust ("Family Trust") established by Family members for descendants of the Family and their spouses ("Family Trust Beneficiaries"). The trustees of the Family Trust are advised by a committee of Family members. 5600's board of directors is elected by the trustees of the Family Trust and is comprised entirely of Family Members. (The office maintained by the Family, the Family Trust and the Family Trust Beneficiaries are collectively hereinafter referred to as the "Family Office.")

Applicant will act as investment adviser to each Partnership and will receive an annual fee of no more than two percent of Partnership assets as of the end of each year. Applicant states that each General Partner will be either (i) Applicant, (ii) a subsidiary of Applicant, (iii) key employees of, or consultants or other persons performing key services under contract with, the Family Office or a corporation controlled by the Family Office, or (iv) a partnership comprised of a combination of the foregoing. According to the application, each Partnership will have varying investment objectives and will require varying degrees of supervision and management by the General Partner. Further, the General Partner will be responsible for the management and administration of the Partnership's business and will be reimbursed by the Partnership for all expenses incurred by it on behalf of the Partnership. According to Applicant, each General Partner will maintain a Partnership interest equal to the greater of $150,000 or one percent of the total amount invested in the Partnership.

Applicant represents that limited partnership interests in the Partnership will be exempt from registration under the Securities Act of 1933 pursuant to section 4(2) thereof and that each Partnership will be exempt from registration as an investment company pursuant to either section 3(c)(1) of the Investment Company Act of 1940, or under an order issued by the Commission under section 6(c) thereof. Applicant further represents that individuals or entities desiring to invest in the Partnerships will either participate in accordance with Rule 205-3(b) under the Act or be "Family Partners" consisting of:

(i) Descendants of John D. Rockefeller, Jr. and their spouses, trusts created by or for such persons, and estates of such persons;

(ii) Charitable or educational institutions established by persons described in (i) or by John D. Rockefeller, Sr. or Jr.;

(iii) Businesses established by persons described in (i) and (ii), and which either are controlled by them or in which they have significant interest;

(iv) Certain organizations served by the Family Office; and

(v) Managers, supervisors and professionals ("Key Employees") of persons described in (i), (ii) and (iii) or trusts for the benefit of such Key Employees.

Family Partners who are Family Members must have a continuing and substantial relationship with the Family Office or have at least 50% of his or her assets available for investment under Family Office management. Applicants state that at present many Family Partners have at least $250,000 under management with the Family Office. Applicant also states that each Key Employee must (a) earn in excess of $50,000 per year; (b) have either a business or professional background and a college or professional degree or substantial specific experience in financial matters; (c) perform significant executive, professional or managerial functions; (d) be involved with the Family's business and/or philanthropic activities and have regular access to Family members; and (e) participate in a Key Employee investment program. Further, as described in the application, Family Partners have certain withdrawal and appraisal rights and Key Employees are subject to investment limitations.

According to the application, a General Partner will participate in the capital appreciation (or depreciation) of Partnership assets in two ways:

First, a General Partner will participate in the capital appreciation (or depreciation) of Partnership assets to the extent of its Interest in the same manner as Limited Partners so participate. Each Partner (General or Limited) will be allocated a pro rata share of all capital appreciation (or depreciation) which has not been specially allocated to the General Partner in the manner described below.

Second, a General Partner will receive a Performance Fee, ranging between 10% and 20% depending on the type of investments in which Partner assets are invested, of the realized and unrealized capital gains less realized and unrealized capital depreciation of Partnership assets. (The General Partner of a Partnership which requires more intensive supervision and management will receive a Performance Fee nearer 20%; the General Partner of a Partnership requiring less intensive supervision and management will receive nearer 10%.) If realized and unrealized capital depreciation exceeds realized and unrealized capital gains in any year, the General Partner will be specially allocated a percentage of such excess equal to its Performance Fee; *Provided, however,* Such net depreciation shall be so allocated to the General Partner only to the extent it does not exceed the aggregate amount of gains previously specially allocated to each such General Partner, net of any capital depreciation previously specially allocated to that General Partner. Thereafter, any excess net depreciation will be allocated to all Partners (General and Limited) in proportion to their capital contributions to be Partnership, adjusted for accretions, demunitions and withdrawals ("Interests"). Any net capital gains in subsequent years will also be allocated (pro rata) to all Partners until all allocated excess net

depreciation has been fully offset. Applicant represents that permitting a General Partner to receive a Performance Fee representing a share of a Partnership's capital gains furthers the public interest, will not endanger the interests of the Limited Partners, and will not conflict with the policy of the Act against encouraging undue speculation by investment advisers.

Notice is further given that any interested person wishing to request a hearing on the applicaton may, not later than April 4, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant(s) at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,
Secretary.

PRESIDENTIAL COMMISSION ON THE SPACE SHUTTLE CHALLENGER ACCIDENT

[Notice 86-20]

Presidential Commission on the Space Shuttle Challenger Accident; Open Meeting

AGENCY: Presidential Commission on the Space Shuttle Challenger Accident.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the Commission announces a forthcoming meeting.

DATE AND TIME: March 21, 1986, 10:00 a.m. to 4:00 p.m.

ADDRESS: Dean Atchison State Department Auditorium, 2201 C Street NW., Washington, DC 20520.

FOR FURTHER INFORMATION CONTACT: Dr. Alton G. Keel, Executive Director, Presidential Commission on the Space Shuttle Challenger Accident (202-453-1797).

Purpose of Meeting: To receive the results of the latest analysis of photographic and film evidence relating to the Space Shuttle Challenger accident and to receive testimony to update the findings of the Commission's investigative efforts.

SUPPLEMENTARY INFORMATION: The Presidential Commission on the Space Shuttle Challenger Accident was established as a group of distinguished leaders of the government and the scientific, technical and management communities to investigate the accident of the Space Shuttle *Challenger* which occurred on January 28, 1986.

Exceptional circumstances requiring less than 15 days notice: the meeting is required to be held promptly due to the Presidential direction that the Commission investigate the January 28, 1986, Space Shuttle Challenger accident and submit a final report to the President and the Administrator of the National Aeronautics and Space Administration within 120 days of issuance of Executive Order 12546, dated February 3, 1986.

Type of Meeting: Open.

Richard L. Daniels,
Advisory Committee Management Officer, National Aeronautics and Space Administration.

March 17, 1986.

Agency Form Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

The Veterans Administration has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document contains a new collection and lists the following information: (1) The department or staff office issuing the form, (2) the title of the form, (3) the agency form number, if applicable, (4) how often the form must be filled out, (5) who will be required or asked to report, (6) an estimate of the number of responses, (7) an estimate of the total number of hours needed to fill out the form, and (8) an indication of whether section 3504(h) of Pub. L. 96-511 applies.

ADDRESSES: Copies of the form and supporting documents may be obtained from Nancy C. McCoy, Agency Clearance Officer (732), Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 389-2146. Comments and questions about the items on the list should be directed to the VA's OMB Desk Officer, Dick Eisinger, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395-7316.

DATES: Comments on the information collection should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: March 13, 1986.

ACTION: Proposed rule.

SUMMARY: The proposed rule would consolidate into one document the currently multitiered rules of the Offshore program of the Minerals Management Service (MMS) that govern oil and gas operations in the Outer Continental Shelf (OCS). The proposal also would eliminate redundant, burdensome, unnecessary, and counterproductive requirements imposed in current rules; introduce more performance standards; introduce new requirements; and simplify the language of the rules.

DATES: Comments must be hand delivered or postmarked no later than June 16, 1986.

ADDRESSES: Written comments must be mailed or hand delivered to the Department of the Interior, Minerals Management Service, 12203 Sunrise Valley Drive, Mail Stop 646, Room 6A110, Reston, Virginia 22091, Attention: David A. Schuenke.

FOR FURTHER INFORMATION CONTACT: David A. Schuenke, telephone (703) 648–7729.

SUPPLEMENTARY INFORMATION:

Synopsis

The MMS is proposing to reform the rules governing oil and gas operations in the OCS. The reform is directed toward reducing the burden on industry resulting from the regulations while maintaining or increasing the level of safety and the protection provided for the environment. This is being accomplished by addressing issues identified by MMS as well as issues raised by industry in response to a request from the Secretary of the Interior (Secretary) for the identification of burdensome regulations.

The goal of minimizing the burden on industry while maintaining levels of safety and environmental protection mandated by statute is proposed to be accomplished through the following specific objectives:

(1) To consolidate all requirements into a single document, eliminating the multiple tiers of rules,

(2) To add more performance standards to the extent practicable,

(3) To update rules in areas where warranted by safety or environmental needs, operating experience, current operational practices, or advances in technology,

(4) To trim reporting and recordkeeping requirements to the minimum, and

(5) To remove redundant provisions, generally simplify the language, and clarify the rules.

Current regulations at 30 CFR Part 250, Oil and Gas and Sulphur Operations in the Outer Continental Shelf, OCS Orders for each of the four OCS Regions, and portions of selected Notices to Lessees and Operators (NTL) would be combined into a proposed new Part 250 of Title 30 of the Code of Federal Regulations. The proposed rules would be organized into 14 subparts reflecting specific subject matter, e.g., Drilling Operations, and Remedies and Penalties.

The following summarizes the major proposed changes:

(1) *Performance Standards.* Performance standards would be added to the detailed requirements. Because the nature of the activities regulated are not readily amenable to performance standards (as in the case of emission standards or other numerically quantifiable standards) these standards are fairly general. They are descriptions of the safety, environmental, property, and resource protection goals intended to be achieved by the design and engineering requirements. They are intended to identify the purpose of the detailed requirements and provide a basis for alternative achievement of such purpose. New, different, better, and more efficient techniques and practices are intended to be available to lessees on the basis of these performance standards. We invite industry to comment as to whether the performance standards proposed present a welcome opportunity.

(a) *Performance Requirements.* A "Performance requirements" section would be added. This would clarify that specific detailed requirements of the regulations would not preclude the use of new or alternative techniques, procedures, equipment, or activities if they meet or exceed the protection intended to be provided by the specific requirements and if they have been approved by MMS. This is intended to remove obstacles to innovation and ensure that MMS's regulations are not unnecessarily prescriptive.

(b) *Well Casing Performance Characteristics.* A performance standard is proposed to be substituted for a reference in existing regulations incorporating the requirements in eight American Petroleum Institute (API) documents. The Applications for Permit to Drill, Deepen, or Plug Back (APD) and MMS inspections would provide review of actual casing being used.

(c) *Well Casing Setting Depths.* Specific depths for setting the conductor and surface casing are proposed to be deleted. The lessees' proposed casing programs would be reviewed by MMS as part of the APD approval procedure.

(d) *Well Completions and Well Workovers.* In this portion of the proposed regulations, performance standards for well-control fluids, blowout preventers (BOP), tubing, and wellhead equipment would be combined with limited additional requirements as opposed to the detailed design and engineering requirements proposed by MMS in May 1983. Industry voiced objection to the detailed prescriptive approach and suggested the use of performance standards.

(e) *Blowout-Prevention Systems.* The requirements concerning practices for blowout-prevention systems incorporated from various API documents would be replaced by a performance standard.

(2) *New Requirements.* Many of the OCS Orders have not been revised in more than 10 years. Some new requirements are proposed in response to recommendations made by accident investigation panels and others. Whenever possible, these new requirements would be described in terms of performance rather than design.

(a) *Periodic Inspections and Maintenance.* The MMS's regulations and rules presently are silent concerning periodic inspection and maintenance of platforms. Problems may increase as platforms age and as they are built in deeper waters and more hazardous areas. The proposed regulations would provide a minimal regulatory approach, lessee flexibility, and simple reporting to MMS.

(b) *Well-Completion and Well-Workover Operations.* Another gap in current MMS rules relates to well-workover operations and, to some extent, well completions. Numerous accidents have been associated with these operations. In May 1983, MMS proposed a comprehensive set of rules for these activities. The MMS received numerous industry objections to the May 1983 proposed rulemaking, primarily concerning the detail of the proposed requirements. This new

proposal would depend more on performance standards and would also respond to other industry comments. Although these proposed requirements are new, they represent widespread current industry practice. Specific requirements for well-completion and well-workover operations are included for equipment movement, emergency shutdown systems, hydrogen sulfide, subsea completions, crew instructions, welding and burning, electrical requirement, structures on fixed platforms, prevention of diesel engine "runaway", simultaneous operations, field rules, well-control, blow-out prevention, and tubing and wellhead equipment. Requirements are also included for well-workover wireline operations. Many of these requirements are based on similar requirements which are either currently applicable to drilling operations or are proposed to be applicable to drilling operations.

(c) *Hydrogen Sulfide (H_2S) Requirements and Procedures for Production, Well-Completion, and Well-Workover Operations.* The presence of H_2S represents a lethal threat to human safety and equipment/platform durability. Present H_2S requirements concerning drilling operations are proposed to be expanded to cover the other operations. The proposed rules concerning H_2S are tailored to whether or not the operations are in an area known to contain H_2S.

(d) *Diverter Equipment.* During the drilling of a well, shallow gas may be encountered. This equipment diverts gases to the side and away from the rig and may also prevent the destruction of a facility, loss of life or injury, and loss of resource which could occur from a blowout. The proposed rulemaking would require the use of diverters of a specific configuration (large diameter pipe and minimum turns). Because the configuration and use of diverters are controversial, we are posing a number of questions to guide the development of final rules.

(e) *Extension of Lease Terms.* A provision is proposed whereby a suspension which would extend the term of a lease beyond the primary term would be issued only if a well determined to be capable of producing in paying quantities has been drilled on the lease. This new provision is a restatement of existing MMS policy. In addition, the Director would be authorized to extend up to 180 days (currently 90 days), the allowable time that a lease term can be extended through a drilling or well-reworking operation.

(f) *Additions to Development and Production Plans.* Development and Production Plans shall include descriptions of new or unusual technology to be employed and technology and practices intended to increase the ultimate recovery of oil and gas.

(g) *Pollution Prevention and Control.* New provisions are included with regard to restricting the rate of drilling fluid discharge, requiring berms on artificial islands, and information to be included in an oil spill contingency plan.

(h) *Additional Safety Devices.* Requirements would be added for crown block safety devices and for devices to prevent diesel engine "runaway."

(i) *Pipelines.* Rules governing pipelines would expand requirements governing design, installation, testing safety equipment, abandonment and reporting.

(j) *Flaring and Venting.* Requirements for flaring and venting would be expanded to clarify the intent of requirements currently in OCS Order No. 11.

(k) *Enhanced Recovery of Oil and Gas.* Clarifying details would be added to rules concerning enhanced recovery, currently in OCS Order No. 11.

(l) *Site Security.* Requirements would be established for site security. These provisions are intended to ensure against the loss or theft of production and to assure accurate measurement for royalty purposes.

(m) *Enclosed Mud Rooms.* Gas detection systems would be required for enclosed mud-handling rooms.

The MMS invites comment as to the costs and benefits associated with each of the proposed new requirements.

(3) *Reduced or Eliminated Requirements.* Requirements are proposed to be reduced or eliminated where no adverse impact on safety or protection of the environment would result. Many of the requirements proposed to be eliminated have been identified as counterproductive by industry. Requirements are proposed to be eliminated only when we believe the requirements would no longer be needed or where functions would be better accomplished by performance standards.

(a) *Cranes on Platforms.* Requirements concerning cranes on platforms are proposed to be deleted. Recent discussions between the U.S. Coast Guard (USCG) and MMS have resulted in a division of responsibility with respect to cranes. In the agreement, the USCG will have responsibility for cranes on all OCS platforms.

(b) *Determination of Producibility.* The presently required determination of producibility of each well is proposed to be eliminated. The determination of producibility would be needed to suspend operations when a lease which has no producing wells would be extended beyond its primary term. Making those determinations only when the lessee requests it instead of for every completed well would save lessees and MMS considerable time and money. However, we do request comments on whether this proposal should become final, the current requirement remain, or some other alternative such as a requirement for at least one determination per lease for each lease that is not in production by the end of its primary term.

(c) *Maximum Efficient Rate (MER) on Nonsensitive Reservoirs.* The MER's would not be required for "nonsensitive reservoirs." Reservoirs would be classified as sensitive or nonsensitive, and MER's would be established only for the sensitive reservoirs.

(d) *Shallow Hazard Surveys.* Detailed specifications for shallow hazard surveys previously contained in NTL's are proposed to be eliminated. Site and regional differences and data availability preclude establishment of a single set of detailed national or regional requirements. The responsibility for designing an appropriate surveying strategy would be with the lessee.

(e) *Orientation and Motivational Training.* The majority of training requirements for the prevention of pollution relate to drilling and production procedures and would be addressed in subparts D, Drilling Operations, and H, Production Safety Systems. Therefore, the orientation and motivational training requirements currently found in OCS Order No. 7 are proposed to be deleted as unnecessary and redundant. The API Recommended Practice (RP) for Orientation Program for Personnel Going Offshore for the First Time (API RP T–1) and API Bulletin, Employee Motivation Programs for Safety and Prevention of Pollution in Offshore Operations (API Bul. T–6), that are incorporated by reference in the current rules, are proposed to be eliminated. While trained personnel are key to safe conduct of operations, the two referenced documents are not appropriate as regulatory requirements. However, the training requirements for oil spill response operating teams in current OCS Order No. 7 would continue in effect.

The MMS invites comment as to the desirability and savings associated with the proposed deletions.

(4) *Reduced Recordkeeping and/or Reporting.* In a number of instances, recordkeeping and reporting

VOL 51
ISS 52
MR 18
1986
UMI

requirements would be reduced or eliminated without affecting the level of safety or environmental protection. In some cases, redundant reports are proposed to be eliminated while in other cases the use of performance standards would reduce the need for reporting or for recordkeeping.

It has been suggested that it may be more efficient to refer to the brand name, model number, or other similar standardized designation of equipment in lieu of describing such equipment in reports and recordkeeping required by MMS. Comment is requested as to that suggestion.

(a) *Exploration Plans.* Intended development and production information is proposed to be dropped from the Exploration Plan. Since discoveries have not yet been made when the plan is prepared, intended development and production information has been speculative and adds little, if any, information to that which the MMS or coastal States already have.

(b) *Critical Operation and Curtailment Plans.* Critical Operation and Curtailment Plans are proposed to be eliminated for the Gulf of Mexico and Pacific OCS Regions. This information is often speculative and/or redundant to material MMS already receives in the Exploration Plan, Development and Production Plan, and the APD. For the Alaska and Atlantic OCS Regions, the requirements would be merged and refocused. Similarly, information required in the fitness of drilling unit report would be reduced for the Atlantic, Gulf of Mexico, and Pacific OCS Regions. In the Alaska OCS Region, it is proposed that third-party review of the drilling unit may be required by the District Supervisor.

(c) *Exploration Plan and Development and Production Plan.* The proposed regulations would reduce the amount of redundant or unnecessary information to be included in the Exploration Plan and Development and Production Plan. Only information of practical significance to States, localities, and MMS would be required. Local interests and/or regional situations may make some information unnecessary. Regulations would permit the Director of MMS, in consultation with the affected States, to inform lessees of reduced information requirements. This would be in addition to the current exemption from submitting Development and Production Plans in the western Gulf of Mexico.

(d) *Changes to Plans.* Regulations would provide that when plans are revised, only the portions actually being changed would need to be resubmitted. Changes usually involve only a few pages out of hundreds of pages, and many lessees have felt obliged to resubmit the entire plan.

(e) *Monthly Report of Operations.* The monthly report of operations would be discontinued. The production information for each well would be reported to MMS in accordance with rules issued by the Royalty Management Program of MMS.

(f) *Erosion-Control Program Report.* The annual report on erosion control programs would be deleted. The erosion control program would be retained. The lessee would be required to maintain records of the results obtained.

(g) *Pipeline-Safety Reports.* The semiannual reports on pipeline-safety devices and annual reports of monthly pipeline inspections would be deleted. The installation, maintenance, and operation of the safety devices and the conduct of the monthly inspections would continue to be required, but the submission of reports adds little, if anything, to the margin of safety and is proposed to be deleted.

(5) *Deleted and/or Modified References to Technical Documents.* The incorporation by reference of technical documents is proposed only when clearly needed. Only the specific, relevant portions of the document would be incorporated. In some cases, incorporated references would be replaced with a performance standard describing the level of performance rather than relying upon specific requirements.

(a) *Reference for Well-Casing Requirements.* References to eight API documents concerning well casing are proposed to be replaced by a performance standard. The API documents do not provide sufficient flexibility to allow the lessee to meet the desired performance in the most efficient manner for a particular well.

(b) *Electrical Code Reference.* References to the National Electrical code and the American National Standards Institute/Institute of Electrical and Electronics Engineers (ANSI/IEEE) publication, ANSI/IEEE Std 45–1977, Recommended Practice for Electric Installations on Shipboard, are proposed to be eliminated. These documents are bulky, vague as to which portions apply, and difficult to enforce. Essential electrical requirements would already be covered by requirements proposed to be incorporated by reference in API RP 14F for Design and Installation of Electrical Systems for Offshore Production Platforms and API RP 500B for Classification of Areas for Electrical Installations at Drilling Rigs and Production Facilities on Land and on Marine Fixed and Mobile Platforms.

(c) *References to MMS Documents.* References to MMS documents, Appendices to Requirements for Verifying the Structural Integrity of OCS Platforms and Commentary on Requirements to Verifying the Structural Integrity of OCS Platforms are proposed to be eliminated. These documents are outdated and advisory in nature.

(6) *Simplified Format and Wording.* The approach of a single set of rules in place of regulations, Orders, standards, and selected NTL's would greatly simplify the rules format. In addition, many sections of Part 250 would be restructured and reworded for clarity. For example, in Subpart N, Remedies and Penalties, the language would be streamlined and simplified. Portions of current regulations which constitute instructions to MMS personnel would be removed.

(7) *Other Changes in Requirements.* Many other changes are proposed in an attempt to meet the established objectives.

(a) *Preliminary Activities.* Preliminary activities—those which occur prior to activities described in an Exploration Plan or a Development and Production Plan—would be redefined to permit seabed penetrations of up to 500 feet instead of 300 feet in unconsolidated formations or 50 feet in consolidated formations. Normally, significant hydrocarbons do not exist within the first 500 feet. Preliminary activities would not require prior MMS notification or approval except as may be required by the Regional Supervisor. In areas where shallow gas or other hazards might be present, the District Supervisor may specify appropriate procedures. The redefinition is intended to reduce paperwork for lessees and the MMS and to eliminate confusion over differing requirements in consolidated versus uncon solidated formations.

(b) *Combination of Plans and Environmental Reports.* It is proposed to combine the Exploration Plan and Development and Production Plan with their respective Environmental Reports (ER) into single documents. The separate documents now contain redundant material. The combined documents would contain all of the information previously required but with less redundancy.

(c) *Approval of Plans.* Significant changes in the approved plans would be sent to affected coastal zone management (CZM) agencies for review. Existing regulations make provision for a State Governor to review changes in approved plans but not for review by

CZM agencies even though the plan must be consistent with the CZM plan. The proposed regulations recognize the possible significance of modifications to plans and include CZM agency review of modifications.

(d) *Model Unit Agreements.* It is proposed to include the Model Unit Agreements in the regulations. The existing Model Unit Agreement would be rewritten as two model unit agreements—one for exploration units and one for development and production units. The model unit agreements would be published in the regulations and would be a standard for lessees to follow in proposing units. Procedures would be provided for requesting variations. This proposal is expected to save lessees and MMS considerable time and costs.

(e) *Extension of Lease Term by Production, Drilling, or Well Reworking.* Current rules require production, drilling, or well reworking every 90 days to extend a lease which is not in production beyond the primary term. The proposed rules would permit the Regional Supervisor to extend the time period during which production, drilling, or well reworking must occur for such purpose up to 180 days.

(f) *Criteria for Determinations.* The regulations would state criteria to be considered by the District or Regional Supervisor, as appropriate, in making numerous determinations. The proposed regulations would identify a number of circumstances where particular requirements need to be adapted to the situation. In exercising the necessary discretion, District and Regional Supervisors would be guided by appropriate criteria. The proposed regulations would recognize that it is important to articulate the criteria that would guide and affect those judgmental determinations.

(g) *Identification of Specific Authorities and Responsibilities.* The regulations would identify the MMS officials with specific authorities and responsibilities. In the past, MMS informed lessees of this information with NTL's. Such authorities may also be exercised by all MMS and Department of the Interior (DOI) officers superior to the officer designated in the regulations. Delegations of authority in the DOI are effected through DOI manual publications. The regulations would now make the identification of the responsible official explicit.

(h) *Timing of the Exploration Plan.* The requirement that an Exploration Plan be submitted by the fourth year of a lease term is proposed to be deleted. This requirement was originally included to promote exploration diligence. Lessees are fully aware that the failure to explore, discover, and produce by the end of the primary term will result in the loss of a lease and that the Exploration Plans must be submitted early enough to allow time for MMS review. The specific requirement to submit a plan by the fourth year, we believe, is an unnecessary intervention in a lessee's management of its lease.

(i) *Pipelines and Pipeline Rights-of-Way.* Requirements regarding pipelines on a lease would be combined with those regarding rights-of-way for pipelines to shore, currently covered in the leasing regulations in 30 CFR Part 256, Outer Continental Shelf Minerals and Rights-of-Way Management, General.

Background

Executive Order (E.O.) 12291, February 17, 1981, requires Agencies to "initiate reviews of currently effective rules in accordance with the purposes of the Order. . . ." One of the stated purposes of the Order is to reduce the burdens of existing regulations. Since the issuance of E.O. 12291, MMS has been reviewing and revising its rules governing operations on the OCS on an individual subject matter basis.

These revisions have included the following rules: Rescission of affirmative action plan requirements, 47 FR 45951, September 16, 1981; Deletion of requirements to segregate unitized leases, 47 FR 6620, February 16, 1982; Extension of submission deadline for deep stratigraphic test well data and information, 47 FR 15781, April 13, 1982; Deletion of failure and inventory reporting system, 47 FR 18682, April 30, 1982; Reimbursement for copying geological and geophysical data and information, and processing geophysical information, 47 FR 25330, June 11, 1982; Updating of safety equipment required in a hydrogen sulfide environment, 47 FR 28888, July 1, 1982; Provision for suspension of operation when delay results from governmental inaction, 47 FR 30055, July 12, 1982; Rescission of variable net profit and work commitment bidding systems, 48 FR 24873, June 3, 1983; Change status report on prelease permits from weekly to monthly, 48 FR 37967, August 22, 1983; Deletion of requirement of immediate notice of reprocessing geophysical information, 48 FR 46025, October 11, 1983; Reduction of information required prior to deep stratigraphic tests, 48 FR 54007, November 30, 1983; Streamlining of requirements for submission of environmental reports, 48 FR 55455, December 13, 1983: Deletion of requirement to submit Development and Production Plans in the western Gulf of Mexico, 48 FR 55565, December 14, 1983; and Revision of the marking of equipment requirements, 49 FR 1897, January 16, 1984.

On February 22, 1983, the Secretary asked the public for suggestions and recommendations on further reform of the DOI rules, including the offshore operating rules. In response to that request, numerous comments, recommendations, and suggestions were received from the public, especially from the offshore oil and gas industry.

During the summer of 1983, the Director of MMS appointed a Regulatory Reform Task Force of senior personnel from headquarters, regional, and district offices to examine all of the recommendations received from the public and to look at the entire structure of rules governing offshore lease operations, particularly 30 CFR Part 250, Oil and Gas and Sulphur Operations in the Outer Continental Shelf, the OCS Orders (including standards and other documents incorporated by reference), and appropriate NTL's. The Task Force reviewed the various rules and related documents with the view toward consolidating the multitiered structure into a single document. The proposed rules would merge the various operating requirements now found in regulations, OCS Orders, and other documents into a single set of requirements to be codified at 30 CFR Part 250. New internal guidelines and procedures have been established for NTL's to assure that their continued purpose would be to transmit administrative information and disseminate interpretations to lessees.

Performance Standards

The proposed rules would also introduce more performance standards, to the extent practicable, while eliminating those requirements which experience has shown to be needless, excessive to their purpose, or counterproductive in that the harm or costs associated with them outweigh the intended benefit or savings. An effort was made to restate the rules in simple, straightforward language.

The performance standards would generally identify safe and pollution-free (no discharges or emissions contrary to established standards) operations as a minimum requirement. These proposed performance standards are usually associated with more specific design or engineering requirements. The performance requirements would identify the purpose to be achieved by the more specific requirements. If a lessee complies with the specific requirements, it would be presumed that the performance standard would be

VOL 51
ISS 52
MR 18
1986
UMI

achieved. If the lessee can show that something other than compliance with the specific requirements would achieve the performance standard (see discussion below of § 250.3, Performance requirements), MMS could approve the lessee's employment of alternatives to the specific requirements. In those instances, the burden would be on the lessee to demonstrate that the performance standard would be met or exceeded.

Fundamental to this proposed revision of the offshore operating rules is the requirement that the necessary margin of safety for the protection of life, property, environment, and natural resources be maintained. This proposed revision and reform of the operating rules to eliminate unnecessary burdens and excessive and counterproductive requirements is not intended to be achieved at the cost of increased hazards to safety, natural resources or the environment.

Current Rules

The current offshore operating rules are contained in regulations, OCS Orders, standards, NTL's, conditions of approval, and related documents. The regulations at 30 CFR Part 250 were the subject of major revisions following the enactment of amendments to the OCS Lands Act (Act) in 1978. They are rules of general applicability often stated in general policy terms. The OCS Orders are rules of general applicability, adopted in compliance with rulemaking requirements, published in the **Federal Register**, but not codified in the Code of Federal Regulations. The OCS Orders were adopted on a Region-specific basis with separate sets of Orders for the Alaska, Atlantic, Gulf of Mexico, and Pacific OCS Regions. The Orders implement provisions in the regulations in more specific detail—often in terms of particular technical requirements. The requirements are essentially consistent in each of the Regions with variations to accommodate local environmental conditions, e.g., severe arctic weather in portions of the Alaska OCS Region. Standards are documents incorporated by reference into the Orders, thereby becoming requirements. These include statements of recommended practices adopted by industry and trade associations, such as API, or professional standards organizations, such as ANSI, as well as those drafted within MMS itself. The NTL's were intended to inform lessees of MMS's interpretations of its requirements but were not intended to impose new requirements themselves. However, such notices as well as documents reciting conditions of approval for various required approvals at times went beyond the realm of clarification or interpretation to impose new requirements.

The growth of multiple levels of rules, interpretations, and requirements incorporated from other documents tended to confuse industry, the Government, and the public in their understanding of offshore operating rules. In this proposed restructuring and consolidation of rules into a new 30 CFR Part 250, we are attempting to eliminate any inconsistency and redundancy in the current rules. We are proposing to narrow or eliminate references to incorporated material found to be excessive and also restate certain requirements found in NTL's and other documents which we believe have merit.

The MMS recognizes that the proposed reorganization of the offshore operating rules will necessitate an effort on the part of industry and the government to become acquainted with the new organization. This may entail some initial difficulty. However, MMS is of the view that long-term benefits of a consolidated, consistent, and comprehensive presentation of those rules far outweigh the initial inconvenience.

In many cases, the requirements ano procedures will be recognized to be identical with the current requirements and procedures. Therefore, the MMS believes that the proposed rules will be readily understood by those already familar with the current rules (regulations, OCS Orders, and NTLs).

Part 256 of Title 30 of the Code of Federal Regulations, Outer Continental Shelf Minerals and Rights-of-Way Management, General, is also proposed for revision.

Pursuant to the National Environmental Policy Act and the requirements of the DOI, the proposed rules are being analyzed to determine whether they would have significant effects on the human environment. An environmental assessment will be prepared and included in the administrative record of the rulemaking.

Specific Proposed Changes

The following represents the specific changes proposed to be made. References to OCS Orders are to the Gulf of Mexico OCS Orders, unless otherwise specified. A derivation table relating proposed new sections to current rule designations is included at the conclusion of this preamble. Editorial clarifications, eliminations of redundancy, and reformatting are not intended to effect substantive changes.

Subpart A—General

Section 250.0, Authority for information collection, is proposed to be retained. This section would report the status of information collection clearances by the Office of Management and Budget (OMB) concerning information collection requirements contained in this part. It would comply with OMB and **Federal Register** requirements under the Paperwork Reduction Act, 44 U.S.C. 35.

Proposed § 250.1, Documents incorporated by reference, would be added in accordance with the requirements of the Office of the Federal Register regulations contained in 1 CFR Part 51, Incorporation by reference. The introductory paragraph is self explanatory. It should be noted that certain of the documents incorporated by reference are published by nongovernmental entities as "Recommended Practices." Compliance with such recommended practices, procedures, and equipment become mandatory when incorporated by reference in this part.

Current § 250.1, Purpose and authority, is proposed to be deleted as an unnecessary recitation of statutory authority.

Section 250.2, Definitions is proposed to be revised to eliminate those definitions that are not believed to be essential for an understanding of the regulations in Part 250.

Definitions which are relevant only to a particular subpart or section would be provided in the subpart or section, as appropriate. For example, definitions of "Party," "Unit agreement," "Unit area," and "Unitized substances" are proposed to be deleted from § 250.2 as those terms would be dealt with in the context of the subparts on investigations, remedies and penalties, and on unit agreements.

Definitions of "Regional Director," "Regional Supervisor," and "District Supervisor" are proposed to be added. In that regard, it should be noted that we are proposing to name the appropriate MMS officer, e.g., the Regional Supervisor, the District Supervisor, or the Regional Director, as appropriate, to the context of the particular section involved. This would differ from the current regulations which consistently refer to the Director, necessitating reference to a delegation of authority document to ascertain the appropriate MMS official with authority or responsibility for specific provisions in the regulations.

A new § 250.3, Performance requirements, is proposed to be added to authorize the use of new or alternative

techniques, procedures, equipment, or activities other than those prescribed in the regulations of Part 250 if such new or alternative techniques, procedures, equipment, or activities would provide a degree of protection, safety, or performance equal to or better than that to be achieved by any particular provision in the regulations.

The requirements in these regulations would not exist for their own sake but are intended to achieve the beneficial purposes identified in the Act—the protection of life, property, and the environment, and the efficient production of our offshore resources. It is the achievement of those beneficial purposes, rather than adherence to any particular operating procedures, which we intend to pursue. We recognize that those beneficial, statutorily defined purposes might be better or equally achieved through practices other than those prescribed in these regulations. We believe this is especially important in a field such as offshore oil and gas operations where new and innovative technology and procedures are continually developing. We would hope that our proposed operating regulations would serve as an encouragement to new, better, and more efficient practices. We invite industry representatives to indicate whether performance standards present a welcome opportunity for efficiencies and innovations.

This policy should not be understood as opening the door to every alternative practice. Only those new or alternative practices which are found to achieve equal or superior results to those required in the regulations would be authorized. We do not expect that this would be an easy or pro-forma determination since the minimum requirements in our proposed regulations are adopted as the best available and safest technology practicable in the offshore oil and gas industry today as required by the Act.

Proposed § 250.3(b) is a restatement of current § 250.11(b). It would provide for departures from the requirements of this part as may be necessary under specific circumstances. These departures, whether required by the Regional or District Supervisor or requested by the lessee, would be dictated by the circumstances of the particular case.

Current § 250.4, Privileged and proprietary data and information to be available to affected States, is proposed to be deleted as it is redundant with 30 CFR 256.25, Areas near Coastal States. The provision is more appropriate in Part 256 which governs leasing than in Part 250 which governs operations.

Current § 250.5, Effect of regulations on provisions of section 6 leases, is proposed to be deleted as it is redundant with 30 CFR 256.79, Effect of regulations on lease. The provision is more appropriate in Part 256 which governs leasing than in Part 250 which governs operations.

Proposed § 250.4, Jurisdiction, and § 250.5, Functions, are proposed to replace and amend §§ 250.10 and 250.11, respectively, to eliminate references to OCS Orders since appropriate requirements of those Orders are proposed to be merged into this part. The OCS Orders would not exist as separate rules. References to royalty management functions are also proposed to be eliminated as those functions are now addressed in Subchapter A of Chapter II of 30 CFR.

Proposed § 250.6, Oral approvals would replace § 250.13 and indicate that oral approvals (to be later confirmed in writing) may be made by the appropriate MMS official from whom approval is required.

Proposed § 250.7, Right of use and easement, is proposed to revise § 250.18 to clarify the rule and remove unnecessary language.

The lease agreement executed between MMS and the lessee gives the lessee the exclusive right and privilege to drill for, develop, and produce oil and gas resources within the leased area. In addition, other rights are granted including the right to conduct certain operations on the leased area leading to the full enjoyment of the lease. (Proposed Subpart J, Pipelines and Pipeline Rights-of-Way, deals with rights-of-way for oil and gas pipelines for transportation of oil and gas off the lease.) Under certain circumstances, a lessee might have a legitimate reason to conduct operations such as construction of a platform on lands off a lease or to conduct operations on a lease which are not granted in the lease agreement or in proposed Subpart J. The granting of a right of use and easement in accordance with the proposed rule would provide for these circumstances.

Revisions are intended to clarify that a right of use and easement may be granted if a structure would be used for conducting exploration, development, or production activities or if an operation would be related to such activities. A right of use and easement may be on or off a lessee's lease.

A new paragraph would require that the holder of a right of use and easement comply with all rules which are applicable to a lessee. This is the intent of the existing rule although it recites only the requirements for use of best available and safest technology and requirements for disposition of equipment after use. The MMS believes that the proposed amendment would more clearly define the responsibilities of a holder of right of use and easement.

Proposed § 250.8, Designation of operator, and § 250.9, Local agent, would replace §§ 250.31 and 250.32, respectively. The District Supervisor would be substituted for the Director in § 250.8, and the Regional Supervisor would be substituted for the Director in § 250.9.

Proposed § 250.10, Suspension of operations, and § 250.12, Cancellation of leases, would incorporate the provisions of current § 250.12 governing suspension of operations.

Under current policy, a suspension of operations requested by a lessee which extends a lease beyond its primary term is not available unless the lease contains a well determined to be producible in paying quantities. A request for such determination under current OCS Order No. 4, Determination of Well Producibility, must be made within 60 days from the removal of a rig from the well. Under the proposed § 250.11, Determination of well producibility, such request could be made whenever the lessee wishes. We expect this change would reduce the number of applications for determinations of producibility and the associated administrative costs. Under the proposed rule, it would not be necessary to obtain a determination of producibility for each well. Further, a lessee need not obtain such determination if the lease has production in the primary term. However, we are requesting comments as to whether this proposal should become final, the requirement remain as it currently stands, or an alternative be used such as requiring at least one determination per lease for every lease that is not in production by the end of its primary term.

Proposed § 250.12, Cancellation of leases, would essentially repeat the provisions concerning lease cancellation in § 250.12.

Proposed § 250.13, Effect of production, drilling, or well reworking on lease term, would replace § 250.35 and authorize the extension of a lease based upon operations other than production, drilling, or well reworking for periods of up to 180 days. Such an extension would be conditioned upon a determination that it would be in the national interest. We believe that the Director should have the discretion to approve operations other than producing, drilling, or well reworking for

VOL 51
ISS 52
MR 18
1986
UMI

periods up to 180 days to allow proper exploration and development of leases in certain frontier areas or in other circumstances where producing, drilling, or well reworking every 90 days would not serve a useful purpose and where the Director determines that prompt and appropriate exploration and/or development is underway.

Proposed § 250.14, Reinjection and subsurface storage of gas, would replace § 250.53 but would be modified in the following manner:

(1) The section would differentiate reinjection of gas for conservation purposes and subsurface storage of gas for later commercial benefits.

(2) Only the subsurface storage of gas, rather than oil and gas, would be addressed. In our experience, we need provide only for subsurface storage of gas on the OCS.

(3) Specific criteria would be identified as providing the basis for reinjection, i.e., for enhanced recovery projects to prevent the flaring of casinghead gas and for other conservation reasons.

(4) Clarification would be provided as to the availability of both on-lease and off-lease storage.

(5) Timing of royalty payments would be clarified.

Proposed § 250.15, Identification, would repeat the requirements of current § 250.37, and parts of current OCS Order No. 1 as revised on January 16, 1984, 49 FR 1897.

Proposed § 250.16, Reimbursement, would amend current § 250.56 which provides for reimbursement of lessees for the cost of reproducing geological and geophysical (G&G) data and information as well as certain processing costs to clarify that such reimbursement would be authorized whether the MMS retains the information required to be submitted or not.

Proposed § 250.17, Information and forms, relating to reports made by lessees would replace § 250.90 and add a paragraph (b) to require the submission of a "Public Information" copy of each required report. The "Public Information" copy would be available to the public and would exclude protected proprietary information. This is a restatement of a portion of current OCS Order No. 12.

Proposed § 250.18, Data and information to be made available to the public, would govern the release to the public of G&G data and information submitted by lessees, and would replace and amend § 250.3 as follows:

- The regulation would be clarified to indicate that the terms of protection it provides would apply to all G&G data and information, whenever submitted (either before the effective date of the regulation or thereafter).
- Processed geological information—a new category of information—would be protected to the same extent as analysed geological information.

It should be noted that MMS is amending its rules in 30 CFR Part 251 to eliminate reimbursement of permittees for costs of processing and reprocessing data and information in a form and manner used by the permittee in the normal conduct of business. This conforms with provisions in Pub. L. 99-190.

Paragraph 250.18(c) would restate pertinent portions of OCS Order No. 12, Public Inspection of Records, to indicate those specific entries required on MMS forms that are considered to fall within the class of G&G data and information which would be protected from public disclosure in accordance with the terms of § 250.18 or would otherwise be considered privileged information protected from disclosure (e.g., trade secrets, commercial information). The items are not intended to be a comprehensive identification of all G&G data and information protected from release to the public under proposed § 250.18, or otherwise protected as proprietary, but as an identification of the most frequently recurring instances where such data and information would be required on MMS forms.

Proposed § 250.18 would also clarify the status of information resulting from directional surveys for wells drilled in close proximity to a lease line. If the adjacent off-lease area is leased, the data and information may be required to be shared with the adjacent lessee but not with the public. If the adjacent off-lease area is unleased, the data and information obtained from the unleased land would be available to the public.

The determination of producibility pursuant to proposed § 250.11 would continue to be available to the public without the consent of the lessee. Such determinations are made not by the lessees but by MMS. This proposed restatement of a portion of OCS Order No. 12 is not intended to effect a substantive change.

Proposed § 250.19, Accident reports, would replace, retitle, and simplify § 250.45. The proposal would clarify the present requirements for reporting blowouts and explosions as well as the official to whom the report would be submitted. In addition, the current § 250.45(b) with respect to the reporting of "unusual conditions" is proposed to be deleted as a vague, unnecessary, and burdensome requirement. The proposal would also clarify that the owner of an easement, right-of-way, or permit would also be required to report accidents occurring in these events. Requirements for written reports are proposed to be eliminated. The MMS will obtain copies of accident reports from the U.S. Coast Guard in those instances where reporting is required under Coast Guard rules.

Proposed § 250.20, Safe and workmanlike operations, would replace § 250.46 without change.

Proposed § 250.21, Access to facilities, would incorporate the provisions of current § 250.19. This section, rather than addressing only lessees, has been expanded to include right-of-way holders, easement holders, and permit holders.

Current § 250.92, Sundry notices and reports on wells, is proposed to be deleted. Reporting requirements including Form No. MMS-331, Sundry Notices and Reports on Wells, would be reflected in the sections relating to drilling, production, and site abandonment, well-completion, or well-workover operations, as appropriate.

Current § 250.93, Monthly report of operations, is proposed to be deleted. The production information for each well now provided by this report will be reported to Royalty Management under the production Accounting and Auditing System.

Current § 250.96, Special forms or reports, is proposed to be deleted as unnecessary.

Subpart B—Exploration and Development and Production Plans

The current rules at § 250.17, Well spacing, and § 250.34, Exploration, development, and production activities, are proposed for revision as Subpart B, Exploration and Development and Production Plans, to combine reporting requirements, eliminate redundant and unnecessary requirements, eliminate descriptions of certain procedures internal to MMS, incorporate some provisions from the current OCS Orders and NTL's and simplify format and language.

The requirements of the Exploration Plan or the Development and Production Plan and the attendant ER's will be combined to strengthen the presentation and eliminate the submittal of redundant information. Information need not be repeated in separate sections of the document. Lessees would be encouraged to organize the document to facilitate the identification of each item of information required by this subpart. Including information in the plans in the same sequence in which it is required in this subpart would greatly

increase MMS's ability to promptly review and process such plans.

The procedures would continue to require the submittal of the environmental information presently included in ER's. Such information alerts the lessee of the possible environmental effects of the proposed actions so that any necessary mitigating measures can be included in the plan and provided to the affected States for CZM consistency determinations (pursuant to 15 CFR 930.77(a)) and used by MMS to expeditiously complete its responsibilities under the National Environmental Policy Act (NEPA). The Regional Director would be able to authorize lessees to jointly submit environmental information for leases in the same planning area that are covered by more than one Exploration Plan but have similar environmental conditions. This could significantly reduce the duplication prevalent in Exploration Plans, particularly in frontier areas.

After operational and environmental data have been gathered for an offshore area, the Regional Director could, after consultation with the affected States, limit the amount of information required to be submitted. This authority would permit the Regional Director to limit the content of plans to a minimum of information necessary for the MMS and the affected States to conduct their reviews. Such reductions should result in savings for lessees submitting plans describing proposed activities in established offshore areas and should facilitate MMS and coastal State review. This authority would be in addition to the current exemption from the requirement to submit Development and Production Plans for leases in the western Gulf of Mexico and would be applicable to all offshore areas.

The definition of preliminary activities is proposed to be modified to include seabed penetrations of up to 500 feet. The present rule is limited to 300 feet of unconsolidated formations or 50 feet of consolidated formations. This has proven confusing for both the MMS and the lessees. This change would simplify the requirement. The section would also be reformatted to clarify that the definition applies to activities conducted prior to submittal of both Exploration Plans and Development and Production Plans. The present language is unclear as to the status of such activities as soil borings conducted prior to development. As a result, lessees often file special plans to obtain approval for such activities. The 500-foot limit would be deep enough to exclude most soil borings from the Plan-approval process but shallow enough to assure that significant hydrocarbon accumulations would not be encountered (or would have been previously identified). Under certain unusual logistical and environmental problems, particularly related to arctic operations, the Regional Supervisor may require certain information to make a determination that preliminary activities excluded from plans would not result in any significant adverse environmental effects.

A specific deadline for submittal of an Exploration Plan would be deleted. Lessees have often submitted plans prematurely to fulfill the regulatory filing requirements. This has resulted in unnecessary efforts by lessees, MMS, affected States, and other reviewers. Lessees are aware of the statutory requirements that must be met to keep a lease. It would be the lessee's responsibility to submit a plan in sufficient time for approval of those activities necessary to keep a lease.

Unless considered necessary for explanatory purposes or to assure compliance with the Act, language related to some internal MMS procedures would be deleted. Such language is not necessary and has made it difficult to locate and excerpt those portions that constitute lessee requirements.

In Exploration Plans, lessees would be required to describe the type of mobile drilling unit, platform, or artificial island to be used rather than provide a description of the specific rig. State CZM consistency review and other considerations often dictate that lessees submit Exploration Plans well in advance of the proposed drilling operation. As it may be imprudent, if not impossible to commit to a specific rig contract at such an early date, lessees often describe rigs which may or may not be used, and they must later revise the plan to provide information on the actual rig. Under the proposed language, the lessee would need only to indicate the type of unit (e.g., jack-up or semisubmersible) and describe the characteristics of such a unit. Alternatively, the lessee could reference information already on file for a similar unit. The unit itself could then be specified in the APD. If there is no difference in the type or performance capabilities of the unit, the plan would not need to be revised.

Lessees would be required to submit only that information related to the proposed changes to modify or revise a plan. Under the present language, lessees often resubmitted the entire plan. This has resulted in unnecessary duplication of effort for industry and Government.

Lessees would no longer be required to identify those portions of plans considered to be proprietary. The release of data and information submitted with plans would be restricted in accordance with the provisions of § 250.18. Lessees would continue to be free to identify that data which they consider exempt from disclosure; however, such determinations would neither be required nor binding. Lessees would no longer be required to fully describe their Oil Spill Contingency Plans (OSCP) in their plans. Since the OSCP's are already provided to the USCG and the affected States, descriptions of the OSCP in the plans are an unnecessary duplication. The OSCP document itself or reference to an approved or previously submitted OSCP (including regional OSCP's covering leases where activity is proposed) would meet the requirement as part of the Exploration Plan or Development and Production Plan.

The requirement to submit a general statement of development and production intentions in current § 250.34-1(a)(4) with an Exploration Plan is proposed to be deleted. Lessees intending to develop a lease must submit a Development and Production Plan. Indications of such intentions are often given to MMS and the affected States prior to submission of a plan. Therefore, there has been sufficient notice of development and production intentions without requiring a general statement of intentions.

Some of the information requirements related to the effects of onshore activities are proposed to be limited to new or significantly expanded onshore facilities. The number of new employees and families to be added to the local population, increased energy and resource needs, contractors to be employed, and similar information are very important for new or expanded bases in isolated locations. Such information is of little value for established bases in the Gulf of Mexico. In making the determination regarding such facilities, the Regional Supervisor would consider local concerns and regional differences. In some cases, small incremental increases might be significant. For example, although onshore facilities to support Pacific offshore operations are well established, it would still be necessary to provide estimates on increased air emissions from new onshore activities because of regional air quality problems. The MMS and the Office of Management and

VOL
51
ISS
52
MR
18
1986
UMI

Budget (OMB) request comments concerning the need for a provision to enable States to collect information directly from lessees when such information is collected solely for the States.

A requirement is proposed to be added to Development and Production Plans to describe the technology and reservoir engineering practices intended to increase the ultimate recovery of oil and gas. The consideration of secondary and tertiary recovery methods in the early stages of lease development can have a significant effect on the feasibility of greater oil and gas recovery. This is becoming more and more important as the use of enhanced oil recovery methods increases and the economic and social value of these activities grow.

Information requirements would be incorporated into this subpart from the OCS Orders and various NTL's. This incorporation would not result in any new information requirements but would consolidate them in one place and eliminate duplication.

Current §§ 250.34–1(j)(2) and 250.34–2(k)(2) excluding revised plans which could result in certain significant changes from further CZM review would be deleted. We propose that such significant changes should not be excluded from CZM review. Furthermore, as no revised plan with significant changes has ever been excluded, we do not anticipate any additional cost or delay as a result of this deletion.

The time provided for the Regional Supervisor to transmit Development and Production Plans to affected States would be reduced from 10 days to 5 days. This would be sufficient time to prepare such documents for transmittal and would help expedite the review process.

Requirements currently in § 250.17, Well spacing, and OCS Order No. 11, Oil and Gas Production Rates, Prevention of Waste, and Protection of Correlative Rights, related to well location and spacing would be incorporated into this subpart because these requirements relate to operational planning decisions. If a proposed well could intersect an offset property, the Regional Supervisor would be authorized to require additional directional control measures to assure that the well does not deviate into the adjacent lease. The Regional Supervisor could also release directional survey data to the adjacent lessee but not to the public. In the case of drainage wells, unitization may be required. If a well deviated into an unleased tract, those portions of the data obtained from beneath the unleased tract would be subject to public release. These measures would be necessary to protect the correlative rights of offset lessees from improper acquisition of geologic data or from hydrocarbon drainage. This would not be a significant change as these measures have frequently been required in the past.

Subpart C—Pollution Prevention and Control

The current OCS Order No. 7, Pollution Prevention and Control, and §§ 250.43, Pollution and waste disposal, and 250.57, Air quality, would be combined into Subpart C, Pollution Prevention and Control. The requirements of § 250.54, Marking of equipment, and parts of OCS Order No. 1, Identification of Wells, Platforms, Structures, Mobile Drilling Units, and Subsea Objects, as they relate to marking of equipment, are proposed to be merged in Subpart C as well. Only slight editorial changes and some reformatting are proposed to be made to current § 250.43 for clarification and simplification. The following changes to current requirements are proposed:

Requirements for environmental information on drilling mud components would be covered in proposed Subpart B, Exploration and Development and Production Plans. Under the current requirements, such information on drilling fluid components is often redundant in the plan and the APD. Environmental information would only continue to be required with the Exploration Plan and Development and Production Plans while information on mud weights, reserve barite supplies, and other well-control considerations would be submitted in the APD eliminating any duplication.

Under proposed Subpart C, the District Supervisor would have the authority to restrict the rate of drilling fluid discharges, prescribe alternate discharge methods, and restrict the use of certain components. Such requirements are generally part of the Environmental Protection Agency's National Pollution Discharge Elimination System process, but under special circumstances, it might be necessary for the District Supervisor to exercise such authority.

As a result of studies by the National Research Council, *Drilling Discharges in the Marine Environment*, in particular, the use of petroleum-based additives is proposed to be prohibited without prior approval by the District Supervisor. The District Supervisor would approve the use of petroleum-based additives only to correct serious operational problems and only after alternative corrective actions have failed. Muds containing such additives would have to be collected for disposal at approved onshore sites. The majority of training requirements for the prevention of pollution relate to drilling and production procedures and are addressed in Subparts D, Drilling Operations, and H, Production Safety Systems. However, training of the designated oil spill response operating team and drills to demonstrate familiarization with pollution-control equipment and procedures is included in Subpart C, (§ 250.43). This team constitutes the key personnel involved in containing and removing an oil spill to minimize the environmental impact. The MMS will continue to monitor pollution-prevention programs, focusing on lessee maintenance practices and operational procedures. Lessees and contractors with ineffective pollution-prevention programs would be identified and dealt with under our enforcement program.

The pollution-reporting provisions are proposed to be changed as follows:

a. All oil spills would be required to be reported to MMS, but only spills of 1 barrel or more would require confirmation in writing.

b. Spill-size limits would be defined in barrels instead of cubic meters. As offshore separation and storage equipment is rated in barrels, personnel could better judge amounts in barrels. The level of detailed information would continue to be dependent on the size of the spill.

c. Certain OSCP requirements would be revised to include the specific size of spill that must be planned for and the expected response times. These proposed requirements are based on agreements with the USCG.

No substantive changes are being proposed to the rules concerning air quality (§ 250.57). On June 10, 1983, we proposed a distance-from-shore exemption to these rules (48 FR 26837). The comments received fell into two distinct categories—one feeling the exemption was too broad and the other feeling it was too narrow. Both objected to the background data used to calculate the proposed exemption. Therefore, no changes will be proposed until the results of an air quality modeling study are received.

Subpart D—Drilling Operations

The current rules which pertain to drilling operations at 30 CFR 250.36, 250.38, 250.39, 250.40, 250.41, and 250.92; Alaska, Atlantic, Gulf of Mexico, and Pacific OCS Regions' Orders No. 2; and some provisions from NTL's and from Conditions of Approval are proposed to be merged in Subpart D, §§ 250.50 through 250.68. Unnecessary, excessive, and redundant requirements are removed; incorporation by reference of numerous API and other institutional standards are eliminated; and the requirements are restated as a unified and concise body of rules.

Eight API documents which address casing are removed. Sufficient supervision over the quality and design of casing already exist under the requirements for the APD.

The National Electrical Code (NEC) and the IEEE Recommended Practice for Electric Installation on Shipboard would be removed. The API RP 500B, Classification of Areas for Electrical Installations at Drilling Rigs and Production Facilities on Land and on Marine Fixed and Mobile Platforms, is retained. Those portions of API RP 14F for Design and Installation of Electrical Systems for Offshore Production Platforms, which pertain to drilling rigs, are newly introduced as proposed requirements. The NEC and IEEE documents now incorporated by reference are bulky, vague as to which of their sections are applicable, and difficult to administer for compliance. The API RP 500B and API RP 14F documents cover the essentials for minimum standards of safety without imposing excessive burdens.

The API RP T–1, Orientation Program for Personnel Going Offshore for the First Time, and API Bul. T–5, Employee Motivation Programs for Safety and Prevention of Pollution in Offshore Operations, are proposed for removal. These documents do not lend themselves to appropriate regulatory requirements.

Sections 3–A and 3–B and subsection 5.B.13 in API RP 53, Blowout Prevention Equipment Systems, which address choke manifolds, closing units, and subsea control pods, are proposed to be replaced with more performance oriented standards, eliminating unnecessary requirements.

All of API RP 13B, Standard Procedure for Field Testing Drilling Fluids, is proposed to be replaced with a requirement that drilling fluids be tested in accordance with generally accepted industry practices. The intent is to eliminate unnecessarily specific and detailed procedures. Testing procedures have not proven to be a source of problems, and generally accepted industry practices are sufficiently ascertainable.

The National Fire Protection Association (NFPA) 51B, Cutting and Welding Processes 1977, is proposed to be removed. Proposed § 250.52 would provide the essential precautions and protective measures to be taken. The NFPA Standard is considered redundant.

The existing MMS Standard, MMSS–OCS–1, Safety Requirements for Drilling Operations in a Hydrogen Sulfide Environment, incorporates 10 documents by reference. All of these are proposed to be deleted except the ANSI Z88.2–1980, Practices for Respiratory Protection. The documents proposed to be removed are considered out-of-date, nonessential, and/or redundant to the H_2S rules proposed at § 250.67. The proposed rules would incorporate by reference the National Association of Corrosion Engineers (NACE) Standard MR–01–75, Material Requirement, Sulfide Stress Cracking Resistant Metallic Material for Oil Field Equipment. The proper selection of metals for use in well-control equipment in an H_2S environment is crucial. The NACE Standard, developed with the participation of the petroleum industry, is considered to be an appropriate requirement.

Proposed MMS rules require that certain H_2S personnel protection precautions, such as the installation of monitors, take place when drilling is initiated. These provisions differ from Occupational Safety and Health Administration (OSHA) requirements in that OSHA rules apply when within 1,000 feet of a hydrocarbon bearing zone. Installation of this equipment when drilling reaches a certain depth, as is required by OSHA, is less practical for operations at locations which are offshore and sometimes remote. The proposed rules require that H_2S monitors and detectors be calibrated daily when drilling approaches a potential H_2S-bearing zone and every 8 hours when in an H_2S environment. The MMS welcomes comments on the potential cost savings associated with allowing installation of the H_2S detection and monitoring equipment to take place when drilling reaches a prescribed distance from a potential H_2S-bearing zone. In addition, MMS welcomes comments concerning the proposed frequency of calibration of H_2S monitors. Is the proposed frequency both necessary and sufficient to ensure the accuracy of H_2S monitors?

Statistics from the Gulf of Mexico OCS Region indicate that about one-third of all fires have been caused by engines. Nearly one-half of these engine-caused fires have resulted from diesel engine "runaway" when hydrocarbons enter the air intake of the engine. To mitigate this problem, the proposed rules require that diesel engine air intakes be equipped with an automatic-shutdown device. The requirement concerning diesel engine "runaway" are contained in subparts relating to drilling, well-completions, well-workovers, and production.

The MMS surveys show that the preponderance of drilling rigs are now equipped with a crown-block safety device. The proposed rules require that this device be installed on all drilling rigs. We believe the device has proven its value in practice. The requirement for a crown-block safety device is contained in subparts relating to drilling, well-completions, and well-workovers.

Lessees are presently required by OCS Order No. 2, as supplemented by NTL's for each Region, to conduct geophysical surveys to identify surface or near-surface geologic conditions to be considered in a proposed drilling program.

The proposed rule incorporates such a requirement. However, for sites where predrilling surveys have previously been conducted or which are otherwise well-defined geologically, no surveys will be required. The significant inter- and intra-regional differences in data availability, water depths, seafloor gradients, surface sediments, seismicity, ice conditions, and other natural factors preclude one set of national site-survey requirements. Further, the rapid advances in site-survey technology necessitate continuous updates in the specifications. Therefore, the lessee is asked to submit a survey strategy prior to beginning the field program. If the District Supervisor concurs that the strategy is sufficient to identify potential geologic and manmade constraints, the lessee may proceed with the survey.

This flexibility allows the lessee to determine a survey program independent of rigid grid and instrumentation requirements. We believe prior approval of the survey strategy by MMS is necessary to prevent costly disagreements and possible resurveys after the data has been gathered. However, lessees will be given full opportunity to demonstrate the viability of their strategy. With this approach, the MMS believes lessees will have the incentive to tailor surveys to the region, site, and operation.

The proposed rule articulates that a magnetometer survey and/or soil borings may be required in areas where the competency of the ocean floor to support the load of a jack-up rig is in doubt. The purpose is to add clarity and specificity to existing rules.

The present requirements in OCS Order No. 2 for the filing of a Critical Operations and Curtailment Plan are proposed to be removed. This requirement has resulted in the

VOL 51
ISS 52
MR 18
1986
UMI

preparation of lists of examples of critical operations which are often arbitrary and conjectural. Operators have been pressed into making tentative statements about future courses of action under a hypothetical set of circumstances with little relation to reality. The proposed requirements state that the design and use of unique and unproven drilling units in Alaska may require a third-party review. The purposes of the third-party review are to assure that the drilling unit is capable of operating under the environmental conditions at the site and to establish contingency plans to be followed in the event that operational limitations are reached or exceeded.

Setting-depth ranges specified in the present rules as between 500 and 1,000 feet for the conductor and between 1,500 and 4,500 feet for the surface casing are proposed to be removed. These setting-depth ranges are a source of confusion and unnecessary paper work. A properly engineered design may yield proposed setting depths outside the specified range which triggers a request for a departure. Conversely, setting depths within the specified range may be construed erroneously as prima facie evidence of proper design. Lessees routinely submit with the APD a single sheet containing plots of estimated pore pressures, estimated fracture gradients, proposed mud weights, and proposed casing points. This convention provides the information needed with a minimum of paperwork.

The requirement that the volume of excess cement be approved by the District Supervisor is proposed to be removed. This requirement for specific approval action generates paperwork which has not proven worthwhile. The lessee remains under an obligation to bring cement to the ocean floor, and excess volumes of cement are readily calculable when the geometry of the hole as drilled becomes known or estimable.

The last sentence of paragraph 3.8 in OCS Order No. 2 which reads, "The typical performance data for the particular cement mix used in the well shall be used to determine the time lapse required," is proposed to be removed. "Typical performance data" is a statistic on distribution of values and may or may not be applied properly to an individual well. The results-oriented requirements that the cement in place attain a compressive strength of 500 pounds per square inch (psi) and that inadequate cement jobs be remedied along with the cementing information contained in the APD are considered sufficient. There is no intent to change the objectives or substance of the requirement.

The OCS Order No. 2 requires that the casing be evaluated following prolonged drill-pipe rotation that could cause damage to the casing. The present wording is nondefinitive and unquantified as to the meaning of "prolonged drill pipe rotation." This gives rise to uncertainties about compliance. The proposed wording clarifies the intent by proposing that an evaluation survey be run every 30 days when certain drill-pipe operations are conducted within any casing string run to the surface. We recognize that casing wear is the result of a complex interplay of multiple variables and solicit comments you may have which would serve to further delineate, quantify, and clarify the rule.

The proposed rule revises the language in OCS Order No. 2 to specify the amount of pressure to be applied during pressure testing of the annulus between the liner top and the casing outside the liner top. We recognize that the proposed required test pressures (70 percent of the minimum internal-yield pressure of the larger casing) are a significant change from current requirements and solicit comments with respect to test pressures of a more general applicability and/or where exceptions to the rule as proposed are warranted.

The sentence in paragraph 3.5 in OCS Order No. 2 which reads, "Open-hole and slotted-liner completions are permitted when approved by the District Supervisor," is proposed to be removed as being essentially informational and, as such, unnecessary. No change in the rules is intended.

The OCS Order No. 2 requires that BOP stacks be pressure tested to the anticipated surface pressure. Lessees submit to the MMS the underlying assumptions and the calculations made in arriving at the anticipated surface pressure. Experience shows a wide divergence among lessees in the degree of conservatism in the underlying assumptions and in the methodologies used in the calculation. As such, there are significant variances among lessees in the estimates of anticipated surface pressure. Some of these variances are not explainable by differences in geology or local drilling conditions. This gives rise to requests for resubmittals and further paperwork. We propose that the required-test pressure be changed from anticipated surface pressure to 70 percent of the minimum internal-yield pressure of the casing. We believe that tying the required test pressure to casing-yield pressure provides a more concrete and objective basis, is reasonable, and will reduce paperwork.

The present rules require only actuation tests on the kelly cock, inside preventer, and the drillstring safety valve. The proposed rule requires pressure tests. Pressure seals on these valves deteriorate with time and use. Defective seals are not detectable by actuation tests only.

The proposed rules require that the blind and blind-shear rams in surface and subsea BOP stacks be actuated at least once every 7 days. Since the weekly pressure test is not required for blind and blind-shear rams, we believe it is important that these rams be actuated weekly to assure that control communication exists and that the rams will move. Full closing pressure on these rams is not required. Requirements relating to variable-bore pipe rams have been restated to eliminate needless complexity. The proposed language is more concise. There is no intent to alter the substance of the requirement.

The frequency and costly consequences of shallow-gas blowouts during drilling operations continue to be a source of serious concern to the MMS, industry, and the public. To combat this problem, requirements are proposed which focus primarily on improving diverter hardware reliability by reducing restrictions to flow and lessening causes of line parting and clogging and control instrument failure. The MMS believes that the use of diverters is important for the mitigation of damage once control of a drilling well is lost. Diverters direct well flow away from the drilling rig and allow time for personnel to evacuate the structure. From an examination of a number of diverter-related accidents and near-accidents on the OCS, it is fair to conclude that more injuries, fatalities, and platform and drilling rig losses would have occurred if diverters had not been installed. The MMS also believes that if the minimum size for diverters is increased to 12 inches, fewer losses in rigs, platforms, personnel, and wells will occur. A 12-inch line would provide for a much larger flow area and relieve pressures on the surface equipment and on shallow rock formations which may fracture under pressure and allow flow to the surface outside of the wellbore. We recognize that the proposed new line sizes and maximum number of turns may be debatable and also that the problems of shallow-gas drilling go beyond diverter hardware. Within this context, your recommendations and comments are solicited as to the appropriate design criteria and performance capabilities for a diverter system, as well as your comments on the following issues:

1. Appropriate vent pipe internal diameter, tensile and burst strengths, resistance to erosion, and thrust-load anchoring,

2. The advisability of changing the direction of flow while diverting in response to a change in wind speed and/or direction,

3. Suitability of flexible hose versus rigid vent pipe,

4. Maximum permissible number of and minimum radius of curvature of turns in the vent line(s),

5. Valve and valve actuator types suitable for use,

6. Optimum diverter control panel instrumentation and logic,

7. Protection of diverter system hardware from damage at all times, and

8. Functional reliability inspection and testing methods as well as frequency.

Other issues of a less equipment-specific nature are as follows:

1. Is elimination or abbreviation of MMS requirements appropriate in view of the historical failure rate and the outlook for those systems. What are acceptable means of substitution for coping with shallow-gas flow once control of the well is lost?

2. On balance, would the prohibition of venting from the marine riser into the ocean water serve the best interests of safety and prevention of pollution? Under what conditions, i.e., water depths, casing setting depths, fracture pressures, anticipated composition of the flowing fluids and solids, anticipated flow rates? Would disconnection of the marine riser or the use of dump or flood valves on the marine riser be a better alternative to bringing the flow to the surface? Under what specific conditions would it be best to drill without a marine riser even though it is possible to bring returns to the surface while drilling?

3. Should the requirements for diverters be modified or exempted on the basis of drilling history within a geologic/geographical area?

4. Under what conditions does the drilling of pilot holes provide worthwhile safety benefits?

5. What are the estimated costs and benefits of retrofitting existing rigs and the incremental costs of fitting future rigs as a result of the proposed requirements and as a result of any alternate sets of design criteria and equipment specifications that you may recommend?

In determining its policy on the design and use of diverters, MMS will consider the comments and suggestions in response to the foregoing questions and its own continuing examination of the question, including results of a study being conducted by Louisiana State University under contract with MMS.

Note.—The MMS published an OCS report entitled, Shallow Gas Events, MMS 84–0029, dated July 1984. Copies of this report may be obtained by contacting the Gulf of Mexico OCS Region, Minerals Management Service, Imperial Office Building, 3301 N. Causeway Boulevard, P.O. Box 7944, Metairie, Louisiana 70010.

The OCS Order No. 2 is proposed to be revised to remove the requirement for a tabulation of well depth and minimum mud quantities and the requirement that the District Supervisor approve plans to replenish mud supplies in an emergency. This paperwork and specific approval action by the District Supervisor has proven redundant and unnecessary. Information on availability of resupplies is obtainable from the Exploration Plan, Development and Production Plan, and from the APD. Alaska OCS Order No. 2 contains a requirement that enclosed mud-handling areas be equipped with gas detection, negative pressure, and ventilation equipment. Drilling units working in cold climates winterize (enclose) the mud rooms for the protection of personnel and materials. Gas emanating from gas-cut mud presents a fire and explosion hazard. The proposed rule extends the requirement to all OCS Regions. The intent is to include those drilling units which travel from cold to mild climates or are already located in a mild climate and which elect to maintain enclosed, unventilated mud rooms.

For clarity, a definition of field drilling rules in terms of their purpose and relationship to other drilling rules has been added. Further clarification as to the basis on which a lessee may apply for or the District Supervisor may require establishment of field drilling rules has been added. There is no intent to change the substance of this requirement.

The phrases "As approved by," "As required by" and "As prescribed by the District Supervisor" or "Regional Supervisor," appear without qualification numerous times throughout the existing drilling regulations and OCS Order No. 2. The purpose and condition on which the District Supervisor or Regional Supervisor require specific approval actions and the bases for such actions have been added.

Information collection and recordkeeping requirements are widely scattered in the present rules. The proposed rules consolidate and separate them from the safety requirements.

The proposed rules revise the existing MMS Standard, MMSS–OCS–1, Safety Requirements for Drilling Operations in a Hydrogen Sulfide Environment, which are currently applicable only to drilling operations, to include well-completion, well-workover, and production operations. The presence or potential presence of H_2S poses a hazard in these operations as it does in drilling. The MMS regulates H_2S safety during well-completion, well-workover, and production operations by requiring lessees to submit an H_2S Contingency Plan for approval in the Exploration Plan, Development and Production Plan, and the APD. Experience with this procedure shows that uncertainties and inefficiencies exist because there are no clear guidelines for the lessees' use in preparing the H_2S Contingency Plan. As a result, unnecessary paperwork is generated. The proposed rules provide guidelines and are intended to reduce paperwork. We believe that lessees are essentially in compliance with the proposed rules and that they impose no substantive new burdens.

Fully trained, technically competent personnel are essential for the safe conduct of offshore oil and gas operations. The MMS recognizes a responsibility under the Act to take appropriate measures toward that end. Although our responsibility is clear, there is question as to the measures which may be appropriate.

The MMS's objectives are to assure that the personnel employed by the lessees are trained and qualified, to assure that the standards for these qualifications are appropriate to ensure safety and environmental protection, and to reduce the amount of paperwork to be submitted by the lessee which MMS must review and upon which they must act.

As we reexamine our training requirements and programs, we would appreciate the advice and recommendations of the regulated industry, States, public interest groups, and the public as to the following:

General

1. How can MMS best assure that personnel engaged in oil and gas operations on the OCS are adequately trained?

2. To what extent, if any, should the training be provided by (a) the Federal Government, (b) OCS lessees, (c) State educational and training institutions, or (d) private training schools?

3. How should MMS assure itself that the training provided is adequate.

4. Should performance standards for job categories be established by MMS, by industry, or by others.

VOL
51
ISS
52
MR
18
1986
UMI

5. Should MMS prescribe training criteria.

6. To what extent, if any, should on-the-job training be a part of MMS training requirements?

7. Should MMS training requirements call for periodic retraining or "refresher" training?

8. What is the appropriate training role for lessees, for oil and gas industry trade associations, and for others?

9. Have the current MMS training requirements provided satisfactory results?

10. Should MMS adopt a training program different from its current program? If so, what should it be, how would it be an improvement over the current program, and what are the cost implications of any recommended changes?

11. What are practical alternatives to the present MMS program for school certification, periodic recertification, and on-site evaluations that would maintain the standards of training?

12. Might such alternatives include an approach in which the MMS would require access to appropriate records at the field site and make periodic on-site evaluations of training facilities to determine compliance and take such corrective actions as warranted?

MMSS-OCS-T 1, Training and Qualifications of Personnel in Well-Control Equipment and Techniques for Drilling on Offshore Locations

The MMS promulgated in 1977 and revised in 1982 a training standard for certain categories of personnel engaged in offshore drilling operations. The currently effective standard is published at § 250.68 in these proposed rules. While not proposing specific changes in its existing drilling training requirements at this time, MMS is searching for ways to improve the program, reduce paperwork, and increase cost effectiveness.

We believe that the current MMS training program is basically sound in concept, except as follows:

1. How can the present program be improved, administrative procedures be simplified, and costs be reduced?

2. Is the curriculum too broad or too detailed?

3. Are there too many or too few job classifications?

4. Are there sufficient distinctions as to training requirements for each classification? What should the classifications be and how should the training requirements differ for each classification?

5. Would refresher-course training less often than once a year suffice? Should refresher-course training be required more frequently than once a year for certain activities? Should refresher-course training be placed on a graduated scale so that the longer a person is active on the job, the farther apart the required refresher training?

6. Should "hands-on" training be expanded?

7. Should MMS oversight of certified training institutions be expanded or reduced?

Training and Qualifications for Personnel in Well-Control Equipment and Techniques for Well-Completion and Workover Operations on Offshore Locations

The MMS (then the U.S. Geological Survey) published in the **Federal Register**, on February 8, 1979 (44 FR 8029), a Notice of Intent to develop a training standard for personnel engaged in well-completion and workover operations. In general, the comments received in 1979 (1) suggest that the standard follow the basic format used in GSS-OCS-T 1 (MMSS-OCS-T 1), and (2) urge the participation of industry in the development of the standard and its implementation.

In light of the concerns about training for these personnel, MMS is considering the develoment and adoption of training standards applicable to well-completion and workover operations. We are especially interested in your response to the following:

1. How should MMS establish training standards for well-completion and workover operations, and what should these standards include?

2. What are appropriate job classifications for such standards?

3. What should be the relationship between drilling and well-completion and workover standards and training?

4. Should refresher courses be required, and if so, how often?

5. What should be the implementation schedule for such a training requirement?

Training and Qualifications of Personnel in Well- and Process-Control Equipment and Techniques for Production Operations on Offshore Locations

Paragraph 5.7 in currently effective OCS Order No. 5 requires that personnel engaged in installing, inspecting, testing, and maintaining safety devices be qualified under a program as recommended by API RP T-2 for Qualification Programs for Offshore Production Personnel Who Work with Anti-Pollution Safety Devices. Administratively, lessees submit an application to MMS for approval which describes the training to be conducted and the methods the lessee will utilize. After approval, lessees are required to maintain records of all qualified personnel in the field area. Experience with the program shows that uncertainty and inefficiencies exist primarily because there are no clear, written guidelines as to which employees should receive training and the lack of definition of a particular standard curriculum to match each particular job classification's duties and responsibilities. To resolve this problem, MMS is considering development of a training standard for personnel engaged in production operations.

The format of such a standard would be similar to that of MMSS-0CS-T 1 and would attempt to include the strengths and correct the deficiencies of API RP T-2 in an MMS document.

In addition to any general comments you may have, we would like your response to the following:

1. To strengthen the standard, should job classifications be added, and if so, which ones?

2. What training should be specified for each job classification?

3. Should refresher courses be required, and if so, how often and what should be their content?

4. How should MMS properly recognize individuals trained under currently approved programs?

5. What is an appropriate timetable for development and implementation of such a training requirement?

Subpart E—Well-Completion Operations and

Subpart F—Well-Workover Operations

The proposed revisions to the requirements in Subpart E, Well-Completion Operations, and Subpart F, Well-Workover Operations, presently contained in § 250.92 and OCS Order No. 6 regarding well-completion and well-workover operations, are intended to reflect experience in the field and advances in available technology. Well-completion and well-workover operations are a significant portion of oil and gas operations and involve a number of critical and dangerous tasks. A significant number of the blowouts on the OCS have occurred during well-completion and well-workover operations. However, there are few MMS requirements governing those operations. Despite advances in technology and an accumulation of operational experience, current requirements have not been revised in more than a decade. Considerations of good practice prompted most lessees to guide their well-completion and well-workover operations on the basis of

---

other regulatory provisions such as current OCS Order No. 2, Drilling Operations, and Order No. 5, Production Safety Systems. We believe that both lessees and the MMS should have a clear understanding of the minimum requirements and safeguards needed for well-completion and well-workover operations. We are proposing requirements written specifically for such operations.

On July 27, 1983, MMS published in the **Federal Register** (48 FR 34063) a proposed revision to current OCS Order No. 6 concerning well completion and well-workover operations. Numerous comments were received in response to the Notice, and many oral comments were presented at a public meeting held on September 13, 1983.

Many commenters suggested that the proposed requirements were too detailed and should be replaced by "performance type" rules. In this proposal, we have attempted to define requirements in terms of performance to the extent we believe practicable. Specific engineering and design requirements are associated with those proposed performance standards. However, lessees would be free to use approved alternatives to those specific requirements if the performance standard would be met. (See discussion of § 250.3.).

Some commenters suggested that specific requirements for subsea completions and workovers should not be included since the technology is undergoing rapid development. It was suggested that specific requirements might stifle technological and equipment development. Because it is our intention to promote safety while encouraging innovation and improved technology, we are proposing for the foreseeable future that the District Supervisor approve subsea completions on a case-by-case basis (§§ 250.75 and 250.95).

Several commenters felt that the 1983 proposed rules involved too many detailed recordkeeping and reporting requirements. We have reexamined those requirements and are now proposing minimized recordkeeping and reporting burden on lessees.

Several commenters objected to the incorporation by reference of lengthy documents without identifying specific applicable sections. We agree with those comments. Commenters also objected to the incorporation by reference of documents developed by industry as recommended practices. We recognize that some recommended practices developed by industry are not suitable as Federal requirements, and those are not included in the proposal.

Several commenters felt that a number of operations should be considered routine, obviating the need for notice and approval. The MMS has reviewed the hazards associated with various types of well-workover operations, and we are proposing that a number of additional operations be considered routine and need not be preceded by notice, MMS approval, or after-the-fact reporting (§ 250.41). However, these routine operations shall be conducted in accordance with all other appropriate requirements of the regulations.

Some commenters felt that the earlier proposed requirements for surface safety valves (SSV) were too detailed and required too much recordkeeping. We are now proposing that the SSV requirements for well-completion and well-workover operations parallel those applicable to production operations.

Based on field experience, the responses from the public to our 1983 proposal concerning well-completion and well-workover operations, and our further analysis of the issues, a new set of requirements in a different structure are now being proposed. The requirements have been organized into two subparts, i.e., well-completion operations, and well-workover operations. Although this organization of the regulations results in some redundancy, we believe this will facilitate use of the regulations in field operations. However, for purposes of discussing the requirements, the following comments in many cases address both subparts.

A number of provisions included in our 1983 proposal are not included in this proposed rulemaking. We agree with the comments and suggestions of many of the commenters and have deleted a number of those detailed requirements, i.e., (1) storage and conveyance of flammable liquids, (2) certain pumping and testing safeguards, (3) requirements for drill-stem testing, and (4) verification of valve closure for wireline operations. The proposed general performance requirements that are discussed later would require safe operations with regard to these items. Possible future requirements for well-completion and well-workover training that are discussed in Subpart D, Drilling Operations, would provide additional safeguards.

Performance standards have been proposed to more clearly identify the regulatory objective of the subparts regarding well-completion and well-workover operations and subordinate sections, e.g., §§ 250.70, 250.85, 250.86, 250.88, 250.90, 250.105, 250.106, and 250.108. Such performance standards focus on the objective to be attained. While the performance standards do not specify the means to be used, they require that the means shall be compatible to whatever conditions or circumstances may exist, e.g., subfreezing conditions, storms or waves, and age of equipment. They further require that the equipment is maintained and is operable, that the crews are adequately trained, and that operating and maintenance tools and supplies are readily available so that the objective can be attained. We believe these performance standards will better accomplish the regulatory purpose than a large number of detailed requirements.

Sections 250.71 and 250.91 define well-completion operations and well-workover operations. The definition of well-completion operations, in part, distinguishes those operations from drilling operations.

Section 250.91 also distinguishes between routine and nonroutine well-workover operations.

Routine operations would be excluded from the advance notice and approval and reporting requirements associated with other operations. They are not excluded from compliance with other requirements. This would reduce recordkeeping and reporting requirements.

Requirements are proposed in §§ 250.72 and 250.92 concerning movement of rigs and equipment onto wells for well-completion and well-workover operations. We believe that the possibility of accidents resulting from such movements justify precautions and redundant securing of the wells.

A requirement is proposed in §§ 250.73 and 250.93 that an Emergency Shutdown (ESD) System to provide a rapid means of shutting in an entire platform in the event of an emergency be required when well-completion or well-workover operations are conducted on a platform. We believe an ESD System is a prudent and necessary system to minimize the threat of pollution during well-completion and well-workover operations. In the event of an emergency, the ESD would reduce the risk to wells, personnel, and production equipment on the platform.

A requirement has been proposed in §§ 250.74 and 250.94 to require special precautions when a well-completion or well-workover operation is conducted on a well in zones known to contain H_2S or in zones where the presence of H_2S is unknown. These zones and necessary requirements are spelled out in § 250.67. The danger of H_2S to the crews and equipment is such that we believe

VOL
51
ISS
52
MR
18
1986
UMI

special requirements are appropriate during well-completion and well-workover operations.

It is proposed in §§ 250.75 and 250.95 that subsea well-completion and well-workover operations be subject to approval by the District Supervisor on a case-by-case basis. Our experience is yet insufficient to set out standard requirements as was proposed in the 1983 Notice of Proposed Rulemaking concerning revision of current OCS Order No. 6. A case-by-case review and approval at this time would provide necessary flexibility and assurance of safety.

A requirement for crew instructions is proposed in §§ 250.76 and 250.96. We believe properly informed and trained personnel are necessary for assuring safe well-completion and well-workover operations, and we are proposing that instruction of the involved personnel should occur before the operations begin. Thereafter, the timing and format of subsequent instruction, e.g., periodic meetings, would be best left to the lessee's judgment. Recordkeeping burdens would be reduced from the 1983 proposal to what we believe would be the minimum necessary to monitor the occurrence of these important meetings.

It is proposed in §§ 250.77, 250.78, 250.97 and 250.98 that well-completion and well-workover operations adhere to appropriate requirements of welding and burning practices and procedures (§ 250.52) and electrical requirements (§ 250.53). We believe these requirements to be prudent. They will contribute to the safety of operations, and they should be followed in well-completion and well-workover operations as well as in the drilling and production phases.

Requirements have been proposed in §§ 250.79 and 250.99 for determining the adequacy of well-completion or well-workover equipment and for determining the structural capacity of fixed platforms before moving well-completion or well-workover equipment onto them. The MMS is concerned with the hazard that may be involved in using inadequately designed well-completion and well-workover equipment and in placing additional stresses on old platforms. These proposed requirements will not entail a costly analysis but rather an analysis of the well-completion or well-workover equipment and a review of additional stresses which may be added to the platform during the well-completion or well-workover operations and of any changes in the capacity of the platform due to factors such as hurricanes, earthquakes, or workboat collisions.

It is proposed in §§ 250.80 and 250.100 to require an automatic shut-down device on all diesel engines used in well-completion and well-workover operations to prevent engine runaways. This requirement is similar to that proposed in Subpart D, Drilling Operations (§ 250.51), and Subpart H, Production Safety Systems (§ 250.123), and is proposed for the same reasons.

A requirement has been proposed in §§ 250.81 and 250.101 for a safety device to prevent the traveling block from striking the crown block. Accidents have occurred in the past from this event, and we believe precautions are warranted. The specific requirement that is now proposed has been modified to reflect comments received on our 1983 proposal.

Sections 250.82 and 250.102 regarding simultaneous operations provide the linkage in these subparts on well-completion and well-workover operations with the current production operation phase requirements proposed in § 250.123 requiring a plan for simultaneous operations.

The authority is proposed in §§ 250.83 and 250.103 to establish special field rules for well-completion and well-workover operations when field conditions indicate that a departure from the requirements of these subparts is appropriate. We believe such a convention provides operational flexibility to meet real-world conditions, eases administration for the lessee and MMS, and assures safety. A requirement is proposed in § 250.84 that all well-completions must be approved before those operations are commenced. The completion of a well is such a significant step in the lease development in terms of safety and resource management that we believe MMS's review and approval of the proposal is warranted. We propose that the review and approval of the completion can be handled on one of two forms at different times. In those cases when the proposed completion can be foreseen at the time the APD (Form MMS–331C) is submitted, as would be the case with many development wells, the APD can include the completion proposal. When completion is planned some time after the APD is submitted, when the drilling rig is moved off the hole and a well-completion rig is moved on, or when conditions have significantly changed from the completion proposed on the APD, the well-completion proposal and approval shall be handled on a Form MMS–331, Sundry Notices and Reports on Wells. We believe this use of forms will accomplish the desired approval step consistent with the status of knowledge in the field and minimal changes in the use of familiar forms.

It is also proposed that Form MMS–331 shall be submitted within 30 days of a well completion to report the "as built situation," instead of a second submission of Form MMS–330, Well Completion and Recompletion Report and Log. This latter report is frequently submitted at the end of the actual drilling and before completion begins. We believe it is redundant to have Form MMS–330 submitted again following actual completion when the needed information can be submitted on Form MMS–331. The regulations would provide that if Form MMS–330 had not already been submitted, it shall be submitted with the "as built" Form MMS–331 within 30 days of well completion.

A requirement for well-control fluid is proposed to be added to the subparts on well-completion operations (§ 250.85) and well-workover operations with the tree removed (§ 250.105). A good well-control fluid system and its operation are a primary mechanism for maintaining well-control during these activities. This requirement and others proposed for well-workover and well-completion operations are new rules although they reflect current practice in the OCS. We propose that this important phase of well control be addressed by well-completion and well-workover operations requirements and not through piecemeal application of requirements designed specifically for drilling operations. More is known of the expected pressures during the completion and workover operations as distinguished from the drilling operation. Accordingly, we are proposing a performance standard and only a few detailed requirements governing well-control fluids to allow the lessee to design a system to meet the needs of the particular situation.

The proposed requirements for BOP equipment and procedure requirements would be tailored to well-completion operations (§ 250.86), well-workover operations with the tree installed, and well-workover operations with the tree removed (§ 250.106). The number of blowouts which have occurred during well-completion and well-workover operations warrant the proposed inclusion of requirements addressing BOP equipment. As with well-control fluids, we are proposing a performance standard coupled with a few detailed requirements to allow the lessee to tailor a system to the circumstances. We believe this would provide needed safety with the minimum burden on the lessee.

A requirement has been proposed for BOP drills in §§ 250.87 and 250.107. We believe trained personnel are the most important means of preventing injury and loss. The proposed drills would be a key aspect of necessary training and are intended to increase the capability of personnel to deal with potential emergencies.

New requirements have been proposed in §§ 250.88 and 250.108 for wellhead equipment and tubing based on a performance standard approach to regulation. They would substitute for the requirements in current OCS Order No. 6 concerning wellhead-testing procedures. We believe that the testing requirements are unnecessarily prescriptive and are no longer appropriate. Would retention of the more prescriptive requirements be desirable? Does the performance standard approach present a welcome opportunity?

We are proposing a specific requirement for a minimum of one master valve and one SSV in the vertical run of the tree. This equipment would be required on all new wells completed after the effective date of these regulations and would be required on any previously completed wells at the time the existing tree is removed and reinstalled for a well-workover operation.

The current requirement in OCS Order No. 6 for "storm choke" is proposed to be reidentified as a part of subsurface safety equipment, inasmuch as "storm choke" is a proprietary name for a specific piece of equipment. The proposed amendment for subsurface safety equipment would require that the lessee meet the requirements which are in proposed Subpart H, Production Safety Systems.

Specific requirements for tubingless completions contained in current OCS Order No. 6 would be deleted. Tubingless completions have become relatively rare, and the existing requirements are felt to be unnecessarily prescriptive and detailed. Any proposed completion, including a tubingless one, would still have to be proposed and approved through an APD or Sundry Notices and Reports on Wells. We believe that the approval process and proposed general performance requirements would provide adequate precaution to achieve installation reliability, safety, and environmental protection.

It is proposed in § 250.109 to require the lessee to minimize leakage and to test the lubricator each time it is installed during wireline operations. These new requirements have been significantly modified as a result of comments on our 1983 proposal. We believe these proposed requirements address the most critical concerns about wireline operations and, when taken with the performance standard and other requirements of this subpart, will provide safe operations.

Subpart G—Abandonment of Wells

The requirements of current OCS Order No. 3 on plugging and abandonment of wells are proposed to be transferred to new Subpart G, Abandonment of Wells. A number of revisions of an editorial nature are proposed to be made. Under the requirements of current OCS Order No. 3, all casings, wellhead equipment, and pilings must be removed to a depth of 15 feet below the mud line to avoid conflict with other users of the seafloor. Under proposed § 250.112(i), wellhead removal and site clearance might be reduced or eliminated if the remaining material would not result in a hazard for other users of the seafloor. It is intended that this proposal would eliminate significant costs associated with site clearance when no resulting benefit can be identified.

Proposed § 250.114, Site clearance, would require the lessee to verify the clearance of the drill site by one of the prescribed methods and submit a certifying letter that the drill site had been cleared of all obstructions. The current Region-specific requirements would be deleted; the prescribed methods would apply to all Regions. An option would allow for the application of other methods.

Subpart H—Production Safety Systems

The requirements relating to production safety systems that are currently contained in OCS Order No. 5, Production Safety Systems, and 30 CFR 250.41(b) are proposed to be revised to remove unnecessary and redundant provisions and be incorporated into proposed Subpart H, Production Safety Systems.

Section 250.22 of Subpart A, General, is proposed to incorporate the requirements of Paragraph 1, *Use of Best Available and Safest Technologies (BAST)*, of current OCS Order No. 5 where applicable to all appropriate operations. This proposal takes into account the responses to comments on the proposed revision of current OCS Order No. 5 which was published in the **Federal Register** on July 25, 1983 (48 FR 33757). That Notice proposed the following:

(1) To delete the "grandfather provision" in the American National Standards Institute/American Society of Mechanical Engineers (ANSI/ASME) Safety and Pollution Prevention Equipment (SPPE) program.

(2) To delete redundant citations, and

(3) To establish operator field practice controls for equipment used in the ANSI/ASME SPPE program.

Seventeen timely comments were received on the proposal. The **Federal Register** Notice was not clearly worded with respect to the "grandfather provision." It was possible to interpret the definition of "replaced" in two different fashions. One interpretation, the replacement of all non-SPPE valves with SPPE valves, was very costly, and the other interpretation, the replacement of valves being remanufactured, was not. Nine of the commenters understood the proposal to require the immediate replacement of all non-SPPE valves with SPPE valves and felt that the revised definition was too costly. Another five commenters felt that the definition needed to be clarified. As a result of the comments received, the definition of "replaced" is proposed to be revised as indicated in §§ 250.121(b) and 250.122(c). This revision would eliminate an ambiguous statement that could have resulted in significant expense without a corresponding gain in safety and pollution prevention. It should be noted that in the 4 years that the SPPE program has been in effect, approximately one-third of the safety valves in use offshore are now SPPE valves.

Section 250.126 is proposed to incorporate the substance of current Paragraph 2, *Quality Assurance and Performance of Safety and Pollution-Prevention Equipment*, of OCS Order No. 5. The ANSI/ASME Standard, Accreditation of Testing Laboratories for Safety and Pollution Prevention Equipment Used in Offshore Oil and Gas Operations, ANSI/ASME SPPE–2–1982 Edition, is proposed for deletion as a redundant reference. Compliance with ANSI/ASME SPPE–2 is required by ANSI/ASME SPPE–1 which is proposed for incorporation by reference in § 250.126.

Proposed Subpart D, Drilling Operations, would incorporate the requirements of Subparagraphs 5.1.10, *Electrical Equipment*, and 5.4, *Welding and Burning Practices and Procedures*, of current OCS Order No. 5 into §§ 250.53, and 250.52. Language would be incorporated into those sections to make the appropriate parts applicable to platform and production operations. Electrical-system information-submittal requirements are proposed for § 250.122(e)(4) as safety-system design and installation features. Since this is design and installation information, it

VOL 51
ISS 52
MR 18
1986
UMI

would seem appropriate to include it in Subpart H.

The requirements of Paragraph 7, *Crane Operations*, of current OCS Order No. 5 are proposed to be deleted to reflect an agreement between USCG and MMS. In that agreement, the USCG will have responsibility for cranes installed on all OCS platforms.

Sections 250.52 and 250.53 of proposed Subpart D, Drilling Operations, would incorporate the substance of Paragraph 9, *Requirements for Drilling Rigs*, of current OCS Order No. 5 for the Atlantic, Gulf of Mexico, and Pacific OCS Regions.

There are numerous proposed changes in the language contained in current OCS Order No. 5 that are basically editorial in nature. The editorial changes would not result in substantive changes in the requirements. The effective date of current OCS Order No. 5 was January 1, 1980, for the Atlantic, Gulf of Mexico, and Pacific, OCS Regions. This is a pivotal date for many requirements of the current Order. For example, surface-controlled subsurface safety valves (SSSV) are currently required in all tubing installations after the effective date of the Order. On the other hand, if installation of the tubing had occurred prior to January 1, 1980, subsurface-controlled SSSV's, currently "grandfathered," would not require replacement until the tubing is first removed and reinstalled. In most instances, however, we have eliminated the "before" and "after" requirements based on the effective date of the current Order in this proposal.

Substantive changes in the regulation are addressed below:

Proposed §§ 250.120 through 250.127 would incorporate the requirements of the current paragraph (b) of § 250.41, Control of wells.

All references made to the NEC and IEEE RP for Electric Installations on Shipboard, IEEE Std 45–1977, are proposed to be eliminated. These references are not appropriate for fixed offshore facilities. In place of these references, we are proposing that industry standards such as API RP for Design and Installation of Electrical Systems for Offshore Production Platforms, API RP 14F, and API RP for Classification of Areas for Electrical Installations at Drilling Rigs and Production Facilities on Land and on Marine Fixed and Mobile Platforms, API RP 500B, be incorporated by reference into the regulations. These changes would not have an effect on current industry practices.

Proposed § 250.123(b) would incorporate the requirements of subparagraph 5.1.1(d) of current OCS Order No. 5. The last three sentences of the current subparagraph contain a provision to permit the use of uncoded vessels if they have successfully passed a hydrostatic test. This provision would be eliminated in the proposed regulation. We believe the use of uncoded vessels should not be approved. However, proposed § 250.123(b)(1) would allow continued use of any uncoded vessels that have received approval under the current Order.

Statistics from Gulf of Mexico OCS operations indicate that about one-third of all fires have been caused by engines. Nearly half of these engine-caused fires have resulted from diesel engine "runaway" when hydrocarbons enter the air intake of the engine. To eliminate this problem, we are proposing in § 250.123(b)(5) that all diesel-engine air intakes be equipped with an automatic-shutdown device that would prevent engine "runaway." The same requirement is proposed in the subpart on drilling as discussed above.

Subparagraph 5.1.9(e) of current OCS Order No. 5 requires fire-detection systems to be designed and installed in accordance with the NFPA Standard on Automatic Fire Detectors, ANSI/NFPA 72E. Gas-detection systems are currently required to be designed and installed in accordance with sections 9.1 and 9.2 of API RP 14F. The proposed § 250.123(b)(9) would retain API RP 14F but would eliminate the NFPA Standard and replace it with API RP for Fire Prevention and Control on Open Type Offshore Production Platforms, API RP 14G. We believe that the API documents are more appropriate for offshore petroleum industry operations.

Subparagraph 5.1.11 of current OCS Order No. 5 requires an annual report on the erosion-control programs in effect and the results of those programs. Proposed § 250.123(b)(10) would retain the requirement for the erosion-control program but would not require an annual report to be submitted. It would require the lessee to maintain the records of results obtained from the programs. We believe that this change would provide for adequate monitoring of the programs while reducing the reporting burden for the lessee.

Proposed § 250.125 would retain the requirements of Paragraph 5.7, *Safety Device Training*, of current OCS Order No. 5. However, the requirement for the lessee to apply for and obtain MMS approval of the proposed training would be eliminated. Comments on the method of improving the Safety Device Training Program are requested. The substance of Paragraph 8, *Employee Orientation and Motivation Programs for Personnel Working Offshore*, of current OCS Order No. 5 is proposed to be deleted. While we agree that motivation of personnel is a desirable management tool, we believe that industry management can best implement such a program without the need for Federal regulatory involvement. The deletion of this program would have no effect on the Fisheries Training Program which is required by a stipulation.

Proposed § 250.126, Quality assurance and performance of safety and pollution prevention equipment, would repeat the requirement of OCS Order No. 5 that SPPE shall conform to ANSI/ASME SPPE–1–1982, Quality Assurance and Certification of Safety and Pollution Prevention Equipment used in Offshore Oil and Gas Operations, and related requirements.

The MMS believes the SPPE program contributes significantly to the safety of offshore oil and gas operations. Nevertheless, MMS invites comment as to whether alternatives to the SPPE program exist which could accomplish purposes of the SPPE program while reducing the paperwork burden on lessees and operators.

Current OCS Order No. 5 does not address the subject of H_2S. However, proposed § 250.127 would make the appropriate parts of proposed Subpart D, Drilling Operations, § 250.67 relating to H_2S applicable to production operations.

Subpart I—Platforms and Structures

The requirements pertaining to platforms and structures contained in current OCS Order No. 8, Platforms and Structures, are proposed to be revised to remove redundant provisions, update the requirements as appropriate, eliminate two referenced documents concerning the Platform Verification Program, consolidate and clarify the submittal of required technical data and verification plans, and add provisions for periodic inspection and platform removal.

Proposed Subpart I, Platforms and Structures, would merge the provisions of the four regional OCS Orders No. 8 into a single set of regulations which would apply generally to platforms and structures on the OCS. However, different geological and environmental conditions in the Regions continue to make it necessary to propose to retain certain specialized requirements, e.g., icing effects.

Proposed §§ 250.130, 250.131, 250.132, 250.143, and 250.144 would incorporate the requirements of current OCS Order No. 8. These proposed sections would specify the requirements for application,

documentation, structure removal, record retention, and the criteria for third-party verification. Proposed §§ 250.134 through 250.141 would specify the technical requirements, concepts, and performance standards for the design, fabrication, and installation of platforms on the OCS. These requirements would be transferred from the current MMS publication, Requirements for Verifying the Structural Integrity of OCS Platforms. There is no change intended. This document was issued in November 1979 and has been a part of current OCS Order No. 8 since January 1, 1980. It is a comprehensive tabulation of specific technical requirements, concepts, and considerations to be utilized in the design, fabrication, and installation of offshore platforms. Other standards, codes, or sets of rules exist pertaining to the full scope of activities involving offshore platforms. Two examples are the API RP for Planning, Designing, and Constructing Fixed Offshore Platforms, API RP 2A, and Part 1, Structures, of the American Bureau of Shipping Rules for Building and Classing Offshore Installations. Similar sets of rules have been issued by other Nations involved with offshore oil and gas operations, i.e., Norway, Great Britain, Canada, and France. Considering the total offshore industry experience with OCS Order No. 8 as well as these other standards and/or rules affecting platform activities, we are requesting comments as to the effective use and application of each and/or all of these existing documents. We invite your recommendations as to whether the requirements of the proposed Subpart I or the requirements of API RP 2A or those of the American Bureau of Shipping mentioned above would best accomplish the desired structural integrity of offshore platforms.

In proposed § 250.130(c), the criteria that currently determine the applicability of the Platform Verification Program for platforms in the Gulf of Mexico OCS Region would be revised and applied to all OCS Regions. We are proposing to replace current Criterion (d), Installed in Frontier Areas, and to revise Criterion (e) to read as follows: ". . . having configurations and designs which have not been used previously or proven for use in the area, . . ." We are also proposing a requirement whereby platforms to be installed in seismically active areas would also need third-party verification. The proposed revisions are intended to make the criteria more descriptive of the conditions encountered in frontier areas. The same criteria would apply, providing for similar exemptions in the Alaska, Atlantic, and Pacific OCS Regions when sufficient experience is obtained and designs are proven.

The MMS believes that the third-party verification program has contributed significantly to the safety and success of the offshore oil and gas program. Through the third-party verification program, a number of serious defects in design, fabrication, and installation of offshore platforms have been detected and corrected, thereby eliminating high potential for significant damage or loss. Nevertheless, we invite comment as to whether alternatives to the third-party verification program are available which would better and more economically accomplish the purposes of that program.

Proposed § 250.131(d) would revise the requirements of Paragraph 2.2, *Certification*, of current OCS Order No. 8. We do not propose to require the submittal of lessee certification but rather to require that the detailed structural plans and specifications for all platforms be certified by a registered professional or structural engineer. These drawings and specifications are routinely submitted and normally contain the professional engineer's stamp.

The requirements of item (c) of paragraph 3.2.1.1 of current OCS Order No. 8 would be deleted because the intended use of the platform would be provided in the Development and Production Plan or Exploration Plan. Item (d) of the same paragraph would be deleted since the submittal of information on personnel facilities, boat landings, cranes, and evacuation routes is covered by USCG requirements.

Proposed § 250.133 would contain the revised text of the current MMS publication, Operating Procedures for the OCS Platform Verification Program. This document covers the review process for a certified verification agent (CVA), qualification criteria for certification as a CVA, instructions and guidance to the CVA, and procedures for handling disputes between the CVA and the lessee. The proposed text at § 250.133 would describe only the CVA-review process and the criteria for nomination as a CVA. Parts of the current document that are proposed to be deleted concern the responsibility of parties and the dispute procedures which are inherent to the lessee/lessor relationship that are otherwise covered in the lease contract or the law.

A new § 250.142, Periodic inspections and maintenance, is proposed to require periodic inspections of the entire platform and the submittal of a brief annual report describing inspection techniques and the results of the inspections. This proposed requirement is intended to ensure that the integrity of the platform would be maintained throughout its useful life. On October 10, 1980, a Notice of Intent to develop these requirements was published in the Federal Register. After an analysis of the public comments and reconsideration of the objectives of the Platform Verification Program, we are proposing periodic inspection and maintenance requirements as logical methods to assure the continual structural integrity of these platforms.

A new § 250.143 is proposed to address removal of platforms and site clearance. Paragraph 2.9 of current OCS Order No. 3 (proposed Subpart G, Abandonment of Wells) addresses the removal of well equipment and site clearance but does not address platform removal. To cover this issue in a manner consistent with Subpart G, it is proposed to require the removal of all platforms to a depth of at least 15 feet below the ocean floor. Currently, under OCS Order No. 3 and Gulf of Mexico NTL 81–5, a letter is required concerning the location clearance for wellhead and equipment removal after the plugging and abandonment of wells. A similar provision is proposed for the clearance of a platform location. If final well abandonment is also involved, one letter concerning overall location clearance would suffice.

Concerning the removal of platforms and site clearance, we have considered the possibility of providing for the allowance of the entire platform to remain in place or to be partially removed. This may be considered if it could be shown that there was a beneficial use for the platform and that it would not unreasonably interfere with the other legitimate uses of the area. The MMS has recently funded a study to be conducted by the Marine Board of the National Research Council to analyze and advise on the national and international ramifications of platform removal and disposition. The MMS has considered this option in light of the objectives of the Recreational and Environmental Enhancement for Fishing in the Seas (REEFS) Task Force cochaired by the Secretary of the Interior, the proposed legislation (H.R. 5447), the possible economic savings to be derived, studies demonstrating considerable incidental biological, social, and economic values associated with offshore structures, and the absence of objection from State or Federal Agencies having jurisdiction. Therefore, we request comments as to the need for a provision relating to

VOL 51
ISS 52
MR 18
1986
UMI

platform partial removal or nonremoval, the limitations or conditions that should be included, and a general expression of the pros and cons. If there are benefits to be obtained and the multiple-use concept of the OCS will not be violated, we would appreciate the benefit of your thoughts as to the need for such a provision.

Concerning the above consideration and the study to be made on platform removal and disposition by the Marine Board, we request your responses to the following:

Alternative Dispositions

1. What are the alternatives for the disposition of offshore platforms after they have reached the end of their useful life as oil and gas facilities? What are the opportunities for reusing platforms or sections of platforms as oil and gas facilities or for other industrial purposes? What are the costs of the alternatives?

Status of Technology

2. What are the technical problems in dismantling, transporting, relocating, and reusing platforms? What are the technological capabilities?

Environmental Protection

3. What disruption of fisheries habitats is likely to result from the removal of platforms?

4. The question of the reuse of offshore platforms for fisheries-habitat enhancement is of widespread interest. To this end, the structures can be left in place, toppled in place or removed, or transported and relocated as an artificial reef. What are the potential benefits of this alternative? What criteria could be used to identify platforms that have potential for fisheries-habitat enhancement?

Economic

5. What percentage of the cost of offshore resource development can be attributed to platform removal? How might this vary in the different Regions?

Legal

6. How is liability for safety, maintenance, marking, and third-party damage affected by the alternative strategies for the disposition of offshore platforms?

The existing MMS documents, Appendices to Requirements for Verifying the Structural Integrity of OCS Platforms, and Commentary on the Requirements for Verifying the Structural Integrity of OCS Platforms, are proposed to be deleted. These documents contain guidelines and numerous technical references concerning how to design, fabricate, and install offshore platforms. As research efforts and experience have moved technology ahead, these guidelines and references have become outdated. Therefore, it is proposed to no longer reference these documents.

The substance of paragraph 5 of current OCS Order No. 8 would be deleted because departures from the regulations may be granted by the Regional Supervisor in accordance with proposed § 250.3(b) of Subpart A, General.

Subpart J—Pipelines and Pipeline Rights-of-Way

The DOI and the Department of Transportation (DOT) share responsibility for safety and prevention of pollution associated with offshore pipelines. In addition, DOI has the responsibility for the approval of the installation, modification, change of service, or abandonment of oil and gas pipelines under the jurisdiction of DOI on the OCS.

At present, there are three classifications of oil and gas pipelines approved by DOI on the OCS. They are as follows:

1. Lease—These pipelines are owned and operated by a lessee or operator and are wholly contained within a single lease, unitized leases, or contiguous (not cornering) leases.

2. Permit—These pipelines meet the same boundary limits as in 1. above; however, the pipelines are owned and operated by a nonlessee of the lease(s) involved.

3. Right-of-way—These pipelines are those which are not wholly contained within a single lease, unitized leases, or contiguous (not cornering) leases.

The proposed regulations would apply to the approval of all oil and gas pipelines on the OCS. No substantive change is intended in this regard.
